WE DO NOT PREPAY CHARGES

5

Every price quoted in the pages of this big catalog is for the article quoted, delivered free on board the cars in New York City or at our factories or warehouses where the goods are manufactured. Practically all of the merchandise shown in the pages of this book is shipped from New York City. When shipped from factory or warehouse, that fact is so stated in the description of the merchandise offered. The customer pays the transportation charges from New York City or from factory or warehouse in every case

WHY WE DO NOT PAY THE TRANSPORTATION CHARGES

For a number of years, in fact ever since the creation of the Mail Order Department of R. H. MACY & COMPANY, we have been advertising the prepayment of transportation charges on certain classes of merchandise when purchased in certain quantities. The merchandise on which we prepaid the charges was always light-weight merchandise such as wearing apparel, jewelry, etc., etc., while bulky merchandise, such as groceries, furniture, rugs, sewing machines, etc. were sent with the charges to be paid by the customer. For eight years we have been endeavoring to work out a Freight Prepaid plan which would work to the advantage of the customer and ourselves, but in spite of our desire to perfect a plan advantageous to the customer and to ourselves, so many complications are constantly arising that we have decided that from this time we will no longer prepay charges on anything shown in our catalog.

Contradictions in Classifications

Some of the reasons for this decision will surely be interesting to you. In the first place, the transportation companies charge for freight or express according to the class of merchandise shipped. On certain classifications they ask for one rate, on another classification they ask for a second rate, on a third classification they ask still a different rate, so that if a customer were to order a considerable bill of merchandise from us, made up of several classes, there would be several different rates applied as a charge for carrying this merchandise to the home of the customer. This involves considerable clerical labor which must be taken care of by us before the shipment is delivered to the transportation company. This, in itself, would not be a serious matter, however, were it not for the fact that the railroad companies operate under several different association agreements and under these agreements there is what is called "Eastern Classification," "Western Classification" and "Southern Classification." In many cases the same merchandise carries a different rate in the territory of these different associations; for instance, freight which would carry second class freight rate in one classification would carry a third class rate in another classification or a first class rate in a third classification. Therefore a shipment of merchandise to a point in the South would carry a different rate from that charged by the transportation company to deliver the same shipment to a western point. This brings about a great many complications on the same classes of merchandise so that it is practically impossible for us to arrive at a fair transportation charge which, of course, is a part of the cost of our merchandise.

Who Pays the Freight

You are too intelligent to be misled by any specious argument as to who pays the transportation charges. The customer always pays the transportation charges either in the first price he pays for the merchandise, if the goods are shipped by a firm which prepays the charges, or when he pays the Local Freight or Express Agent at his railway station when the goods arrive at destination. You understand that every firm selling merchandise is engaged in business for the sake of profit. If the firm prepays the transportation charges, it must figure the charges as a part of the cost of doing business and it is added to the price of the merchandise in some form. When you buy goods in your home town, the freight charges are included in the price your merchant asks for the goods he sells you. When you purchase merchandise from a firm which prepays the charges, you know and we know, that the transportation charges are included in the price you pay. When you purchase goods from us at the prices quoted in this catalog you pay the transportation charges to your Railway or Express Agent when the goods reach your station.

In view of the very complicated methods at present employed by the railroads, we have found it impractical to arrive at a uniform freight rate so that we could determine what the carrying charge would be on merchandise to every section of the country, and no other firm can arrive at a fair rate any easier than we can. The result is that any firm which quotes "Freight Prepaid" prices to its customers must put in its selling price a sum large enough to cover the cost of the transportation to the most distant point likely to be reached in its delivery of merchandise to its customers. It is not fair to the customer in New York State to add to the cost of a suit of clothes, for instance, a sum sufficient to protect the firm selling this clothing, if the order were to come from a customer living in California, yet that is exactly what prepayment of charges requires the firm to do to protect itself from possible loss.

We believe the time is coming when the Interstate Commerce Commission will be able to bring about uniform classification which will mean uniform freight rates, so that a prepaid plan can be worked out according to distance, which will enable firms and individuals to quote a delivered price which will be fair to the customer and to the house, but until that time comes, it is practically impossible for any firm engaged in the sale of general merchandise to quote prepaid prices which are fair to all parties concerned.

What Price Comparison Proves

We know that many specialty houses selling goods by mail quote prepaid prices. These firms, however, are engaged in the sale of a certain line of merchandise on which it is very easy to quote a prepaid price by adding a sufficient sum to the cost of the goods to protect the firm in the event of a long haul to a customer at a distant point. This is particularly true of wearing apparel. These specialty houses do not sell miscellaneous merchandise and therefore do not receive orders for various classes of goods ranging from groceries to drugs. They have but the one commodity shipped under only one classification to figure freight transportation charges on, and a "Freight Prepaid" offer looks attractive. However, if you will analyze the prices they quote on the goods they offer to ship prepaid, and you will make comparison of their qualities with similar goods offered by us in this catalog, you will find in every case that our price is much lower and that you will save money by ordering from us and paying the transportation charges yourself upon arrival of the goods. As merchants, we make it our business to know what all other firms in competition with us are offering their customers. We buy their merchandise just as they buy ours, for the purpose of comparison, and we have made some interesting discoveries from time to time. For instance, last year one of the largest specialty houses was offering in the pages of its catalog the same dress skirt shown in our catalog, but at a price one dollar higher than the price quoted by us. They also offered a dress at a price about $4.00 higher than the price quoted by us on the same thing. Inasmuch as 25 to 50 cents would carry either of these articles to customers located almost anywhere east of the Rocky Mountains, you will see what the effect of the prepayment of charges is on the prices quoted by them. These two examples are but representative of what you will find to be true generally and we invite you to make comparisons yourself and if you will do that, you will quickly discover that our prices are so very low when compared with the prices quoted by others on goods of equal quality, that you can't afford to purchase needed goods from any other firm or individual anywhere. For 53 years we have been underselling all other merchants in the City of New York and New York is the home of low prices because it is the primary market in America. Your own home merchants come to New York to buy the goods they sell. They buy in small quantities and add the transportation charges to the cost of the goods so that you pay the freight or express when you buy from them. Being on the ground in New York ourselves, purchasing in enormous quantities, or manufacturing ourselves, you get the goods you buy from us from practically first hands. Comparison of our merchandise and prices with the merchandise and prices offered by any other firm or individual at home or elsewhere, will convince you that Macy's is the most economical place for you to supply all your needs.

THE TRANSPORTATION CHARGES ARE VERY SMALL COMPARED WITH THE AMOUNT OF MONEY WE SAVE YOU

One of the favorite arguments of retail dealers everywhere, when they are disputing the economy of ordering goods from us by mail, is that while our prices are lower, the cost of transportation charges will be much more than the saving you make when you order from us. This is untrue and it is only necessary for you to send us a single order to discover the falsity of this claim: For instance, we sell you a Sewing Machine at from $12.00 to $21.00 which you could not buy from a sewing machine agent at anywhere near our price. In fact, the sewing machines we sell are sold under another name at prices ranging up to double those asked by us. We ship Sewing Machines from the factory in Northern Illinois, a most central location, and the transportation charges on a Sewing Machine will range from 35c to $1.50. The cheapest machine we offer is sold by retail dealers and sewing machine agents generally for about $10.00 to $13.00 more than we ask for it, so you will see that you can save at least $10.00 when you buy from us. Hundreds of other articles might be mentioned, illustrating the great saving we make for you when you buy from us. As a matter of fact, the transportation charges amount to practically nothing at all when compared with the saving we make you. If you send us an order for a miscellaneous lot of merchandise, wearing apparel, household supplies, groceries, etc., we guarantee that the saving will be enough to pay the transportation charges and leave you a substantial saving. We guarantee that we will send you satisfactory merchandise at a saving or you may return the goods to us at our expense of transportation charges both ways and we will refund the purchase price in full. You take absolutely no chance whatever when you order from us, and we solicit your patronage under these conditions.

R. H. MACY & CO.

SPRING 1911 SUMMER

ONE HUNDRED STORES IN ONE

IN HANDING you herewith our catalog for the Spring and Summer of 1911, we are presenting you with the most complete catalog ever issued by R. H. MACY & COMPANY, and the most complete general merchandise catalog issued by any firm in the city of New York. We call your particular attention to the fact that this catalog is not a mere fashion plate,— a booklet devoted only to the description of wearing apparel for men, women, and children,— but instead is a book representative of almost every line of merchandise sold in a department store. This is the 16th issue of our catalog and it marks an epoch in the history of our mail order department in that this book is the largest, the most comprehensive merchandise catalog which we have ever issued. We are not only offering you the most dependable wearing apparel for every member of the family, but we are also bringing to your home a five million dollar stock of merchandise from which you can make selection to supply almost your every want. From the great Macy grocery store you will be able to buy the finest food products at a material saving. You will find furniture, carpets and rugs, curtains, and other house furnishing goods for the home and the office. You will find footwear, sporting goods, drugs and toilet articles in great variety in the pages of this book. You will find wash goods and dress goods, the finest silks and satins, laces, embroideries, insertions, all in wonderful variety, at prices so inviting that you can well afford to buy from us all the materials necessary if you prefer to make your own wearing apparel. You will find toys and games, silverware, jewelry, sewing machines, bicycles, stoves and ranges, all completely illustrated and described in the pages of this book. Dinnerware made in our own potteries, the famous Straus cut glassware,— in short, there is hardly an article that you need from day to day, which you will fail to find catalogued in the pages of this book. If not illustrated and described herein it is surely carried in our great store at 34th Street and Broadway, and a letter of inquiry to us will bring the fullest information by return mail.

MACY'S ATTRACTIONS ARE THEIR LOW PRICES

EVEN more important than the splendid variety of merchandise shown in the pages of this big catalog is the price-saving which purchasing from us means to every customer. We have enjoyed undisputed underselling supremacy in New York City for many years and any comparison you make of the prices quoted in this catalog with the prices quoted on similar qualities by any other firm or individual, at home or elsewhere, cannot help but prove to you the great advantage you enjoy when you patronize us. We have saved millions of dollars to customers who visit our great store in New York City and in enlarging this catalog, adding other lines from time to time, we are offering to customers hundreds and thousands of miles away, the same splendid advantages they would enjoy were they to visit New York City in person and make selection of the goods they require. You can buy from us by mail just as satisfactorily, and in many respects more satisfactorily, than if you were to join the crowds surging through our aisles every day. We give personal service in the handling of customers' orders, unlike that given by any exclusive mail order catalog house. We have enormous stocks of merchandise ready to fill your orders promptly and from the standpoint of quality, from the standpoint of economy, from the standpoint of service, there is every advantage to you in making liberal use of this splendid catalog. We invite your support and we will endeavor to so handle any orders you may send us as to win your confidence and increasing patronage.

OUR RELIABILITY

You Do not Take the Slightest Risk in Sending Us Your Money and Your Orders. Read What these Three Great Banks Say About Us. We realize

that this Catalogue may fall into the hands of those who have never had any business relations with us, and we would not be surprised if it fell into the hands of those who have never heard of R. H. Macy & Co., and therefore that you may know something of our financial responsibility we print below three letters from three of the largest banks in America which bear witness to our financial responsibility. We have been in business in New York City for more than 53 years, and have grown from almost nothing to be the largest department store in the world, under one roof. We are the original department store and our original methods of merchandising, our uniformly considerate treatment of our customers, the great values we give and the splendid service we render have won for us a steadily increasing volume of business until to-day we rank with the largest merchandising establishments in the world. You therefore take no risk when you send us your orders and your money.

To Whom It May Concern:
The firm of R. H. Macy & Co. is not only one of the most prominent mercantile houses of New York City, but of the entire country as well, and richly deserves the high reputation it has borne for integrity and honorable dealing with its customers throughout its long and successful career. Its representations may safely be relied upon.
Respectfully,

Chairman of the Board.

WE TAKE ALL THE RISK

When we receive your money and an order for merchandise we fill your order with the distinct understanding and agreement that the goods we send you must be exactly as we represent them to be; that they must represent a substantial saving to you, and be entirely satisfactory or you are at liberty to return them to us at our expense of transportation charges both ways, and we will refund your money in full. We do not regard any single transaction as closed until the customer is fully satisfied. We render the best possible service, we give the greatest values we know how to give, we endeavor to so please our customers that they will return to us again and again and again, and we endeavor to so conduct our business on such a broad gauge plan that customers will find it both pleasant and profitable to deal with us. So we say to you again, you take no risk when you send your orders to us because if for any reason whatever you should be dissatisfied with any part or all of the merchandise received, return the unsatisfactory goods to us at our expense, and we will refund your money or exchange for other goods.

OUR GUARANTEE

WE GUARANTEE That goods ordered from us must prove entirely satisfactory or you need not keep them. That if any article ordered from us proves unsatisfactory and you return the unsatisfactory article together with our bill within 30 days, we will return the purchase price together with the transportation charges.

PROVIDED, HOWEVER, that the goods are returned to us in the same condition as when received. This guarantee gives you the privilege of examination and acceptance just as if you were to select them in person. If you are dissatisfied with anything received from us, write us an explanation of your difficulty so that we may have an opportunity to go into the matter with a view to adjusting it satisfactorily.

(NOTE)—Before returning goods to us please read Page 9, which tells you how to do it.

WE GUARANTEE That any goods ordered from us and sent by freight or express to any railway station in the United States where there is an agent will arrive at destination in good condition. Any article so shipped, which becomes lost or damaged in transit will be duplicated by us without charge to the customer or the purchase price refunded. PROVIDED, HOWEVER, you send us the receipt for the freight or express charges paid by you with a statement written thereon by the agent, showing such loss or damage to shipment.

(NOTE)—See Page 10 for additional information about lost or damaged shipments.

MERCHANDISE ORDERED FROM US Must be reported by the purchaser, if unsatisfactory, within 30 days after its arrival, to come within the scope of our guarantee of satisfaction or your money back, unless the reason for the goods proving unsatisfactory is of such a nature that the defect, if any, cannot be ascertained within that time, in which case we shall be glad to take it up with you with a view to giving you a satisfactory adjustment.

WE WILL NOT TAKE BACK

FIRST—Goods bought or made on special order if sent as ordered.
SECOND—Goods that have been used by customers or that have been damaged by misuse, neglect or unnecessary handling.
THIRD—Articles of personal use, such as toilet and tooth brushes, rubber goods, fever thermometers, dental and surgical instruments, etc.
FOURTH—Engraved goods, if sent according to specifications, etc.
FIFTH—Books, music and printed matter cannot be returned if sent as ordered.

BUYING BY MAIL MADE EASY

If you have never ordered goods by mail, do not think that it is a difficult thing to do, or that we will have any difficulty in understanding what you want. Remember that we are receiving every day thousands of pieces of mail from customers all over the country and from abroad and we are therefore experts in handling letters. We read all languages and if it is more convenient for you to write in Spanish, German, Italian, Polish, or any other language than English, we want you to do so. We have translators who will read your letters and enter your orders according to your wishes. There is no "red tape" to observe in sending us an order for our goods. Write us in your own way and tell us just what you want, and we will be sure to fill your order exactly as you want it; but it will help us materially if you will observe the following points, as they will give us all the information necessary to correctly fill your order:

FIRST. Select the goods you want and write down the name of the article, giving the catalogue number just as it appears in our catalogue. Use one of our order-blanks, if you have one. If you have no order-blank, use any plain piece of paper.

SECOND. In addition to giving us the catalogue number, do not fail to give us the size or color of the article wanted, where it is necessary for us to know these things in order to send you just what you want.

THIRD. Write your full name and address and write as plainly as possible. This is more important than anything else.

FOURTH. If the goods you want are light in weight, so we can send them by mail, be sure to allow the extra amount required to pay the postage. You will find the postage given in connection with the description of any article in this book which may be sent by mail. If the goods are to be sent by freight or express, and there is no Freight Agent at your station, it will be necessary for you to send us enough money so we can pay the charges at this end, because the transportation company will not accept the shipment until charges are paid. If goods are to be sent by express or by freight to a railway station where there is an Agent, it is not necessary to prepay the transportation charges and it will be better for you to pay these charges when the goods arrive. On pages 11 and 12 we give you a classified freight table so you can tell what any given article will cost you by freight or express, and from this table you can determine how much to send us to prepay charges on any shipment which must be delivered to a station where there is no Agent. Remember that under our present laws, every shipper is on the same basis, and it would be no advantage for us to prepay a shipment to any point where there is an Agent, as we could get no better freight rates than you can get. We therefore advise you to have all shipments made, charges "collect," where there is a station Agent to receive them, but in case you think there has been an excessive charge on your shipment, send us your freight bill and we will have our Traffic Department check the rate and if there has been an over-charge, we will refund the over-charge to you and look to the transportation company to repay us.

FIFTH. When your order is completed, enclose with it a bank draft, bank money order, express money order, or a post-office money order for the amount of the bill, and mail it to us. For further particulars as to how to send money, see page 5.

SIXTH. Do not write us and ask if we have certain articles in stock ready to ship you, for the reason that every article in this big catalogue is on our shelves and we are prepared to promptly ship anything you may order from this book, therefore, when you are in a hurry for your goods, send your order right along and in nearly every instance the goods will be forwarded to you by the first mail, freight or express, leaving New York City after your order has been received and entered.

SEVENTH. If you want us to send your order C. O. D., read page — before writing out your order. We strongly urge our customers to send us the full purchase price with their order as it makes it more expensive to the customer where we send the goods C. O. D. There are many people, however, who feel better satisfied to order goods in this way and are willing to pay the extra C. O. D. cost in order to have the privilege of examining the goods before acceptance and for such we will ship C. O. D. in accordance with our terms as explained on page 5.

These general instructions, if carefully observed, will aid us materially in sending you exactly what you want. If you are not accustomed to ordering goods by mail, we suggest that you read the following pages which will give you a lot of valuable information as to "How to Order" and "How to Send Money," "C. O. D. Shipments," "Mail Shipments," "Express Shipments," "Freight Shipments," "Omissions and Substitutions," "Correspondence," "Samples," "Returning Goods," "Shipments from Factory," "Freight & Express Rates," etc. Remember that we make every effort to fill your order as soon as it is received, therefore, after you have sent us an order for goods, allow sufficient time for the transportation company to make delivery to you before writing us about it. If there is any unusual delay, and you will let us know, we will be glad to trace the shipment and if this does not effect immediate delivery, we will be glad to refund your money or duplicate the shipment.

This Catalogue Is Filled With The World's Choicest Merchandise

This catalogue offers you an opportunity to select from enormous stocks of the choicest merchandise to be procured in the markets of the World. As you look through its pages, we call your attention to the fact that our stocks are not only complete and of the very best qualities, but that we give you a wide range in quality and price, which enables you to supply almost every need of the home and work-shop, at a very great saving to yourself. If you will look through the pages of this catalogue, you will find almost every article for which you might have need and if you compare this catalogue with those of other houses selling merchandise by mail, you will find we give you a wider range of selection and price, and offer you much greater opportunities for money-saving purchases, than you can get elsewhere. We invite you to send us a trial order for anything you may need, selecting the goods from the pages of this big catalogue, and if we do not entirely please you with the merchandise we send, and make you a very great saving in cost, you may return the goods to us, we will refund the purchase price and pay the transportation charges both ways.

THE MACY POLICY FOR 53 YEARS

It has been the policy of R. H. Macy & Co. to offer our customers all of the necessities, comforts and luxuries they may require, and in carrying out this policy, we have built up the largest department store under one roof in New York City and America. We do not stop to consider whether or not every transaction is likely to yield us a profit—the interests of our customers are our first consideration and even though we would like to make a profit on every article, still we have found after 53 years of business experience that this is impossible. No merchant who serves his customers satisfactorily and well can confine his stocks exclusively to the profitable lines—he must carry some lines such as sugar, nails, flour, etc., which do not add to his profits, and which frequently must be carried at a loss. For this reason we have made our stocks complete in every particular to supply the needs of the largest number of customers at the greatest saving possible, being satisfied to accept the unpleasant along with the pleasant things, which come into every merchant's experience, and so we take the lean along with the fat and look to the general average to bring us satisfactory returns.

WHY PEOPLE RELY ON US

Many of our customers have come to rely absolutely on this store to supply their every need, to keep them abreast of the changing styles, and we feel that we owe them every attention, every service and every facility within our power to add to their comfort and happiness. There are many merchants, however, who carry only those items which give them a large profit. They believe they should confine their business strictly to such lines as yield handsome returns and to keep profits as large as possible, they omit those lines which carry small profits and those which sell only in certain months of the year. In contrast to this policy of large profit and restricted lines, we carry everything—the low profit, slow selling lines as well as those which carry a satisfactory margin and whether your order calls for the one or the other it will have the same careful attention and the same good service which we give to every purchase made in our store, irrespective of its nature.

ABOUT SMALL ORDERS

We might accept any order you would send us, no matter how small it would be, but small shipments, especially those valued at less than 50c, are not profitable ones to make, for the reason that the transportation charges which you must pay, are out of all proportion to the value of the goods shipped. For that reason we ask you not to send us orders, for less than 50c for merchandise in this catalogue. Where possible, your order should be so made up that the charges will not be excessive.

THIS CATALOGUE

has been carefully prepared for the convenience of those of our customers who cannot visit our mammoth store in New York City and contains the cream of merchandise offered us by thousands of factories and producers abroad and at home. The descriptions are so carefully worded and the illustrations so accurately drawn that you can get as perfect an idea of the goods we have for sale as though you saw the actual goods on our counters and they were described to you by our salespeople. Every page is filled with descriptions and quotations on merchandise of a high standard of quality sold at a lower price than you can obtain anywhere else. We have tried to make every page carry a message of economy and service unequalled in the history of merchandising, and we believe that a trial order will be sufficient to prove to you that Macy's is a most satisfactory place to send your orders.

PRICES SUBJECT TO CHANGE

All prices quoted by us in this catalogue are subject to market change without notice. Prices we quote are correct as based on conditions at the time this book is printed and we have every reason to believe we have protected our requirements by contracts for goods sufficient to supply our needs during the life of this catalogue, but should our stocks become exhausted, our contracts expire or our factories be unable, because of strikes, fires or other causes, to supply our needs, we reserve the right if market conditions at that time are such that we must pay more money for these goods to advance prices without notice, charging you the advance in cost to us. It is very seldom that such an advance must be made but since our prices are so very low and our margin of profit so very small, we must have some protection and therefore our right to advance prices under certain conditions, must be and is reserved. While we reserve this right we want you to understand that if prices should decline instead of advancing, you will be given the advantage in the form of a reduced price and the difference returned to you in cash. As our business expands, our purchases grow larger and our contracts are more advantageous so that the tendency of prices is downward and we reduce them oftener than we find it necessary to raise them. In fact, Macy's have undersold all other New York stores for more than 53 years.

GENERAL INFORMATION

IF YOU have never before bought goods by mail it will be of advantage to you to read this and the following pages which contain much general information concerning how to order, how to send money, C. O. D. shipments, mail, express and freight shipments, lost and damaged shipments, freight and express rates, etc., which will be of interest to you. We give our patrons the very best service it is possible for us to render, but things sometimes will go wrong, and when they do we need your help and co-operation so the difficulties may be corrected in the least possible time to save you from possible annoyance and disappointment. This page, and those following, are prepared for your convenience and for your information, and it will pay you well to read them carefully.

HOW TO ORDER

We send with our catalogue one of our order blanks which we desire you to use in making out your order. We will send you additional order blanks if you will ask for them. If you do not have one of these order blanks your order may be written out on plain paper. Be sure to give us your full name and address, carefully and plainly written, so we will not make any mistake in shipping the good to the correct address.

If your postoffice is different from your railway station, be sure to give us the names of both.

Tell us exactly how much money you are sending us with your order.

Always give us the catalogue number exactly as it is shown in our catalogue in addition to giving us the names of the articles ordered and the size and color, if such are given. Should you order shoes, it would be necessary for us to know your size; if you wanted dress goods it would be necessary to know the color, if more than one color is given.

If there is no freight agent at your railway station, it will be necessary for us to prepay the freight charges, otherwise the transportation company will not accept the shipment. Always send enough money with your order for goods to be shipped to a no-agent station so we can prepay the charges and any money which may be left over after this has been done will be refunded to you. For full information concerning freight rates and freight classification, see page 11.

After you have completed your order, look it over carefully and be certain of the following facts:

FIRST That your name and address are correctly given and plainly written.

SECOND That the name of your railway station is given if it is different from your post office address.

THIRD That all sizes, colors and measurements are given, if these are necessary.

FOURTH If you have ordered some goods sent by mail, that you have added enough postage to allow for prepayment.

FIFTH If you wish goods sent by insured mail, see that you have allowed additional money to pay the insurance fee. Read page 5 for information concerning insured mail.

ABOUT OUR PRICES

In fifty-three years R. H. Macy & Company have grown to enjoy the largest patronage of any retail store in New York City. The volume has been increasing from year to year, due wholly to the fact that we have given our customers the very best qualities and the very best prices it has been possible for us to give. In this catalogue we have selected a very attractive line of the choicest merchandise the market affords and we quote prices lower than any other concern in the country selling goods of equal quality. We have only one price and were you to order one thousand dollars' worth of goods of any one number we could not give you a better price than that quoted in our catalogue. Our one small percentage of profit added to the lowest cost possible to obtain through our tremendous purchases makes it impossible under any consideration to give you any reduction of the extremely low prices listed in this book.

We invite you to compare the prices quoted in this catalogue with those quoted by any other concern selling goods by mail. We invite you to compare our qualities with those of our competitors, feeling confident that, quality and price considered, you will favor us with your business. Remember that illustrations look much alike and that descriptive matter may be made very alluring and that an unscrupulous firm may quote a seemingly lower price, only to send you something that is worth even less than the price asked for it. Our reputation for square dealing and low price-making on dependable merchandise is such that we would not dare, if we wanted to, to send out merchandise which would not meet every requirement of our customers, and which would not give to them full value for their money. You do not take the slightest risk when you order goods from us, and if you do not know this, you will doubtless find friends and neighbors in your community who will tell you that their experience in dealing with us substantiates this statement.

The large trade we have built up in New York City owes much to the method New York women have of going from store to store, making comparisons and finally buying where they know the best values are obtainable. They buy at Macy's. You who cannot visit New York personally can shop satisfactorily from this catalog.

THE GREAT QUESTION OF QUALITY AND PRICE

We feel that we cannot give too much attention to the quality of the goods handled by us, and those of you who have traded with us for years have come to learn that when you buy good from R. H. Macy & Co. you may depend upon receiving such qualities as will give you first-class service and which in every case give you more than full value for your money. You have learned, furthermore, that we do not handle low grade merchandise at any price. We know better, perhaps, than anyone else how easy it is to take just a little out of the quality for the sake of quoting a lower price, because this policy is so often suggested to us. We know that we can buy merchandise of a kind for less than we now pay but any reduction in the prices we pay for the goods we sell means exactly so much sacrifice in quality.

There are so many lines which may be juggled by manufacturers and producers. Just a little taken out here, or a little something left undone there, which enables them to quote us lower prices and this in turn would enable us to quote our customers a lower price. It would be a very easy matter for us to illustrate and describe these cheapened products most attractively and we could undoubtedly name slightly lower prices than we now name and we could say to our customers in every printed description that these lower grade goods are not fully recommended by us, but many of our customers would undoubtedly buy such goods from us, anyway. We know very well, however, that our patrons would not get the service, the wear or the satisfaction from such merchandise that we are anxious to give them in every case and, therefore, as we cannot conscientiously catalogue or sell these second grades, we refuse absolutely to show them in our catalogues.

We are furthermore very careful to give our customers the fullest information concerning every article catalogued by us. We are particular, that the descriptions of our merchandise shall be absolutely truthful. We cannot afford to deceive a customer even in matters of minor importance. We are building a business to endure. We not only want the continued support of the customers we now have, but we want their good will so that they may speak favorably of us to their friends. We are alert every moment of every day to see that the goods we offer them shall be right in quality, that our prices shall mean a saving to them and that the descriptions of our merchandise shall be so simply written, so complete and truthful that there shall be no possibility of any customer being deceived. We want our merchandise to open up in the hands of our customers in such a manner that they shall be absolutely satisfied, so that they receive exactly what they expected to receive when they ordered from us, and we believe that we come very close to our ideals in these respects. We earnestly ask the co-operation of our friends and customers to the end that we may serve them well and in instances where any deviation from these principles comes to the attention of any friend or customer, we ask that we be advised of this condition that we may promptly correct it.

HOW TO SEND MONEY

WE ASK YOU to send cash in full with your orders, believing our standing in the business world and our reputation for fair dealing with our customers is a sufficient guarantee that we will apply the money sent us exactly according to your wishes. There are six safe and convenient methods of sending money by mail as explained below and we suggest that you use whichever method is the most convenient. These methods are:

ONE. By bank draft which you may purchase from any bank or banker.

TWO. By express money order which may be purchased from any express company doing business in your town.

THREE. By postal money order which may be purchased from your Postmaster or from your Rural Free Delivery carrier.

FOUR. By registered mail; by this method you enclose the money itself and register the letter at the postoffice or your Rural Free Delivery carrier will register it for you.

FIVE. By personal check made payable to the order of R. H. Macy & Co. on any bank with which you have a checking account. Personal checks are accepted subject to payment immediately upon presentation to the bank on which they are drawn. This method of sending money is a very convenient and safe one since it saves you a trip to the Bank to buy a draft or to the post-office or express office to get a money order and should the letter become lost, your check could not be cashed.

SIX. By postage stamps; we prefer to have you send your remittance in any other way than by this method, but as an accommodation to you, we will accept postage stamps if they are received in good condition. If you are compelled to send us postage stamps, wrap them in wax paper, otherwise they may become stuck together, which would render them unfit for use and therefore of no value. In sending us postage stamps, do not include any special stamps issued by the Government, such as Internal Revenue stamps, Special Delivery stamps, or foreign stamps of any kind as we cannot dispose of them and therefore they have no value to us.

WORN OR DEFACED COIN. The value of gold or silver coin is determined by its weight and if you are forced to send us gold or silver coin, be sure that it is not worn or defaced. If it is worn so as to be lightweight or if it is defaced or mutilated to any noticeable extent, it is worth only its weight as bullion and therefore it could not be accepted by us at its face value.

MONEY SENT BY OPEN MAIL. It is very risky to send gold or silver coin by open mail—that is without registering the letter. The loose coin may break through the envelope and become lost and in cases of this kind you have no recourse but must stand the loss yourself. We cannot be responsible for safe delivery of any coin sent us by open mail and strongly urge you not to take this chance. Better register your letter if you find it necessary to send the actual money.

WE REFUND EXCESS MONEY. If you send us more money than is required to pay for your order, we will immediately refund the difference to you. If you send more money than is necessary we always send in the shipment or by mail, an itemized bill of your order so you can see exactly how your funds have been applied. Where you have ordered us to prepay the charges, be sure to make a liberal allowance for this purpose and whatever is left will be immediately returned to you.

C.O.D. SHIPMENTS

"C. O. D." means you pay the agent for the goods when they are delivered to you. We do not believe in C. O. D. shipments and would much prefer to have our customers send us the money in advance to pay for their orders. There are many reasons for our position. In the first place, if there were any doubt as to our reliability or integrity or if we did not agree to exchange or refund your money on any article not entirely satisfactory, there might be some excuse for having your goods come C. O. D. This house has been doing business in New York City for 53 years, enjoys the confidence and good will of the business interests of the city as well as that of thousands of customers all over the country who have, many of them, been with us since the beginning. In view of our very high standing in the community and our reputation for fair dealing, we believe our customers can well afford to order anything shown by us in this catalogue and send cash in full with the order. You do not take the slightest chance whatever when you buy goods from us because our guarantee provides that any purchase not exactly as represented and not entirely satisfactory, may be returned at our expense and either an exchange will be made without further expense to you or your money will be refunded.

THEN, TOO, YOU ARE CAUSED unnecessary inconvenience and expense when you order goods shipped C. O. D. When you have accepted the shipment, the express comapny charges you a fee for collecting the money and returning it to us, which makes your order cost you more than it would cost had you sent the full purchase price with your order. Another annoyance connected with C. O. D. shipments, which is embarrassing to many customers, is the fact that the agent who may personally be opposed to the mail-order business, by reason of his relations with the business men of your home town, knows exactly what you buy and the amount you pay for it. As a result, your private affairs are public property and may be used to embarrass you if the agent were so disposed.

FOR THESE REASONS, C. O. D. shipments are a nuisance and offer no advantage to you when trading with us or any other reliable concern. As a matter of fact, our terms are so liberal and our guarantee so broad that you take no risk whatever in sending us the purchase price in full with your order, and we strongly urge you to do so. If you order any goods of us on our regular terms and anything does not prove satisfactory to you, it may be returned to us for exchange or refund, and we will pay all transportation charges of the return and exchange shipments or if a refund is requested, we will refund the purchase price of the article or articles returned. However, if you do not care to buy goods under our regular terms, backed by our liberal guarantee and feel that you would rather order them sent C. O. D., we will accept your order and make shipment C. O. D.

C. O. D. EXPRESS SHIPMENTS. The express agent will permit you to open the package and examine the goods before you pay the balance of the C. O. D., and under a new system, adopted by the express companies you are permitted to make selection from this shipment—that is, you may take a part of the shipment and refuse the rest. To do this, however, you must make a request for this privilege at the time your order is placed, so we can see that the proper instructions are given to the agent. Express agents have no authority to permit examination and selection unless the express wrapper is so stamped. If you want this privilege, be sure to so state in your order.

C. O. D. FREIGHT SHIPMENTS. When goods are ordered sent by freight C. O. D., we usually ship in our own name and send the Bill of Lading to a Bank in your town with draft attached for the collection of the amount due on your order. The Bank will notify you and after paying the amount of the draft, the Bill of Lading will be turned over to you, properly endorsed, so that you can get the shipment on presentation to the Agent, any payment of the freight charges. If you order goods sent by freight C. O. D., be sure to give us the name and post-office address of your Bank. Any Bank will do, and it is not necessary that you have a deposit in that Bank to have goods shipped there C. O. D. by freight, with collection through that Bank.

Another method of shipping goods by freight C. O. D is to make the shipment in our own name and send the Bill of Lading to the Express Agent for collection. The usual charge for carrying the Bill of Lading is 30 cents. The company will also charge you an extra fee for collecting the money and forwarding it to us. This method of shipment is more or less troublesome and is an expensive one to the customer. In fact, shipping goods C. O. D involves so much red tape and expense that it is a very unsatisfactory method. As long as we guarantee to refund the purchase price and pay transportation charges both ways on any goods bought under our regular terms, there is little reason for a C. O. D. shipment and we hope our customers will not ask us to send goods in this way, but will take advantage of our liberal terms which make trading with us by mail just as safe and just as satisfactory as if you were to make your selection and purchase in our store.

MAIL SHIPMENTS

GOODS SENT BY MAIL as a rule, should be of light weight, small in bulk, and of no great value. Any packages weighing more than four pounds, cannot be shipped by mail, but any number of packages weighing four pounds or less each, can be mailed to the same person at the same time. The merchandise postage rate is one cent an ounce, 16 ounces constituting a pound. The average express rate on four pounds is less than the cost to send the same package by mail, so that only in cases where there is no express agent at your town or where the express haul is a long one, you should order a four pound package sent by mail. Occasionally a customer may live many miles from an express office, but within a few miles of a post-office, in which case it is frequently advisable to have shipments come by mail, that could otherwise be more profitably sent by express or freight. For example; a ten pound package by express to Carson City, Nevada, would cost $1.50 and about $1.75 by mail, allowing 15 ounces for wrapping. To ship by mail we would divide the shipment into three packages so each would weigh less than four pounds, which is the limit the postal rules will permit. If you lived in or near Carson City, express would be the best method to use, but if you lived 100 miles away, it would be best for the goods to come by mail. We have tried to give the weight or postage of every article we catalogue, which may be profitably sent by mail, but if you do not find the weight or postage given, allow a generous amount to pay the postage, registration or insured mail fees, and if there is any money left after shipment has been made, it will be returned to you. There are three methods of shipping goods by mail as follows:

ONE Open Mail. So called, because only the regular merchandise rate of one cent an ounce is required. Valuable packages should not be sent by open mail, as the Government is not responsible for packages lost if shipped by open mail. Goods ordered sent by open mail are sent at the owner's risk, and if lost or stolen, we will not be responsible.

TWO Insured Mail. Packages sent by insured mail, if lost or stolen are made good by us. This method is a cheap, safe and very satisfactory way of shipping valuable merchandise by mail. The postage rate of goods sent by insured mail is the same as if sent by open mail, that is, one cent an ounce. In addition to sending us the regular postage, we require as insurance fee, five cents extra for any order valued from 96c to $15.00; ten cents extra for orders valued from $15.00 to $30.00; and fifteen cents extra for orders from $30.00 to $50.00. If any shipment sent by insured mail fails to reach you, and sufficient time has elapsed to permit of delivery, write us a letter to that effect, and have your Postmaster endorse it. We will then duplicate the shipment without expense to you. We advise insuring every mail shipment of value, as the fee is small and we assume all the risk.

THREE Registered Mail. So called because the postal authorities keep a record of each package shipped by registered mail from the time it is delivered to them until it is delivered at destination, and receipted for. Jewelry or other small valuable articles, exceeding $10.00 in value, are usually sent by registered mail. The rate of postage is one cent an ounce, and the registration fee is ten cents extra per package, for each package so shipped.

POSTAGE RATE ON BOOKS. The postage rate on books or printed matter is one-half a cent per ounce and any book may be sent by mail at this rate, no matter what its weight.

EXPLOSIVES, Poisonous, or Inflammable Articles cannot be sent by mail under any circumstances whatever. Liquids weighing more than four ounces cannot be shipped by mail.

SHIPMENTS BY MAIL should be confined strictly to light weight articles such as jewelry, gloves, neckwear, etc., otherwise the cost of postage in some cases, might more than counter-balance the amount you would save by buying of us. We are extremely anxious that every purchase you make of us shall be a profitable one and that every time you send us an order you will save money by doing so. We therefore suggest that you make up your order in such a way that it will weigh one hundred pounds or more so we cand send it by express or better still by freight. It will not be hard for you to do this since this catalogue quotes very low prices on thousands of articles of every day use, such as boots and shoes, clothing, dry goods, house furnishings, groceries, etc., some of which you buy every day, so that if you anticipate your wants for a week or so, you can very easily send us an order which we can send by freight or express, and which when received, will represent a very great saving over what you have been in the habit of paying to your local dealers for the same goods. Shipping by freight is the most economical method to use and wherever possible, goods should be sent in that way. The different railroads handle our shipments very quickly, in many instances getting them to destination as quickly as express or mail.

UNPROFITABLE SHIPMENTS. We frequently receive orders for merchandise which we believe will not be to the customer's advantage to send. In other words, after the customer has paid the charges, it will have cost him out of all proportion to the value of the shipment. In cases of this kind, we reserve the right to hold the order and write an explanation of our action. It may sometimes happen, however, that you may want an article by mail or express at once, no matter what the cost, so long as you get it quickly. In cases of this kind, always explain in your order that you understand the shipment will not be a profitable one to you, but that you are willing to pay the cost of transportation, regardless of that fact. Under these circumstances, we will fill the order and get it to you by the first mail or express leaving the city, notwithstanding the fact that it will not be to your financial advantage to do so.

C. O. D. SHIPMENTS BY MAIL cannot be made, as the postal authorities do not make collection of moneys due.

EXPRESS SHIPMENTS

SHIPPING GOODS BY EXPRESS is a safe and inexpensive method, providing the haul is not too long, the package under twenty pounds, and is valued at more than $5.00. In case you do not specify how you want your orders sent, we use our best judgment and ship by the quickest and least expensive method. Express rates are figured according to the distance of the haul and the weight of the package. Below we give you an express table to assist you in determining the probable cost of having any package shipped to you by express. Always call for your goods immediately after receipt of notice from the agent that they are there for you. If you have no agent at your station all express shipments will be carried to the town nearest you where there is an agent. If there is no agent at your station, and you want the goods shipped by express, be sure to tell us what station you want them shipped to.

SPECIAL RATES. On small packages of light weight, all express companies make a special rate of one cent an ounce, but to get the rate, the charges must be prepaid. The minimum charge express companies will make under this special prepaid rate, is fifteen cents per package.

FIGURING EXPRESS RATES. If you live in Harrisburg, Pa., and want to find how much a ten pound package will cost you to be shipped by express, look at the table of rates on pages 12 and 13 and ascertain the express rate for one hundred pounds to Harrisburg, Pa., from New York City. The rate is found to be $1.25 per hundred pounds. Now, refer to the list of express charges below, and you will note that the cost of a ten pound package to Harrisburg, Pa. at the $1.25 rate, will cost you 50c. If, however, you cannot find your town in the list given in the table of rates, take the rate which applies to the town nearest your home and you can always approximate the cost very closely, or if the express rate you are seeking does not appear in the list of rates below, take the next higher rate and you can determine within a few cents the actual cost.

POUND RATES. Where an express package weighs fifty pounds or more, and the rate per hundred pounds is over $2.00, the express charge is figured by the pound. For example, suppose the express rate for your town is $5.00 per hundred pounds and your shipment will weigh sixty pounds the rate under this rule would be five cents a pound and for sixty pounds you would pay $3.00.

SEALED EXPRESS. Watches, jewelry, silkwear, and valuable merchandise of like character, when ordered with other goods, will always be shipped separately in sealed express packages as a protection against loss or damage.

The express system is quick and economical when the weight is not over 20 pounds. Points within 500 miles of our establishment can be reached at a very satisfactory rate. If you are in a hurry and the weight is less than 20 pounds, the express system is the best one to ship by.

PREPAID EXPRESS RATES ON BOOKS. Books and printed matter can be sent by express when charges are prepaid at the rate of 10 cents for 20 ounces or less, and ½ cent for each additional ounce, except when carried by more than one express company. If carried by more than one company, each company will charge 10 cents on the first 20 ounces or less, and ½ cent for each additional ounce. To secure this rate allow enough money to prepay, and state on your order, "Special Prepaid Book Rate."

FREIGHT SHIPMENTS

THE FREIGHT CHARGES.

Many people who get our catalogue do not send us orders for the reason that they fear the freight charges will be out of all proportion to the value of the shipment. There has been a great deal of misrepresentation and misunderstanding concerning freight charges, and it is with a view to correcting this misrepresentation and misunderstanding that we give you a few facts concerning freight charges.

Whether you buy your goods from R. H. Macy & Company or whether you buy from your local dealer you pay the transportation charges in either case. As a matter of fact, the transportation charge is as much a part of the cost of the goods you buy as the raw material of which they are made or the labor involved in preparing them for market, and you pay this cost whether you buy from us or whether you buy at home.

Freight shipments are usually made up of many items of a different nature and when you come to figure the transportation cost on each item making up your shipment, you will discover that the transportation charge amounts to next to nothing when you consider the actual saving in price made on any freight shipment. When you come to figure the cost of your goods bought from your local dealer and the cost of the same articles bought from us, even after you have added the freight to our very low prices, you will find that you have saved from fifteen to fifty per cent, depending somewhat on the nature of the goods you order. In view of these facts, the freight charges on any shipment which may be profitably sent by freight, are very low and should not prevent you from taking advantage of the wonderful money-saving values we show in this splendid catalogue.

THE SAVINGS ARE UNUSUAL.

We want you to know something of the very great advantages to be derived from supplying your wants from the immense stocks carried by R. H. Macy & Co., and for that purpose we suggest you make out a trial order and compare the prices at which we catalogue your selections with the prices you would pay for the same goods if purchased from your local dealer. When you come to foot up the totals of the two orders, you will be astonished at the remarkable savings we will make you on this trial order. This must indeed be so, for if you stop to think you will realize that there must be some very good reason why thousands upon thousands of customers supply every want of their home, and workshop, by mail orders made out entirely from representations and illustrations shown in a catalogue. These people would not continue to order goods in this way if it were not very much to their advantage to do so. In fact you will find if you go into the matter carefully that buying by mail from us is a very reasonable and satisfactory method of supplying the necessities and luxuries for your home.

TO OBTAIN.

the very greatest benefits from a freight shipment, you should so arrange your order to weigh 100 pounds or more, because most of the railroads charge the same freight rate for any shipment weighing less than 100 pounds. For example, if your order weighed 50 pounds, and the freight was 35c per 100 pounds, you would have to pay the 100 pound rate even though your shipment only weighed 50 pounds, so you see you would lose the advantage of 50 pounds, which could be sent without any additional cost. The saving you would make on a $25.00 order of general merchandise selected from the pages of this catalogue, would enable you to include in the same order a suit of school clothes for your boy, a school dress for your girl, wearing apparel for all members of the family, or you could add needed house furnishing to your order and still the shipment would cost you less than you would have to pay your local dealer for the same goods. Please bear in mind when you consider the freight proposition that the Law requires the same rate to be given to the small shipper as is given to the large shipper and that no rebates can be made without a violation of the Interstate Commerce act. This makes it possible for you to secure the same freight rate on the same goods bought from us that your dealer pays when he buys of the wholesaler. Since you pay the freight in either case, the only difference between buying your goods from us and in securing them from your local dealer is the fact that the difference between our extremely low prices and his prices is the saving you make by letting us handle the order for you. For example, two brothers were in the market for the same kind of merchandise. One ordered by mail, while the other bought from the local dealer. The brother who bought from the local dealer got an article which had been on the floor since the beginning of the season. The varnish was somewhat dull and there were other evidences of its being out of the factory for some time. The mail-order buyer secured his goods a few days later, fresh from the factory, the varnish, trimmings and everything in first-class condition and the whole appearance very inviting. The two articles were identically the same in quality, appearance and finish; in fact, on looking at the name plate, it was found that the two were made in the same factory. The brother who bought of the local dealer, paid $98.00 for his purchase; the mail-order purchaser got the same thing for $55.00. The only difference, therefore, in this transaction, between buying by mail and buying of the local dealer was $43.00.

Such incidents occur almost every day in buying goods by mail. Remember that every article we habe for sale in our mammoth store and every article we catalogue in this catalogue is thoroughly reliable, is of good quality, will give you good service, and is backed by our Guarantee of Satisfaction or your money back. We base our prices on the cost of production to which we add only one small percentage of profit. When you buy from us you come as close to the best source of supply as possible and get reliable merchandise for prices far below those you have been in the habit of paying elsewhere. For these reasons you will find it very much to your advantage to go through the pages of this general catalogue and compare our prices and qualities with those offered you at home or elsewhere. We would like to have you send us a trial order at least, to determine for yourself the kind of service, the kind of merchandise, and the remarkably low prices which R. H. Macy & Co. are in a position to give you.

MINIMUM FREIGHT CHARGES.

All Railroads figure their freight rates on the basis of weight, the unit being 100 pounds. When a shipment weighs 100 pounds or more, the rates given in the freight table on pages 13 and 12 apply to the shipment. When a shipment weighs less than 100 pounds, the Railroads in certain territories apply what is called the minimum rate, which is the least amount of money the carriers will accept for the transportation of that particular shipment, while in other territory the minimum charge is the regular charge for 100 pounds. In the freight table given on pages 12 and 13, the minimum rates as well as the rates for first-class, second-class, third-class, fourth-class, fifth-class, and sixth-class shipments are given so you can tell exactly what your rate will be to your station or to a station within a few miles of you. In many cases it will be seen, therefore, that the transportation charges on a 50 pound freight shipment will be as much as if the shipment weighed 100 pounds, so it will be to your advantage to select your order with a view to making it weigh 100 pounds or more, since you would not have to pay any more for a 100 pound shipment than you would for a 50 pound shipment.

STATIONS WITH NO AGENTS.

Nearly all railroads have stations along their lines at which they maintain no Agent. Such stations are called "prepay stations," that is, any merchandise shipped to such stations must be prepaid, since there is no Agent on hand to collect the feight charges. There are many disadvantages in having goods sent to a prepaid station, and if your station is one of this character, we want you to be careful to observe some of the suggestions we make concerning shipments to prepay stations. We inspect all of the goods of your order before packing them. We pack in strong cases or prepare the shipment in such a way that there is the least danger of loss or damage in transit. We guarantee safe delivery at destination but when we ship to a prepaid station, our responsibility ceases the minute the goods are unloaded from the car. To prevent theft or damage, you should arrange to either be at the station when the goods arrive, or have somebody look after the shipment for you. Where you order goods shipped to a station which has no Agent, it will be necessary for us to prepay the freight charges, otherwise the railroad company will not accept the shipment. It will be necessary for you to allow additional money to pay the charges when you remit for your order. If you cannot determine the weight of your shipment, or the amount of the charges, make a generous allowance and any money that remains after the order has been shipped and the charges paid will be refunded to you immediately, and a statement rendered showing just how we have applied your remittance. In case you do not send us remittance to cover the charges, we will send your shipment to the nearest station which has an Agent and notify you of our action, so there may be no necessary delay in your receiving the goods. Where there is an Agent at your station, it is not necessary for you to order the shipment prepaid, and we would rather you would not do so, since there would be no advantage to you in our prepaying the shipment, for the reason that under the Law the rates which you would secure are identically the same as would be issued to us.

OVERCHARGES.

It sometimes happens through a mistake in the billing of a shipment that our customers pay more than is the legal rate for the transportation of their goods. In such cases, if you have reason to believe that you have been overcharged, either through a mistake in the rate per 100 pounds, or through a mistake in the weights of the shipment as shown on the freight bill, pay the charges assessed, and send us the freight bill, together with a statement of the reason for doing so. We maintain a force of rate clerks and traffic experts whose duty it is to check over rates of this kind and in case we should find there had been an overcharge, we would pay you the difference between what you paid and what you should have paid, and reimburse ourselves by filing a claim against the railroad. In case you have reason to believe that the weights as shown on your freight bill are inaccurate, insist on your Agent weighing the shipment on his own scales, and if your supposition is correct, have him charge you the correct rate in which case there will be no need to write us.

LOSS AND DAMAGE.

Nearly all of the Railroads and Express Companies carry our shipments to destination quickly and in good order, but should any shipment arrive in a damaged condition, call this fact to the attention of your Agent and have him write a statement of the exact condition of the shipment across the face of your freight bill before you pay any of the charges. Should he refuse to do this, do not sign the receipt or pay any charges, but leave the goods with him and notify us. Occasionally a shipment will reach destination without any case or crate around it and Agents will sometimes state that it was the fault of the shipper and not the fault of the Railroad Company and by these representations secure signature for the damaged goods without being obliged to write a statement of damage across the face of the receipt. All of our goods are carefully packed and are receipted for in good condition and if they arrive in bad order, the fault is not ours but that of the carriers and you have a perfect right to insist on a damage notation on the freight bill before you accept the goods or pay any charges, and if your Agent refuses to give you one, let us know the circumstances and we will see that immediate adjustment is made. We guarantee to adjust every claim for loss or damage sustained to shipments we make to our customers in the quickest possible time and in the most satisfactory manner provided:

FIRST You send us the freight receipt showing the charges you paid on the shipment, with a statement written thereon by the Agent explaining the nature of the loss or damage.

SECOND You return to us your statement or bill, showing the goods which you bought.

THIRD That you sent us a statement telling us just what you want us to do to rectify your loss or damage.

OMISSIONS AND SUBSTITUTIONS

OUR STOCKS ARE COMPLETE. To successfully carry on our tremendous business, we find it necessary to carry very large reserve stocks so we will seldom be out of any article we catalogue. We place standing orders with the factories and producers to make regular deliveries to us, so that as our reserves are used up, they will be replenished automatically. In addition to this, we have a force of buyers, stock men and inspectors whose duties require them to keep in constant touch with our sales and purchases so that they may anticipate our requirements and see that the goods are on hand at the proper time. Notwithstanding these precautionary measures, we are forced sometimes to substitute. When we receive an order from the customer which contains any article which we cannot immediately ship, we either:

FIRST Omit the article and explain why we are doing so.

SECOND Substitute an article which is of equal or better quality than the one we were unable to supply.

THIRD Send the rest of your order and arrange to ship the missing article at a later date, in which event we pay the transportation charges on the delayed article.

FOURTH Hold your entire shipment until we can ship your order complete. As a rule we do not take this action unless we know absolutely that the missing article will be ready to ship within 48 hours from the time your order reaches us.

WHEN WE SUBSTITUTE. It is very rare indeed that we find it necessary to substitute some article which has not been ordered for one which has been ordered, and when we are forced to do this, we are very certain that the article we substitute will please you either by reason of the fact that it is of equal quality and will answer the same purpose, or because it is of better quality than the one you ordered and paid for and for which we have made no extra charge. In making substitution we are therefore very careful to see that the article substituted will:

FIRST Answer the same purpose.

SECOND Is of equal or better value.

THIRD Is of the same size, color or style as the article ordered. In case you do not want us to make the substitution and will so state in your order, if there is any article which we haven't in stock, and cannot secure to send out promptly with your order, we will refund the price allowed for that article.

WE SEND FREE SAMPLES

WE SEND SAMPLES of many lines of merchandise catalogued in this book. When you write for samples, be specific that we may know exactly what you want and will not send you a lot of samples in which you are not interested, and for which you have no use. For example, if you wanted samples of ginghams, do not ask us to send you samples of "dress goods" for the simple reason that "dress goods" covers not only ginghams but hundreds of other qualities of goods and if we were to send you samples according to your request, we would include many kinds of cloth, for which you would never have any use whatsoever. We therefore suggest when you write to us for samples that you state the kind of merchandise and the color shade you may desire and about what price you expect to pay, so we can send you an assortment of samples in a very wide range of qualities and price. Of course, we realize when you want samples of anything, that you have not yet made up your mind and want these samples to assist you to do so, but at the same time if you will stop to think, you will realize the useless waste in sending a lot of samples which can be of little or no value to you.

CARPET SAMPLES. If you will refer to pages 281 to 284 of our carpet section, you will find we reproduce in their natural colors by the new color process of printing some of the carpets and rugs sold by us. This is to give you an idea of the color combinations and just how the different carpets and rugs will look when the actual goods are before you. If you like, however, we will send you carpet samples, but when you write for them, tell us whether you are interested in Wilton, Brussels, or Ingrain qualities, and what colors you prefer. If you desire an extra large sample and will send us $1 00 as a guarantee of good faith, we will send you our Book of Samples which contains a very large assortment of the different qualities and which will give you a very satisfactory idea of the actual goods. After you have made your selection, return the carpet samples to us and we will refund the $1.00 you paid, or if you send us an order you may deduct $1.00 from your remittance, simply stating that you are taking credit for the return of the carpet samples.

DO NOT RETURN SAMPLES. Except for our carpet samples we make no charge for any samples which we send, and for that reason we do not care to have you return them to us. When you are through with the samples you have requested, we would consider it a very great favor indeed if you would hand the samples to some neighbor or friend, as we might possibly interest them in our merchandise. We are prepared to furnish free samples of the following lines of merchandise to any of our customers or their friends on receipt of inquiry for them:

Prepared Roofing	Laces
Curtains	Battenburg Material
Linoleums	Dry Goods
Oil Cloth	Ready Made Clothing
Draperies	Made to Order Clothing

These samples will give you an idea of the quality of the goods you will receive, R. H. MACY & COMPANY, goods which we guarantee to please our customers and in the use of which the recollection of quality will long be remembered after the price has been forgotten.

CORRESPONDENCE

A PRIVILEGE. We consider it a very great privilege to give our customers all of the information they may require concerning goods we catalogue or goods which they may want, which we do not catalogue. We have correspondents whose duty it is to give this information, but we feel like asking our customers to read our catalogue descriptions and to read the introductory pages before making their inquiry, for in many cases the very information you are seeking will be found in our catalogue. You will save yourself needless delay and annoyance, if you make certain that the information is not contained in our general catalogue before you write.

USELESS CORRESPONDENCE. Every article which we list in this general catalogue can be shipped immediately, and it is useless to write us and ask if we have this or that article in stock. Do not ask us for discounts or commissions on any merchandise we have for sale, for we have only one price and that is the price at which it is listed in our catalogue, and were you to buy in carload lots, we could not give you a better price than we name in our catalogue. Remember our prices are based on factory, or producing cost, plus one small margin of profit so that any further reduction would make your order an unprofitable transaction for us to handle. Do not write and ask us to appoint you an Agent for us in your neighborhood. We have no "Agents" anywhere—our catalogue being our only salesman.

MIXED INQUIRIES. Should you desire to write us concerning any matter not a part of your order, write your inquiry on a separate sheet of paper, sign your name and address and enclose it with your order in the same envelope. We do not handle the inquiries and orders in the same departments and therefore we can give your inquiry quicker attention if it is not mixed in with your order. Anything pertaining to your order, however, should be written on the same sheet of paper. In signing your name, always be sure to give us your full name and not your initials. For example, if your name is James Howard, do not write it J. Howard, for there may be a John Howard, or a Joseph Howard in your neighborhood, and it would be possible for a serious mistake to be made in mail delivery, unless this suggestion is carried out.

BEFORE WRITING look over the fourteen introductory pages in this catalogue to see if you do not find an answer to the very question you intend to ask. When you write, be careful to give us a very clear idea of just what you want to know especially if it is concerning something which we do not catalogue. We are always willing and anxious to go out of our way to accommodate any customer, but in order to do so economically and with the very best of results to you, we should have your hearty cooperation to the extent, at least, that you give us all of the needed details which would make it possible for us to intelligently answer your inquiry. For instance, if you ask about something we do not list in our catalogue, tell us as much about the purpose for which you desire this article as possible, the amount you expect to pay for it, and any further details which may occur to you, which will enable us to secure the information and give you an intelligent reply at the earliest possible moment.

ABOUT DELAYS. As a rule the Railroad and Express Companies carry our shipments to destination very promptly and seldom do we have cause for complaint. Should you become uneasy after placing an order with us, because you have not yet received the goods, we suggest that you determine first whether or not the Railroad Company or Express Company has had ample time in which to get the shipment to you. If you consider that plenty of time for delivery has elapsed since the order was sent, do not write us until you have inquired of the various depots in your town to see whether or not the shipment may not be on hand. If you have requested us to send your shipment by a certain Railroad and it does not come, do not hesitate to inquire of the other Railroads entering your town as it may be possible that through error at some transfer station the shipment was rerouted. Should you not find the goods at any of the stations awaiting call, write us a letter explaining this fact and give us the invoice number which appears on the card we sent you, acknowledging receipt of your order. We will immediately make a very careful investigation and if we find the Railroad Company has been negligent in making delivery, or if we find they have lost the shipment, we will either trace by wire, or we will send a duplicate shipment at once.

CHANGE OF ADDRESS. We keep a very complete and accurate record of every customer who has ever sent us an order, and part of this record is a card bearing your full name and address, together with your street number or Rural Free Delivery number and your shipping point, if different from your post-office. We try to keep this record up-to-date, and to assist us to do so, should you change your address, we want you to notify us at once.

RETURNING MERCHANDISE

OUR MERCHANDISE has been carefully selected, arranged and priced to give our customers the widest range in quality and price ever offered by any concern in the country. Notwithstanding every effort we make to please our customers with merchandise above criticism, there are bound to be some who, through misunderstanding of the descriptive matter in our catalogue, or through a misunderstanding of the illustration will not be satisfied when the goods arrive, and will desire to return the shipment to us. There are certain rules governing the return of merchandise which we would like to have our customers observe so that we may give them complete satisfaction in the least possible time.

Please read the following paragraphs very carefully before you return any goods to us, as they give you full details concerning how to do it.

RETURNING GOODS BY MAIL. Only light-weight articles should be returned to us by mail, and if the shipment is valued at $2.00 or more, you should register the package. Address the package to R. H. MACY & COMPANY, New York City, N. Y., and at the left-hand upper corner put your name and address like this: "From John H. Howard, Lawrenceville, Mass." By putting your name and address on the package we can identify it and can immediately give you credit, not only for the purchase price of the goods returned, but for whatever postage or registration fee you paid to get the shipment back to us. Do not enclose in the package a letter or any other paper containing writing of any kind, for if you do, you cannot send the package at merchandise rates of one cent an ounce, but you will have to pay letter rate of 2 cents an ounce. You are liable to a fine of $10.00 if you mail a package under the merchandise rates which carries writing of any kind. Send a letter of explanation and our bill which we sent you when you ordered the goods, in a separate envelope. When the package and your letter arrive, we will immediately adjust your complaint, either by refunding the purchase price or sending you an exchange, as you may direct. The Postal Laws require that all packages must be so wrapped that the postmasters and postal clerks may open the package and inspect the contents without breaking the wrapper so you must not seal your package by glueing the fold.

RETURNING GOODS BY EXPRESS. Do not return any package to us by express which weighs more than 20 pounds. We ask you to write us before making the return and explain the character of the goods and the weight, and we will send you instructions as to how we want it returned and a label to attach to the package so that it will be asy for us to identify it. When you return goods by express, enclose in the package our invoice or itemized bill, together with a letter of explanation, telling us why the goods are being returned and what you want us to do to make the matter satisfactory. The postal authorities have no jurisdiction over the Express Companies, therefore there is no danger in enclosing inside the package writing of any nature whatsoever, so we suggest that you enclose bills and letter with the package so that the minute the package is opened we will know just exactly what to do to satisfactorily adjust your complaint.

RETURNING GOODS BY FREIGHT. Do not return anything to us by freight unless it weighs 20 pounds or more. Before you return any heavy or bulky goods to us, be sure you write us an explanation of the difficulties you are having, so we may know exactly what the trouble is and can determine just what we want done with the merchandise. Some of our goods are shipped direct from the factory and we would not want it to be returned to our New York Store under any circumstances, for the simple reason that we have no room to take care of heavy or bulky goods. Therefore, before making any return to us of anything which is of a bulky nature or of heavy weight, write us first, so we may instruct you where to return the shipment and send you tags to attach to the goods. When you take the shipment to the Railroad Company for return, your Agent will give you a receipt for the goods. This receipt is called a Bill of Lading. It is a very valuable document, since, if the shipment is lost or damaged in transit, this document must be presented before the Railroad Company will pay whatever we may have suffered on account of such loss or damage. When you receive the Bill of Lading send it to us together with your bill or itemized statement and a letter of explanation, so we may know just what your wishes are with reference to the returned goods. Another advantage in sending us this Bill of Lading is that if you want us to make an exchange shipment, or if you want the return of your money, we can immediately do as you direct without waiting for the goods to arrive, since we have a receipt showing that they are on the way to us. Should you request a return of the purchase price and you will send us your freight bill which you received from the Agent, and which has the amount of all the charges you paid to get your goods in the first place, we will add to the purchase price this amount, so you will not be out one cent on the unsatisfactory purchase. When you return an article to us, by freight, always be sure that your name and address appears somewhere on the box so we may know from whom it is sent. We do not advise putting in your freight package your letter of complaint and your bill for the reason that freight is usually a slower method of transportation than mail or express and if you want an immediate adjustment you will readily see that it would be better to mail your complaint and your bill rather than to wait until the goods came in.

EXCHANGE SHIPMENTS. It frequently is the case that goods which have proven unsatisfactory would have been all right had the proper color, size or measurements been sent. In cases of this kind, our customers usually prefer that we make an exchange and send the proper article. Where we make an exchange shipment we not only pay the return charges to us, but we prepay the exchange shipment so that our customers will not suffer any loss through failure on our part to fill their order to their entire satisfaction. In cases where a refund of the purchase price is requested, we will immediately return the purchase price on receipt of the goods or on receipt of freight or express receipts, showing the goods are being returned to us, and in addition will add to our refund the amount of express or freight charges the customer paid when he first got the goods. In case the returned article is only a part of the original shipment and the rest of the goods have been kept and are satisfactory, we will return only the proportionate freight charge or express charge which the unsatisfactory shipment bears to the whole.

NEVER SEND MONEY In packages of merchandise you are returning to us for it is a very risky thing to do and we will not be responsible for theft or loss in transit. If you are sending a new order and want to send additional money send your order and remittance by mail, but you can deduct from your order the credit you will have for the merchandise for which you are returning bill of lading or express receipt and we will accept this credit immediately on receipt of your order and make the exchange without awaiting the arrival of the goods.

RETURN YOUR BILL. When we shipped your goods, we sent you an itemized invoice or bill showing exactly how your money was applied and when you return goods to us for any reason we must have this invoice or bill along with your letter of complaint. Every employee who handles your order has the record of his handling marked on the sheets so we can tell at a glance whether or not the employee was the cause of your order being unsatisfactory. Then, too, the bill will tell us how your goods were packed, how they were shipped and much other information of a like character, all of value to us in determining the reason for your dissatisfaction. You will readily see, therefore, how important it is to us in adjusting your complaint to have this invoice or bill. Do not fail to send it when you write us.

SHIPMENTS FROM FACTORY

THERE ARE MANY ITEMS which can be more profitably sent to our customers from our factories direct, instead of being shipped from our factories to our warehouse and then rehandled and reshipped. Such items as pianos, heavy furniture, stoves and ranges, sewing machines and goods of a like character, we send direct to the customer from the factory, and in our catalogue we give the approximate location of this factory so you can determine about what the freight rate will be. There are many advantages to the customer and to ourselves in shipping goods from the factory direct. In the first place, the merchandise is always fresh and new, many articles not being given the final coat of varnish until after the order has been received. Another point which is very much to the advantage of our customers is that we do not tie up any of our capital in stock, we do not have to go to any expense for cartage, all of which means that the goods cost us much less than they would if we shipped them from our store in New York City. Because of these savings, and because of the fact that we can handle a factory order at much less expense than we can an order which calls for goods to be shipped from our stock, we quote prices on factory lines which cannot be equalled by any other concern at home or elsewhere. Then, again, our factories are located at central points where there are the very best of transportation facilities which permit an order to be handled quickly, to be put from the factory direct into the car where it remains without further handling until it is delivered at your station. The same broad and liberal guarantee which we make on merchandise carried in stock applies just the same to every article which we ship from our factory so that you need not hesitate to order from this catalogue any article which we state will be shipped from the factory for the simple reason that we stand back of this merchandise and if it is not exactly as represented and entirely satisfactory you have the same privilege of returning it to us which is accorded to you when you purchase anything else in this catalogue.

ABOUT OUR FACTORIES We exercise the same care in selecting the factories which are to fill our orders direct to our customers as we do those which are to send their merchandise to our New York Store. Our high standards of qualities are strictly maintained, and every shipment not measuring up to our requirements is rejected and not permitted to go out. We patronize only those manufacturers who have an established reputation for dependable merchandise and who can successfully handle our business in a prompt and satisfactory manner. Do not think because we ship your goods from our factory that there will be any unusual delay; on the contrary nearly all factory items are already crated ready to load on the cars and in most instances shipments are made from factory sooner than if packed and crated in our own store.

THE TROUBLE DEPARTMENT

EVERY big business has its troubles—with thousands of orders passing through our house every day, it is inevitable that we should have ours. Our method of filling, assembling, packing and shipping orders is as nearly perfect as it is possible to make it, but even though we take very precautionary measure possible to prevent mistakes, either of omission or commission, they just will occur. To straighten out a transaction after it has gone wrong, requires a full knowledge of all the details so the right thing can be done in the least possible time. If anything should happen to an order placed with us, and you find it necessary to write us, we suggest you first read the following instructions so we may get at the bottom of the trouble at once without unnecessary correspondence and delay.

DELAYED SHIPMENTS. Many customers who write us concerning delayed shipments, have not allowed sufficient time for the order to reach us, to be filled, and for the transportation company to effect delivery. If you have sent us an order and you are becoming uneasy concerning non-delivery, first be sure that you have allowed ample time for your letter to reach us, for your order to be filled, and for the shipment to be delivered to you. If you think sufficient time has elapsed for this purpose, before writing us, visit the express or freight offices and inquire of the Agents whether or not a shipment is holding for you. Some shipments arrive at destination with the label gone or the address so badly mutilated that it is sometimes impossible for the Agent to tell for whom it was intended, so that if you tell the Agent you are expecting a shipment and describe the merchandise to him, it sometimes is possible for him to locate among his goods "on hand without mark," the identical package you are looking for. After making inquiry at the various express and freight offices without success, write us to that effect and give us the invoice number which you will find on the card we sent you, acknowledging receipt of your order. This invoice number will greatly assist us in identifying the order and giving you an explanation of the cause of delay. If we find on looking up our records that the Railroad or Express Companies have had the shipment long enough to have effected delivery, we will immediately trace, or if we think this will not locate the shipment, we will duplicate the order at our expense.

DAMAGED SHIPMENTS. As a rule the railroad and express companies carry our shipments to destination and deliver them promptly and in perfect order, but occasionally through carelessness or from other causes, a shipment may be delivered at destination in a damaged condition, in which case we want you to observe the following rules:

FIRST. Examine the shipment and learn the extent of the damage before paying the charges and before taking it from the station.

SECOND. If repairs can be made, accept the shipment, pay the charges, and have your Agent write a statement on the freight or express bill, showing the exact condition in which the goods were delivered to you. Send this bill to us and tell us just what is necessary to be done to put the article in good repair, what the repairs will cost if made locally and on receipt of this information, we will see that proper steps are taken to at once adjust the loss or damage to your entire satisfaction.

Do not, under any circumstances, have repairs made locally until you have written to us and received our authority for doing so, because we will not recognize unauthorized repair bills. Frequently we can send a new part to replace that which is broken much cheaper than it could be repaired locally. When you explain to us the nature of the damage, do not just tell us that the article is broken, but explain how it is broken and, if possible, send us a rough pencil sketch of the article showing where it is broken, or cut the picture out of the catalogue and mark the place on the picture.

THIRD. If you decide to refuse to receive the damaged article and are compelled to pay the freight or express charges in order to obtain the other goods sent in the same shipment which are satisfactory and in good condition, be sure to have the Agent write a statement of the damage on the receipt and have him state that the article damaged is on hand refused by consignee on account of damage, and is holding subject to the order of R. H. MACY & COMPANY. Write us the facts, enclosing the invoice sheets and freight bill with the Agent's notation and send to us immediately, and we will replace the broken or damaged article at our expense and ship it to you all charges paid.

FOURTH. If the goods are so badly damaged that you do not want to accept any of the shipment, leave it in the hands of the Agent and write us to that effect.

Where shipments are received in a damaged condition, we make a satisfactory adjustment with our customer and file claim against the railroad company to reimburse ourselves. To recover the loss we sustain from an adjustment of this character, we must have your co-operation to the extent that you send us the freight bill with the Agent's statement and a statement of your own, concerning the exact condition in which the goods were delivered to you, or tendered to you.

LOST SHIPMENTS. If for any reason, part of the shipment has not been received, first look at your bill to determine whether or not we didn't omit the article. If it was not in stock when we filled your order it may have been necessary for us to omit it, in which case the amount you allowed for it will be refunded to you. Also look to see if a stamp with the words "Back Order" has not been stamped opposite the entry on the bill, which means that this particular item will be shipped later rather than to hold all of your order until this could be obtained. Nearly all back orders are sent, charges prepaid, but occasionally, where the article to be shipped later, weighs a hundred pounds or more, we do not pay the freight or express, since the rate would have been the same whether it went forward as one shipment or as two. Or the article may be shipped from factory in which case a stamp indicating this fact will appear opposite the entry on your bill. If, however, you find we charged you for the shortage and there is nothing in our letter or on our bills to tell why this article has not been received, inspect the box or package and see whether it has the appearance of having been tampered with in transit, and if it does, call it to the attention of your Agent and have him note this fact on the freight bill. Boxes are sometimes opened in transit, some of the goods taken out, and the box re-nailed. The transportation company is responsible from the time they receive the goods until they make final disposition of them at destination, but in order to establish their liability it is necessary in cases where there is loss or damage, to have the freight bill properly noted by the Agent at destination.

GOODS NOT ORDERED. If you find something in your order which you did not order or pay for, the chances are that we have sent you a substitute and some letter of explanation will be found with your bill, explaining why this was done. If, however, there is no explanation on the invoice or bill and you feel that the article you received could not possibly be a substitute for anything which you had ordered, the chances are a mistake has been made in filling your order, and you have received something which should have gone to some other customer. Give us a description of the article received and we will tell you what to do with it. In cases of this kind, we will of course reimburse you for any expense incurred in packing or returning to us anything which does not belong to you.

CHANGE IN PRICE. Certain articles such as sugar, flour, oils, etc. fluctuate in price from day to day and in our catalogue we state we reserve the right to change our prices without notice, so that, should you think that you have been overcharged on anything of this character, the chances are the market has forced us to change our price, in which case a letter of explanation will be given you so you may know why the prices shown on your bill are not the same as those you allowed. If there is no explanation on the bill, and the mistake seems to be clearly an error on our part in pricing or in making an extension, send the bills back with your letter of complaint and we will immediately rectify the mistake and send whatever difference is due you.

GOODS NOT SATISFACTORY. Every care has been exercised in the selection and pricing of the merchandise we offer for sale in this catalogue, so that we might give our customers the very best values possible to obtain for the money, but occasionally some customer may receive something that does not entirely please, in which case we would like to receive a letter of explanation before the goods are returned. Sometimes it is possible for the trouble to be rectified by letter, without the necessity of a return, or sometimes by making a certain allowance the customer would be satisfied to keep the unsatisfactory goods.

In any event, before returning anything to us for exchange or refund, we would like to have a letter of explanation, telling us just why the goods fail to come up to your expectations.

EXCESSIVE CHARGES. Freight and express charges are based on the weight of the shipment carried, and should you feel that you have been overcharged on your order see that the weights given on the freight or express bill are correct, and if they are not, have your agent rectify the weights and charge you accordingly to the correct weight. If you find the weights on the bill are correct and you still believe that you have been overcharged, send the freight bill to us with a letter of explanation, and we will have our rate experts check it over and if an overcharge is found, we will refund to you in cash, the amount due you and file claim against the Railroad Company to reimburse ourselves.

REMEMBER that we are extremely anxious that every transaction you have with us shall be very satisfactory to you and that we will go out of our way to do everything we can do to adjust any complaint you may make on any shipment which you receive from us. If you will observe the rules outlined above, we feel confident we can adjust, without annoyance or delay, any transaction which, through carelessness on our part or through the fault of the transportation company, may have gone wrong. We therefore, will ask you to kindly co-operate with us in every possible way so that we may give you the service you are entitled to when you become a customer of this house.

FREIGHT CLASSIFICATION

1 — Stands for First Class.
2 — Stands for Second Class.
3 — Stands for Third Class.
4 — Stands for Fourth Class.
5 — Stands for Fifth Class.
6 — Stands for Sixth Class.

1¼— Stands for 1¼ times First Class.
1½— Stands for 1½ times First Class.
D-1 Stands for 2 times First Class.
2½— Stands for 2½ times First Class.
3-T-1 Stands for 3 times First Class.
4-T1 Stands for 4 times First Class.

HOW TO FIGURE FREIGHT CHARGES.

Refer to freight classification table given below and find what class of freight the article takes on which you wish to find the charges. Then in the column giving that class of freight find the rate to your town, or the nearest point to it, and multiply the weight of the article by the rate and you will have the charges almost exact. For example. If you live at Johnstown, Penns., and order a stove weighing 280 pounds, you will find by referring to the freight classification that stoves take a third class rate. Turning to the table on freight rates you will note that the third class rate to Johnstown, Penns., is 29c per 100 pounds. Multiplying the weight of the stove, 280 pounds by the rate, 28c, you will find the freight charges are $0.81.

FREIGHT AND EXPRESS RATES

IN THE following list below are towns located in every section of the United States and Canada. You will be able to figure freight and express charges on any article you order from us. If your town is not given, take the nearest town to it that is listed and use the rates to that place; the rate to your station will differ only a few cents if any. The freight or express charges never amount to a great deal compared to the amount we can save you on the price of goods you buy from us. Remember that in order to get the best rates your freight shipment should weigh at least 100 pounds. In many cases it will cost no more than a shipment weighing only twenty pounds.

The Minimum Charge is the least amount for which a railroad will haul a freight shipment no matter how little it weighs. Below we give a column on minimum charges to towns named in list. To some towns there is no regular minimum charge; shipments to such towns are governed by rules. The letter of rule which is to be applied is given in the minimum charge column.

Rule A. The Minimum Charge is for 100 pounds at the class to which the article belongs, but not less than 50 cents.

Rule B. The Minimum Charge is for 100 pounds at the class to which the article belongs.

Express Charges. In the following table are given the express rates for 100 pounds but for shipments weighing less than that see table on graduated charges for express packages weighing less than 100 pounds.

The Consumer pays the freight. The expense of transporting merchandise from the source of supply to the retail dealer is as much a part of the cost of that merchandise as the materials of which it is made. You pay the freight no matter where you buy. It therefore is simply a question of where you can trade the more profitably—at home where stocks and qualities are limited or with us where the markets of the world are at your command.

HOW TO MEASURE AND ORDER MEN'S CLOTHING FROM US

You can order a suit, pair of pants or any other clothing you need from us quickly, economically and satisfactorily by making your selection from this book and by taking your measurements right in your own home. Our simple measuring and ordering plan enables you to do this without any previous experience and without the services of a tailor. Select the clothing you want and write out your order, using our order blank, if you have one. If you haven't one take any plain piece of paper and write your order on it. Let some friend or member of your family measure you. All the information we need is, first, state what size coat you wear (breast measure); second, tell us what size pants you wear (your waist and inseam measures); third, give your height, weight and age. Mail your order to us with remittance. Don't be afraid about making a mistake. It is so simple that there isn't one chance in a thousand that you will make one. Even if you did make one we would be bound to notice it, and correct it for you. Every order is carefully examined before goods are shipped. Your first experience will prove to you that it is just as easy and satisfactory to order men's and youths' clothing from us by mail as it is to order hardware, paints, furniture, and other goods. Thousands are doing it every day. Try it.

LIVE BETTER AND AT LOWER COST

Our grocery department easily ranks first in importance compared with any other firm conducting a similar department and primarily in importance among the many merchandise divisions in our big business. The rapidity of its growth in recent years is unusual, in fact, extraordinary; and so much so that we want to tell you of the policies followed to make this one of the largest and finest grocery stores in all the world.

MANY YEARS AGO we handled groceries just as we handled dry goods, clothing, shoes or hardware, and just as the majority of merchants are handling such merchandise to-day. We accepted what the manufacturer, packer, canner and producer offered us and passed it along to our customers. We decided one day in the long ago that there were satisfactory methods surrounding the sale of food products with every possible safeguard. We decided that we needed expert men to take charge of this important department; men who had grown up in the business, knowing methods and processes in the preparation of food stuffs for market; whose knowledge of qualities, source of supply, etc., would enable us to put R. H. Macy & Co.'s grocery store in a class by itself. We obtained the men. They knew conditions in the grocery business as then conducted by everyone, and they immediately made many important changes in our methods. We made it our business to find out day by day what was going from us to our customers in every package, can, bottle and bag, and raised our standards of quality many degrees. Our customers were quick in appreciation of our pioneer pure food work, and to recognize the value of our changed methods; they were quick to note improved qualities, our volume of output increased to the extent that our prices were lowered to the great financial advantage of our customers, and R. H. Macy & Co.'s grocery store quickly took first rank, shipping our pure food products to customers all over the world.

THE ADVANTAGE OF BUYING FROM US, AND WHY

THIS CATALOG does not show our complete line of groceries. As this catalogue is good for a year or more, it is impossible for us to list all groceries so far in advance, due to fluctuation in prices; but you are perfectly safe in sending us your order for grocery items, because if the market declines between the time you send us your order and its receipt here, we will promptly refund the difference to you in cash. Remember we aim to protect your every interest. The very largest stores in the big cities do not carry great stocks and the wide varieties shown by us, nor do they compete with us in matter of quality and price. Does it not stand to reason that the small retail dealer in the country town, who has a very limited volume of business, cannot begin to meet our prices, much less give you the splendid qualities we always send our customers on their orders? Merchandise passes through our hands so quickly, in that we sell such enormous quantities of goods, that they have no time to deteriorate in quality.

AS A COMPARISON In the ordinary retail store a box of prunes will last a week and it often stands uncovered, open to dust, dirt, and dirty handling by careless clerks. Under our methods it is impossible, because should a carload of prunes or raisins reach us to-day, it is sold and on the way to a thousand customers to-morrow. We guarantee to give you absolutely pure food products. We guarantee that you cannot get better qualities anywhere, no matter where you buy. And we further guarantee that should you not be satisfied in every respect with the goods shipped to you as to size, style, quality or for any other reason, we will cheerfully refund your money.

THIS CATALOG BRINGS OUR GOODS TO YOUR HOUSE

AFTER YOU HAVE GLANCED OVER the grocery pages in this book you will find that this enormous grocery enterprise with its wonderful facilities has been brought direct into your home and that it will be easier, in fact a pleasure to shop right in your own home, instead of going from door to door, suffering all the attendant indignities and disappointments in your attempts to buy high grade groceries at exceptionally low prices. By buying from this catalogue you will also find a greater variety to select from than you could possibly find in the average retail store, and that we quote a considerable range in price, covering several grades. If you have never tried sending to us for groceries, you can have no idea how satisfactory it is to sit under the evening lamp, and make up your grocery order from the pages of this great book. When your shipment arrives, in just a few days, it comes carefully packed, everything opens up clean, fresh, and satisfactory.

OUR EXTREMELY LOW PRICES ON GROCERIES

LOW PRICES have drawn to us a tremendous patronage. We admit other grocery stores give first quality goods, are considerate in treatment of their customers, etc., but there is no store anywhere which combines high qualities, prompt service and careful attention to customer's needs with the low prices quoted in our grocery department. First and foremost, the volume of our business is so large, that we buy in carload lots or entire outputs, thereby saving the middleman's profit, and enabling you to derive the benefit of a saving of from 10 to 50 per cent.

AN IDEAL GROCERY STORE

NO OTHER DEPARTMENT in this huge business has won so much support as our grocery. The purchase of groceries is unquestionably the largest portion of the family expense, it is therefore of vital interest that this expense be reduced as much as possible. However, a matter of equal importance is the purity and wholesomeness of canned goods and the sanitary conditions surrounding the manufacturing, packing, and handling of groceries, canned goods, etc. All this and more is attained through our extensive laboratories and its staff of expert chemists.

PURITY INSURED BY OUR LABORATORIES

WHEN YOU SEND US AN ORDER for groceries and include in it baking powders, sodas, extracts and items of a similar character, there is nothing about the bottles, boxes, or packages, or their contents, showing the care, time, money and ability expended before the goods were ready to be shipped to you. Since the beginning of agitation in favor of pure foods, in order to safeguard the interest of the consumer, all large wholesalers of food products have employed expert chemists. In taking up the question of employing chemists, in order to insure purity in all food products sold by us, we found that something more than the occasional advice of a consulting chemist was needed. We found that vast improvements in the quality and great reduction of cost could be made by creating larger laboratories, with scientific equipment and installing a permanent staff of chemists. It has never been our policy to do things half-heartedly; we therefore established our laboratory. Its great success has been proven again and again since we make hundreds of articles formerly purchased from manufacturers, and this department now occupies thousands of square feet of floor space with a daily capacity far in excess of some of the largest independent laboratories in this country.

IMPROVED QUALITIES AND LOWER PRICES

BY THE INSTALLATION of the necessary scientific apparatus, manufacturing equipment and employing our own chemists we are enabled to guarantee our goods as well as produce them at a much lower price than under former conditions. The great volume of our business is, of course, a very large factor in helping us bring manufacturing and producing cost to the lowest possible figures. A store with a very small volume of business could hardly go into the open market and buy the raw materials in sufficient quantities to obtain any special price concessions. Our prices, therefore, are based on the cost of raw materials purchased at first hand, manufactured in enormous quantities by ourselves under ideal conditions and then distributing this merchandise among our customers, with a small manufacturing profit added. Under these conditions there is only one transaction from us to you, removing the wholesalers', jobbers', and other middlemen's profits. We are so sure of our qualities that we guarantee the goods we send you to be all that we represent them to be, to prove entirely satisfactory to you, or you may return them to us and we will refund your money, including cost of transportation charges.

WHEN IN A HURRY order your groceries from us. We fill orders promptly and deliver quickly by fast freight. Probably you have never sent us an order because you were afraid that you would have to wait a long time for delivery. Such is not the case. All of the goods listed in this catalogue and many more are carried by us in large quantities. We have every facility for quick handling and make a specialty of filling grocery orders promptly. New York is the greatest railway center in America and the railways of today carry merchandise by fast freight, insuring quick deliveries in a large territory within twenty-four hours after shipment leaves New York. Surely under these conditions you can well afford to send us a trial order at least, and we feel that you will be more than satisfied with the results.

GROCERIES SECURE LOWEST FREIGHT RATES

THOSE WHO HAVE NEVER ORDERED of us before are sometimes made to believe that the transportation charges will be more than the saving we make you. This is an erroneous idea, because groceries as a rule take the lowest freight rate, fourth class, and the freight rate of carrying one hundred pounds several hundred miles amounts to nothing as compared to the saving you make by ordering from us. In making up an order for groceries, please bear in mind that railroads base their rates on a hundred pounds. For instance, the freight charge will be as much on an order of five pounds as on a hundred. We therefore urge you to bring your purchases up to a hundred pound weight. It is easy to make up a hundred pound order because there are many bulky goods you use daily, such as rice, rolled oats, dried fruits, etc., and the prices on these goods are extremely low. In order to find out in what class and rate your goods belong turn to our table of freight rates and freight classification in this catalogue and by consulting these tables and finding the rate to the town nearest to you, you may very easily find what the freight charges will be to your station. Do not let any one make you believe that freight charges will be excessive or that it will require much time to get the goods to you. We have thousands of customers who find ordering from us satisfactory and economical.

REDUCED PRICES ON TEAS FROM THE BIG MACY TEA STORE

We have room for only a few of the great variety of teas carried in the great Macy tea store, but these are very popular and worth at least a third more than our price.

Curio Chop Ceylon—Mountain grown teas have a superior flavor to the valley products. This is a high grown Pekoe black-brown leaf, brewing a rather highly flavored cup. Appearance and richness of color have been sacrificed to produce pleasant taste and flavor in this brand.

33B1631 Price per 5 pound caddy... $1.59
33B1632 Price, per 10 lb. caddy..... $3.02

Pekin Mixed. This is a fine blend of black and green tea that makes a delicious red colored beverage. It is a much better grade than you will find in most retail etores at a bigher price. Our tea business is so large that we buy from first bands, and our customers reap the benefit.

33B1633 Price per 5 pound caddy... $1.14
33B1634 Price per 10 lb. caddy..... $2.16

This is a very good tea, nut quite as strong as the Formosa, yet not a mild tea. A blackish-brown leaf that brews a dark brown liquor of a desirable flavor. Tea of this quality is often sold for a great deal more than this very low price.

100A3024 Price per 5-lb. caddy $1.14
100A3025 Price per 10 lb. caddy $2.16

Curio Japan Tea is a Panfired, well formed leaf for lovers of moderate strong beverage. Has excellent cup quality, and will please nearly everyone. One of our favorite brands, for which we have a constant demand. Exceptionally low price for tea of such good quality.

33B1635 Price per 5 lb. caddy..... $1.59
33B1636 Price, per 10 lb. caddy..... $3.02

India and Ceylon Teas

There are no better judges than the English, and this has for many years been one of their favorites—rich, full-flavored and with a delicious aroma. The following brands challenge comparison with those so widely advertised by the great English houses. They are all packed in heavy lead one-pound cartons, insuring the full retention of their wonderful aroma.

Our Low Prices

Are not made at the expense of quality—on the contrary we never overlook an opportunity to increase the quality where possible. You cannot afford to buy groceries at the ordinary store in the ordinary way for the reasnn that your goods are not fresh and wholesome. A trial order will convince you of our ability to serve you satisfactorily and well.

Formosa Oolong Tea

We are one of the largest direct importers and sole proprietors of the following chops of Oolong: All of these teas are absolutely pure. It is simply a matter of grade and flavor.

All are teas of excellent flavor and will give the very best of satisfaction. We sell enormous quantities of these four grades, our sales testifying to the general favor in which they are held.

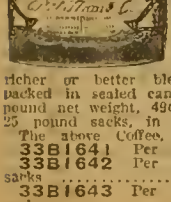
THESE PRICES SAVE OVER ONE THIRD ON COFFEES

Hundreds of our customers who buy their Coffee supplies here year after year will tell you that the grades never vary from one year's end to another. We handle every pound with mathematical precision, buying the green bean by tons and tons, roasting in our own Coffee roasting plant, and blending every grade according to methods proved most satisfactory. There's more in the blending than you think; it's as important as food seasoning. Then the prices: No matter what particular blend pleases your fancy, you may be sure to get it at the lowest price possible. When ordering, please state whether beans, granulated or pulverized are desired.

Genuine Old Mandehling Java and Arabian Mocha



Not one coffee drinker in a thousand would like Mocha alone or Java alone. Certain blending brings just the right flavor and strength. There is no finer Coffee grown than this Mandhreling Java and Arabian Mocha, and it is mixed in the proper proportions to please the most exacting palate. No matter what price you're willing to pay for coffee, you can't buy a richer or better blend than this. It is packed in sealed cans, each containing one pound net weight, 48c each, $5.48 per dozen, 25 pound sacks, in the bean only, $11.22

The above Coffee, green in the bean:

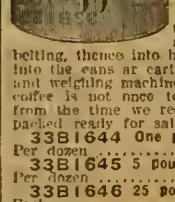
Orient Brand Coffee



A blend of the best coffee grown in the Far East. Delicious in flavor; fragrant, full bodied and mellow. Connoisseurs will recognize the style peculiar only to coffee grown in these countries under the highest forms of cultivation. All of our coffees are cleaned, milled, stoned and roasted by continuous machinery. After the roasting, the cooled bean is taken in both grinding and pulverizing mills by belting, thence into hoppers, where it is filled into the cans or cartoons by automatic filling and weighing machinery. In other words, the coffee is not once touched by human hands from the time we receive it green until it is packed ready for sale.

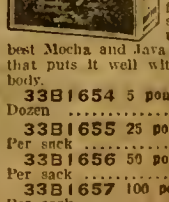
Genesta Brand Coffee



Here is an old Government Coffee Blend—rich, ragrant, mellow, regarded by many as the equal of the best Mocha and Java combination; but we make no such claim for it. It is an excellent and satisfactory combination of those old Government grades that are so well liked by many coffee users, and to them, no doubt, it is the best coffee in the world. We're sure it is far superior to many of the so-called best Mocha and Java mixtures, and at a price that puts it well within the reach of everybody.

RED STAR BRAND FLAVORING EXTRACTS

Many flavoring extracts are pure with no other quality to recommend them. Usually they are without strength and flavoring quality. The Red Star Flavoring Extracts possess absolute purity and cannot be excelled for the strength and high quality of their flavoring power. For twenty years, we have been compounding these extracts in our own Laboratory using only the best materials obtainable, and in all this time we have never received a complaint concerning them. Thoroughly tested by our chemists to insure uniform high quality. In buying this brand, you get the best to be had at the same price you would pay for inferior goods elsewhere.

Tomato Catsup

Good tomato catsup is the easiest thing in the world to imitate—in appearance; vegetables of various kinds may—and do—serve, with the addition of a little cheap coloring matter. But when it comes to the "eating thereof," it's a different proposition. Our Lily White catsup is made of the finest red-ripe tomatoes, especially selected, combined with pure spices—and the result is a condiment that the most particular palate will find delicious.

Canned Fruits

It is impossible to be too particular in the selection of fruits for canning, and in the methods for preserving them—and in almost no other product is it so easy to detect at once an inferior or a superior grade. We insist upon fresh, ripe fruit, pure sugar and hand-packing—and the result is a perfect preserve, in a rich, heavy syrup, with all the natural flavor of the fresh fruit.

Russian Caviar

We have been rated for years as the leading importers of the highest qualities of Caviar that are brought to this country from Russia. We get it direct in weekly shipments from Nicolai Schelesch, of Warsaw, Russia. One highest grade Beluga Malossol is too delicate to stand transportation, therefore, we do not deliver it, but we quote the genuine Prime Beluga, which is just salted enough to carry the same and that is sold by many dealers as the genuine Malossol.

AN ARGUMENT SOMETIMES USED

to influence prospective customers not to send orders to us is that while our prices may be less than the prices quoted by others, the delay which must follow the writing of a letter and the mailing of an order to us at New York, and then the packing, and shipping, and the delivery of the merchandise to you is so great that you are inconvenienced, whereas if you buy in your own home city or town, you may get the goods the same day they are ordered. While it is true that it requires a little more time to order from us by mail, it is not true that there is any great delay in filling orders. It only takes a day or two for your letters to reach us. The order is filled immediately, unless it is for merchandise which must be made to order, in which case we can make it to order just as quickly as any other dealer. The fact is our orders are filled as quickly as received, and it only takes a very little time for needed merchandise to reach you, as the transportation companies now handle freight and express under such improved conditions that goods go through very promptly and reach the customer in first-class condition. We guarantee that merchandise ordered from us will reach the customer safely. That is another one of the things which you may depend upon absolutely.

Yellow Corn Meal

Real granulated Meal, cleanly ground, free from dust and other impure substances, made from finest selected yellow corn. Contains as great a percentage of blood making and health building properties as wheat and valued by the discriminating housewife accordingly.

EXCLUSIVE PRODUCTIONS FROM MACY'S

These fine dress materials are in many cases made for us and in many instances cannot be procured in any other store. You cannot buy better wearing silk and we guarantee every yard to be perfect. You cannot buy better wearing silk dress goods at any price, and for appearance and fine finish they are equal to any on the market. They are all made on specially designed looms, and the very best grades of silk yarn and the very best workmanship goes into the manufacture of these products. Most of the grades are dyed in the yarn, which insures permanent colors. We recommend these goods very strongly as being very durable and haven't the slightest doubt that you will be perfectly satisfied with whatever selection you make.

There is no store in New York, or anywhere else, for that matter, that can offer anything like the silk values to be obtained here. We are known to be the heaviest silk buyers in the country, and in addition have mills of our own that supply the great demands made on our silk departments. We never sell at wholesale, but many of our retail prices are lower than most dealers can buy for.

Our Marchioness Silks are the best silk values obtainable anywhere. Besides the silks, you buy our guarantee, which is worth a great deal.

Satin Messaline

This extremely handsome material is proving to be just as popular this season for the better grade of fashionable waists, full costumes and skirts, as it has been in the past. Our showing this season comprises some of the prettiest shades and colorings that the mills have been able to originate, and we can assure you that garments made from it will be extremely fashionable. It is a most splendid material to use as a foundation for Silk voiles or Marquisettes. It is a medium weight material, with a soft and lustrous surface that gives it the appearance of being much more expensive than it really is. We have it in a large variety of colors, including besides white, ivory and cream, many pleasing shades of pink, ciel, mais, lavender, Copenhagen, navy blue, tan, and many other attractive colrs. Samples will be sent if you desire them, or you can safely order from this description.

Colored Satin Crepe

This is an exceedingly beautiful and decidedly fashionable material for which we are having great demand. Satin Crepe has a beautiful satin weave with a fine, very lustrous, crepe finish. It is very desirable for the most fashionable waists and customes, as well as many other of this season's most stylish garments. Besides the always popular white, ivory and cream, we have it in a range of beautiful colors, including many attractive shades of tan, navy blue, Copenhagen, lavender, mais, ciel, ping, etc.

30B105 40 inches wide. Price, per yard..... $1.49

30B106 42 inches wide, a very superior dress quality, somewhat heavier and much finer in texture. Price, per yard $2.79

Colored Liberty Satin

This is a rather light-weight, all-silk Satin, handsomely woven, and with a fine lustre only found in much higher-priced materials. It is very extensively used for whole dresses, separate waists, and is also used for millinery purposes. It is also a very popular material for evening dresses, the better grade of children's party and confirmation dresses, and also for the foundations of Silk voiles and Marquisettes. We have Liberty Satins in several grades, the cheapest of which is better than the so-called best grades in many stores. Our color assortment includes some of the latest and most popular shades, such as white, ivory, cream, pink, mais, ciel, tan, green, navy blue, Copenhagen, lavender, etc., and all in several tones. Liberty Satin is an always popular dress material of which we make tremendous purchases every season, thereby enabling ourselves to undersell all other stores.

Colored Crepe Meteor

This is a very fine silk fabric, which, besides being decidedly fashionable and having a beautiful appearance, has remarkable wearing qualities. It is woven from the finest, pure silk, the weave being in the popular crepe effect, and has a very soft, handsome satin finish. This is one of the most widely used materials for the most fashionable waists and evening costumes, as there is hardly anything that drapes better or makes up more satisfactory for fine women's wear. It is always in style, as popular in winter as it is in summer. We are quoting as exceptional value in this number as our price for this fine fabric is much lower than you will be able to buy it for elsewhere. We can supply it in a wide variety of popular colors, having many shades of each color, some of which are pink, ciel, mais, wistaria, navy blue, Copenhagen, and tan, as well as white, ivory and cream. Samples will be sent if requested.

49c FOR PRINTED FOULARDS

22B2000 Printed Foulards, the season's most approved dress fabric in varied designs on colored ground. You will certainly be delighted with this fine fabric. The designs are beautiful and new, the quality cannot be found elsewhere at this price. We will be glad to send you samples if you would like to see them, but if you will tell us the color you want and about the pattern you wish we will undoubtedly please you if you order without seeing samples; width 23½ inches; in staple colors as rose, reseda, brown, navy, black, grey ground with varied designs. Price per yard 49c

White Japanese Silks

This lightweight imported silk fabric has always been considered one of the most popular silks for general use. Although it is an all-the-year-round material, and fashionable at all seasons, it is particularly attractive for late spring and summer wear, and is extensively used for fine waists, dressee, street costumes, evening and bridal gowns, and a variety of other uses for which a high-grade, medium-priced silk could be advantageously put. It is neatly and attractively woven from pure silk yarn and has a nice smooth surface. We have this fine silk in two widths only, 27 and 36 inches. Our prices are the lowest for which these goods can be bought anywhere. You are perfectly safe in selecting any of these numbers.

Colored Satin Panne

This is an extremely rich-looking, velvet finished Satin of the very best quality, and will give excellent service and satisfaction. It is a splendid material for fashionable waists and dresses, and while very extensively used for evening costumes, it is especially adapted for street gowns of the better grade, as it is of good weight. This same goods is now on sale in many reliable stores at $3.00 a yard. We have it in an extremely wide range of colors, including many attractive shades of blue, Copenhagen, navy blue, tan, lavender, mais, ciel, pink as well as the always popular white, ivory and cream. There are also many other colors and shades, to suit any taste and to harmonize with any other color.

30B109 44 inches wide. Price, per yard..... $2.69

Colored Satin Mignonette

This is a splendid silk and wool material that is particularly adapted for street wear, such as wraps, coats and full costumes. This is an especially attractive offering, as it is made expressly for us by one of the best-known silk mills in this country, and we can therefore sell it much cheaper than you will be able to buy such fine material for at any other store. It is finely woven from the very finest silk and wool yarn, and is the best material for outdoor wear that you could buy at any price. Like all our high-grade silks, we have this Stain Mignonette in an extensive variety of shades and colorings, some of which we mention here: white, ivory, cream, ciel, pink, mais, lavender, navy blue, etc. If you desire it we will aid you in your selection by sending you samples of any colors you wish, although you are safe in ordering direct from the catalogue.

Imported English Wash Silks

This is an extra fine grade of fine wash silk, which we import ourselves, and which we can guarantee as an exceptional bargain. It is a very durable fabric made in that fine twilled weave, for which the English mills are so famous. Wash silks, not nearly as good as this are on sale all over the country at $1.50 a yard, and are being extensively bought at that price. Here is a chance to effect a very desirable saving without sacrificing one bit of quality, in fact you get better goods for less money. This Wash Silk is extensively used for waists and dresses for spring and summer wear, and is especially adapted for the finest grades of Men's shirts—its laundering qualities making it especially desirable for this kind of wear. This imported silk comes in a white ground color with stripes of several attractive colors. Samples of any of these colors will be sent on request, or you can safely order direct from this description.

Black Crepe-de-Chine

This is the most staple and popular of all the silks in the market. The demand for it is as great in the summer as it is in the winter, and it is always fashionable. It is made with a fine, soft, clingy weave, and has that soft crepe effect that gives it its name. It is a very durable fabric, and is extensively used for fine waists, dresses, street and evening gowns. Popular in all colors, the black is extremely so, especially at this season. We are offering some very choice selections here, every one of which is a typical Macy silk bargain.

22B236 48 inches wide, very best quality, unusually wide. Price, per yard.....$2.97

Black Japanese Silks

One of our very popular imported numbers, a great favorite because of its fine quality and low price. It is handsomely woven from high grade silk and is of rather light weight, although wonderfully durable. It is finely adapted for waists, dresses and traveling gowns, and is also much used for evening wear. We are listing two widths and several grades, and at prices that many dealers would like to buy the same goods for. We underbuy everyone and can well afford to undersell.

22B242 27 inches wide, good quality at extremely low price. Price, per yard..... **49c**

22B243 30 inches wide, same quality, but wider. Price, per yard.79c

22B249 27 inches wide, very best grade, regular $1.50 goods. Price, per yard..... $1.2

Black Imported Grenadine Satin

While this is a bright finished fabric, it is not quite as lustrous as Satin Crepe. It is a very finely woven fabric and is of good weight, heavy enough for street wear, although very extensively used for waists and full costumes. It has a very soft finish, and is admirably suited for garments that require a good-draping material. Like all our high grade silks, it is offered at a very low, money-saving price—a lower price than you will be able to get the same material for elsewhere. Many of the silks you read about here are made exclusively for us, and we are therefore able to undersell all other stores.

22B197 42 inches wide.
Price, per yard..... **$2.79**

Black Silk Pongee

Among the moderate priced silk fabrics, Pongee is always a favorite, as it is well adapted to making very fine looking and good wearing garments for home and street wear, such as waists, dresses and gowns, as well as fashionable costumes. It is a smoothly woven, soft fabric, with a dull surface, sheds dust readily, and does not show spots and stains as quickly as many higher priced goods. Silk Pongees are usually sold at from 20 to 30 cents a yard more than we ask for the same quality goods. It pays you to buy your silks here, as even with transportation charges included, you get better values than you can get elsewhere.

22B237 26 inches wide.
Price, per yard..... **69c**

22B248 27 inches wide, a finer quality. Price, per yard..... 89c

Black Rough Silk Shantung

This is a fine silk material, woven with a rough finish, to give the hand-loom effect. It is decidedly fashionable this season for fine waists, suits and street costumes. The material is of the finest silk, and compares favorably with the imported grades sold at nearly double the price of American goods. It is a good wearing material, and in spite of its rough weave, does not show dust or dirt. You can make no mistake in selecting this as you will undoubtedly get very good value for your money.

22B239 26 inches wide.
Price, per yard..... **99c**

22B240 26 inches wide, a finer and heavier grade. Price, per yard..... $1.29

22B241 36 inches wide, fine heavy quality. Price, per yard..... $1.69

Black Moire Renaissance

A very fine grade of the Moire weave Silks, but with the Moire effect brought out very clearly, and with a more even surface than is usually found in this class of goods. It is much used for coats, wraps and full costumes, and as trimming for the more expensive millinery. It is not a lustrous fabric, but reflects brightly the grain effects which are worked into the weave. This is a very fashionable material, but is not faddy by any means. It is suitable and appropriate at all seasons. Our prices for this fine goods are a good deal lower than you will be able to buy them for at any other store.

22B254 21 inches wide.
Price, per yard..... **$1.69**

22B255 22 inches wide, fine quality.
Price, per yard..... $1.89

Black Silk Armure

A very stylish fabric for this season's wear. It is woven in that beautiful basket or bird's-eye effect, the pattern of the weave being plainly visible. It is a very fine material, and is exactly the same on both sides, a very desirable feature. It is particularly adapted for mourning wear, although extensively used for street costumes. It is also popular as a millinery trimming. We have selected three very choice widths and grades for this listing, and each one of them is a rare bargain.

22B256 19 inches wide, very fine quality, and good weight.
Price, per yard..... **79c**

20B257 20 inches wide, a finer weave and slightly heavier.
Price, per yard..... 99c

22B258 24 inches wide, very fine weave, and splendid quality.
Price, per yard..... $1.34

Marchioness Black Faille Francaise

This is a cord-weave fabric with the cord effect prominently outlined, and considerably larger than in the Gros grains. It is a soft, velvety feeling fabric, with a semi-lustrous surface that is very attractive. This is a better looking and better wearing material than many that you could buy elsewhere at $1.25 and $1.50 a yard. It is nicely adapted to fine dresses and costumes, and is often used for making street garments of the better grade. All the Marchioness products are made exclusively for us, and we sell them at much lower prices than any similar dress materials can be bought for anywhere else.

22B290 20 inches wide.
Price, per yard..... **99c**

Black Faille Francaise

This is a very soft, fine finished material, with a ribbed surface, showing plainly the cord weave. It is a medium weight fabric, although it has the appearance of being much heavier than it really is. One of the handsomest and most stylish of black silks for fine waists and dresses. While the surface is bright and velvety, it is not at all lustrous, and has a rich-looking appearance hard to find in any other material. We are offering exceptional bargains in this fine selection.

22B259 20 inches wide, a nicely woven, soft finished grade.
Price, per yard..... **99c**

22B260 20 inches wide, a fine superior finish, and very soft.
Price, per yard..... $1.24

22B261 21 inches wide, better weight, with very fine cord effect.
Price, per yard..... $1.49

22B262 27 inches wide, superior quality, fine heavy cord effect, and very good weight. Price, per yard.... $1.98

Marchioness Black Peau-de-Cygne

A very fine silk dress cloth, made with a high Satin finish, and with considerably more weight than Messaline. It is a beautiful fabric and one that drapes fine and gives excellent wear. The surface is bright, but not lustrous. It is widely used for waists, dresses, suits, and costumes, and is always fashionable. We are selling great quantities of this material to discriminating buyers, who can appreciate good values, as the prices are very low for the quality we give.

22B274 20 inches wide, very fine grade, and very popular.
Price, per yard..... **99c**

22B275 23 inches wide, extra fine grade and superior finish.
Price, per yard..... $1.24

22B276 24 inches wide, very superior quality. Price, per yard... $1.49

Marchioness Black Peau-de-Soie

A medium weight material, woven from the finest silk and made with a fine, soft, velvety surface which gives it a peculiar richness. It is a splendid wearing material and is extensively used as a waist and dress material, and for fine evening wear. This grade of dress goods is very much in demand just now, and we are selling great quantities of it. It is one of the handsomest silk dress goods you can buy, and one that will give you great value.

22B277 20 inches wide, a very good selection.

22B284 36 inches wide, very good grade in extra width.
Price, per yard..... $1.98

Marchioness Black Grosgrain Silks

A cord weave dress silk, with the rib clearly defined but very small, and close. Its peculiar weave gives it more body than is found in many other weaves, and makes it very durable. It is exactly alike on both sides, has remarkably good dust shedding qualities, and is a very desirable fabric in every way. It is one of the very best weaves produced for good wear, and is very fine for rich-looking dresses. It is extensively used for waists, and is particularly adapted for outdoor wear. Every one of the three grades listed here is a good bargain and has been carefully selected from our large assortment.

22B285 20 inches wide, medium weight, very good quality.
Price, per yard..... **99c**

22B286 21 inches wide, very fine quality, heavy weight.
Price, per yard..... $1.29

22B287 22 inches wide, extra fine quality and good weight, worth $2.00.
Price, per yard..... $1.59

Black Peau-de-Sapho

This is an important silk of excellent quality, though priced exceedingly low. It is a fine, evenly woven satin of semi-lustrous surface, and is of medium weight. It is a fine-wearing material, and has never failed to give satisfaction. We import this class of goods ourselves.

22B250 20 inches wide.
Price, per yard..... **94c**

Marchioness Black Silk Armure

A very soft, medium weight dress goods made in the pretty basket, or bird's-eye weave, and alike on both sides. The weave pattern is rather pronounced and gives the cloth a rich, velvety appearance, but without any of the gloss. This material is mostly used for mourning garments, although it is suitable for dresses and street wear, where a rich-looking, soft cloth of medium price is desired. It is a good-wearing material, and has our recommendation the same as all our Marchioness products.

22B291 20 inches wide.
Price, per yard..... **99c**

Marchioness Black Surah Silk

This is an old favorite with silk users, and is just as fashionable and popular as it ever was. It is a soft, twilled weave fabric, made from very fine silk yarn, and has a fine rich looking appearance. It is extensively used for fine waists, separate dresses and full costumes for street and evening wear. We sell great quantities of this excellent dress material, as it is an exceptional value and wears very well. Dress goods of similar construction, but inferior quality are often sold at $1.20 a yard.

22B292 20 inches wide.
Price, per yard..... **99c**

Marchioness Black Silk Taffetas

This is a carefully selected line of Taffeta Silks, all the items giving the very best value for the money. Taffetas are just as popular as they have been in past seasons and seem to be the best adapted material for fine petticoats and underskirts, as well as for waists and dresses. This grade is made exclusively for us. We can recommend it to be a fine wearing fabric and one that never fails to satisfy.

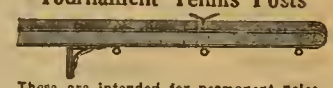
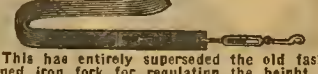
Tournament Tennis Posts



These are intended for permanent poles, as they are to be sunk into the ground, going in about 18 inches. They are made of fine hardwood, 2½ inches square, and are handsomely painted red. There are brackets to steady the poles and take up some of the strain of the net.

38B44244 Price, per pair..... **$2.97**

Canvas Center Strap

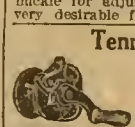


This has entirely superseded the old fashioned iron fork for regulating the height of the center of the net to three feet. It does not deflect the ball striking it, as did the iron fork, neither does it chafe the net. A very desirable addition for any tennis outfit, and one that will give great satisfaction.

38B44239 Canvas center strap, with snap hook and bottom iron.
Price each **89c**

38B44240 "Match" pattern Canvas Center strap, with brass swivelled turnbuckle for adjusting the height to a nicety; very desirable for tournaments. Price..$1.14

Tennis Post Reels



This is a necessity for every permanent tennis net pole, as it does away with the clumsy rope fastenings. A turn or two of the crank, and the line is adjusted as tight as you wish. Has a dog for holding the reel in the position desired, and a pin for fastening the loop of the line.

38B44245 Price, each **$1.39**

How to Launder Colored Linens

In the defence of manufacturers and dyers it must be stated that in no other countries are fabrics subjected to such hard usage in laundering as here. There are few colors on any class of material that can stand the chloride of lime, the strong potash soaps, or the acids commonly used in machine laundries. When wash fabrics of any kind are sold the customers should fully understand that the colors cannot stand such ill-treatment.

Washing Directions

Before washing soak thoroughly in a solution of one cup of salt to one pail of cold water.

Wash by hand, while wet, with a mild soap in hot (never boiling) water.

Never send colored linen to the ordinary laundry. Never wash linens of different colors in the same water. Never allow them to come in contact with boiling water. Never use strong lye or potash soaps or washing compounds.

If these instructions are faithfully followed the customers will have no trouble with any but the most fugitive colors.

23c Per Yard for 27-inch Waterproof Tan Poplin

61B4319 This is a plain color fabric. It is medium weight of exceptional softness and beauty in finish. In construction it resembles the famous Hindoo poplin, such is its airy and lustrous surface. This material is treated with a waterproof process, rendering it impervious to water and rain, preserving its natural beauty. It is very popular because of its serviceability at the seashore and in damp weather. It is made in the popular linen color only. Width 27 inches.

9c Per Yard for Plain Colored Cotton Duck

61B4320 This is a strong and firmly woven fabric of splendid wearing qualities. It is a material largely used for skirting, suiting and children's wear. It comes in navy blue, light blue, tan, pink, medium brown, cadet, myrtle green, cardinal and black only, and is 28 inches wide. Considering the price we ask for it, you are getting a very unusual value, when you consider its splendid wearing qualities. It is but another of the many examples shown in the pages of this big catalogue, which prove our underselling supremacy.
Price, per yard..... 9c

lish Twilled Suiting 28c Per Yard

61B4321 This is an imported twilled fabric, woven of extremely fine twisted combed yarn and so thoroughly constructed as to render it exceptionally serviceable. This material is ideal for skirts and suits, as it is probably the sturdiest fabric of this kind used for this purpose. It comes in dainty hairline stripes of red, navy blue, and black on white ground and is 27 inches wide. If you have little people to clothe, by all means order this dependable fabric. Price per yard 28c

Genuine Khaki Suiting

61B4322 This is a strong, weighty, twilled fabric, woven of an unusually stout cotton yarn. This material is used for boy's Soldier's Suits because of its good wearing qualities and fine appearance. It is dyed a reddish tan, and the greatest care is exercised with the dying process to produce a color as permanent as possible. It is used for outing garments for both men and women, also for riding habits, boys' clothing, and boys' Indian suits. 27 in.
Price, per yard 14c

61B4323 This Khaki Suiting is 27 inches wide and a much finer and firmer grade than that described above. It is very strong and durable. Price, per yard..... 23c

61B4324 This is an imported Khaki Eton Boy's Suiting, 27 inches wide. It is a fine twilled, medium weight fabric, soft and pliable. This is one of the most desirable fabrics of its kind for suitings, and as it is an imported material, it possesses all the strong qualities for which the foreign manufacturers are famous. We import it direct from the maker, and it is ideal for boys' suits and women's skirts and suits. Our price is very low. Price, per yard. 27 in. 28c

61B4325 This imported Khaki suiting is the Government Standard weight. It is the best quality of Khaki suiting that we carry. 27 inches wide. Price, per yard..... 46c

28-inch Cotton Covert Cloth 14c Per Yard

61B4326 This is an especially strong twilled material and is firmly woven with a view to long service. It is extensively used for skirts and suits and comes in colors of navy, tan, and brown mixture. At the price we quote you will surely find this a value not to be equaled by ordinary retail dealers. Only our large sales together with our economical selling methods and policy of adding only one small profit to first cost, makes this price possible.

Asbestos Table Pads and Mats

These are the only pads that are guaranteed to protect the tops of polished tables from the ruinous effects of hot dishes. The larger pads are made with a layer of asbestos on each side, and filled with a heat resisting composition which renders them an absolute protection. Another advantage they have over ordinary table pads is a removable canton flannel cover that can be taken off and washed, thus always insuring a clean pad. They come in two parts, each folding in three sections, which makes them easy to handle when not in use. Small sized mats of the same quality, covered on one side with a soft felt. Can be had in the following sizes:

THE ARGUMENT

Sometimes used to influence prospective customers not to send orders to us is that while our prices are lower than the prices quoted by others, the delay which must follow the writing of a letter and the mailing of an order to us at New York and then the packing, and shipping, and the delivery of the merchandise to you is so great that you are inconvenienced, whereas if you buy in your own home city or town, you may get the goods the same day they are ordered. While it is true that it requires a little more time to order from us by mail, it is not true that there is any great delay in filling orders. It only takes a day or two for your letters to reach us. The order is filled immediately, unless it is for merchandise which must be made to order, in which case we can make it to order just as quickly as any other dealer. The fact is, our orders are filled as quickly as received, and it only takes a very little time for needed merchandise to reach you, as the transportation companies now handle freight and express under such improved conditions that goods go through very promptly and reach the customer in first-class condition. We guarantee that merchandise ordered from us will reach the customer safely. That is another one of the things which you may depend upon absolutely.

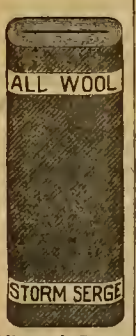
ALL WOOL STORM SERGE

36 INCHES WIDE — 47c YD. — 36 INCHES WIDE



This fabric is so well known to our patrons that it needs but little description. This all wool serge stands first among dress fabrics. More suits and skirts are made from it than from almost any other material. The reason for this is that it has proven itself always seasonable and gives the wearer the best of service. The sterling wearing qualities of this number coupled with the Macy policy of underbuying and underselling, has placed it in many of our customer's homes and we have yet to receive a single complaint. This fabric is to be had in the convenient 36-inch width, which permits economical cutting. The liberal assortment of colors which includes navy blue, garnet, cardinal, light grey, dark grey, and black makes this serviceable and popular material generally adapted to all requirements. Samples of the black or any of the colors sent to any address on request. It isn't necessary to have samples before you order, however, as we guarantee satisfaction or your money back. All wool Storm Serge, 36 inches wide.

THIS ALL WOOL PANAMA 41c

THE MOST POPULAR LOW PRICED FABRIC MADE

Among the medium weight dress goods, Panama has always been a leader. It is particularly popular now, as our heavy sales lead us to believe. This is a splendid all wool fabric; and a favorite material for dresses, suits, skirts, etc., for outdoor wear and extensively used; its medium weight makes it an all-around dress material. It wears better than serge, and its closely woven texture prevents it from sagging. An all-around handsome material, that cannot be duplicated at anything like our price. We can supply this fine quality in all the latest shades, including navy blue, cadet blue, garnet, myrtle green, brown, dark grey and black. In appearance and wearing qualities this excellent material will please you, and you could do no better than order enough of it for a dress or suit. If you desire we will send samples of any of the above colors. This is one of the best suiting values we have to offer. This all wool Panama is 36 inches wide.

OUR PRICES ARE THE LOWEST IN AMERICA ON GOODS OF QUALITY

NEW YORK PRICES ARE LOWEST

and R. H. Macy & Co. establish prices in New York City. Every page in this big general Catalogue sparkles with attractive prices. Every page means economy for you. Every page increases the purchasing value of your dollar, if you spend it to us for needed merchandise. Every page offers you price savings that are greater than those offered you by any other dealer, at home or elsewhere.

BUY WHERE YOUR HOME MERCHANTS BUY.

Buy in the market that establishes values. Merchants from all over the United States come to New York to buy merchandise. Why don't you buy in the same market that your merchant patronizes? Why buy in inland cities and towns and pay prices asked in usual retail stores with their long rows of profits and expenses to middlemen, all of which are added to the New York prices when the goods are sold to you by small dealers? Why not buy from first hands? Why not buy from R. H. Macy & Co. who manufacture and produce more of the merchandise sold by them than any other department store in the world?

AS MANUFACTURERS

we have price advantages not enjoyed by other retailers. Thousands of the articles sold by us are manufactured in our own factories, and come to you at practically first cost of raw materials and labor with just one small manufacturing profit added. Hundreds, yes, thousands of the items catalogued by us are sold to you at prices in many instances less than small dealers pay their wholesale houses for goods of equal quality. Your first obligation is to yourself. In these days when we hear so much about the high cost of living, you should buy in the market which will give you the most for your money. R. H. Macy & Co. have been pioneers in low price making, pioneers in economical methods of buying and selling and distributing merchandise, and no matter what you need you are almost sure to find it in the pages of this big free Catalogue at a price which will mean a big saving to you.

AN EXCEPTIONALLY FINE VARIETY OF LITTLE BOYS' SUITS

The suits on this page represent the highest degree of perfection in workmanship and aterials. Much time and study has been devoted to so making our children's clothing that shall be made in the most perfect manner from the best materials, to sell for the least oney. We leave it with you to decide how well we have succeeded. If any suit does not me up to our representations, or meet with your full approval, return it to us, and your oney will be promptly refunded. We could not make such an unqualified offer if we were t certain that whatever is selected will give absolute satisfaction. Another special feature th us is our offer of two pair of trousers with many of these suits, because we know that the pants must stand th greatest strain, are the first to show wear and tear, and an extra pair extends the life of the suit many months. Even compared with what others charge for suits not so good and with only one pair of pants, our prices would be low enough for only the suit with one pair of pants. We make this offer so that you may secure almost the equivalent of two suits at the cost of one, and to sustain our reputation as the best place to buy the boy's outfit. Because of the great variety of patterns in different combinations described, please remember when making selections to always give the **catalog number, material, color, age,** and **style of trimmings** preferred, if described in more than one way.

Men's Gray Striped Cassimere Suit

$4.50

Material consists in part of soft finished wool and cotton mixed; the cotton yarn giving it good strength and wearing qualities, which could only be acquired in this way. Color is gray with subdued stripes formed by single threads of blue, combined with triple threads of brown and blue. Coat cut in single breasted, three button sack style, slightly cut away at corners; made with plain seams, single stitched edges, Italian lining, fitted with one inside and three outside pockets. Vest cut the usual way without collar, has five buttons, and ample pockets. Trousers of medium width, with pockets, side straps and belt loops. Well made for summer wear and very inexpensive; sizes 31 to 42 inch waist; 34 to 44 inch chest; 31 to 35 inseam measure; include sizes when ordering.

10B6901 Price per suit $4.50

Men's Fancy Striped Cheviot Suit

$5.50

A stylish black and gray mixture in a herringbone stripe pattern, showing through both sides the white threads, slightly tinged with blue. The cloth is part wool mixed with cotton yarn, giving it strength and weight. Designed with a three button, single breasted sack coat, corners slightly cut away; stitched edges, fitted with usual pockets, and finished with italian lining. Vest is collarless, 5 button style, with usual pockets. Shapely trousers cut in a conservative style, fitting with all pockets and durably sewed. Because of its good wearing qualities, Cheviots are always in popular demand for ordinary dress and wear. This pattern particularly is a substantial value. Sizes 34 to 44 inches, chest measure 31 to 42 inches, waist measure 31 to 35 inches inseam; do not neglect giving measurements required when ordering.

Youth's Fine Brown Cassimere Suit

$4.50

This is a striped pattern, formed by threads of gray spaced about an inch apart, and paralleled with stripes of blue thread in a very subdued, almost invisible coloring, on a background of dark brown. The cloth is a smooth soft finish wool and cotton fabric, closely woven and just of the right mixture to give body and strength and insuring excellent service. Designed in the latest three button single breasted sack coat style, finished with Italian body lining and twill sleeve lining. Vest to match in a five button effect, without collar, and trousers, shaped semi-pag style, all fitted with usual pockets and other essentials and thoroughly well tailored throughout. Sizes 31 to 36 inches chest measure, embracing ages from 15 to 20 years. Is a pleasing pattern, does not readily soil and could easily be sold at much more than the little price we ask.

10B7301 Price per suit **$4.50**

Stylish Gray Mixed Cassimere Suit

$5.50

This cloth is a closely woven mixture of pure wool, with just enough cotton to add weight and strength to the fabric, has a soft woolly surface covered with gray pin checks on a black ground. Coat is made in a three button single breasted sack model with a slight cutaway effect, stitched edges, Italian body lining and twill sleeve lining. Vest is the prevailing five button style without collar. Well shaped semi-peg style of trousers to match; complete with ample pockets and other fittings. Splendidly tailored throughout. In sizes 31 to 36 inches chest measure, embracing ages from 15 to 20 years. Makes a fine college or business suit at a very low price. These are made of very fine net, covered with silver color metal spangles and it makes a very beautif scarf, especially for evening wear. We have enormous sales of these scarfs in our New York City store whe they have jumped into great popularity for many purposes.

GENUINE IMPORTED SCARFS

72B9201 Imported silver spangled Syrian scarfs of heavy white net threaded by hand with untarnishable pliant metal spangles securely attached in a variety of rich oriental designs; these beautiful scarfs may be washed without injury to the net or spangles and possess exceptional service giving qualities; they are imported direct by us from Syria where they are woven by the deft hands of the Syrian peasants, who are famous for their skill in producing such articles of exceptional beauty and durability. The scarfs vary in length from 2 to 2¾ yards. They are admirably adapted for evening wearing, their richness adding the desired effect to any evening gown; they are also in great demand for an entire costume, being frequently made over a silk drop skirt which serves to bring out the richness of design to perfection; they have also been in great demand as head covering, protecting the carefully arranged coiffure as well as affording the necessary protection from the cold; in all they are so serviceable as to be almost indispensable; colors, white net with silver spangles or black net with silver spangles; the prices vary according to the amount of labor involved in producing the different designs, some being much more elaborate than the others; the lengths run from 2 to 2¾ yards; range of prices as follows; state whether black or white is desired.

ANOTHER STYLE IN FINE IMPORTED SCARFS

This is another style in which we offer our fine imported silver spangled Syrian scarfs, as described above. As a matter of fact, the patterns in which these splendid scarfs come are almost unlimited. They are hand made by the natives and brougbt a thousand miles down the Nile and then direct to this country by us, and when yon buy from us you get an individuality in design that probably is not duplicated in any other scarf in the world. Considering their extreme beauty, the labor involved in procuring them, and the thousands of miles we bring them, it is really surprising that we are able to sell them at such very low prices. No one else in this country can give you these scarfs at this price. While we are unable to illustrate and describe all the patterns or quote each style individually, remember that you get full value for any sum you send us as quoted in the description given at the top of this page, and if you do not find what we send you entirely satisfactory, it is your privilege to return for exchange or refund of purchase price.

To Secure the Greatest Possible Advantage

From the very low prices we quote on every page of this big catalog, you ought not to order any single article shipped to you by mail or express, because the transportation charges which must be paid by you are usually out of all proportion to the value of the single article purchased and the saving we make for you. For instance, if you buy an article weighing 36 ounces at, say, 7 cents and have it sent by mail, it would eat up the saving we make over the usual retail price, but if you were to order a number of these articles and have them sent to you by express, the cost of transportation charges on each item would be only a few cents. The saving is even greater when you order a shipment weighing from 50 to 100 pounds to go by freight, because 25c to 50 will carry a big freight shipment several hundred miles

EXTRAORDINARY VALUE IN A DAINTY WHITE DRESS OF STYLE AND QUALITY

No picture can do justice to this wonderful gown. The dress itself must be seen to be appreciated, and if you want the greatest value we have ever been able to offer in a white lingerie dress, one which was selected by us from hundreds of garments submitted by the best manufacturers in the country, as offering the very best materials, superb workmanship, and a style distinctly its own, you will surely send us your order for this number at our price.

FIFTY-THREE YEARS OF UNUSUAL VALUE GIVING

In the fifty-three years of our business experience, we have given our customers the most unusual values at all times and from year to year we have been able to give extraordinary values in certain lines of merchandise, but up to this time we have never been able to put so much of real worth into a gown as we are giving this year in this model. We expect to sell thousands of them to those thousands of discriminating New York City shoppers who visit our great store at 34th Street and Broadway, New York City, and we feel sure that our customers, living at a distance, will be just as appreciative of this extraordinary dress, at this astonishingly low price, as the great number of New York shoppers who make our city store their headquarters for all that is newest and best in women's wearing apparel.

WE GUARANTEE COMPLETE SATISFACTION OR NO SALE

We are anxious to receive your order for this very fine white dress, and if you will send it to us, we will make shipment of the garment with the full understanding and agreement that if it is not the very finest lingerie dress that you have ever seen at anywhere near this price, if you do not find the material the very highest quality, workmanship perfect in every detail, the style most becoming to you and the fit perfect, you may send it back to us at our expense of transportation charges both ways, and we will refund your money in full. These are the terms on which we offer you any garment shown in this big catalogue. You take no chances when you order from us, instead we give you an opportunity to examine anything you buy from us in the privacy of your own home where you may try it on, submit it to the inspection of your friends, as to quality, materials, workmanship, style and fit, where you may compare it with the offerings of other stores at home or elsewhere. Then, too, buying by mail from us is even more satisfactory than shopping among the crowds of a great store where busy salespeople find it difficult to give you the attention you deserve and where, as one of a crowd of shoppers, you do not have opportunity to make the careful examination the expenditure of this sum of money for a dainty gown warrants you to give it. Read the detailed description given below, see what we offer you at this very low price, and then send us your order. We will make immediate shipment and guarantee to give you perfect satisfaction or no sale.

STYLISH ONE PIECE WASH DRESS $4.96

This very beautiful wash dress has all the style of garments sold in usual retail stores at double our price.

The very pretty one-piece wash dress illustrated and described on this page is the result of many months of consideration of styles and fabrics as submitted to us by the very best manufacturers in women's wearing apparel and we believe it is superior to anything of this kind which we have been able to offer our customers in the past. In style it is certainly a most attractive garment. The materials were specially selected with a view to giving long service and to withstand frequent laundering and retain the same brilliancy of texture and finish as when new.

$7.00 would be considered a fair price by others.

We believe if you were to submit this dress to experts they would quickly say that it was worth up to $7.00. Only our enormous sales in this department enable us to buy in such large quantities that we get price concessions far below those granted ordinary dealers, and then our economical methods of merchandising and our fixed policy of selling at practically manufacturers' cost of materials and labor with one small profit added gives our customers such price advantages as they do not enjoy when they patronize any other retail store anywhere.

For fifty-three years Macys have enjoyed undisputed supremacy as retailers of the highest grade merchandise at lowest prices and we believe that this wash dress at only $4.96 is proof positive of our leadership for 1911. If you order this garment and do not find it better quality than you can obtain at home or elsewhere for anywhere near this price, better from the standpoint of style, workmanship and fit, really the best wash dress value you have ever seen, return it to us at our expense of transportation charges both ways and we will refund your money.

If you have never tried ordering from Macys by mail you do not know how satisfactory it is to send us your order. You are relieved from the trouble and annoyances incident to shopping in the store as one of a great crowd of shoppers. When you buy by mail you have an opportunity to examine what you buy from us in the privacy of your own home, where tired salespeople do not urge you to buy something you do not want. You also have the advantage of examining the garments at your desire, of trying them on in your own home and getting the opinion of your friends as to style, fit and quality, and if you are not then fully satisfied it is your privilege, in fact, we wish you to return your purchase either for exchange for something that you feel would suit you better or a refund of the purchase price. Remember that we guarantee satisfaction in every purchase or no sale. We want your order for this wash suit under these conditions.

Detailed description of our $4.96 one piece wash dress

This illustration can give only a suggestion, a slight idea of the attractiveness and style of this beautifully designed one-piece dress. There is not an ungraceful line in the whole garment. Cut after the latest mode, from finest quality linon, that will launder beautifully and retain its fresh crispness while the dress lasts. A high close fitting collar and dainty yoke, cut round and shallow at the back, and brought down in a fancy shaped point in front, is made of a beautiful novelty net, woven of vari-colored threads in a rich Persian effect that harmonizes well with the gown. The waist, elaborately braided with soutache about the shoulders and down the front, is laid in a broad plait at either side which provides a graceful fullness to the blouse. New full length sleeve, well cut and properly set, is finished at the wrist with a deep turned back braided cuff. The new gored skirt, cut in long graceful lines, shows the high waist line, so much in vogue this season, attached to the blouse by several rows of tailor stitching. A broad circular fold, elaborately braided with soutache to correspond with the general style of trimming, encircles the skirt at the knee in becoming and stylish effect. Below this the skirt hangs plain, but with perfect evenness all around, finished with a deep hem. You cannot fail to be delighted with this unusually desirable dress. The material, fit, workmanship, and finish are perfect in every detail and the price is a notable demonstration of Macy's selling supremacy. Can be had in beautiful shades of Copenhagen blue, rose, olive green, lavender, corn, in all sizes from 32 to 44 bust measure. Be sure to state size required when ordering.

THIS VERY STYLISH SILK COAT $9.94

You would pay $11.00 to $14.00 elsewhere for equal quality

You will find by a careful comparison of the quality of the material, the style and tailoring of this silk coat with similar garments offered in retail stores at from $11.00 to $14.00, to be very much in our favor. This coat was selected by us from several hundreds submitted by the largest and best manufacturers of women's high grade wearing apparel, as being by far the best value offered us this season. We placed such a large order that we got the price down to a surprisingly low figure and we are giving you the advantage of our saving in the form of this very low price. For Spring wear this silk coat will be found very satisfactory and that this coat is to be one of the most popular coats ever sold by us is assured as we have already sold large quantities of them to the discriminating women of New York City and vicinity who visit our store at 34th Street and Broadway daily.

Our Values Unsurpassed by Any Other Dealer in the Country

Silk coats will be very much in vogue this Spring and if you want a coat worth much more than the price you pay for it, one that has style in every line, that is thoroughly well made from strictly first grade materials, by all means send us your order.

The great values we offer in women's wearing apparel are not approached by the offerings of any other firm or individual in this country. Our great store in New York City is the largest retail establishment under one roof in America and we devote more than one entire floor to the display and sale of women's high-grade wearing apparel. Our sales are so enormous that the best manufacturers find our business very desirable, and because of our large purchases we are able to specify qualities and obtain price concessions that are very unusual. The manager and buyers in charge of this great department are experts in their business, all of them having devoted a lifetime to the designing, manufacture and sale of high-class wearing apparel for women, and you can order anything shown in the pages of this big catalogue with the assurance that you are getting the greatest possible value for every dollar spent with us. No matter what you may require in women's wearing apparel you can supply your wants more economically at Macy's than anywhere else. This we guarantee, or the goods ordered may be returned to us at our expense and your money will be refunded in full. This makes it very satisfactory for you to shop in New York City, the fashion center of America, because you have opportunity to examine our qualities and styles in the privacy of your own home, where you may secure the opinion of your friends and where, at your leisure, you may make whatsoever comparisons you wish. We know that we undersell all other dealers and all we ask is an opportunity to prove to you that we are better able to supply your wants than anyone else anywhere. When you read the detailed description as given below we feel sure that if you desire a fine silk coat at a very low price, you will send us your order.

Description of this Coat

45B10601 **Stylishly designed, full-length coat of splendid quality black chiffon taffeta silk, which is universally conceded to be the popular material for this style of a garment. Our skilled tailors have used great care in developing this model, cutting it on the very latest approved lines;** it is 54 in. long, semi-fitting and closes with three, handsome silk-covered tailored buttons; a striking feature of this garment is the very deep sailor collar, cut square in the back and extending over the shoulders to the front in broad revere effect; the entire collar and revers are most elaborately trimmed with heavy bonnaz braiding, giving a very rich and charming effect; the full length sleeves are finished with a deep turned-back cuff, elaborately braided to harmonize with the collar trimming; unlined; splendidly tailored; will be found exceptionally desirable for dress occasions during the coming season; our expert designers have spent months studying the most desirable features of the present-day styles, and into this very desirable model they have put the most popular material and the richest style of trimming and produced a coat that for quality and serviceability cannot be duplicated for the price by any retail dealer in this country; we are offering you an extraordinary opportunity of saving money not only in this garment, but on everything listed in this catalogue. We are sure you will be more than delighted with it; made in black only; sizes 32 to 44 inch bust measure. Special price each **$9.94**

THIS STYLISH PANAMA SKIRT $4.96

A most extraordinary value in a new spring style made from this very popular fabric.

For the last two or three seasons we have offered a very special panama skirt made from very fine selected material in the newest styles at prices which represented a very large saving to the customer, and, as a result of the values we gave, the style, quality of materials and finish, we have enjoyed a most unusual volume of sales in these special skirts offered at special prices.

As a result of this experience in previous seasons, as a result of the very large sales we have enjoyed in the past, we have been able to make a very satisfactory contract with one of the largest and best manufacturers of ladies' wearing apparel, and we offer you on this page *more of quality than we have ever been able to give you in the past at $4.96.*

The illustration will give you some idea of the splendid style of this garment, but no picture can begin to do justice to it. You should see the skirt itself to appreciate the splendid quality of the panama cloth used in its manufacture, the very fine tailoring of the garment and great care exercised in finishing every little detail. When you have examined it carefully and compared it with the offerings of any other firm or individual, even at one-third or one-half more than the price we ask for it, you will agree with us that this is a most unusual opportunity for you to secure a first class skirt at a price just about the same as would be asked in the usual retail store for second or third class garments.

When Macy sells a garment you may depend upon its quality. When you buy from Macy you are certain to make a saving. Remember that we own and operate the largest department store in America under one roof. Our buying organization is world wide, and there is no advantage in buying, or manufacturing or selling that we do not enjoy. For fifty-three years we have stood at the top as leaders in merchandising in the great city of New York, and we are continually creating and carrying to successful conclusions great merchandising campaigns which astonish our customers as much as they surprise our competitors. We are not only able to give you the greatest possible values, the best qualities and lowest prices always, but our service is prompt and satsifactory, and everything you buy from us is sold with the distinct understanding and agreement that it must please you in every way or you may return it to us at our expense of transportation charges both ways, and we will refund your money.

Women's very attractive dress skirt; made of selected quality, fine, all-wool chiffon panama, a material that has been growing in popularity every season, and which is acknowledged by all to be as serviceable a material as can be secured for high-class walking skirts. Our designers have produced a model that will lend grace to any figure. The fashionable gored sides and panel front fit smoothly in accord with the demands of the present fashions; the front panel is very elaborately trimmed with rich, silk bonnaz braiding which is also used with striking effect to outline the cleverly cut points at the sides, as well as extending part of the way up each side in a harmonizing design; a stylish, kilted flounce extends around the skirt from the center panel, falling into graceful folds, and finished with a deep hem; the fastenings in the back are concealed under a deep inverted pleat; the illustration shows how carefully this skirt is designed and finished in the back and front, and the value represented in this special offering will surprise even those who are already familiar with our underselling supremacy. This skirt may be had in either black or navy blue; sizes are, waist measure, 22 to 29 inches; skirt lengths, 37 to 43 inches; do not omit size required when you send your order, so that we can fill it promptly and correctly.

You will certainly find this big general catalog the most valuable book you can possibly have in your home. We probably sell more wearing apparel for boys and girls and children than any other house in the country and we devote many pages of this big catalog to showing a very large line of this class of merchandise. If you have boys, we recommend that you turn to pages 60 to 68 inclusive, and note the very large variety that we show in play suits, wash suits and dress suits of every description. In girls' dresses and coats, we carry the very newest styles in great variety of materials, all priced exceedingly low. You will find these garments shown from pages 92 to 127. For millinery for girls and children we ask you to turn to pages 79 to 91 inclusive, and for hosiery and underwear for boys and girls and children consult pages 189 to 199 inclusive.

Our infants' wear department carries everything, almost, that will be required for baby's comfort. See pages 129 to 162, and if you fail to find there the things you need, write us, because this catalog, while very complete, does not begin to show all the merchandise carried in our big store in New York City. We surely have what you need if you do not find it in this book and we will be very glad to answer any inquiry you may send us.

ROM THESE TWO PAGES OF LADIES' SWEATERS

The ladies' sweaters shown on this page, as well as those shown on the previous page, are very much underpriced if you compare style, quality of materials used and the general fit and finish of these garments with those you find in the average retail stores oughout the country. Our sales on ladies' sweaters have long been very unusual, our customers learning that our values are unpassed by other dealers at home or elsewhere. It is for this reason that we are always willing to have customers order from us h the understanding that if, quality for quality, we do not undersell all others or give better quality for the same money, our garnts may be returned for refund or exchange. A sweater is almost a necessity in the Spring and Fall months and if you want a very lish garment and at the same time one of moderate cost, you will surely have no trouble in finding exactly what you want among se shown on these two pages. Our stocks are very large and we are prepared to fill your order practically the day it is received. n't forget to give size wanted when you order.

THE MACY POLICY

These wonderfully low prices are the result of weeks and months of careful planning, and come as the result of the Macy policy of either manufacturing what we sell ourselves or securing the goods from manufacturers and producers at first hands under the most favorable conditions. We have a buying organization unsurpassed by that of any other merchandising establishment in America. Keen, trained, experienced men and women who are specialists in every line of merchandise—some of them in Europe, some of them in the Orient, while others are in the manufacturing and producing centers— are always ready to take advantage of any condition which will bring us high-class, dependable merchandise at a saving in price. For months this world-wide buying organization has been searching for exceptional values. When a manufacturer finds a dull season coming on, our buyer in his line is ready to suggest making up certain lines of goods for us at a special contract price. In other cases manufacturers, producers, importers with overstocks find us ready to take their surplus goods at an attractive price for cash. All these things taken together have made it possible for us to give you the wonderful bargains shown on every page in this big general merchandise catalogue.

THREE WONDERFUL VALUES IN SILK PETTICOATS

We invite comparison of these fine silk petticoats with those offered by any firm or individual at home or elsewhere. We don't believe you can find their equal except at prices very much higher than we ask. We invite you to order and make comparison.

Only $3.79 Each

This very attractive petticoat is developed from a fine selected soft quality of satin messaline, which is one of the season's most popular fabrics. The skirt illustrated under this number has been selected from our enormous stocks of silk petticoats because it combined so many points of richness and durability. Although designed on somewhat simple lines yet it has been cut with extreme care with a view of preserving the smooth fit which is so necessary with the present fashions. The very handsome deep accordion pleated flounce has a wide gathered ruffle of self material to about the ankle, and is finished with a very dainty foot ruffle of very attractive rose ruching. An underlay and dust ruffle of excellent quality sateen matching the messaline in color perfectly add very greatly to the service giving qualities of this undeniably stylish garment; offered in black, navy, brown, green or grey; lengths 38, 40 and 42 inches.

FINE CLOTHES FOR BABY

If you are interested in the exceptional values in children's hats and caps shown on this page you will surely be interested also in wearing apparel for the little one. We ask you to turn to pages 129 to 162 inclusive, wherein we show our full line of wearing apparel for the little folks up to three or four years. Our stocks this spring are very complete, our great variety enables you to make a very satisfactory selection and quality and price combined make our offerings very attractive. No matter what you need for the children this year, you are sure to find it in the pages of this big catalog and at prices which means a saving to you. Our quantity purchases are very large. The best manufacturers receive our orders and from every standpoint the goods we offer you are superior. As a matter of fact, our prices are so attractive that in the majority of cases it would be cheaper and more satisfactory for you to purchase the ready made garments from us than to buy the materials and attempt to make them. Our stocks are so large and the assortments so complete, that we will be able to fill your order practically the same day it is received. Let us have an opportunity to show you how well we can take care of you and how much we can save you when you purchase from R. H. Macy & Co.

EXCEPTIONAL VALUES FROM NEW YORK'S LARGEST STORE

In a single day as many as a quarter of a million people buy goods in the great Macy Store in New York and they buy after shopping around in the other great stores of the city. They buy here because prices are lowest, value greatest, service and qualities most satisfactory. If more than a quarter of a million critical New York people find it profitable to buy from Macy's daily, surely this is the place for you to buy too. The dress goods offered on this page show you how much we give for your money—more and better merchandise than any other store gives you.—You need not take our word for it. If you orer and the goods are not entirely satisfactory in every way, send them back at our expense and get your money back. The Macy Store has grown to its present proportions by giving its customers more than they can obtain elsewhere.

MACY SHOES OF QUALITY

IF YOU ARE SATISFIED TO PAY THE HIGH PRICES ASKED IN THE USUAL RETAIL STORES, THESE PAGES WON'T INTEREST YOU.

We are quite sure that no retail store anywhere can approach the shoe values we offer in the pages of this big catalog. The numbers we offer here are the cream of the shoe-making industry. The very best manufacturers in the business produce these shoes in large quantities under contract, and as a result we receive price concessions which we pass along to you in the form of these very low prices on shoes of quality.

Located as we are in the center of the great shoe-making industry, we have first call on style and are in a position to give you the newer things as quickly as they are on the market and months in advance of dealers in inland cities. Furthermore, the manufacturers who supply us are not dependent upon the Leather Trust for the materials used by them, because they buy their own hides, and they are submitted to careful examination by their own experts who direct the tanning. We believe in the old-fashioned, long time tannage of sole leather, and we guarantee a genuine high grade oak tanned sole—not a cheap red leather sole—in every men's and boys' shoe shown in these pages. We challenge any other dealer in the world carrying a general line of men's, boys', women's and children's shoes, to equal the quality we show in these pages at the price.

Our shoes are made with genuine leather counters and inner soles, no paper substitue being used under any circumstances. Therefore, with the hides right, with the leather tanned right, with the highest type of skilled labor obtainable used in manufacturing, with lasts and patterns made by the most expert designers in the shoe industry, with the most economical method of tanning and manufacturing, and with all unnecessary profits to jobbers and other middlemen between the manufacturer and you cut out, these pages mark a new epoch in shoe merchandising, and if you want quality at a low price, you will make no mistake in sending us your order from these pages. In sending us your order, be sure to state what size you want, width of last, and such other information as will enable us to send shoes which will fit you.

SHOES WITH INDESTRUCTIBLE SOLES

LAST TWICE AS LONG AS ORDINARY LEATHER SOLES

THE BEST SHOE IN THE WORLD FOR FARMERS, RAILROAD MEN, MECHANICS, AND ALL WHO WORK AND WALK.

There is no shoe made that will give greater satisfaction or better service to workingmen, mechanics, and others who are required to stand or walk all the time, than the shoes shown and described here. The uppers are made of a selected grade of fine chrome tanned elkskin, and are very strongly made and finely finished. The insoles and counters are solid leather; the vamps are full length to the toe, not cut off under the tips; the soles are double thick and are made by that new special process which renders them practically indestructible. Sole leather treated by this special process will last two to three times as long as the ordinary sole leather of the best grade. This treatment does not make the sole stiff or heavy. The gussets, or tongues are of the dirt-excluding type; soles are double fastened, brass nailed and sewed; eyelets and hooks of the best quality and of fine appearance. These shoes will last longer than any shoe made. They cost less than many shoes that will not last half as long. Made on a roomy last.

Use Your Home Address

SOMETIMES YOU GO AWAY FROM HOME, TO SOME OTHER TOWN, on a visit, and while there you write to us about something, and the address on your letter is the place where you are visiting. Please, in all your correspondence with us, no matter what place you write from, always give us your regular home address, by which we mean the place where you regularly receive your mail and from which you generally write us. In that way we can look up our files and answer your letters intelligently,, while if you do not give us your home address we may be unable to do so; and, besides when we write a letter to you in reply to yours and send it to the town where you were visiting, and you have meanwhile returned to your home, the letter sometimes remains there awhile in the postoffice and then is sent back to us marked "unknown," and we do not know how to reach you, and you get provoked at us because you think we have not answered your questions. So please remember, no matter from what town you write, always give us your home address. This will help us to answer you quickly.

FOR MEN, WOMEN AND CHILDREN

QUALITIES

THE HOSE THAT Irontex REGISTERED TRADE MARK WEARS LIKE IRON

POPULARITY

MACY'S IRONTEX HOSIERY made from our own combination of specially selected and closely twisted long cotton yarn and genuine Belfast linen, on improved full fashioned machines. **Irontex has become wonderfully popular.** Nearly two years ago, after perfecting the final details of improvement in Irontex Hosiery, we heralded the news of Irontex Hosiery's superiority through the medium of our catalogue. These improvements were so self evident that Irontex Hosiery was quickly welcomed by thousands of customers throughout the United States. Each improvement in material and the method of manufacturing is the result of long, painstaking investigation, growing out of years of experience. Today Irontex brand hosiery is enthusiastically commended by all classes of people who demand honestly priced hosiery, correctly knitted and shaped from a combination of dependable materials.

Irontex Cotton Quality. Our hosiery is made of selected long staple cotton and the soles, heels, and toes are spliced or reinforced with genuine Maco linen yarn. This makes Irontex Stockings safe where they should be safe, and strong where the wearing strains the hardest.

Irontex Gauze Qualities. Some people prefer a very light weight stocking, and to supply this demand we have produced the Irontex Brand in a gauze lisle and gauze cotton for men and women. In the manufacture of this quality we use a very fine and light weight grade of lisle or cotton and we then reinforce and splice the heels and toes exactly the same as in the 24c Irontex Hosiery, except that the Irish linen yarn used for this purpose is a little lighter weight, but especially selected to produce the greatest wear resisting qualities, in combination with the light weight lisle or light weight cotton.

Macy's Guarantee. You do not have to buy 6 pair or a dozen pair at once, in order to get the best prices. We will sell you one single pair or a dozen pair just as you prefer. Our reputation after half a century of business in the heart of New York City, stands back of every pair of Irontex Hosiery you buy. If, when you receive them, you do not feel that they are just as we have described them, we guarantee to refund your money instantly without any explanation on your part or argument whatsoever.

TRANSPORTATION CHARGES AMOUNT TO LITTLE COMPARED WITH WHAT WE SAVE YOU

It will cost you very little for transportation charges on anything you order from Macy's; fact, the freight charges will be practically insignificant compared with the amount of oney we save you on your order. There is a great deal of misrepresentation as to the ost of transportation charges. Retail dealers and their friends in small cities and towns ave misrepresented the cost of carrying merchandise to our customers at a distances, in any cases alleging that by the time you pay the transportation charges you make no eaving ver the price you would have to pay in the usual retail stores. This is not true. The freight harge on 100 pounds of merchandise sent by first class freight to Buffalo is only 39c; to leveland, 53c; Toledo; 59c; Lancaster, Penn., 35; Covington, Kentucky, 65c; Augusta, laine, 45c; Peoria, Illinois, 83c; and correspondingly low prices to other points. You can rder a big bill of groceries, a number of dresses, skirts, waists, druge, hosiery, underwear, etc., to the weight of 100 pounds and have it transported to any point east of the Mississippi River and north of the Ohio River for less than $1.00, and if you will look over the pages of this big general catalogue and make comparison of our prices and qualities with the prices your local dealer will ask for goods of similar quality, you will find in making up an order weighing 100 pounds or more that you are saving several times the sum necessary to pay the transportation charges to your nearest railway station. Therefore we say to you, make up a freight shipment starting with some needed groceries shown on pages 15 to 22 of this catalogue, and then add such other goods as you may need, offered you at astonishingly low prices, and when the goods reach you, and you have paid the very small freight charge, you will discover that you have made a very large saving in sending us your order, and secured the newest and best merchandise.

MESH WOVEN UNDERWEAR

UNION SUITS 49c PER SUIT

Ventilated mesh woven underwear has become very popular for summer wear and its sale has increased tremendously since its introduction several seasons ago. It is a flat knit-cotton fabric woven with small holes or openings to permit free circulation of air between the fabric and the body. This free circulation of air keeps the body dry and prevents the underwear from sticking. It is the most comfortable underwear you can buy and can be worn the entire year if desired. It is made from selected cotton yarn, is full size and properly proportioned. The very large sales we enjoy have enabled us to name this season the lowest prices ever quoted on these splendid garments and if you expect to lay in a supply of summer weight garments for your boys by all means treat them to the novelty of being comfortable during the hot summer months by buying a supply of these open mesh union suits. Sizes 26 to 34.

WO EXCEPTIONALLY FINE BABY CARRIAGES

.8[03] REED HOOD STATIONARY GO-CART

This is a very attractive and dignified model of the non-adjustable type of Go-Cart. It is a large and roomy cart, and very comfortable. The body and hood are made of nicely woven, half-round reed, with heavy roll work all around the body and around the front of the hood. The hood can be adjusted in any desired position, and fastened by the large thumb screws, and is fully lined with good quality corduroy. The gear of this car is of a very strong steel construction, the front of the car setting directly on the front axle, while the back rests on the extremely flexible springs. The steel bicycle tubing reachers are directly connected to the front exle, thus putting no strain at all on the springs when the front of the carriage is lifted by the reachers. The pusher is of white china, and is trimmed with handsome knobs. The wheels are 14 inches in diameter and have ⅝ inch rubber cushion tires, and polished brass hub caps. There are no nuts to bother with when the wheels are taken off the axles, as the patent axle require but a slight finger pressure to release the wheels. These carriages nished in either light or oak colors, the gears being enamelled blue. All arriages are made of the best materials and by the most skilled workmen uable, and there is no such thing as second quality in our line. In addition r own label, which means that you are getting the best possible value for money, every carriage bears the maker's name, which alone is a guarantee of value and honest workmanship. This same carriage that we are offering at 3, is on sale now in many New York stores at $22.00. Shipping weight, l, 75 pounds.
B7005 Price each $18.03

$9[38] STATIONARY REED GO-CARTS

Although offered at a low price, this go-cart is really a first quality article, and not to be confused with the cheap grades usually put out by unreliable makers. All the details of the construction receive the same careful attention as in the higher priced cars, and the same high grade materials are used. Its low price is established by its simplicity, and the Macy method of buying and selling first class merchandise. The body and foot-rest are woven of first quality flat reeds in diamond panels, with some handsome scroll work in the footrest. The rolls are of halfround reed, and handsomely finished. The gear is strongly made of steel and the pushers are of steel bicycle tubing. The springs are of the continuous pattern and are very smooth riding. An attractive feature of this carriage is the china pusher, something not found in many of the highest priced cars sold elsewhere. The wheels are 14 inches in diameter, are fitted with ⅝ inch rubber cushion tires, have the patent spring axle clip for quick detaching from the axle, and have polished brass hub caps. We carry this number in either natural or oak finish. This go-cart cannot be folded. It is fitted with a quick acting brake, that is very effective in its action. Shipping weight, crated, 85 pounds.

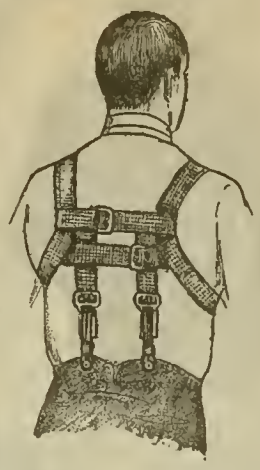
KNICKERBOCKER SHOULDER BRACE

TROUSER SUPPORTER



Why suffer with pains in the back and kidneys from improper support, when with our Knickerbocker shoulder brace you are assured of relief and comfort? Men, who are forced to be about and working and those who are compelled to assume inactive postures, will find a haven of rest in them. They absolutely prevent rounded shoulders, keep the body firm and erect, and make for correct breathing and proper heart action. Scientifically constructed, of strong webbing made doubly strong at all important parts. Elastic web is used at trouser ends, and novel clasps. Easily adjusted to meet the requirements of a perfect fit, simply and effectively. Our knickerbocker shoulder brace is a success on its merits. Designed to meet the demand for a low priced brace that will do its work easily and well. There is no reason why you should pay fancy prices for fancy high-sounding harnesses. The material in our brace has been chosen as most suitable regardless of the fact that it is inexpensive. Higher priced doesn't always mean higher efficiency. When ordering, give the measurement in inches entirely around the body under the arms. Men's sizes 34 to 44; Boy's sizes 26 to 32.

LATEST STYLE SUMMER SHIRT

Admitted to be the biggest hit of the season, the most popular shirt that has appeared in years. Combining perfect comfort with a superiority of material and manufacture seldom equalled. Made of a very fine quality togo cloth; a high grade of mercerized cotton, in an extremely pretty, strong weave. Soft to the touch, and absorbent, the material is pre-eminently suited for spring and summer wear. The finish throughout is a marvel of neatness and careful stitching. The cushioned neckband, and buttonholes on the sleeves, at the turned back french cuffs; the fullness of the coat cut style; the pretty pearl buttons that fasten the shirt in front, and the stylish soft separate collar, are features that have made this shirt famous. One of the most novel and interesting points is the separate collar. Made of the same material of the shirt, it is fashioned like the regular laundered linen collars, in a complete turnover effect. In the front are two very pretty pearl buttons that are removable, and fasten through two neat buttonholes on the collar, serving as a neat decoration and giving the collar the close front, so much in vogue at the present time. The unstinted praise that has marked the event of this shirt on the market has caused wonderment among the trade. Such popular approval cannot mean less than the recognition of an article of superior worth, and it is destined to become an event in the shirt making business. The wonderful soft texture of the material and splendid absorbing power make it the ideal summer shirting. The cut of this shirt has been designed on broad lines, making for looseness and comfort. Can be had in white, gray, ecru, blue or lavender; sizes 14 to 17; please mention color and size when ordering.

PURE DRUGS AND MEDICINES

AVE MONEY ON DRUGS

Buying medicines, drugs, etc., through this catalogue will save you money, often very near f of what you have been accustomed to paying.. We were the original firm in selling drugs l medicines at reduced prices, at the same time keeping up the quality and purity of the gs to the highest possible standard. When you buy a standard remedy through this alogue and get it for about half what your local druggist asks, don't imagine for a ment that you are not getting the best for your money; we sell nothing but the purest l freshest goods. Your local merchant can replenish his stock only occasionally, and in sequence there are bound to be some goods on his shelves that have been there for a g time, long enough to have impaired its value. A great many of the articles listed here prepared in our own laboratory, under the direct supervision of expert chemists, who compelled to maintain our high standards in everything they make or compound. Such licines and drugs as we do not make ourselves are purchased from the most reputable ns, and must be made to conform with our own regulations as to purity, cleanliness and ility. Above all things we insist that our own chemists and our supplying chemists must misrepresent in any way.

URE FOOD AND DRUG LAWS

We comply with the pure food and drug laws of the United States and the laws and regulations of the great city and state of New York; and we have complied and demanded enforcement of these laws long before they were enacted. Our sales on drugs and medicines are enormous, and in consequence our stocks are always fresh and pure Buying constantly, and in large quantities, not only prepared and compounded drugs, but the raw materials and ingredients for own laboratory as well, we get the best and lowest market quotations, and are therefore able to sell at such wonderfully low prices as you will find in this money-saving catalog.

ABOUT OPIATES AND POISONS

We do not compound prescriptions, as we believe that in most instances they are needed the moment they are written by the physician, and should be filled by the nearest pharmacist. We cannot fill orders for opium, morphine, cocaine, or preparations containing any of these drugs. Neither can we fill orders for poisons of any kind, or dangerous acids, or for any drug that should not be used except on a physician's prescription. The prices quoted are always for the package as described, and we cannot accept orders for a smaller quantity than a complete package. Remember that an ounce of prevention is worth a pound of cure. Order some of the standard and well-known remedies and preventatives listed here and have them on hand when they will be needed. You can make a double saving by including your order for drugs and medicines with your order for household furnishings, and save the freight.

Syrup Hypophosphites Compound

Hypophosphites has been recognized for many years as an ideal tonic and reconstructive agent, and is especially desirable in struma, scrofula, rickets, secondary anaamia, and other debilitated states. While it has no specific action on tuberculosis it is of value in this disease in improving the appetite and digestion, and in correcting the anaemia. Hypophosphites owing to the constructive features of some of its ingredients, which tend to develop many of the elements of the body, has long been a desirsble tonic for children, as it builds up the bone and muscles, stimulates the appetite, improves the strength of the system, and aids in many ways the growing body. This brand is prepared from the most carefully selected ingredients, and we know it to be strictly pure and compounded after the most correct formulas. Full directions for the best and most effective use accompany each bottle. Put up in 16 ounce bottles, the same as others charge $1.00 for. Not mailable, shipping weight 20 ounces.

MACY'S ROSE D'OR PERFUME

This is our new perfume that we have introduced with the New Year, 1911. It is still an infant and has only recently been christened "Rose D'Or." The odor is beautiful, resembling that of a bunch of fresh cut American Beauty Roses, and penetrates every corner of the room. It is highly concentrated so you must not use more than a few drops. We were given the inspiration to produce this remarkably elegant perfume by the exquisiteness of a French perfume, recently introduced into the United States at $2.40 and $4.50 a bottle. An expert cannot tell Rose D'Or from the French perfume, so exact have we produced it. Our prices for Rose D'Or are equally interesting.

RUBBER DRUG SUNDRIES

Owing to the changes in the market price of crude rubber, the prices quoted on all articles that contain rubber are subject to change without notice. We always aim, however, to quote the very lowest possible price on all rubber goods of first quality. Should the price be reduced lower than that quoted here, your order will be filled at the reduced price, and the difference refunded to you. We sell only first quality, absolutely perfect rubber goods. If our prices seem higher to you, you can rest assured that you are getting the very best that the money will buy. We never handle inferior or second quality goods and never offer such goods for sale.

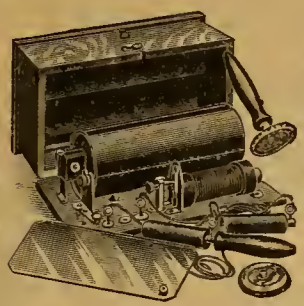
HOME ELECTRICAL MEDICAL APPARATUS



There are many diseases in which electrical treatment will effect a lasting remedy without the use of drugs, which have a tendency in some cases to leave injurious effects behind. Every home should have a family battery. It will save its price over many times, and will in some instances save a life. Physicians are prescribing treatment with the Farradic current more and more every day, and our Home Electrical and Medical Apparatus is designed to provide a safe and simple as well as effective means of administering this health-giving current at home, and without any previous knowledge of electricity. There are no liquids or acids to confuse, and there is no danger whatever in its use. The currents are smooth and even and can be regulated from an almost imperceptible current, to one that few can withstand. The outfit comprises a standard dry cell battery; two sponge electrodes with non-conducting handles; two metal hand electrodes; foot electrode; connecting cords; a 100-page Electropathic guide, giving full directions for treating over 100 diseases, and for the care and use of the Apparatus. Contained in a handsome polished oak or mahogany finished case, with handsome nickel plated handle, measuring 8¾x5½x4½ inches.

TOILET AND MEDICINAL SOAPS

Soaps improve with age, therefore we suggest that you include in your freight shipment to supply to last at least three months. It is the most necessary article for cleanliness and yet the one that is most often overlooked in making up an order. The soaps we illustrate or mention are only a few of the very large variety we sell. Every popular brand for the Toilet, Shampoo, or Bath, and those usually bought especially for Baby, are here and you can include any of them in your order. All Soaps of whatever kind, bearing our name, we guarantee absolutely pure. Take our La Isna Castile Soap, for example. In arranging our soap lines we ran across a castile soap offered at a lower price. Chemical analysis showed so little olive oil present that it could not be found, but there was a superabundance of "Peanut Oil." You pay for one thing and get another. Not so with our La Isna Castile Soap. You pay for a pure Castile Soap and you receive a pure Castile Soap.

FINE TOILET PREPARATIONS

We maintain a thoroughly equipped chemical laboratory that enables us to produce thoroughly reliable Fine Toilet Preparations at the lowest possible price. We guarantee every article we manufacture to be as represented.

We also handle the largest assortment of other Domestic and Imported Toilet Preparations that would require a book the size of this one to illustrate and describe each article. We handle them chiefly for the convenience of our New York City customers and you are cordially invited to enjoy the same privilege that they do and at the same low prices. If we do not have the article you order and for which you do not find a good substitute among the many we illustrate and guarantee, we will try and procure it for you. The price will be as low, if not lower, than elsewhere.

MACY'S CANDIES ARE STRICTLY PURE AND FRESH

Many years before the United States government discovered the necessity of passing the Pure Foods and Drugs act to prevent the manufacture and sale of adulterated foods, candies and medicines, we decided from observation and the knowledge acquired in handling candy, that the only way we could guarantee the candy we sold to be pure was to make it ourselves; and we did, with the result that the Macy candies have grown and are still growing in popular favor with the purchasing public.

We know what Macy's candies are made of, even to the chocolate coating, which we also manufacture ourselves, and we can conscientiously guarantee the Macy's candies to be absolutely "Pure." Fresh they must be, because we only manufacture as we sell. We are not compelled to manufacture before we receive orders, as wholesalers do, and consequently do not have any stock on our shelves to grow stale. Our prices, quality for quality, are about half what others must ask.

Old Fashioned Stick Candy

19c Lb.

Guaranteed Pure

16B22801 Old Fashioned Stick Candy—Put up in tin boxes of about a pound and containing assorted flavors. The sticks are about the size of an ordinary lead pencil, but not quite as long. A safe candy for the younger children and one that will please them immensely. Add a couple of boxes to your next freight order. Price per box 19c

Sweetheart Chocolates

16B22803 Sweetheart Chocolates—The candy is better than the box. Every piece is heart shaped and the centers are assorted flavors. Packed in one of our own original packages, a box holding about sixteen ounces. An order for this item will be speedily followed by orders more. Price per box 39c

Snapping Mottoes 9c per Box

In boxes of a dozen, each one containing some kind of a paper cap or mask, accompanied by a verse. The higher priced grades contain some small favor in addition.

16B22804 Regular grade, no favors. Price, per box 9c

16B22805 Containing Toy Favors. Price per box 29c

16B22806 Containing Musical Favors. Price, per box 49c

Maraschino Cherries

16B22807 Large red cherries coming in a delicious Maraschino liquid, all encased in a sweet chocolate coating — a delicacy fit for kings. They are simply delicious. If you have never eaten a chocolate covered maraschino cherry, be sure to order one box and enjoy a treat nobody should miss. Per 12 ounce box 39c

60c Standard Chocolates 59c lb.

We sincerely believe that our "Perfection" or best grade of chocolates are equal if not superior to the highest priced chocolates made in any part of the world. The chocolate coating is exceptionally well blended and has an exquisite flavor. You simply can't stop eating them. The centers are each better than the other—almonds, filberts, walnuts, cherries, pineapple, etc., of the first quality. Packed in heavy glazed paper boxes with tinfoil wrapping, lace paper and tongs, and tied with colored silk ribbon.

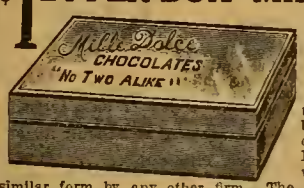
$1.24 PER BOX MILLE DOLCE CHOCOLATES



Over a Hundred Pieces in a 2-Lb. Box

NO TWO ALIKE

"Mille Dolce" Chocolates—Translated the name means "a thousand sweets." This package is perhaps the most unique package of chocolates ever offered in the world, and is original with Macy's. It cannot be had in the original form elsewhere, and we have not heard that it has been offered in a similar form by any other firm. The box contains about two pounds of specially selected chocolates, over one hundred pieces, and yet there are NO TWO PIECES ALIKE. Imagine preparing over one hundred different kinds of chocolates, which we must do in order to pack the box. A task only possible where the candy is being made fresh every day. The assortment has every candy known in chocolates, even the new "old-fashioned" unsweetened kind. For special occasions or gift purposes a box of "Mille Dolce" chocolates is most appropriate. The most particular person would enjoy them. Put up only in the one size package, about two pounds.

16B22821 Mille Dolce Chocolates. Price, per box $1.24

40c Standard Chocolates 24c per Lb

16B22823 Ideal Chocolates—This is our cheapest grade chocolates, but is nevertheless absolutely pure. The assortment is good, with nut, fruit and cream centers, and is well assorted in the box. This grade is usually sold at 40c per pound. Put up as follows:

1 lb. box assorted	Special price	24c
1 lb. box all nougat	Special price	24c

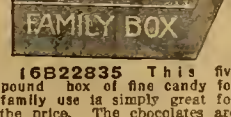
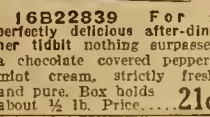
Chocolates and Bon Bons



16B22835 This five pound box of fine candy for family use is simply great for the price. The chocolates are of very good quality, absolutely pure, and assorted; the assorted bonbons are a grade usually sold by us at 39c. If they were all bonbons we would be obliged to ask $1.75 for the box, and you would get a wonderful value at even that price; but we have decided to make this box a leader at per 5 pound box 99c

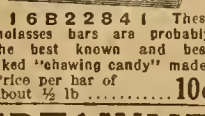
All candies carefully packed to keep fresh a long time.

Chocolate Peppermints



16B22839 For a perfectly delicious after-dinner tidbit nothing surpasses a chocolate covered peppermint cream, strictly fresh and pure. Box holds about ½ lb. Price 21c

Molasses Candy



16B22841 These molasses bars are probably the best known and best liked "chewing candy" made. Price per bar of about ½ lb 10c

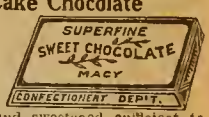
Family Box All Chocolates

16B22809 This five pound box of fine chocolates has been put up especially for family use; and at a special price. The candies are absolutely pure—in fact this is our "Ideal" quality chocolates, assorted and packed for family use. Packing in the large boxes makes the handling easier for us, and therefore the very low price. You get the quality just the same. Price, per five pound box 99c

Genuine Marshmallows

16B22853 Who does not enjoy a soft and delicious marshmallow drop that fairly melts in the mouth? Ours are that grade, and you surely should include a few boxes in your next order. They are put up in round tin boxes holding about ½ pound. Price per box 10c

Sweet Cake Chocolate



A sweet Eating Chocolate in solid cake form. Made from selected cocoa beans, perfectly blended, very smooth and fine, and sweetened sufficient to make it very palatable. Very wholesome and nutritious for children. You should have it always at home; does not spoil.

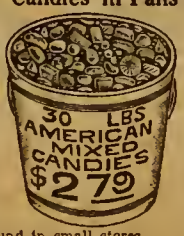
CANDIES IN BULK FOR PICNICS, ENTERTAINMENTS, FAIRS, ETC.

American Mixed Candies in Pails



This is a superior mixed candy made of pure sugar and flavors and colors in cut and cup shapes. They are all individual pieces and are packed "Kindergarten" size. Characterized by the same purity and cleanliness that is the distinguishing mark of our candies and confectionery stuffs. Best mixture for the price; usually sold at 20c pound in small stores.

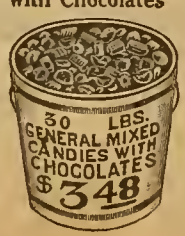
16B22872 American Mixed Candies, Price, per 30 lb. pail $2.79

French Mixed Candies in Pails

This is an extra fine mixture of pure French Creams, made of pure sugar and in assorted flavors. The shapes are assorted and are regular bonbon style; often called French Cream Bonbons. This is a fine quality candy, carefully packed, and as good as the quality usually sold in small stores at about 30c a pound. A great favorite.

16B22873 French Mixed Candies, Price per 30 lb. pail $2.97

General Mixed with Chocolates



This is one of the favorite mixtures for Sunday School picnics, festivals, etc. The mixture includes some very fine assorted chocolates, as nonpareils, wrapped nougats, soft jellies, and creams. Candies of this same quality are often sold in smaller stores at about 40c per pound. Freshly packed and absolutely pure, as all our candies are.

16B22875 General Mixed Candies, Price, per 30 lb. pail $3.48

Crystallized Gum Drops in Pails

These gum drops are pure fruit flavored and perfectly crystallized, not merely rolled in sugar, as many other grades are that are sold for even more than we ask. Made in the new twist shape, and look like fancy jelly bonbons. These are new, and will probably be sold at 25c a pound by many other stores. Freight rates are very low on candies.

16B22877 Crystallized Gum Drops, Price, per 30 lb pail $2.97

OUR MILITARY SET
COMPETE IN EVERY DETAIL AND THE BEST QUALITY TO BE HAD

We do not hesitate to recommend our Military Safety Razor Set with the accessories that go with it, to be as good, if not better, than many sets now on the market under extensively advertised names which sell for about double our price. This set is made by one of the most reliable cutlery manufacturers in the country and in point of quality, material, careful construction, superb finish, convenience and satisfaction in using, this set is as good, if not better, than the advertised sets that are offered at nearly double the price of ours. The outfit consists of one safety razor of the best, most improved type, with heavy, handsomely engraved and finished handle; 12 finest steel, double edge razor blades, oil tempered, hand-honed, ready for immediate use; one stropper handle for sharpening the blades; a box for sharp blades and a box for used blades; a genuine Badger shaving brush in a round metal case with screw cover; one prepared razor strop 14 inches long in box with telescope cover; one box of shaving powder contained in a screw cover container; the whole is contained in a plush lined, leatherette case, with silver-plated snap. All of the articles composing this set are triple silver-plated and handsomely finished.

WOSTENHOLM'S FAMOUS IXL RAZOR
THE IDEAL RAZOR FOR PARTICULAR GENTLEMEN
$1.39

This razor is considered by barbers and those familiar with cutlery, to be the best German razor made. It is the leading razor manufactured by George Wostenholm & Sons, of Sheffield, England, celebrated cutlery manufacturers, and probably enjoys a wider use by barbers and people who know the merits of a good razor, than any other make on the market. The blade is made of the very best English razor steel, oil-tempered, hollow-ground, and hand-honed, sharp, ready for immediate use. Blade is ⅝-inches wide; is very thin, has a round point and nicely shaped tang. The handle is of imitation ivory and is handsomely gold engraved. We do not hesitate to recommend this Celebrated IXL Gentleman's Razor to give the very best of satisfaction to any customer, no matter how hard a beard he may have or what kind of service he may demand of a razor. It is one that will keep its edge with very little honing and keep in condition with very little attention. We have made an exceptionally low price on this splendid razor for we want our customers to know something of the splendid values we give in our cutlery department. This price is less than half the regular price charged for this same razor by most dealers.

HAIR SWITCHES, WIGS, TOUPEES, CURLS, CLUSTERS, ETC

Superior quality and workmanship characterize every article of hair goods that we sell. In matters of this kind too much emphasis cannot be put on the manner of manufacturing. In every case only real human hair is used, the finest grades from every locality abroad. We have spared no effort or expense to secure skilled experts, whose work is a marvel of neatness and careful finish. Compared quality for quality and size for size, our prices are lower than the lowest. Furthermore we have never sacrificed quality, always maintaining the same high standard in the various grades of hair. Our goods are made under the most hygienic and sanitary conditions, insuring absolute protection and safety.

We list only the standard articles, but are equipped to furnish anything that you may desire, anything that can be made. When ordering, always send a sample so that we can secure perfect match. All we ask is that you permit us days in which to execute your order. If for any reason we are unable to match hair in a particular grade we will advise you at once.

Where "finest quality" is quoted we furnish pure cut hair in natural shades, best real human hair procurable. "Mixture" refers to the combination of pure and 2d quality hair. In "good quality" hair goods, only the best 2d grade real human hair is used.

We guarantee all our goods to be free from wool, fiber and combings; cle pure and sanitary. We welcome any inquiries about the line, and promise spe attention and personal consideration.

STRAIGHT SWITCHES

The present style of hair dressing finds a very attractive straight switch worn in the front of the hair in a loose swirl. Ours are well made, giving a long and satisfactory service. We carry them in several grades. Workmanship at all times is perfect throughout.

Send us a sample of your hair and we will quote prices on shades other than the regular browns, blondes and black.

HOW TO MEASURE WIGS FOR LADIES AND GENTLEMEN

Measure carefully, twice for certainty.

1st The circumference of the head from the forehead around the back of the neck.

2d From the forehead to the nape of the neck over the top of the head.

3d From ear to ear, across the forehead.

4th From ear to ear, across the top of the head.

5th From temple, to temple, around the back of the head.

When ordering, mention style, catalog number, and state whether you wish parting on the right or left side. If you measure carefully there is no reason why we cannot fit you perfectly. Allow us from a week to ten days to fill your order. Your complete satisfaction is guaranteed.

HOW TO MEASURE TOUPEES

In measuring for a toupee, cut out a pattern, the exact size of the bald spot. Mark the words, "front," "back," "right," and "left" in the proper places, draw a line where you wish a parting, enclose a sample of your hair, and state whether your hair is curly or straight.

MACY'S AUTOMATICALLY ADJUSTABLE DRESS FORM $5.94

Every woman who makes her own dresses needs one of our Automatically Adjustable Dress Forms as much as she needs her sewing machine or needle. You can make a dress without the sewing machine but you cannot fit one to your own figure without one of these adjustable forms.

Thousands of women have been compelled to give up home dressmaking just on account of not being able to fit themselves properly; and have been compelled to pay exhorbitant tailor's bills that they could have easily saved and in addition have had that keen pleasure of making their own garments. Order one of these Automatically Adjustable Dress Forms today, and your dressmaking troubles will end; you will not only save your tailor's bills, but you will have better fitting clothes, clothes that fit as you want them to fit; clothes that you know fit, because you have fitted them yourself on a model of our own figure.

Macy's Automatically Adjustable Dress Form is the most rigid and most durable Dress Form made. It has automatic adjustments for the neck, bust, hip and skirt. The skirt can be made fuller or scantier, as you wish, or to conform to the prevailing fashion, and the form can be raised or lowered to give any length skirt desired. The form is mounted on a rigid iron stand that is fitted with casters and can be moved around easily. The general lines of the form conform exactly to the approved 1911 model of the American woman. It is made in two styles; Style A, when closed is 32 inches bust measure and opens to 44 inches; and Style B, when closed 36 inches bust, and opens to 48 inches. Packed ready for shipment, it weighs 35 pounds.

3B23419 Macy's Automatically Adjustable Dress Form Style A or B. Price each..... **$5.94**

Automatically Adjustable Dress form, made in 8 sections. This form is similar in general construction and design to the one above, but it has in addition several very desirable features: The neck can be made larger or smaller; the bust can be increased or diminished; the waist can be made larger or smaller; the waist can be lengthened or shortened; the hips can be made larger or smaller; the skirt can be made fuller or scantier; the form can be raised or lowered to make any desired skirt length. The form is mounted on a roller stand; the upper part is made of papier mache, covered with Jersey cloth, to which the material is pinned while fitting or draping. The skirt is made from strong steel wire, and will not bend. Style A is for bust 32 to 44 inches; Style B is for busts 36 to 48 inches.

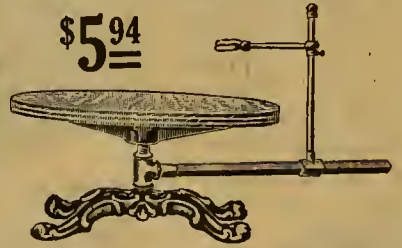
$5.94 ACME SKIRT MARKER, $5.94



The Acme Skirt Marker is a necessity to every woman who makes dresses, whether for herself or for others. The person to be fitted stands in one position on the raised platform, while the marker is moved around, thus making an absolutely even line all around the skirt, to give the correct length, or to mark the position for ruffles, flounceing, trimming, etc. The platform is of fine finished oak, polished, while the base is enameled and has nickel fittings. The arm and upright rod, which are of steel and nickel plated, are removable and the stand along can be used for a stool. Every part of this marker is made in the best possible manner, and the finish is perfect. This marker cannot be purchased elsewhere under $7.00. Shipping weight 20 lbs.

54c PERFECTION SHOULDER BRACE

DEEP AND PROPER BREATHING is necessary to good health, beauty of form and a military carriage. Few people breath properly. Those who do usually are found to be people who live outdoors a large share of the time. Those who work over desks, who sit all day long over the typewriter or sewing machine, or whose occupation requires a stooping posture a part or all of the time acquire the habit of improper breathing, which is hard to correct without artificial help. Unconsciously the shoulders stoop, the chest sinks and before you realize it you have become disfigured, you have lost your erect carriage, your health is impaired, and in time you are a physical wreck. The lungs are the great purifiers of the human system and no condition should be allowed to exist which will restrict their functions, if possible to prevent it.

MACY'S PERFECTION BRACE

is scientifically constructed to form an ideal support for the shoulders and back, to compel deep and proper breathing, to force proper expansion of the lungs, to throw the shoulders back into their normal position, to correct narrow chests and to give the body health, strength, erectness and beauty of form. It fits the body perfectly, can be worn by men, women and children, without the least discomfort. The perfection Brace is made of thin, light weight washable material, is self lacing and so simply constructed any child can put it on without assistance. In ordering, give chest measure under arms. Fully guaranteed. Extra small size 22 to 26 chest measure; small, size 28 to 32 chest measure; medium size 34 to 38 chest measure; large size 40 to 42 chest measure; extra large size 44.

READY MADE COAT PADS FOR WOMEN'S COATS 19c

Many women have been debarred from making their own coats and suits because they could not properly fit and pad the coat so as to give the perfect figure so much desired. These pads are designed to give this help to the home dressmaker. They are already made and shaped, and all that has to be done is to insert them into the garment. They are made from a very good quality canvas and are padded with good felt; the padding is taped on and reinforced. You cannot buy the materials and sit down and make a pair of pads as good as these to cost you as little as the extremely low price we ask.

14c FOR READY MADE YOKE FOR SKIRTS AND PETTICOATS

These yokes offer a great help to the woman who is sensible enough to make her own clothes. It is no longer necessary to fuss and try to fit the waist of a petticoat or skirt. Get one of these yokes of the proper size, and all you have to do is attach the body of your petticoat, and the hardest part of the work is done. Can be also used for the foundation of a skirt by sewing the skirt material on top of it. The yoke is made of fine sateen and is perfectly shaped to the body and finely finished, even to the hooks and eyes. It can be had in black or white and in all sizes from 24 to 36 inches deep.

MODEL FITTED WAIST LINING 49c

BONED AND SEWED — READY TO PUT IN

This lining is another help for the home dressmaker that originated with us. This is one of the greatest aids that could be offered to the thousands of women who make their own waists. Entirely new, and pronounced by the most experienced dressmakers and ladies' tailors to be the most perfect that has yet been produced. It is boned, sewed and fitted, and makes the dressmaking a very simple matter. The under arm and shoulder seams are temporarily basted on the outside to permit proper fitting and sewing on the drew fabric. The lining is manufactured from fine Percaline, and can be had in any size from 34 to 44 bust measure and in long and medium lengths; black, white and gray only. With every lining is furnished extra inside canvas collar, and extra stays; also a circular with full directions for fitting and sewng. You cannot make this lining for double what we ask for it.

TERLING SILVER TABLE WARE

Besides the six splendid patterns shown in knives and forks we show two brand new strikingly beautiful designs in tableware. One rich design is called the GRAPE pattern, because the ornamentation comprises grape cluster with leaf in relief. The other, designated the Empire, is really royal in shape and appearance. The finish ith is French Grey, in a soft clouded effect. We offer this sterling silverware at prices far below those asked in retail jewelry stores and invite comparison of both quality and price. matter of fact, every article is priced to within a fraction of the factory cost to us on the principle of large sales and small profits. Satisfaction guaranteed or money refunded.
NGRAVING One fancy script initial or two initials in plain script FREE OF CHARGE. Extra lettering, plain script, 3c per letter. Extra lettering, fancy script, 5c per letter.

THE FRONTENAC is a well-known design, finished in the beautiful soft gray, and of such richness in effect as to be a universal favorite; the lily is used as the motif of the pattern; good heavy weight.
THE FLANDERS, a rich attractive pattern in bright, burnished finish; medium heavy.
THE MARGARET, a revival of the Old English thread border, popular past century; medium weight.
THE VIDLET, one of the best designs in gray finished floral effects we have ever shown.
THE BRIOAL ROSE represents the highest art of the silversmith, and is an exceedingly beautiful pattern, expressing all the chaste beauty of the bride's favorite flower in the soft gray-finished silver.
THE CARNATION. A handsome floral design finely finished in gray, attractive and one of our best.

JEST QUALITY SILVER PLATED ORIGINAL DESIGN SPOONS

isy Arbutus Flower Florida
y Bright Gray Bright
sh. Finish. Finish. Finish.

In this assortment of spoons we have to offer the celebrated line of "William Rogers and Sons" brand. We guarantee it to be the genuine article. The blanks used in the Roger Plate Silverware are made in medium weight and will give good lasting service. The fancy pieces illustrated on this page, especially the Daisy, Arbutus, Flower and Florida patterns are marvels of beauty. The fancy pieces all come in heavy weight, and considering the price there is not a better value in the catalog than this line of Rogers silver-plated fancy pieces. Every one of the spoons, knives, forks and fancy pieces in the entire line on this page is plainly stamped with the Rogers' Trade Mark together with the number—whether extra plate or triple plate. You are therefore not buying blindly when you buy the Roger's Brand from us. The years of reputation behind these manufacturers of high grade silverware support any claim that is made for these goods, and as for a price comparison between the ordinary retailer and R. H. MACY & CO.—our prices really show a wonderful saving. The four patterns illustrated here are named—from left to right—Daisy (Gray Finish), Arbutus (Bright Finish), Flower (Gray Finish), and Florida (Bright Finish).

CLOCKS AT REDUCED PRICES

Few, if any, stores have so complete a line of moderate priced clocks as we have, and none can offer such reliable, well-made clocks for so little money. The products of the best known makers in this and foreign countries are included in our line, and every clock we sell is guaranteed to be and do just what we claim. Our clocks are shipped most carefully packed, and we guarantee the safe delivery of every clock we send out. Any clock that is not in perfect working order when received can be sent back to us at our expense, and a perfect clock will be sent you. You take absolutely no risk that way. You will find the prices on our alarm clocks and other clocks considerably lower than the prices quoted for similar clocks by other mail order houses. We buy our clocks as we buy all our other merchandise; at the lowest possible price, regardless of the quantities we have to take to secure this price.

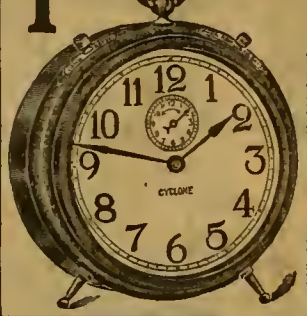
Mission Wall Clock

With Mission style construction so much in vogue, this handsome clock at our extraordinary low price should appeal to you. It is finely made in that rigid, bold style that characterizes the mission products; measures 27½ inches high and 15¼ inches wide. The case is made of Flemish finished solid oak, the dial being of the same material and 12 inches in diameter. The figures are of heavy brass and the hands are of brass. Guaranteed New Haven movement, striking the hours and half hours on a sweet-toned wire cathedral gong. This is an eight day clock and keeps good time. The pendulum is an ingeniously constructed framework of Flemished oak, and the pendulum bob is of polished brass, adjustable to make the clock run faster or slower. This clock makes a splendid wall piece for dining-room, parlor or sitting-room, and is a wonderful bargain at this price. The shipping weight, carefully crated, is 25 pounds.

81B24601 Price each $2.89

$1.98 Cyclone Alarm Clock

Continuous or Intermittent



This is the best alarm clock every sold at so low a price. Unusual both in construction and movement. It can be made to ring a loud, continuous alarm for 5 minutes, or it can, in an instant, be changed to an intermittent alarm to ring for ½ minute and remain silent for ½ minute, and so on for a quarter of an hour, or the alarm can be shut off entirely, or stopped at will by means of a switch. The clock stands 7 inches high and has a 4¾ inch dial. The gong is 5 inches in diameter and forms the back of the clock. Has an easel back so the clock can stand, or it can be hung up, as desired. The case is made of nickel, handsomely finished; movement is one day guaranteed. This clock never fails to give excellent satisfaction, and at our special price is a fine bargain. Shipping weight, 56 ounces.

81B24606 Price each $1.98

CUCKOO CLOCKS

Among expressions of contentment and happiness, the cuckoo clock has long headed the list. The sweet chirping of the cuckoo in its quaint clock-home is a symbol of peace and satisfaction the world over. The possession of one is an ever-present influence for cheerful home surroundings.

It is our experience that the best is the only kind worth while. Cheap cuckoo clocks are hardly deserving of wall space. They never keep correct time and owing to their faulty construction, they soon fall apart. We carry only the highest grade, the best to be had.

Imported directly by us, we have chosen only such clocks as we know are absolutely dependable. We cheerfully invite a comparison of prices. We are from one-fifth to one-half lower than the lowest.

IMPORTED CUCKOO CLOCK

$4.96

Directly imported from the home of the makers in the black forests of Germany, this neatly carved solid walnut cuckoo clock is highly to be recommended, not only as a beautiful decoration, but as a correct and dependable timepiece. The case is most beautifully hand carved, the oak leaves and deer's head as natural as in life. The pendulum is hand carved and has a regulating screw at the bottom. The hands are bleached bone, the Roman numerals in white celluloid. The movement is the best obtainable, solid brass, weight winding, guaranteed accurate. Runs 24 hours with one winding. Both the hour and half-hour are announced by the cuckoo; at the same time they are sounded on a rich, deep-toned gong. Measures 19 inches high; 14 inches wide; 5¼ inches, dial diameter. Shipping weight 24 lbs.

A SPECIAL MACY BARGAIN VALUE

We are making a special offer in this clock, and one that you cannot afford to miss. Cheap imitations of this clock have appeared, inferior in construction, movement and finish, and have been offered in its place. Ours is the genuine, imported from the Black Forests of Germany directly by us. Made of walnut, beautifully carved and inlaid with woods of lighter color, effecting a striking contrast. The movement is of heavy brass and steel, thoroughly guaranteed. It is run by weight, being wound up by pulling a chain, as are the most expensive cuckoo clocks. The cuckoo calls the hour and half-hour and there is also a gong strike on the hour. The dial measures 5¼ inches in diameter, with hand carved hands and raised numerals. Fitted with a pendulum, regulated by means of an adjustment screw, a superior method, making for accuracy and durability. The clock measures over all, 21 inches high, 14 inches wide. Shipping weight, 20 lbs. Ours is the best. The other clocks are not reliable, and being flimsily made, do not last. Get ours.

MAGIC FOLDING UMBRELLAS

A MARVEL OF CONVENIENCE AND SERVICE FOR THE WOMAN WHO TRAVELS

Don't be annoyed by being obliged to carry a clumsy umbrella around with you when traveling. The ordinary umbrella must either be carried in the hand or left at home when you go away on a trip. You can't put it in your trunk or suit case, and you can't check it. You must either do without it or carry it with you wherever you go. This is no longer necessary; as the Magic Folding Umbrella has been designed to meet just the purpose required by women who travel, while at the same time it is a splendid umbrella for those who stay at home. The handle can be pulled out and folded over, making the entire umbrella small enough to go into the ordinary suit case. When the handle is pulled outward, being released by a little button, the tip disappears into the rod as if by magic, and there is no danger of the tip soiling your clothes, no matter how wet or muddy it may be. The umbrella is made of selected Union Taffeta, and is tape-edged, thus insuring strength and good wearing qualities. It is equipped with a very strong, 8-ribbed paragon frame, of the full size; the folding arrangement does not decrease the size of the umbrella in the least. The handle is the straight 10-inch mission handle or can be had in the natural hooked wood handle, as desired. When ordering, do not fail to specify the handle you wish. The umbrella is sent complete with covering case and handsome tassel, and makes a most desirable and useful article for anyone. Our special price for this fine umbrella is no more than you would ordinarily pay for a plain umbrella without the special folding features of this one. This umbrella, if bought in the ordinary way, costs $2.50 or more, and very many are sold at that price. Shipping weight 5 pounds.

An Attractive Pattern at a Very Low Price

Quality, tasteful decoration and serviceability all combine to make this a very attractive number. The American porcelain used is the very best that we could procure for the money; it is very heavily glazed, perfectly finished and guaranteed not to glaze; each piece is daintily decorated with clusters of pink and white roses, entwined with white morning glories, and festoons of tiny blue forget-me-nots; these floral decorations, combined with the delicately tinted natural color stems and leaves harmonize very well indeed with the stippled gold handles and gold decorations on the larger dishes; if you want a generally useful Dinner Set that is guaranteed exactly as represented, and which is priced at a figure below what is usually asked for much inferior grades, here is your opportunity; we ship the sets direct from our pottery in Ohio, ensuring prompt service, and every piece will be carefully packed and examined before it is sent to you; any breakage in transit will be replaced at our expense. For composition of these dinner sets see page 251. Not sold in open stock.

COMBINATION GLASS AND DINNER SET---160 PIECES $8.69

This price is 50 per cent Better Than Others Quote

This excellent combination Dinner Set and Glass Set possess so many points of merit and desirability that we feel sure it will meet with instant favor with our patrons. The 100-piece Dinner Set is of a very fine quality of pure white Porcelain, guaranteed not to craze, and to stand hard usage; the shape of the pieces is decidedly pleasing; the bodies are nicely finished and have an embossed filigree border all around the edges, and handsomely embossed handles; every piece is decorated with dainty sprays of green flowers, leaves and ferns, in natural colors and tastefully distributed over the white background; the 60-piece Glass Set consists of 12 each of five sizes of tumblers and glasses, all made from fine blown glass, nicely shaped, and splendidly adapted for table use. This combination meets the requirements of the table admirably, and at very low cost. You would expect to pay elsewhere as much for the Dinner Set as we are asking for both the China and Glass set, and remember you are safeguarded in this purchase as you are in all purchases from Macy's,—it must please you in every respect, be exactly as we represent it to be, or you are at liberty to return it to us, at our expense of transportation charges both ways, and we will cheerfully refund your money. This is not an Open Stock pattern, therefore we can only furnish as listed. Shipped from New York.

$8.97 MACY'S SPECIAL GOLD INITIAL WHITE PORCELAIN 100-PIECE DINNER SET

A Value Never Offered by Dealers Elsewhere

In giving our pottery directions with references to this set we instructed them to turn out a Dinner Set that would be so perfect in every detail, that we could stamp it a genuine Macy Special; the result more than justified our expectations. We are offering you here a Dinner Set consisting of 100 pieces, made of the best quality American porcelain, smooth finish and guaranteed not to craze; the decorations consist of a heavily embossed ornamented border of very dainty pattern outlined with a very fine gold edge line; all the handles and ends are attractively ornamented with gold, with gold lines extending into the body of the pieces in harmonizing design; each piece is additionally ornamented with a gold initial, making the set much more exclusive. We always have a large stock of sets stamped with the different initials, but if an unexpected demand for any one initial temporarily reduces our stock we can have a set decorated with the initial desired within ten days of receipt of order. Shipment is made direct from our pottery in Ohio, and every piece carefully examined and packed before being sent to you; breakage in transit will be replaced at our expense. This is not an Open Stock pattern, and can only be supplied in the 100-Piece combination as listed in opposite column.

SUPERIOR AMERICAN PORCELAIN 100-PIECE DINNER SET $9.87

A Delight and Joy to Every Lover of Pretty China

Another excellent offering in fine quality American Porcelain Dinnerware, pure white, suitably glazed and warranted not to crazs; all the pieces are tastefully decorated with dainty sprays of pretty blue flowers, leaves and stems of delicately tinted green; a touch of faint violet in the nature of a background makes the decorations stand out beautifully; an embossed border in an unique design follows the outline of the dishes; the platters have a pretty gold ornament at the ends, and all the handles are delicately traced with gold; you will be surprised at the care with which each piece has been so skillfully moulded and carefully decorated because such high class workmanship is usually to be found only in high priced dinner sets. We make shipment direct from our pottery in Ohio. This is not an Open Stock pattern, and can only be furnished in the 100-piece set as described on page 251.

This is an imported open stock pattern Dinner Set of first quality German Porcelain, made for us in one of the largest potteries in Dresden, Germany. We buy these sets so advantageously, and sell at such a close margin of profit, that our price to you is no greater than you would pay for American made goods of average grade. This set is designed in a solid, substantial pattern, which gives the pieces a heavy appearance, although in reality they are thin and light. The decoration consists entirely of a fairly large poppy design in heavy blue, with leaves and vines of the same color. There is a very elaborate center design of pepples and leaves on all the plates and larger dishes, and every piece has a blue edge tracing, which adds to the beauty of the set. The handles and knobs are embossed with a simple geometrical design which is fully traced and outlined in blue. All the decorations are put on before the finis glazing, and are guaranteed never to come off. This set can be supplied in our regular 5 piece, 100-piece, or 102-piece combinations, as described on page 251, or you can make up a combination you desire from the open stock list below. Shipped from New York. Safe delive guaranteed.

This imported English dinnerware is a very popular pattern, all the pieces being made in pleasing full-rounded shapes of the finest quality, pure white English porcelain. Its popularity is due in a measure to the attractive decoration, which consists of an attractive deep blue border in three sections. At the edge is a blue band with white dots, and under this is a handsome ribbon design, with intervals of flowers and leaves. The third section of the border is a festoon design, composed of round dots in bead form; the three parts making up into a beautiful border, a tracing of rich gold appears on all the edges and extends around onto the handles. The handles have a dotted blue border, with an edging of gold, and are nicely embossed, the embossing being fully traced with gold. This blue and gold combinat makes a very attractive decoration, and coupled with the very low price and the good qua of the set, makes one of our very best sellers. Sold in the open stock selections as well our regular 56, 100, and 102 piece sets as described on page 251. Shipped from New York.

102-PIECE DINNER SET

Shipped from Ohio

This is one of our fine patterns of domestic porcelain dinnerware which have done much for making us prominent as the leading store in this country for this class of goods. This set is made in our own pottery in Ohio, and is shipped to you direct from the pottery, thus effecting desirable saving in freight charges. It is made from the best grade of pure white porcelain. Decorated in a series of very attractive, full shaped forms and patterns. The decorative design is pure gold tracing, no other coloring whatever being used. The edges are embossed with a pretty dot and flower design which shows up remarkably well. The gold design is a wide band of brightly burnished gold following closely the outline of the dishes. The handles are heavily embossed in a very attractive design, all the lines and knobs of the embossing being fully traced and outlined with bright gold. All the plates and platters have a gold circle in the center. Complete sets shipped from pottery in Ohio. See page 251 for composition of these sets.

102-PIECE DINNER SET

This pattern, which comes from our own pottery, one of the largest in Ohio, is a high grade selected white porcelain, heavily glazed, and splendidly finished. This is of the same fine quality materials and workmanship, and the same pattern as our gold trimmed set 3127. The only difference is in the style of decoration. This set is handsomely decorated with garlands of roses, showing half blown and full blown flowers, in delicate shadings of pink, with leaves and stems of natural colored green. There is a suggestion of forget-me-nots as a background for the roses, which adds charm to the design and makes it exceedingly desirable. The flowers are artistically arranged to form handsome border designs. The embossed edges of dot-and-flower are very pretty and enhance the appearance of the colored decorations. The handles are embossed and the embossing is fully traced and outlined with fine gold. Shipped direct from the pottery in Ohio. See page 251 for composition of these sets.

102-PIECE DINNER SET

Shipped from New York

This is a rather novel pattern of porcelain dinnerware that is very much liked by many who prefer the simpler styles of decoration. This ware is made in one of the large Dresden potteries that supplies us with some of the more attractive patterns. As we buy a very large part of their entire output, we are in a position to almost dictate the prices that we pay, and consequently our selling price is much lower than that of any other dealer in dinnerware. Every set we sell, whether the price is two dollars or a hundred and two dollars, is a bargain. This pattern is of highly finished porcelain, highly glazed, and perfectly formed. Every piece is decorated with a double wide and narrow blue stripe, which follows closely the outline of the dishes. The handles have plain, but neat, embossing, which is outlined with blue dots and stripes. Guaranteed not to glaze or crack. Shipped from New York. See page 251 for composition of these sets.

This imported selection is an unusual value for the money we ask, and is sold so close to the producing cost that we doubt if any other dealer can sell at anything like our low prices. The bodies of all these articles are made of first quality, pure white English porcelain, in very attractive shapes. Each piece is carefully finished and has a hand glazed surface that will not craze or crack. The border is simple and exceedingly attractive, coosisting of triple leaves in a delicate shade of green, with a delicate stamen-like lavendar figure after each leaf. All the edges are traced with an edging of bright gold and there is a gold circle in the center of each plate and platter. The handles are neatly embossed and the embossing is fully tr and outlined with bright gold. This pattern is sold in the regular sets as described on 251 or we can fill an order for any combination from the open stock list below. Ship from New York.

102-PIECE DINNER S

Shipped fro Factory in O

This is a very good quality Domestic Dinner Set, made for us in one of the leading potteries in this country. We buy these goods in great quantities in dull seasons, thereby getting them at attractive prices. This enables us to sell them so cheaply, cheaper in fact than any other store is able to offer them. This set is made in a very pleasing series of shapes, following the lines of the highest priced chinaware. The material is the best American Porcelain, nicely glazed and finished, and guaranteed not to craze or crack. The decoration consists of sprays and garlands of pink and white roses in natural colors, intertwined with delicately tinted green leaves and stems. A lightly embossed line decorates all the edges, which are of a peculiar scalloped pattern. The handles are embossed in pleasing signs, and all the lines and knobs of the embossing are traced and outlined with bright The make-up of the sets priced below will be found on page 251; this ware is also sold open stock, at the prices given in the list below. 102-PIECE DINNER S

Shipped fro Trenton, N.

This is an extra fine and exceedingly handsome pattern of American tableware that is a remarkable value at the small price we ask for it. It compares favorably with many high priced Austrian China sets, and the finish and decoration is as good as on any set sold at nearly double the price. This ware is made of a superior grade of semi-vitreous, pure white porcelain, elegantly finished and with a fine glazed surface. The shapes are very attractive, being molded along beautiful symmetrical lines. The decoration is a very handsome one, and consists of a border of pink and white roses entwined in garland form with daintily colored green leaves. This border is enclosed in a double line of fine gold tracing. Several groups of roses artistically arranged at intervals around the pieces. The entire set is full gold lined wi fine line of burnished gold. You cannot buy a better porcelain set at a half more tha ask. Shipped from Trenton, N. J. For composition of these sets see page 251.

102-PIECE DINNER SET
Shipped from New York

This is one of the very best values in open stock pattern, decorated porcelain table ware that have to offer. It is made in Staffordshire, England. This set is a duplicate of a very expensive English pottery design that is found in some of the most fashionable homes of England and this country. We import this splendid reproduction, and it is practically given you at cost to other dealers when we quote you these wonderful low prices. The elaborate decoration is put on before the glazing, and will never come off. The heavy, dark blue design shows several landscape views, with castles and bridges, and flowing rivers. The different figures and views are separated by a very elaborate border design, and the whole set is a very beautiful piece of work. The entire set is full gold lined, the gold tracing extending around to the handles. The pieces are fashioned in the favorite English polygon style, the square note being followed throughout. The quality of the porcelain is of the best, and the workmanship and finish as near perfect as they can be. You are not paying any jobber's commissions or profits, but you are getting the very best dinner set that has ever been sold at such a low price. Shipped from New York. For composition of these sets see page 251.

102-PIECE DINNER SET
Shipped from New York

This is one of the finest grades of imported, open stock pattern, French Chinaware, guaranteed genuine, as every pattern is stamped "Theodre Haviland, Limoges, France." Our imitation for this season was secured at an exceedingly low price, and we placed it on sale about a fourth less than the lowest price we have been able to discover for the same goods anywhere else. The material for this fine set is the very best procurable and all the pieces are fashioned after a series of very attractive patterns. The decoration is a very elaborate tender flower design arranged in groups and sprays, and tastily placed as borders and center ornaments. A background of delicately tinted green leaves enhances the beauty of the design and makes this a very beautiful set. There is a very pretty embossed pattern on all the pieces, and the handsomely embossed handles are heavily clouded with a fine grade of Roman gold. Many of the pieces are decorated both inside and outside. This set is sold in our regular sets of 66, and 102 pieces as described on page 251, or can be supplied from the open stock list given below. Shipped from New York.

102-PIECE DINNER SET
Shipped from New York

This rich-looking dinner set comes from our own pottery in Carlsbad, Austria, and is made by the same skilled workmen, and with the same painstaking care that we demand for goods sold at two and three times the price. All the pieces are made in beautifully rounded shapes in a simple, attractive pattern, that cannot but please the most fastidious. The decoration is simple, neat and exceedingly attractive, consisting of a plain, Roman gold band on the rim of each piece and on the base of the larger articles. All the handles, and the ends of the meat dishes have a simple embossed line traced with plain lines of Roman gold. Aside from this, the bodies of the articles are perfectly plain, and are exceedingly rich-looking. The slightest addition of color of any kind would have spoiled the beautiful simplicity of the design. The quality of the china could not be improved on, and the finish and detail of the work is the best. The prices are much lower than you can buy similar dinnerware for anywhere. Shipped from New York. For composition of these sets see page 251.

102-PIECE DINNER SE

Shipped from New York

This is a beautifully decorated set of pure Schwarzburg China, made in our own pottery in Rudolstadt, Germany. In spite of its exceedingly low price, we guarantee it to be a first-class dinner set in every sense of the word—in material, workmanship, style, decoration and finish. It is made of a strictly first class thin china ware, fire glazed and semi-transparent shaped in a series of beautiful, artistic designs. All the larger dishes have an extra base rib on the bottom, which strengthens them, and prevents cracking. Every piece is guaranteed perfect in every respect, and we will replace any piece that is imperfect without any extra cost to you. The decoration consists of a border design of tiny pink roses set in a cluster of four or five green leaves. Each rose has under it a spray of tiny, pale green leaves hanging in festoon form. A daintier border would be hard to imagine. Every piece has a crim like embossed edge, traced with a band of bright gold. The handles are heavily embo to form a ribbon effect, and are fully traced in bright gold. In addition to our regular piece and 102-piece sets described on page 251, these goods are sold in open stock and can make up a set to suit your own requirements. The 102-piece set we quote at $24.84 c not be bought anywhere else for less than $30.00. Shipped from New York.

102-PIECE DINNER SE

Shipped from New York

This is one of the very best china dinner sets described in this catalog. There is nothing you can buy anywhere at any price that will give you better satisfaction than this splendid selection. Our guarantee on this set means that every piece has been carefully inspected and is perfect, as we condemn a set of this quality on the slightest imperfection. The material is a very strong German china of the very best quality, fire glazed and exquisitely finished. The bodies are beautifully shaped as shown in the illustration, and could not be better moulded if the set cost four times what we ask for it. The decoration is the handsomest that could be designed with simplicity as the keynote, the color scheme being green and gold on white, an extremely rich combination. The border has a small triangular motif, repre-senting a curtain effect, and is in a rich deep green. A double gold band outlines the green design, and there is a tiny heart shaped gold figure inside each triangle of the curtain, with a gold tassel-like hanger after every triangle. An extra gold tracing on the bulge and edge of every piece gives this handsome set a richness hard to match. All the handles handsomely embossed with a very neat design, the embossing being outlined with the a rich gold that is used for the rest of the decoration. This fine dinnerware is made in own pottery in Rudolstadt, Germany, by the best of our skilled workmen. This means you are buying direct from the manufacturer at the manufacturer's first price and are pa no extra profits to anyone. Our price to you for this superior set is lower than any de can buy such fine ware for. We can furnish this in the regular 56-piece and 102-piece as described on page 251, or you can make up a set to suit yourself from the open stock below. Shipped from New York.

This is one of our own productions, being made in our own pottery at Rudolstadt, Germany. Our sales on this particular number are enormous, and we are compelled to devote an entire section of one of our potteries to this pattern alone. Making and selling in large quantities, we can keep the price down to about two-thirds of what such wares are selling for in the regular retail market. The bodies of these pieces are made of a very fine glazed, pure white, thin china, moulded in perfectly rounded, pleasing patterns. Every set is beautifully finished and the sets compare favorably with sets being sold now in New York at much higher prices. The decorative scheme consists of garlands and festoons of roses. The roses are very small and are of the most delicate pink shade, with deep pink centers. Here and there on each garland is a primrose colored flower, which harmonizes with the general design. The stems and leaves are of a most delicate green, with an occasional yellowish-green leaf. In addi to the floral design, there is a tracing of rich Roman gold on the extreme edge of each All the handles are of a handsome embossed pattern, all the knobs and outlines being tr with rich Roman gold. This is a very handsome set and it is a wonderful value at our price. It can be supplied in our regular 56-piece and 102-piece sets, as described on 251, or you can make up a combination to suit yourself, selecting the items from the stock list given below. 102-PIECE DINNER SET

Shipped from New York

This rose pattern dinner set is one of our own products, and is designed to provide a first-ass dinner set at a very moderate price. The bodies of the articles are perfectly made om the finest quality pure white china, in our great Schwarzburg pottery and by men who ve been all their lives at this kind of work. Every piece is beautifully fashioned along lain, symmetrical lines, with several slightly raised ridges on the larger dishes. The corative scheme is exceedingly attractive, and consists of clusters and sprays of roses, stefully arranged. The flowers are of a delicate pink, as near the color of the natural owers as it was possible to produce them, and are offset by tiny green leaves. The edges are crimped-embossed, the crimping being fully brought out with a fine bright gold line. All the handles and the ends of the platters are embossed in ribbon effect, and fully traced with gold. This is a very pretty set and a rare value. We can supply it in our regular 56-piece and 102-piece sets, as described on page 251, or you can make up your own dinner set from the open stock list below. Shipped from New York.

102-PIECE DINNER SET

Shipped from New York

This is a very handsome pattern of high class dinner ware, and cannot be duplicated in similar quality for a third more than we ask for it. It is made in our own pottery in udolstadt, Germany, and cannot be procured through any other dealer at our low price. he body design is a well rounded smooth pattern, the only departure from the smooth, ound lines being the embossed handles. The material is the highest grade pure white china, horoughly fire-glazed, and guaranteed as to quality, workmanship and finish. We will re-lace any piece not found just as we represent it. The decoration on this fine dinner set s a very pretty flower pattern, in the most exquisite of colorings. Each piece has for a entral figure a bouquet of beautiful Dresden flowers, handsomely arranged and in the most elicate of natural colorings. The flowers are not stiffly assembled in rows or borders, but look as if they had been scattered by some artistic hand. Smaller groups and sprays of pretty Dresden flowers decorate the edges and sides of the pieces, the bowls, cups, etc., being decorated inside and outside. All the edges are outlined with a band of bright gold, and the knobs and embossing on the handles are fully outlined with gold. Besides the regular 56-piece and 102-piece sets described on page 251, this fine dinner ware can be supplied in open stock selections, at the prices in the list below. Shipped from New York.

102-PIECE DINNER SET

Shipped from New York

This is an unusually popular pattern and one that we have constant demand for, owing to the attractive decorative scheme, which we find is always a favorite in American homes, and the very low price we ask for it. This is one of our own ma.., coming from our great Schwarzburg pottery in Germany. The body material is a fine grade of selected, pure white china, and is moulded into handsome, well rounded patterns that always please. Every piece is as perfect as it is possible to make it, and is fully guaranteed. The decoration consists of beautiful sprays of naturally tinted blue forget-me-nots, intermingled with green leaves and green stems. The sprays are of different sizes, ranging from a single blossom to bouquets of several hundred. Many of the pieces are decorated inside and outside, which adds to the richness of the set. All the edges are traced with a fine gold band of first-grade highly burnished gold. The handles are richly embossed, all the lines and knobs being fully traced with fine gold. This excellent dinnerware is sold in our regular 58-piece and 102-piece sets, as described on page 251, or you can make up sets of your own selection from the open stock list below. 102-PIECE DINNER SET

Shipped from New York

This attractive dinnerware comes from our own pottery in Rudolstadt, Germany, and is as good a set as is usually sold for one-third more than we ask. It is made from finest grade pure white china, very strong, and equal to many of the better grades of French China. The pieces are designed on plain well rounded lines, have a very rich appearance, and will stand more handling than many of the fancier patterns. The chief attraction of this fine set is the beautiful decoration, which consists of an American rose design. The roses range in size from one-fourth to one-half inch, and are in a variety of delicate, natural pink shades, some showing in full bloom and some but partly opened. The delicately colored green leaves and green stems are so arranged as to give a very striking effect. The flowers are in groups and sprays, tastily arranged in border and center designs, but with an artistic effect that shows no stiffness. All the pieces are full gold traced with a fine band of bright burnished gold. The handles are embossed, the embossing being followed out with fine gold tracing. This set is sold in our regular 56-piece and 102-piece sets, as described on page 251, or can be had in the open stock selections from the list below. Shipped from New York.

102-PIECE DINNER SET

Shipped from New York

This is a handsomely decorated set of genuine German China, made in our own pottery in Rudolstadt, Germany. The Chinaware comes in a neat, plain edged pattern, every piece being well rounded and perfectly formed. The fire-glazed finish is put on after the decorating, which makes the design permanent. The decoration consists of an elaborate border design of floral festoons hanging from an ornamental band. The band is a soft grey color, and is edged with a double row of very small green leaves, symmetrically arranged. The festoons are formed of garlands of cultivated and wild roses, intertwined with green leaves. In the center of each festoon is a ring covered with roses, arranged similar to the flowers in the garlands. All the flowers and leaves are in their natural colorings, and the whole border is extremely dainty and has a beautiful appearance. All the edges are fully outlined with a gold tracing of fine burnished gold. The handles are of an embossed pattern and are fully gold traced. This is an extra valuable set and a wonderful bargain at our price. It can be had in the regular 56-piece or 102-piece sets as described on page 251, or sets can be made up from the open stock listed below. Shipped from New York.

$23.66 102-PIECE DINNER SET

Shipped from New York

hie is the best bargain you could buy in first quality dinnerware. Here is a real china ner set at about the price you would ordinarily pay for good porcelain. It is perfectly ie from high grade pure white china, in our own pottery in Budolstadt, Germany, and we w it to be first quality goods in every way. Like all high class china it is patterned along pie lines, more care being given to symmetry and beauty than to fancy shapes. The oration is in one color only—pure gold. A very fine grade of selected gold is used for decoration, and all the lines and figures are highly burnished. The design is a lace figure and extremely handsome. The lace border follows the outline of all the flat aes, and ornaments the bulge of the round ones. Where the border is not on the edge. the edge is nicely traced with a fine gold-edge line. Every piece has a center ornament in the form of a medallion of pretty leaf design, also in the bright gold. All the handles are nicely embossed, the embossing being traced and outlined with gold. This is the handsomest set you can buy for anything like our price. We furnish it in either our 56-piece or 102-piece sets as described on page 251 or you can make up your own sets from the open stock list below. Shipped from New York.

DOUBLE-THICK SEMI-VITREOUS WHITE HOTEL PORCELAIN WARE

SEMI-VITREOUS PORCELAIN is an absolutely non-absorbent material. Our semi-vitreous products will not turn black where chipped or cracked. Our supplying potteries are engaged in making the best grades of utensils for hotel and home use, and are situated right where the choicest raw materials are to be procured at the lowest possible cost, which enables us to sell the goods at such an astonishingly low range of prices. Semi-vitreous porcelain is the best and most economical kind of table ware for hotels, restaurants and boarding houses requiring dishes that will withstand rough usage. It is made of the best grade semi-vitreous porcelain with a fine hard enameled surface that is guaranteed against crazing. We can furnish you these goods decorated with a band and monogram in one color, at the slight additional cost of 49c per dozen pieces when ordered in lots of 20 dozen or more. This enables you to get fine table ware, marked with your initial or crest, at about the same price you would ordinarily pay for plain ware of an inferior grade. Semi-vitreous porclain can be supplied either half-thick or double-thick, as desired at the same price. State whether you wish half-thick or double-thick

TABLEWARE IN SETS AND SEPARATE PIECES

On these pages you will find illustrated some choice tea sets, game sets, sugar and cream sets, and many other small sets of desirable porcelain and china tableware, as well as many separate pieces; all selected from the great Macy China Store. All the articles are handsome in appearance. The prices are the unmatchable Macy prices, always lower than offered elsewhere.

56-PIECE PORCELAIN TEA SET $3.49

GREEN FLOWER PORCELAIN TEA SET This is undoubtedly one of the finest moderate priced tea sets you can buy, as it offers the best possible value for the money. These sets are made for us by one of the very large Ohio potteries that supplies the great Macy China Store with this class of goods, and we enjoy an especially low price arrangement with this pottery, which enables us to offer these sets to you at the greatly reduced price. The set is shipped to you direct from the pottery, which is another advantage, as with less handling and less shipping from factory to store and from store to you, the goods can accordingly be sold at a smaller price. The bodies of the articles are of a white porcelain, hard baked and heavily glazed, and are handsomely decorated with a pretty green floral design. In addition to the colored decoration the pieces are embossed at the edges with an attractive raised border. The composition of the 56-piece set is as follows:

12 Tea Cups	12 Sauce Dishes	1 Cream Pitcher
12 Saucers	1 Teapot	1 Bowl
12 Tea Plates	1 Sugar Bowl	2 Cake Plates

15B26301 56-Piece Tea Set; shipping weight 60 pounds. Price per set..... $3.49

56-PIECE HIGH-GRADE TEA SET $4.87

BEAUTIFULLY DECORATED PORCELAIN This excellent tea set, which is made from the best grade pure white porcelain, is the equal of sets sold elsewhere for from $6.00 to $7.00. Being made especially for us, and in great quantities, we are enabled to offer this very low price; you should spend your money to the very best advantage and where you will get the most for it. The Macy China Store is known as the one best place to buy china and porcelain ware, and the place where the best values are to be obtained. All the pieces in this set are shaped in a pleasing dainty pattern and are finished with scalloped edges and handsomely embossed borders. The beautiful decoration consists of pretty sprays of pink flowers with green leaves, in natural tints, and are tastefully arranged. All the edges and the neatly embossed handles are traced and outlined in bright gold. These sets are shipped to you direct from the pottery in Ohio. The set is made up as follows:

12 Tea Cups	12 Sauce Dishes	1 Cream Pitcher
12 Tea Saucers	1 Teapot	1 Bowl
12 Tea Plates	1 Sugar Bowl	2 Cake Plates

GERMAN WHITE AND BROWN PORCELAIN

THE ARTICLES LISTED BELOW are but a few of the hundreds of kitchen utensils we have in this fine material. This brown and white porcelain is made by a special process which renders it absolutely fireproof. The outside of these utensils are heavily glazed with a hard baked brown enamel which no heat can crack. The inside is a pure white, hard enamel, perfectly smooth and heat proof. These utensils are imported by us from a German pottery that makes them exclusively for us. We set the price of these goods at practically the same figure that it costs us, which is much lower than any other dealer can sell them for. We offer you this high grade kitchen ware for what you ordinarily pay for earthenware imitation.

GERMAN PORCELAIN COFFEE MACHINE 49c

This excellent coffee machine is made in two sections, of brown and white hard enameled German porcelain, and is becoming more and more popular every day. It is the most effective method of producing coffee and also the most economical. It extracts the full strength of the coffee giving it a new and delightful flavor. If you haven't tried it, you're missing a great treat. Easily handled, quick and clean. The porcelain offers great resistance to the heat and is not affected by sudden changes in temperature. We recommend it as the most desirable boiler made, inexpensive, yet thoroughly satisfactory in every way. In the following sizes:

WHITE PORCELAIN TOILET SETS

This toilet set is made of a superior quality of white porcelain. It is heavily enameled and perfectly glazed and finished. It is adapted especially for Boarding House or Hotel use, but is equally suitable for the private home, where extreme durability is to be desired. The ware is decorated with plain white embossed figures as shown in the illustration. While the utensils are heavy and will endure a world of abuse without damage, they are not clumsy or cumbersome, and will not look out of place in the daintiest bed-room. We furnish these sets in large numbers to public institutions, hotels and rooming houses throughout the country and in all cases the ware has given the very best of satisfaction. The quality is such as you would expect in sets costing you double our price. Shipped direct from our pottery in Ohio.

DECORATED PORCELAIN TOILET SETS

This is an exclusive pattern we have just added to our line of toilet ware, and which has met with very favorable consideration by our customers. It is a departure from the usual form of toilet ware, as each piece is octagonal in shape. It is made of a very superior grade of porcelain; is heavily enameled and perfectly glazed. A very pretty gold floral design decorates all of the pieces with a dainty, embossed border near the top. All of the edges are traced with bright gold; just the kind which meets the requirements of the average home where good service and attractive appearance is demanded. You will find this an especially desirable set and one which will look exceedingly well in your very best rooms. Guaranteed absolutely sanitary. Shipped from our pottery in Ohio.

HOTEL PORCELAIN TOILET SETS

This set is made strictly to supply the demand from hotels and public institutions for a toilet set of superior quality, which would stand hard use and which could be furnished at a moderate price. The very best of porcelain is used in its manufacture. It is heavily enameled and perfectly glazed. All utensils are made heavier than for private use but the pattern is relieved in such a way that none of the pieces are cumbersome or awkward. They are decorated with a plain wide band in either blue, pink, green or maroon, with a gilt line on either side. All edges are gold traced. This ware is absolutely sanitary and where the glazing has been broken, the porcelain underneath has been so treated that it is non-absorbent so that even when in a damaged condition, the ware will not become unsanitary. It is one of the very best hotel toilet sets on the market and at our extremely low price is exceptional value. Shipped direct from our pottery in Ohio.

The Saving is so Great When You Order Merchandise from us that You Can Well Afford to Pay Freight Charges

In fact, on almost any bill of merchandise you order from us the saving will generally be large enough to pay the freight on several similar shipments. If you will think a moment you will realize that there must be some reason why men and women all over the world give us their patronage. In fact, our business would never have grown to its present enormous proportions, we would not have become one of the great retail merchandising houses in America, had we not saved money for those who order from us, and our customers pay the transportation charges on the goods ordered. The fact that our business grows in volume year after year, should prove to you that our low prices and our high qualities make it decidedly to your advantage to order from us.

While the freight charges are very low and hardly worthy of serious consideration when compared to the savings we make for you, nevertheless we are very anxious that our customers shall take advantage of the lowest freights on every shipment ordered from us, and, therefore, it will be greatly to every customer's advantage if he orders merchandise in sufficient quantities to make up a freight shipment of at least one hundred pounds. In almost every case if the shipment weighs less than one hundred pounds, the freight charge to you is based on one hundred pounds. In other words, while the railroads will accept shipments weighing ten pounds or less, they charge for its transportation to your station the same sum they would ask if it weighed one hundred pounds; therefore, when you send us an order, if it weighs less than one hundred pounds, we suggest that you look through the catalogue and anticipate your wants. If you will need something else a little later on, include it with that order to bring the weight up as nearly to one hundred pounds as possible. We are glad to get your orders, and we do not wish you to think that we want big orders only, because we will be very glad to send you anything you need at any time and in any quantity, but we offer this explanation of how to get the freight rates down to the lowest possible figure, so that you may take advantage of them whenever possible to do so. Always remember that freight rates on goods ordered from us to your station will cost you exactly the same that an equal quantity of the same goods sent to a retail dealer in your home town will cost him. You can therefore well afford to take advantage of our wholesale prices, just as the merchant takes advantage of the jobbers' prices, the freight charges being the same to both of you, and you keep the saving we make for you in your own pocket, instead of giving it to someone else in the form of a middleman's profit.

Do not let anyone lead you to believe that the freight charges will be a big item

UR CARPET AND RUG DEPARTMENT

TAKE GREAT PLEASURE in presenting this and the following pages to your attention in view of the remarkably oes and the uniformly high standard of the goods illustrated and described. Not e the prices remarkably low and the qualities unsurpassed but the styles shown hereon ictly up to date, and we feel safe in saying that were you to call at any other hment in any large city you could not find more attractive designs, more beautiful s, or delicate patterns than are shown in these pages, but of course you must understand, that owing to the limited space in any book, we are unable to show he hundreds of styles and patterns of our rugs and carpets.

LINE OF CARPETS and rugs is without doubt the largest of any carried in this country. Our methods of buying and selling are distinctly our own, and enable us to offer the very finest as well as down to est grades at a great saving in prices. We can and do, without misrepresentation, hat we have developed one of the largest carpet and rug buying organizations in the Having seven separate and distinct offices in Europe and the Orient for the sole of buying, we are in a position to command market conditions, and obtain price oos unequalled anywhere. REMEMBER, this brings the benefit to you. Buying our n the basis we do and offering them to you with just our one small margin of profit brings these carpets and rugs to you at a figure in many instances so low that lers themselves could purchase from us to a decided advantage.

THERMORE, YOU SHOULD REMEMBER that this department is e of several hundred, and therefore only bears its little share of expense of operation, are not in the position of the dealer who must make all his profit from a single merchandise.

RY ORDER you send to us from this catalog is accepted with the distinct understanding that the goods we send you must reach you in condition, that they must prove satisfactory in every respect, and if you are not , you are at liberty to return to us at our expense of transportation charges both nd we will immediately refund your money.

CT REPRODUCTIONS of designs and colors are given through our beautiful colored illustrations. By the use of nderful three-color process of printing, the colored illustrations are exact reproduc- om the articles themselves, and though they are small, they will convey to you an ot understanding of the beauty and richness of these rugs and carpets. With this ge, you may feel entirely safe in ordering and feeling sure that when the goods ou they will be exactly as ordered. While we are always willing to furnish samples, lly believe that it is unnecessary for you to go to the trouble and waste of time ry to write for samples, for after long experience in the use of these colored repro- s, we find customers can order very satisfactorily direct from the catalog. We are very st you will be more than pleased with the goods you order from this department ney arrive, because they are much handsomer and richer than even these illustrations ra portray them.

STYLES ARE THE VERY LATEST Our output is unlimited, so that we never carry over he season to another any of the patterns we have handled. Every design and every shown here is new, the color effects are the very latest and we show such carpets ge as can only be found in the most fashionable city retail stores. We do guarantee atement to be absolutely true, else we could not afford to say to you that if you more than pleased with the selection, we are ready to return your money to you, y the transportation charges.

IGHT AND EXPRESS CHARGES amount to very little. The prices we quote in this catalog cash and there are no discounts. Transportation charges must be paid by the er, but we will say that the express or freight charges you will have to pay on any r other goods purchased from this catalog will amount to very little, practically nothing compared with the big saving in price you are able to make when you buy goods

WE CUT, MATCH AND SEW CARPETS AT A VERY LOW PRICE.

IVE CENTS PER YARD extra we will match and sew any 36-inch Ingrain Rug to 6t any room.

IVE CENTS PER YARD extra we will match, cut and sew any 27-inch Tapestry, r Axminster Carpet to 6t any room.

WELVE CENTS PER YARD extra we will cut, match and sew a Tapestry, Velvet or Axminster Carpet where there is a border to match. For example, in making a rug from a Tapestry, Velvet or Axminster Carpet to which there is a border on four sides, or in making a borderless carpet to fit any room.

OUR SPECIAL PRICE for matching and sewing according to the kind of carpet, is very much lower than the same work is being done by any other house, but the demand for made up carpets has grown to where we are now doing the work by automatic machinery on so large a scale as to reduce the cost of matching, making and sewing.

WASTE IN MATCHING CARPETS We require that you allow 1½ yards wastage in matching for each 25 yards. For example, if you wish a carpet for a room measuring 25 yards, you should pay for 26½ yards, or if you wish a carpet for a room measuring 12 yards, you should pay for 12¾ yards. We will cut with as little waste as possible, and if we can make it up, we will give you the benefit of the saving and return the difference to you in cash.

How to Make a Plan and Measure Your Room

We present here a floor plan of two adjoining rooms with windows of three different shapes, to illustrate how the diagram should be drawn and a correct way of taking the measures.

The front of the room, the entrance, all the windows and door openings should be plainly marked and special care should be taken to show if doors have sills or not, and if so whether the threshold is flush with the wall or from a recess. If the door slides on a rod, same should be shown by a line. Be careful to give the exact size of room or rooms, and don't make any allowance for turning under or matching the Carpet. Measure the length and depth of all windows and recesses exact (here we would suggest to soap a chalk line across the windows, to measure from), also locate mantles, radiators or register, and last, but not least, take the full length and width of the room or rooms.

If you wish to order a Carpet and send us a diagram carefully drawn and measured as here suggested and illustrated, we will at once be able to detect any errors and the possibility of a mistake in cutting and fitting your Carpet will be practically obviated.

HIS TABLE SHOWS YOU HOW MUCH CARPET YOU NEED

GIVE A FULL EXPLANATION of this table below. If the size of your room is not given in this list we advise you to allow enough money to pay for the next arger size and we will cut the carpet with the least possible waste and charge only for the exact amount of carpet used in the In this table we have figured in the waste used in fitting the room, but if in cutting the carpet there happens to be less waste we will return whatever balance is due you at the e shipment is made. When necessary to send in a drawing of your room locate front of house, entrance and bay window if any.

VE WE GIVE A LIST OF DIFFERENT SIZED ROOMS and have figured the number of yards of 36-inch carpet, 27-inch made plain without border, also 27-inch carpet made with border, that would be d. If the size of your room is not given in this list and you wish to order carpet e, we advise you to allow enough money to pay for the next larger size, and we will carpet with the least possible waste and only charge you with the exact amount of used in the cutting. In figuring the amount of carpet used in fitting these rooms we ncluded the ordinary waste, but if we can cut the carpet with less waste when your is received we will do so and will return whatever balance you have at the time the nt is made. Perhaps you will wonder why there should be waste used in matching et. Let us explain that the patterns of different style carpets do not match exactly me distance, some patterns being 30 inches apart, some 32, 34 and 36 inches. Take stance a room size 14x15 feet, and you will readily see that it requires 5 widths of ingraio carpet, each width being 14 feet long. This would be the actual amount of used to cover the room. We find when we go to cut this carpet that the patterns ot match at 14 feet exact, but that this pattern cuts at 14 feet 9 inches, and you will see that each strip will have to be cut 14 feet 9 inches long to make the patterns on every strip. On five widths of carpet we would be obliged to use 45 inches more than is actually needed to cover the room and you would be charged with 1¼ yards waste used in matching. This also applies to rooms of different sizes and also applies to Brussels, velvet and Axminster carpets as well as ingrain carpets. Should your room be size 14x14 feet, you will see that we are obliged to use five widths of carpet to cover the room and there will be a strip of one foot on the side that you will either have to turn under, or, in a great many cases, our customers use this extra amount of carpet used in matching to be placed at threshold, or will save these pieces to be used in case a hole is burned in the carpet, as quite often occurs. Remember, Brussels, velvet and Axminster carpets are only 27 inches wide; borders used on carpets are only 22½ inches wide. Ingrain carpets are 36 inches wide. If your room is odd shaped, having a bay window, fireplace or offset, and you do not feel that you can figure the exact amount of carpet in it, we would advise you to send us a diagram of the room, giving all measurements, and we will be pleased to quote you a price on any carpet you may wish. You will note that two rooms of different sizes will require the same amount of carpet. For example, a room 14x14 feet will require 24¾ yards of ingrain carpet. For a room 15x14 feet it will require 24¾ yards of Ingrain carpet. On each of these rooms we are obliged to use five widths of carpet, each width 14 feet long, which, of course, does not include the waste used in matching. You will readily see that for the room size 14x14 feet you will have 1 foot of carpet 14 feet long that you will either to have turn under or can cut it off and use at the threshold, as above stated.

HIGHEST GRADE SEWING MACHINES

ABOUT THE QUALITY of our sewing machines. Many persons think the extremely low prices we are able to make on sewing machines mean that we are handling a cheap, inferior grade of machines. They get this idea from the talk of the agent or local dealer who insists that it is impossible to get a good machine for less than $35.00 to $65.00, as the case may be. The real truth in the case is, that our machines are made by a company that is known for the high standard of machines it turns out. This factory is equipped with all the latest, improved automatic machinery, operated by expert mechanics. The material used in the construction of our machines is the very best, and the construction itself is in accord with the very latest standards of excellence as to utility, durability, ease of operation, and beauty. Our machines, therefore, in quality are equal to or better than machines made by so-called standard companies and sold for two and three times the price we ask. We are able to make extremely low prices because of our method of selling, which eliminates all middlemen's profits. We ship direct from the factory. As soon as a machine is completed by our factory it is delivered to the railroad company and shipped direct to the purchaser, thereby saving the expense of handling the machine, and thus we avoid the investment of a large amount of money in warehouses and stock. On the other hand, the method of selling employed by companies who sell through local dealers and agents is the most expensive. The manufacturer sells to the jobber, the jobber to the local dealer or agent, who in turn sells to the consumer. Each party to the transaction has to have a profit, which in the case of the agent or local dealer is always exorbitant, so that when the machine is finally delivered to the user, he has paid for at least three good round profits. These are the profits we eliminate. The difference in prices of our machines and machines sold by agents and local dealers is not in the intrinsic value of the machines themselves, neither is it due to any secret process of manfacturing, but it is simply and solely in the method of buying and selling. Think it over.

REMEMBER when comparing prices of our machines with prices of machines offered by other mail order houses, that in order to make a fair comparison you should add 75 cents to their prices for attachments which we include free. Our prices, including attachments, will be found equal to or lower than their prices for machines alone. The reason given by these houses for quoting prices on attachments in addition to the cost of the machine is, that they find many purchasers in buying machines do not care for the attachments. As a matter of fact, the real reason is that they use this means to get a higher price for their machine, knowing well that ninety-nine out of every hundred of their purchasers will pay the 75 cents extra for attachments, and at the same time they give the customer the impression that their prices are below ours.

BIG MONEY IN SEWING MACHINES

Hundred Per Cent Singer Company "Melon" Reaches $30,000,000.

[By The Associated Press.]

New York, June 3.—One of the largest "melons" ever sliced for the delectation of stockholders will be cut by the Singer Manufacturing company, makers of sewing machines, which has called a meeting of directors on June 18 to declare a $30,000,000 stock dividend to its shareholders. The company is capitalized at $30,000,000 and the stock dividend is 100 per cent. The company has a surplus of $30,000,000, but the directors believe that a stock rather than a cash dividend is advisable.

FREIGHT CHARGES are of little consequence as compared with the great saving in the price of the machine if you purchase from us. The average weight of a machine crated for shipment is about 115 pounds. The freight rate per 100 pounds in the Central States ranges from 25 cents to 75 cents; in the Eastern States from 75 cents to $1.50; in the Western States from $1.25 to $2.00; and in the Southern States from $1.00 to $1.60. By referring to the tables of freight rates shown in the introductory pages of this catalog, you can estimate almost exactly the freight charges to any point on any machine selected. Sewing machines are rated as first class freight by the railroad companies.

$7.65 FOR A SEWING MACHINE We know there are some catalog houses advertising a machine at $7.65, but if you will read their statements regarding it, noting carefully what they do not say about it, you will discover that the burden of their talk is to advise you not to buy it. They neither recommend it nor guarantee it; in fact, they state that they are offering it simply to meet competition. This class of competition we make no attempt to meet. The intelligent purchaser knows that a machine sold at such a price cannot give satisfaction, would be a poor investment and is not worthy of his consideration. We do not care to insult the intelligence of our patrons by offering them such an article.

OUR MACHINES ARE SOLD UNDER A TEN-YEAR GUARANTEE and each and every one of them is offered at a bargain price. Our low priced machines represent just as great values as the higher priced ones. The difference in price between our cheapest and our highest price machine is in the intrinsic value of the machine itself, that is, in the case, the various improvements, the finish, etc. We add simply our small percentage of profit to each machine, no matter what the lowest or highest price, so that with every additional dollar of cost the purchaser is the gainer by just that much in the intrinsic value of the machine he purchases. Since there is only a few dollars difference between the price of our cheapest and highest priced machines, and since a machine with ordinary care and usage will last a lifetime, we believe it to be to the best interest of our customers to purchase the higher grade machine, as then they will be in possession of the very best that can be offered in a sewing machine, no matter what the price or make. Yet, if the purchaser feels that he has not the money to invest in one of our higher grade machines, he may purchase one of the cheaper machines, with full confidence that he is getting a machine which will give him many years of good service.

OUR LIBERAL TERMS OF SHIPMENT We sell sewing machines on the most liberal terms, and we can well afford to do so because of the high quality of the machines we offer. Select the machine which will fill your requirements, give the catalog number in full, including any letter, send us a postal money order, express money order or bank draft for the price of the machine you have selected, and the day your letter reaches us it will have immediate attention, and in just a few days' time the machine will be ready for delivery to you at your nearest railroad station. There is absolutely no risk in sending cash in full with your order, as you are fully protected by our ninety-day trial offer and ten-year guarantee.

The Freight Charges will be Less than you expect

There is a great deal of misunderstanding as to the cost of transportation charges on goods ordered away from home. This misunderstanding is due largely to misrepresentation in the hope that you will be prevented from taking advantage of our astonishingly low prices on the highest grade merchandise by sending your orders to us. We want you to know that the freight charges should not cause you any uneasiness whatsoever. Please remember that no matter where you buy any needed goods you pay the freight anyway. If you buy them in your own home town, the freight charges are included in the price you pay. Remember the cost of transporting merchandise is just as much a part of the cost of that merchandise as the raw materials which enter into the manufacture of the goods, so whether you buy from us at our low prices, or whether you buy from some other dealer closer to you, you pay the freight charges; it's as long as it is broad

$10.40 MACY MODEL "X" SEWING MACHINE IN THE 3-DRAWER STYLE, WITH ATTACHMENTS

DON'T BE MISLED by the low price quoted on this machine. Don't think that because this machine is low in price that it has been slighted in quality. While it is not as well finished as our high grade machines, yet its wearing and lasting qualities are first class, and we fully guarantee it to be the equal or superior of any machine on the market. Sold by others up to $12.00 or $15.00. It forms a double lockstitch. This is the only stitch that is satisfactory for all classes of sewing. The machine is thoroughly modern in construction and appearance. It is very easy to operate and simple to thread, there being no holes to pass the thread through until the eye of the needle is reached.

THE CABINET is of selected oak, varnish finish, hand lift drop head pattern, two side drawers and swing center drawer with special drilled holes for bobbins. Tape measure on front of table.

STAND is three-coat dipped in black japan, brilliant finish, is not ball bearing, wheel runs on stud and cone, easily adjustable, wooden pitman, oil cups under treadle, which is swung on pivot bearings.

AUTOMATIC BOBBIN WINDER winds the thread on the bobbin very evenly without any care on the part of the operator further than to operate the stand treadle. The machine is fitted with a releasing device on the hand wheel which enables the operator to use the bobbin winder without moving the working parts of the machine or removing the work from under the presser foot.

THE SHUTTLE is positively and absolutely self threading and is of large size, cylindrical in shape, made of the finest tool steel thoroughly hardened and polished in the finest manner.

THE FEED is double, extending on both sides of the needle. It is four motion and positive in its action, and will handle all grades of work easily and accurately. The feed is absolutely free from springs or any other yielding or uncertain device. The positive feed is one of its strongest features.

TAKE-UP is of spring pattern, screwed to inside of face plate and is operated by the action of the needle bar.

THE STITCH REGULATOR by which the length of the stitch is controlled is situated on the upright portion of the arm in plain view of the operator. It is operated by a thumbscrew sliding up and down in a slot. The slot is provided with a nickeled and polished index, and the thumbscrew with a pointer, thus the machine may readily be set to produce any desired number of stitches to the inch. Range of work, from 7 to 20 stitches to the inch.

TENSION is located on top of arm; is of the tested type used for years, consisting of tension leaf, spring and thumbscrew to adjust same

AT OUR SPECIAL PRICE OF $10.40

we furnish this Model "X" three-drawer drop head style, marquetry decorated wood-work, on board cars at factory near Chicago, from which point you must pay the freight. However, the freight charges are really nothing compared with the immense saving in price. The freight on sewing machines is a small amount. No matter where you live it will be of no consideration if you think of the saving when you buy from us; when you consider the superior sewing machine you can get from us at such a low price. Sewing machines take the first class rate of freight and this will be for a sewing machine safely crated as we ship them, about 35 cents to 50 cents for 200 miles, and 50 cents to 75 cents for 200 to 500 miles, greater or less distances in proportion. Do not let any one discourage you from ordering from us by reason of freight charges. A dealer or agent might tell you that all you save in ordering from us will be eaten up by the cost of freight, but do not believe this. We know you will make a great saving even after you pay the freight charges. We guarantee

GOOD MACHINE AT A VERY LOW PRICE

DN'T PAY THE TRUST PRICE FOR A SEWING MACHINE

LEASE REMEMBER that the basic patents on sewing machines have long since expired, and the only ason that you are nowadays compelled to pay from $35.00 to 0.00 for a first-class sewing machine when sold by retail dealers sewing machine agents lies in the fact that almost all of the rge sewing machine manufacturers, those who make the well vertised sewing machines, have entered into a combination or int agreement to maintain prices. We are independent of all usts and combinations, as our prices prove.

OU WILL MISS an opportunity if you overlook this nce to get a first class sewing machine at economical price. It is durable, handsome one of the best machines offered at a price. Every device of merit regardless expense is used in the construction of this chine. It is ball bearing and works easily. ry machine is thoroughly examined and ed by expert workmen before it is allowed leave the factory.

HE HEAD of the machine is very attractive in appearance, beautifully decorated in gold and green on olished black surface. The arm is large well proportioned with a clear space under it, as great as in any family sewing machine made, so the bulkiest work may be dled without any difficulty.

HE WOODWORK is of pleasing design, with the bent cover and skeleton drawer s. It is up to date and handsome, the front being gracefully ed and the drawers, both center and sides, are deeply and stically embossed, the wood used is an excellent grade of d oak, with a golden finish, now so popular. The surface is ly polished and the cover, which forms a sewing leaf when machine is in operation, is quarter sawed and hand polished. 't think that because we quote a low price on this handsome chine that poor material is used. It is because of our exent factory connection and the elimination of all unnecessary fits that we sell at such low prices. When we quote you a e on a sewing machine, it represents but the factory of material and labor with just one profit added. expensive salesmen, no profits to jobbers, no middle- of any sort have added one penny to the price you pay. nufactured in what is probably the largest sewing machine ory of the world, it is shipped to you direct so you receive rom first hands at almost manufacturing cost.

HE STAND is ball bearing of the most improved construction. The large balance wheel runs on two of eleven each, perfectly fitted, accurately ground 3-16-inch l balls, on the same principle as the highest grade bicycles, the maximum of ease in running and the minimum of noise be natural result. Each set of balls is contained in patent retainers which prevent crowding and breaking. A hardd and polished steel cup is set in each side of the wheel in which the balls run, being held in place by steel cones.

AUTOMATIC BELT REPLACER is supplied with every ma- e. This replacer is very simple, but its action on the belt is nothing short of velous. When the machine is open for use, it is naturally unbelted, and instead ending over and replacing the belt with one's hands, it is but necessary to move treadle and the replacer does the rest.

OBBIN WINDER is furnished with this machine, which spools the thread on the bobbins very evenly, thus enabling the operator ave properly wound bobbins, without exercising any other care than to place the obbin in the winder.

Seven Drawer Style

ATTACHMENTS

are included free at our price. Others charge for attachments. With each machine we send the following attachments, made of the best steel, polished and nickel plated; Ruffler, tucker, braider, four hemmers of assorted widths, quilter, thread cutter, foot hemmer and feller. Also the following accessories: Twelve needles, six bobbins, oil can, two screw drivers, sewing guide, and book of instructions, in the following languages: English, German, French, Spanish, Scandinavian, Bohemian and Italian.

OUR NINETY-DAY TRIAL OFFER We ship you this high grade sewing machine with the understanding that you are to have ninety days in which to test it in your own home. If at the end of that time you do not find it as represented, or it does not give satisfaction, you may return it to us at our expense, and we will refund your money, together with any transportation charges you may have paid. Thus you assume no risk whatever in sending us your order and you are under no obligation to keep the machine unless found as represented.

GUARANTEED FOR TEN YEARS As an additional safeguard, we guarantee this machine for ten years. Should the machine, with proper care and use, prove defective in material or workmanship within that time, we hereby agree to replace any part proving defective, on return of same with guarantee, or, if necessary, we will readjust the machine free of charge. This guarantee does not include needles, shuttles, bobbins or attachments.

DON'T PUT OFF ORDERING THIS MACHINE You will be agreeably surprised at its work. It will prove to be a better machine than we represent it to be in this brief description. We want you to become one of our satisfied customers, knowing that you will induce your friends to send their order to us for a machine, after you have given The Macy Model "C" a fair trial.

READ OUR LIBERAL TERMS OF SHIPMENT Remember, you have all the privileges we offer. The three months' trial agreement is in force the moment you send us your order. Let us ship you a machine on three months' trial, and if you are not satisfied you may return the machine and the money paid as well as freight charges will be cheerfully returned to you.

THE SET OF ATTACHMENTS which we furnish free with every one of our Macy Sewing Machines, is strictly high-grade in every respect and enables you to handle almost any kind of sewing on these fine machines. Instead of making you pay extra for them, they are included in our price and in this respect our method is unlike that followed by some other dealers who quote a seemingly low price and when you analyze their offer you generally find that they charge 75 cents or more additional if you want the attachments. Of course, every buyer of a sewing machine wants the attachments. This is a clever way others have of getting 75 cents additional to the price quoted for the sewing machine itself. We prefer to quote our machines complete and when you receive the Macy, it is ready to operate the minute it is uncrated. Every attachment, every tool, everything required to operate it goes with it at our price.

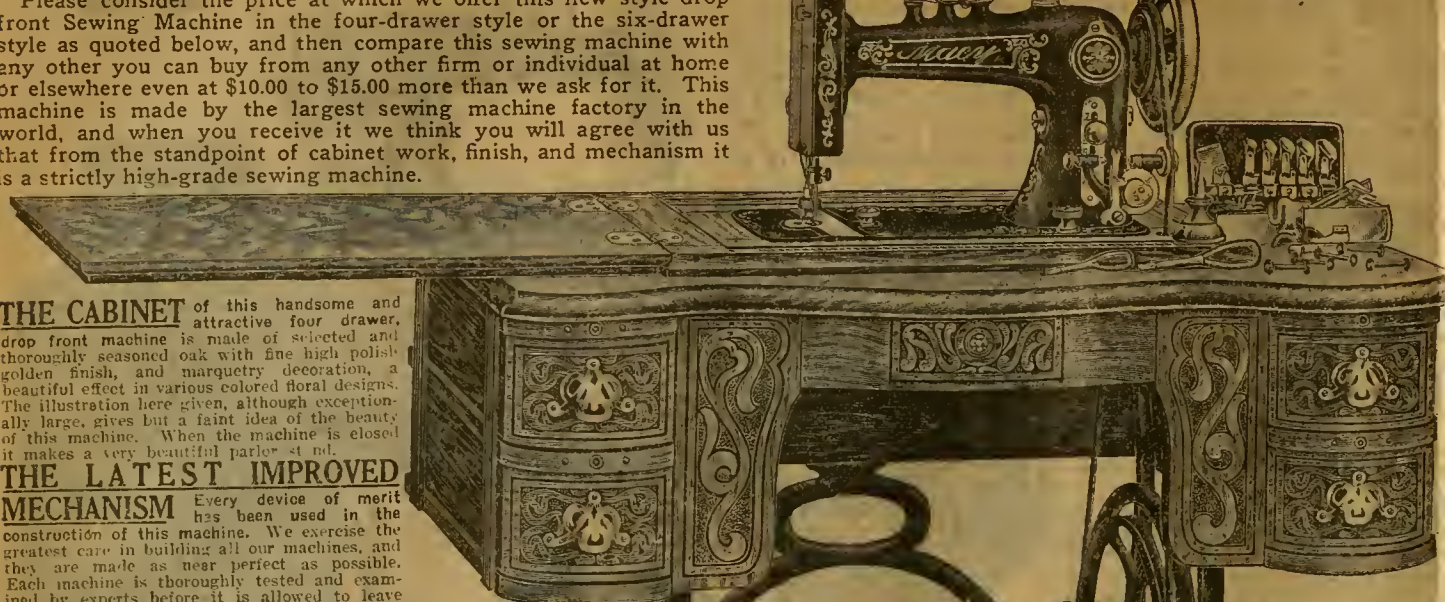
THE MACY MODEL "E" SEWING MACHINE $15.75

A NEW MODEL 4 AND 6 DRAWER, DROP HEAD AUTOMATIC LIFT, BALL BEARING STAND SEWING MACHINE

Please consider the price at which we offer this new style drop front Sewing Machine in the four-drawer style or the six-drawer style as quoted below, and then compare this sewing machine with any other you can buy from any other firm or individual at home or elsewhere even at $10.00 to $15.00 more than we ask for it. This machine is made by the largest sewing machine factory in the world, and when you receive it we think you will agree with us that from the standpoint of cabinet work, finish, and mechanism it is a strictly high-grade sewing machine.



THE CABINET of this handsome and attractive four drawer, drop front machine is made of selected and thoroughly seasoned oak with fine high polish golden finish, and marquetry decoration, a beautiful effect in various colored floral designs. The illustration here given, although exceptionally large, gives but a faint idea of the beauty of this machine. When the machine is closed it makes a very beautiful parlor stand.

THE LATEST IMPROVED MECHANISM Every device of merit has been used in the construction of this machine. We exercise the greatest care in building all our machines, and they are made as near perfect as possible. Each machine is thoroughly tested and examined by experts before it is allowed to leave the factory. We guarantee safe delivery, so that you are sure of receiving a machine in the same perfect condition in which it leaves the factory.

CHAIN AUTOMATIC LIFT This machine is fitted with our latest new chain automatic lifting device. It is simple and substantial. A solid steel polished chain running over a steel pulley makes it very easy to operate. By simply raising the cover of the machine, the head is lifted into place and is ready for use.

THE HEAD AND ARM are very attractively and tastefully decorated. The space under the arm is sufficiently large to admit of any kind of bulky family sewing without difficulty, the dimensions being 5½x8½ inches. It is given three coats of enamel, and varnished. Head has nickeled face plate which can be taken off for cleaning.

THE STAND of this machine has three-coat dipped black japan brilliant finish.

Treadle is hung on pivot bearings with oil cup beneath. Stand has full ball bearings, contained in patent ball retainers which prevent crowding and breaking; easy running and noiseless.

THE PITMAN is unbreakable steel, nickel plated. Upper bearing is universal ball joint type; lower bearing, double pivot.

AN AUTOMATIC BELT REPLACER is supplied with every machine. This replacer is very simple but its action on the belt is nothing short of marvelous. When the machine is open for use, it is naturally unbelted, and instead of bending over and replacing the belt with one's hand, it is only necessary to move the treadle and the replacer does the rest in a moment's time.

THE TAKE-UP is absolutely positive and automatic in its action. It is operated directly by a cam on the main shaft of the machine, and will control any size or kind of thread in a perfect manner in any class of sewing and will thus produce an absolutely correct stitch. There is also an auxiliary take-up near the tension disc, the function of which is to control the thread under special conditions in a more accurate manner than is possible when this auxiliary take-up is omitted.

THE FEED is double and extends on both sides of the needle. It is absolutely positive in its action and is strictly four-motion and will handle all grades of work easily and accurately. This feed is free from springs or other yielding and uncertain devices which invariably wear or weaken and cause serious trouble when used. The positive feed motion of this machine is one of the strongest special features.

Six Drawer Model Closed

THE TENSION is of the latest improved disc type, situated conveniently on the front edge of the face of the arm. It is of the utmost delicacy and wide range of adjustment and is so simple that it operates perfectly with the thread drawn once through it.

AUTOMATIC TENSION RELEASE is an important special feature of this machine. It is operated by the presser bar lifter and the action of operating this lifter automatically releases all tension on the upper thread, so that whenever the presser foot is lifted the work may be freely removed with no possibility of injury to the needle and with no special care from the operator.

All bright parts this and all oth machines shown this catalog a heavily nickel plat over copper a buffed to a high f ish. All under wo ing parts and lev on head, beneath bed, are also nic plated in dull fini

FREE ACCESSORIES AND ATTACHMENTS It has been tomary for r dealers to charge extra for attachments and accessories, giving as a reason many purchasers of machines do not need all attachments and accessories that be to a machine. They claim this is a saving to the customer, as they deduct cost of the attachments from the cost of the machine, and are thus able to nish the machine at a lower price, while as a matter of fact, they charge the same price for the machine without attachments that we charge with att ments and accessories included. With this machine we furnish the following cessories: Twelve needles, six bobbins, oil can filled with oil, large and s screw driver, sewing guide, guide screw, illustrated instruction book, and ce icate of warranty, valid for ten years. The attachments supplied without charge are made of steel throughout, polished and nickel plated, and include following: Ruffler, tucker, binder, braider, four hemmers of assorted wi quilter, thread cutter, foot hemmer and feller.

GUARANTEED FOR TEN YEARS To further show our belief in durability and wearing qualit this machine, we guarantee it for ten years. Should any of the working with proper care, become defective, we will replace them free of charge, it is necessary, we will readjust the machine at our factory without charge. guarantee does not include needles, bobbins, shuttles and attachments.

WHILE THIS SEWING MACHINE carries our full 10-year antee and it is in every a high-grade satisfactory Sewing Machine and a most unusual value at the quoted, nevertheless before you send us your order we hope you will read the criptions of the other Sewing Machines shown in this catalogue, which we offer t at slightly higher prices. 5-DRAWER STYLE WITH ATTACHMENTS

In offering our customers this new style Macy Sewing Machine which we designate as our Model "B," we are showing one of the highest grade vibrating shuttle sewing machines now on the market, a machine which has been perfected in the largest sewing machine factory in the world by men who have given a lifetime of service to the sewing machine industry, and a comparison of this machine with any other vibrating shuttle sewing machine offered by others will quickly convince any purchaser of its superiority. We describe below some of the special features of this high grade vibrating shuttle sewing machine, and we ask you to read the detailed descriptions to learn just how we build this machine, and just why it is better than any other vibrating shuttle sewing machine you can buy elsewhere, no matter what the name, make, or price.

THE WOODWORK The cabinet of the Macy Model "B" Sewing Machine is a beautiful example of the cabinet maker's art. The illustration will give you a slight idea of the handsome design and beauty of the woodwork, although of course, no picture can begin to convey to you an adequate idea of the beauty of this machine. You must see the Macy Model "B" itself before you can realize what fine materials and what careful workmanship are employed in building this cabinet. All the woodwork is made from very fine oak specially selected for the beauty of the grain, and the large flaky markings of this wood are beautifully brought out in the finishing process. The wood is smoothed, filled, varnished and brought to a beautiful piano finish almost mirror-like in its perfection. The drawers are neatly rounded in front and have attractive pulls. The front of table is gracefully designed, making a very attractive article of furniture in your home. The cabinet work by expert cabinet builders is perfection itself, and we challenge any manufacturer to produce a handsomer, better fitted, or better finished sewing machine than this, the Macy Model "B."

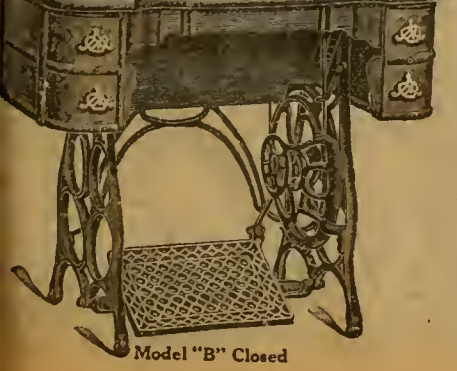
THE HEAD of this machine is very handsome, extremely well proportioned, gracefully shaped and finished in three coats of the best hand rubbed and polished black japan. It is very elaborately decorated in gold and bright colors. The arm is unusually high and gives ample room for large and bulky work. All the working parts, such as screws, plates, levers, etc., are silver, nickel plated over copper and highly polished. The bed plate is entirely without obstruction of any kind and sets into a recess in the machine table, bringing the surfaces flush with each other, very greatly improving the appearance of the machine and facilitating the handling of work.

THE SHUTTLE is positively and absolutely self threading and is of large size, cylindrical in shape, and made of the finest tool steel thoroughly hardened and polished in the most approved manner. This machine is equipped with an automatic belt replacer. By operating the treadle the belt is quickly thrown into its proper place and the machine is ready for work.

THE FEED is double, extending on both sides of the needle. It is absolutely positive in its action and is strictly the four-motion type and guaranteed to handle all grades of work easily and accurately. It is absolutely free from iron springs and other yielding and uncertain devices which are sure to wear, weaken and sooner or later cause serious trouble and dissatisfaction.

THE STITCH REGULATOR controlling the length of the stitch is operated by a thumbscrew sliding up and down in a slot on the upper portion of the arm directly in front of the operator. This slot is equipped with a polished nickel index, and the thumbscrew has a pointer; thus you may set the machine to produce any desired number of stitches to the inch from six to thirty-two.

THE AUTOMATIC BOBBIN WINDER This Sewing Machine is fitted with an automatic bobbin winder, a very vital improvement, for with it the bobbins are all wound in an accurate and uniform manner which contributes a great deal to the perfection of the work produced on this machine. With this automatic winder the bobbin is wound almost as evenly as a spool of thread, the winding being done with absolutely no care or attention on the part of the operator further than to keep the treadle moving. This winder is altogether positive and operates without any springs whatever.



Model "B" Closed

THE STAND is full ball bearing, which makes it an unusually light running sewing machine. There are two sets of steel balls, eight in each set, and they are contained in a patent ball retainer which makes it impossible for them to crowd together, to break, or to become noisy. A hardened and polished steel cup is set in each side of the wheel hub in which the balls run, and are held in place and adjusted by means of case hardened and carefully ground steel cones. The entire bearing is easily adjusted by means of a screw in the end of the stud. The adjustment could not be simpler, and as our patented ball bearing almost entirely prevents jar it may be years and years before a single adjustment of this bearing is necessary. Ball bearings have become to a high class sewing machine what ball bearings became to the bicycle years and years ago, and if you have used the old style sewing machine with its ordinary bearings you cannot appreciate what a difference these bearings make in the easy running qualities.

THE PITMAN is of unbreakable steel, silver nickel plated over copper. Its upper bearing is of universal ball joint type, absolutely non-binding. It is adjusted by one screw which may be reached from the operator's chair in front of the machine. The lower bearing is of the two-pivot type with simple nut adjustments to take up all wear.

THE TENSION is of the latest improved disc type, situated conveniently on the front edge of the face of the arm. It is of the utmost delicacy and wide range of adjustment, and it is so simple that it operates perfectly with the thread merely drawn once through it. The automatic tension release is an important special feature of this machine. It is operated by the presser bar lifter, and the action of operating this lifter automatically releases all the tension on the upper thread, so that whenever the presser foot is lifted the work may be freely removed with no possibility of injury to the needle and no special care of the operator.

NINETY-DAY TRIAL ALLOWED

PLEASE REMEMBER that we ship this machine to any customer with the distinct understanding and agreement that you may use it in your own home for ninety days, and if you are not then fully satisfied that it is all that we represent it to be, and wonderful value at our price, you may return it to us at our expense of transportation charges both ways and we will refund your money in full. You therefore assume no risk whatever in ordering this highest grade vibrating shuttle sewing machine, because we are perfectly willing to assume all the responsibility and risk of loss in the transaction.

WITH EVERY MODEL "B" SEWING MACHINE either the five-drawer or the seven-drawer style, we send, absolutely free, a full set of the famous Greist Foot Attachments. These attachments comprise a ruffler, tucker, binder, braider foot, sbirring slide plate, four hemmers of assorted widths, quilter, foot hemmer and feller. No attachments made compare with the Greist, and every other catalog house we know of makes an extra charge of 75 cents for attachments. With machine is included twelve needles, six bobbins, oil can filled with oil, two screw-drivers, sewing guide, thread cutter, certificate of warranty valid for twenty years, and an elaborately illustrated instruction book.

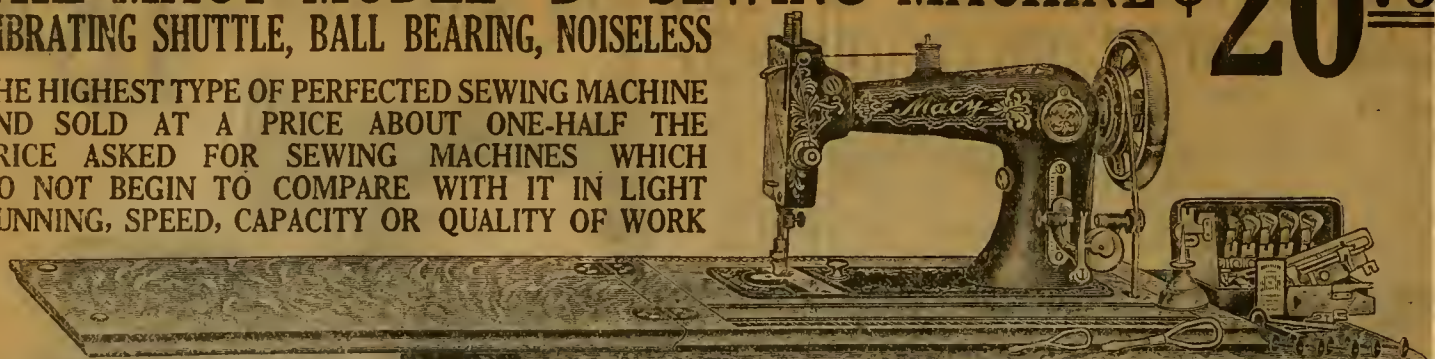
VIBRATING SHUTTLE, BALL BEARING, NOISELESS

THE HIGHEST TYPE OF PERFECTED SEWING MACHINE AND SOLD AT A PRICE ABOUT ONE-HALF THE PRICE ASKED FOR SEWING MACHINES WHICH DO NOT BEGIN TO COMPARE WITH IT IN LIGHT RUNNING, SPEED, CAPACITY OR QUALITY OF WORK



IF YOU ARE DESIROUS OF OWNING one of the highest grade sewing machines made, you must send us your order for The Macy Model "D." If we asked $10.00 more on each Macy Model "D" Machine, it would still pay you well to place your order with us. $10.00 does not begin to represent the difference in quality between the Macy Model "D" and the sewing machines offered by dealers and agents, and particularly those shown by many other catalog houses. When considering quality alone, we could certainly ask $10.00 more for a machine than the prices of other catalog houses, but fortunately for our customers, our policy is to ask just a narrow margin of profit on every article, and we figure our prices on the actual factory cost of the material and labor. When you consider that our sewing machines are so far superior to those offered by others, and the fact that our prices are very low, you really cannot afford to place your order elsewhere.

THIS IS ONE OF THE FINEST sewing machines shown by us in the pages of this catalog. It is one of the very highest grade sewing machines offered by any firm or individual, whether catalog house or retail dealer, and if you want one of the best sewing machines it is possible for money to buy, a machine which will last a life-time, and which carries our unqualified guarantee as to workmanship and quality, by all means order this, The Macy Model "D," at our $20.75 price.

WE SELL LOWER PRICED SEWING MACHINES which are guaranteed by us to give satisfaction, and machines which are worth a great deal more money than the price named by us, but only a few of them begin to compare in any way whatsoever with this, The Macy Model "D," the newest machine of the year, a machine with many new features and improvements. This sewing machine is really the sum of human progress in the development of the sewing machine, and even if you were to pay $50.00, or $60.00, or $70.00 for a sewing machine, you could not possibly get a machine which will do any better work than The Macy Model "D," or one that will run any easier, or give more satisfactory service day in and day out. We sell other machines at higher prices, but the difference in price is due solely to the difference in the factory cost of the wood work.

IF YOU ARE PLANNING TO BUY a sewing machine, before you think of placing the order at home or elsewhere, please read the pages of this catalog devoted to our line of sewing machines; read the descriptions of the high grade machines we catalog in this catalog, the detailed descriptions which tell you how they are constructed, how they excel other sewing machines of a similar type, and then before you order at home or elsewhere, select one of the sewing machines which you think would fill your requirements and let us send it to you on our liberal trial terms. We allow every purchaser of a sewing machine who sends cash in full with the order to use the sewing machine for full ninety days on trial. The machine is sent to you fully equipped with a complete set of attachments; take it home from your nearest railway station and use it on any kind of sewing for ninety days, compare it with any other sewing machine that you have ever owned or that is owned by any of your neighbors; better still, let the sewing machine agent place one of his high priced machines in your home and try our machine and the agent's higher priced machine side by side, and if, after ninety days' use under these conditions, you are not fully satisfied to keep the Macy, if this trial does not demonstrate that it is an easier running sewing machine, that it does better work, does it easier and quicker than any other machine made, no matter what its name, make or price, send it back to us at our expense of transportation charges and we will refund the purchase price in full.

UNDER THESE CONDITIONS you will not be out one penny, because we take all the risk. Sure! under these liberal terms you cannot afford to buy a sewing machine without fir trying The Macy Model "D," which is built to last a lifetime, and which, at o price, means a tremendous saving to you over the price you would pay for a other sewing machine which compares in any way whatsoever with it.'

WITH NEW IMPROVEMENTS We have greatly improved our e tire line of sewing machines. W have carefully gone over every detail with a view to improving wherever possibl with the idea of adding any little changes that will make the Macy machi better in any detail, no matter how slight. Splendid as our sewing machines ha been for the past few years, we can guarantee that the sewing machine we furnis now will give even greater satisfaction. In the large sewing machine factory whi makes these high grade machines, adapted entirely to their manufacture, turnin out an immense product daily, buying the material in such large quantities, with guaranteed output, there are facilities for doing experimental work, for makin tests and comparisons that enable them to constantly improve the quality.

IF YOU THINK OF BUYING A SEWING MACHIN that is offered to you by a sewing machine agent we know that we are placed at great disadvantage. The agent is right there on the ground with his machin while all we can offer you, unless you will take advantage of our liberal terms shipment, is an illustration and description. However, we have this advantag and that is, the agent must also tell you the price, and when he tells you t price and you compare it with our price the difference will compel you to pa and give us a fair trial before you finally place your order. We know that you could be in the factory where our sewing machines are made for just o hour and could see the kind of material that is used, the care that is given every detail of the manufacture, the class of skilled mechanics employed, i tests made; if you could see how thoroughly well made the Macy machines a if you could watch the method of drying the oak, the matching and fitting, t cabinet making, the varnishing, polishing and rubbing, the drawing and sha ing of the parts of the head, the plating and polishing of the bright parts, i grinding and tempering of the bearings, you would be convinced that no oth manufacturer goes to such lengths to produce a perfect sewing machine. Y can quickly see that every penny over and above our small margin of profit g into the machine itself, into the cost of material and labor. You would und stand why we claim that the Macy Sewing Machines are not at all to be co pared with the sewing machines you buy from other mail order houses.

N THE NEW DROP FRONT STYLE

mplete with Drop Head, Automatic Lift, Ball Bearing Stand, ıtomatic Tension Release, Automatic Bobbin Winder, Self reading Shuttle, Automatic Belt Replacer, and every ıer new and up to date feature known to Sewing Machine nstruction

IS NEW MODEL has many very attractive fea-s, conveniences which every dressmaker or istress will appreciate and enjoy. The head igh and wide, affording ample room for the iest kind of work. It drops into a dustproof when the lid is closed and is automatically d into position to sew when the lid is d back. Some machines do not have this enience, and it is necessary after the lid is d back to reach down into the case to lift head by hand. Then there is an attachment h releases the tension on the top thread by g the presser foot, which allows you to pull your work from the needle point without first ning the thread by hand as you have to do many so-called hand machines. This con-nce saves many bent and broken needles, will be greatly appreciated if you have using a machine of the other style. The tension we use on machine is of the disc type, and instead of being on top of arm, where it is inconvenient to get at, it is placed facing the ator on the face of the arm. There is an automatic take-up ıe front arm which keeps the thread tight from the needle point so that it cannot kink or twist, and insures a perfectly tight h under all conditions. An automatic belt replacer is cast to large fly wheel. When the head drops down, the belt is nearly ys thrown off the big wheel, so that it must be replaced when head is raised for sewing. The belt replacer is designed for purpose, and by simply turning the wheel by the treadle the replacer automatically throws the belt on the wheel, and the hine is ready to sew. The stand is ball bearing and the treadle s on knife edge case hardened pivots, making an unusually running, noiseless machine.

ESE CONVENIENCES are all features of the Macy Model "M" Sewing Machine combine to make it a very fine family sewing machine. As a machine will last for many years, there is little to be gained buying anything but the best, especially as our price for this grade machine is so low. There is nothing about this machine h could be improved upon—it is the equal of any sewing hine made—in fact, many customers tell us that our machines better than any they have ever used. As these letters come professional dressmakers as well as other sewing experts, we w we are safe in saying you will find your purchase a very satis-ory one and your machine a better one than nine-tenths of those will find in the homes of your neighbors, some of which otless cost three times the price you paid.

E WOODWORK The cabinet of the Macy Model "M" Sewing Machine is made from very oak, carefully selected for the beauty of the grain and the large flaky markings h are brought out so prettily in the finishing process. The wood is smoothed, d, varnished and given a piano finish, which gives it a polish almost mirrorlike erfection. The drawers are rounded and have attractive handles. The front a drop fall board which follows the head when the lid is thrown back, so it ut of the way when the machine is operated. The large picture shows the board in position when the lid is open. The small picture shows the fall d in place when the top is closed. This feature adds nothing to the sewing ities of the machine, but it adds wonderfully to its attractiveness.

E STAND is equipped with a universal ball joint pitman bearing, while the large balance wheel runs on two sets of eleven perfectly fitted, rately ground 3-16-inch steel balls, working in a ball retainer similar to that on the bicycle, which prevents the balls from crowding together or binding. The natural result is an exceptionally noiseless, easy running stand. The metal parts are all nicely japanned, correctly proportioned and well braced throughout.

MODEL "M" CLOSED

THE HEAD of this machine is very handsome, extremely well proportioned, gracefully shaped and finished in three coats of, the best hand rubbed and polished black japan. It is very elaborately decorated in gold and bright colors. The arm is unusually high and gives ample room for large and bulky work. All the working parts, such as screws, plates, levers, etc., are silver nickel plated over copper and highly finished. The bed plate is entirely without obstruction of any kind and sets into a recess in the machine table, bringing the surfaces flush with each other, very greatly improving the appearance of the machine and facilitating the handling of work.

The Macy Model "M" has all the conveniences to be found on a $60.00 machine.

Foot Attachments and Accessories Furnished Free.

THE PITMAN is of unbreakable steel, silver nickel plated over copper. Its upper bearing is of universal ball joint type, absolutely non-binding. It is adjusted by one screw, which may be reached from the operator's chair in front of the machine. The lower bearing is of the two-pivot type with simple nut adjustments to take up all wear.

THE TENSION is of the latest improved disc type, situated conveniently on the front edge of the face of the arm. It is of the utmost delicacy and wide range of adjustment, and it is so simple that it operates perfectly with the thread merely drawn once through it. The automatic tension release is an important special feature of this machine. It is operated by the presser bar lifter, and the action of operating this lifter automatically releases all the tension on the upper thread, so that whenever the presser foot is lifted, the work may be freely removed, with no possibility of injury to the needle.

BELT REPLACER This machine is equipped with an automatic belt replacer. By operating the treadle the belt is quickly thrown into its proper place and the machine is ready for work.

THE FEED is double extending on both sides of the needle. It is absolutely positive in its action and is strictly the four-motion type, and is guaranteed to handle all grades of work easily and accurately. It is absolutely free from iron springs and other yielding and uncertain devices which are sure to wear, weaken and sooner or later cause serious trouble and dissatisfaction.

THE STITCH REGULATOR controlling the length of the stitch is operated by a thumbscrew sliding up and down in a slot on the upper portion of the arm directly in front of the operator. This slot is equipped with a polished nickel index, and the thumbscrew has a pointer; thus you may set the machine to produce any desired number of stitches to the inch from six to thirty-two.

BOBBIN WINDER This sewing machine is fitted with an automatic bobbin winder, and this is a very vital improvement, for with it the bobbins are all wound in an accurate and uniform manner, which contributes a great deal to the perfection of the work produced on this machine.

OUR LIBERAL TERMS OF SHIPMENT We sell sewing machines on the most liberal terms, and we can well afford to do so because of the high quality of the machines we offer. THE MACY MODEL "A" SEWING MACHINE $21.45

WITH NEW STYLE CABINET WOODWORK
THE FINEST SEWING MACHINE WE OFFER

THIS IS THE VERY FINEST vibrating shuttle sewing machine we offer and the very best vibrating shuttle sewing machine offered by any firm or individual, no matter what the name, make or price. It has all the latest and most up to date improvements. It is in the latest drop head style, has automatic chain lift, full ball bearing stand; in fact, it has everything that goes to make for a high grade, dependable sewing machine of the very best type. We guaarantee it to be the equal of machines made and sold by others at from $50.00 to $60.00. You cannot make a mistake in ordering this machine from us, because we fully protect you with a ninety-day trial offer and a twenty-year guarantee, and as we are an entirely responsible concern you risk absolutely nothing in sending us your order.

THIS CABINET is most certain to please you, as it is entirely different in construction and appearance from others. The principal difference consists in the enclosing of the six side drawers in handsome, solid panels on the side and with beautifully curved doors on the front. The latter are hung on brass hinges and have handsome "S" shaped brass pulls and are fitted with locks and keys, thus preventing the children from mislaying the contents of the drawers. In the construction of this uniquely handsome cabinet, we use only the very best quarter-sawed oak, which is selected for its beautiful, flaky grain which is set off and developed by the hand rubbed, mirrorlike finish of the entire case. On the front of the table there is an eighteen-inch transfer tape measure, a feature which will be found very convenient by the operator.

AUTOMATIC LIFTING DEVICE by means of which the sewing head is raised to position, operates very easily and quietly. It consists of a steel cable tested to 600 pounds weight and an arrangement of metal pulleys and levers. This device also raises the center panel to a horizontal position out of the way of the operator at the same time the sewing head is elevated to position.

THE LOW PRICE we ask for The Macy Model "A" Sewing Machine is an astonishingly low price when you consider the quality of this machine, the beautiful cabinet work, the ball bearing stand, the wonderful sewing head, and all the special features embodied in this machine; a price so low when compared with the prices asked by sewing machine agents and sewing machine dealers, that it seems almost unbelievable that we could deliver a machine of first quality at such a price. But you will please remember that this machine goes direct to you from the factory, and that you are buying it at manufacturing cost plus one small margin of profit, and that our methods are entirely unlike the methods of the retail dealer or local sewing machine agent, who places a price on the machines sold by them which represents manufacturing costs, manufacturing profits, salesmen's salaries and traveling expenses, and local agent's large commissions.

THIS SEWING MACHINE sold under another name by retail dealers and sewing machine agents throughout the world, brings from $30.00 to $50.00, and if we sold sewing machines through agencies and traveling salesmen instead of through the pages of a catalog we could not begin to name this $21.45 price.

OUR SEWING MACHINE DEPARTMENT is but one of many departments of this great business. A profit of $2.00 on a sewing machine multiplied by a large number of sales in the course of a year would mean a generous total profit, when added to the profits of other departments in this great business.

UNDERSTAND therefore, that our price for this high arm, ball bearing sewing machine with all the latest improvements, does not represent any lessening of quality, and if you pay one penny more than our price to anyone for a vibrating shuttle sewing machine you are not getting a dollar's worth of added quality in the machine they sell to you at the higher price. No better materials can be used in the manufacture of a sewing machine than we use in this Macy Model "A." The woodwork is specially selected for its beauty of grain, the cabinet work is of the very highest quality, the fitting is perfect, and the finish and polish all that can be desired, and the equal of the cabinet work on sewing machines sold by others for double our price. The iron used in the casting of the stand is the highest grade Birmingham gray iron; all the working parts of the head are the best grade of steel for that purpose, and the whole is manufactured and assembled in largest sewing machine factory in the world, so that when this machine goe you, you are sure to receive such value as you cannot obtain elsewhere at anyw near this price.

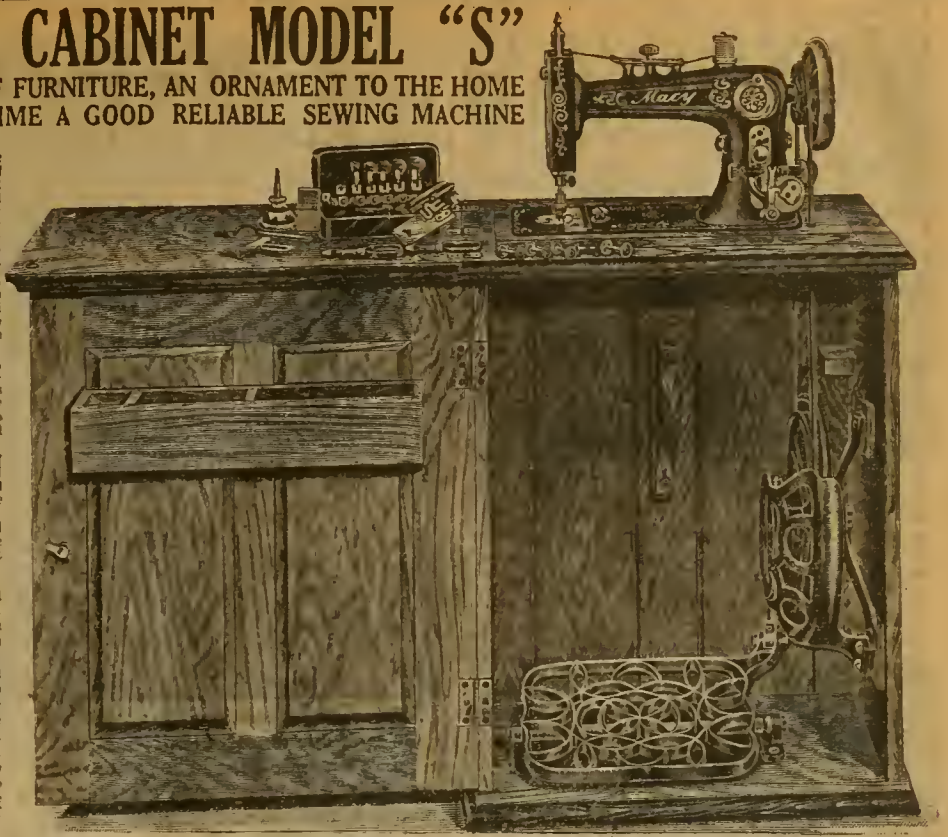
FINEST QUALI CABINET

GENUINE QUARTER SAW OAK

PIANO POLIS FINISH

16.66 THE MACY CABINET MODEL "S"

A BEAUTIFUL PIECE OF FURNITURE, AN ORNAMENT TO THE HOME AND AT THE SAME TIME A GOOD RELIABLE SEWING MACHINE



E BEAUTIFUL CABINET of this machine is made of an excellent grade of ed solid oak, in fine golden finish. The general design is most ng, as the illustration shows. The door is double paneled and panel is embossed in an unusually artistic design. The cover arter-sawed and polished, and presents an extra fine and very h surface. Unlike some cabinets, this one is not unwieldly or but on the contrary, it occupies a very small amount of floor To operate this cabinet it is only necessary to raise the cover e left and let it rest against the side of the cabinet proper. When at position it forms a large and convenient sewing leaf. The is raised to place by one motion of the arm and is locked and solidly in position for sewing by a simple, yet very effective Unlock the double paneled door, open it wide, and you have ilate access to the stand mechanism and are ready for sewing.

E STITCH This machine forms the double lock stitch, using the two threads, which are locked to- in the center of the goods, thus making a stitch which appears ame on both sides of the goods. The machine is thoroughly rn, both in construction and appearance. It is very easy to te and simple to thread, there being no hole to pass the thread gh until the eye of the needle is reached.

E LATEST STYLE AUTOMATIC BOBBIN NDER is supplied with this machine, which winds the three l on the bobbin very evenly without any care on the of the operator further than to operate the stand treadle.

E FEED is double, extends on both sides of the needle and is positive in its action. A very important feature t it does not depend on a spring to operate it, but it will lift eturn throughout its full stroke every time a stitch is made, re- ss of whether the work that is being sewed is light or heavy. machines now on the market will be found to possess a feed ent necessitating the use of a spring of some sort in order that it may do its work. This is a very bad feature, as it is a source of weakness, and sooner or later will tend to cause trouble. The parts are very few, simple and strong, which insure easy working and great durability. The more small parts there are, the more complications and the greater liability of the machine getting out of order.

THE STAND is made and finished in a good substantial manner throughout and is fitted with means for adjustment to take up the wear.

SOLD ON THREE MONTHS' TRIAL While we do not represent this machine to be as well finished in minor details as our higher grade machines, yet so far as sewing qualities are concerned, it is first class, and we allow you the privilege of using the machine in your own home for ninety days, at the end of which time, if you do not find it satisfactory or as represented by us, you may return it at our expense, and we will refund your money.

ATTACHMENTS It has been customary for many dealers to charge extra for attachments and accessories, giving as a reason that many purchasers of machines do not need all attachments and accessories that belong to a machine. With this machine we furnish the following accessories: Twelve needles, six bobbins, lowing accessories: Twelve needles, six bobbins, oil can filled with oil, large and small screwdrivers, sewing guide, guide screw, illustrated instruction book and certificate of warranty valid for ten years. The attachments supplied without extra charge are made of steel throughout, polished and nickel plated, and include the following: Ruffler, tucker, binder, braider, four hemmers of assorted widths, quilter, thread cutter, foot hemmer and feller.

THE POLISHED WOODWORK In this machine is of selected quarter sawed oak, in rich golden finish. It has serpentine front with nned corners of most graceful design. The handsomely carved panel in front door and on either side greatly enhances the beauty out sacrificing strength or utility in any degree. In appearance, it is a writing desk when the machine is not in use. The is raised automatically to position by the simple action of opening the cover, the under side of which then serves as a sewing leaf.

E BEAUTIFULLY FINISHED HEAD is a work of art. It is finished in three coats of hand rubbed and pol- l black japan and elaborately decorated in an attractive design in gold and bright colors. bed plate is entirely without obstruction by kind and sets in a recess in the ma- table, bringing the surfaces flush with other and greatly improving the appear- of the machine and facilitating the han- of the work. The arm is of the largest furnished with any family sewing ma- it is very strong and perfectly pro- oned. The clear space underneath being 3½ inches, thus permitting the easy handling of the bulkiest work.

E NEEDLE BAR is round, accurately finished and thoroughly hard- ened. This round form of bar insures absolutely rm wear at all points and perfect lubrication throughout. It is rigid in direction and is fitted more perfectly than can be done with any other form ill run with the greatest freedom and without noise. The upper end of the le bar is covered and protected by a handsome nickel plated cap, which in- cleanliness in the bearings and does away with the unpleasant projection e upper end of the needle bar above the face plate.

SITIVE TAKE-UP The take-up is absolutely positive and automatic in its action. It is operated directly by a cam he main shaft of the machine, and will control any size or kind of thread in a perfect manner in any class of sewing, and will thus produce an absolutely correct stitch.

THE TENSION is of the latest improved disc type, situated conveniently on the front edge of the face of the arm. It is of the utmost delicacy and wide range of adjustment, and is so simple that it operates perfectly with the thread drawn merely once through it.

NINETY DAYS' TRIAL To convince you of our faith in the merits of this machine, we will send it to you on ninety days' trial. You have the privilege of examining it and thoroughly testing it in your own home for the period of ninety days During, or at the end of that time, if you do not find it exactly as represented, you may return it to us at our expense, and we will refund your money, together with transportation charges you may have paid.

For Acetylene Gas Only

The Ikonograph is the most modern and perfect motion picture machine. The simplicity, which is its leading feature, offers the first complete and satisfying solution of presenting beautiful pictures at a very cheap price. By means of photographic films which are supplied in various lengths, the Ikonograph reproduces on a screen or wall, actual scenes of places and people with lifelike verisimilitude. On the films are 24 pictures to the foot and these are projected on the screen at the rate of from 12 to 24 per second, according to the natural desired effect, forming a continuous moving picture. These are not the crude and lifeless pictures of a common magic lantern, but perfect little dramas full of action and movements. The machine is operated by acetylene gas. The body is made of sheet steel, 9 inches high, 14 inches long, mounted on wooden base, 8x16 inches. Fitted with double focus lenses and a large condensing lens. Automatic fire shutter, 2 acetylene burners and an acetylene generator. It will show about 2½ feet clear pictures. With our machine we give one continuous 10 foot roll full of comic subjects. $4.49 for a High Class Gas Radioptican or Picture Machine

The radioptican projectors are easily operated instruments which project a brilliantly illuminated and greatly enlarged image or photograph clipping or small object of any kind on a white screen or wall. The pictures on the screen are from 3 to 6 feet in diameter and look just like stereopticon or make lantern views. Any photograph or post card, any picture cut from a magazine or newspaper, your own drawings or any small flat object, such as a butterfly, a leaf, a pressed flower or watch, may be projected onto the screen greatly enlarged and in all its own colors. Easy to use. The radioptican projectors are very easy to use. They are very simple in operation. A child can use them just as well as the grown people. They are better than other projectors for the following reasons: They give a sharper and more distinct picture on the screen, they give a more brilliant picture, they are free from overheating, there is no disagreeable odor from paint or enamel finish, absolutely safe, are strong and durable, handsome in appearance and nicely finished. The sharp and bright pictures are due to the improved lenses in these machines. Is fitted with a specially ground and polished double projecting lens. These machines will do all that we claim for them and they will prove a source of unending entertainment and pleasure, not only to the children but to the older members of the family as well.

12B45003 This very fine lamp is the first strictly high grade postcard projecting machine ever offered at a popular price. It does better work than any machine ever sold heretofore at several times our price. Is equipped with our special double lens system, consisting of 2 carefully ground and polished lenses. Strong reflectors and card holders. Is fitted with 2 standard gas burners and mantles yielding 100 candle power. 6 feet of cloth wrapped gas tubing and all necessary equipment and connections. Suitable for both natural and artificial gas. Size of machine: length 10 inches, width 9¾ inches, height 12 inches. Shipping weight 7¾ pounds.

MACY'S SPECIAL WATCH CASES AND FINE MOVEMENTS

We give our customers the greatest possible values when they purchase watches from us, and as an example of the splendid qualities we are able to give at exceedingly low prices, we call your attention to the numbers shown on this page.

Our Herald Square Watch Movement is representative of the best type of American watch works.

Our La Forge & Valentine movements are the best work of the highest class Geneva, Switzerland, watch makers. Both of these movements are guaranteed by us for two years. To the left and right on this page we show two of the La Forge & Valentine movements. On other pages of this catalog we quote the prices of these movements complete with cases of various styles and qualities. We are very sure that if you were to compare our qualities with those offered by others, you would discover that our prices are much below those quoted in the usual retail jewelry store. Remember that our Jewelry Department is but one of 96 in this great business, and we are not dependent upon a few sales in just one department for our volume of business. We are able, for this reason, to sell on a much narrower margin of profit than the specialty dealers, and because of the large volume of business we do, our first costs are much more favorable than those of the specialty dealer. Remember that every saving we make in the purchase of goods and in selling economies, we give our customers in the form of lower prices.

Below we illustrate and describe four watches that are specially low priced, and we recommend them to those who are seeking high-grade dependable watches at moderate cost. We are very sure that you cannot purchase a more reliable watch at anywhere near the special prices we quote.

La Forge & Valentine Watch Movements

PANATELAS DE CUBA CIGARS. These fine cigars are made of clear Havana filler, good seed binder and Havana wrapper; they are all carefully made and put up in bundles, two hundles in a box, and in quality are equal to the cigars usually sold elsewhere at 10c each; as we buy these in such large quantities we are enabled to get price concessions and this advantage we pass along to our customers in the form of exceedingly low price for such excellent quality cigars. Put up mild, medium or strong; always mention flavor preferred; each cigar 4½ inches long.

36B34118 Price, per hundred $2.89

LITTLE HAVANA PERFECTOS CIGARS. Made of excellent quality tobacco, Havana wrapper seed binder and clear Havana filler. These cigars have a history; our buyer, visiting this factory long ago, noticed the workmen using an A No. 1 Havana wrapper as a filler, for other cigars. Asking the reason, was told the wrappers were a trifle too short to fit the regulation 10c cigar. He conceived the idea of making up a choice cigar of a size to conform with this wrapper. This is how the Little Havana Perfectos were started. Today are imitated everywhere, and in universal demand; each cigar, 3⅝ inches long. Equal to the cigars you usually pay 10c apiece for.

36B34119 Our price, box of 50 ..... $1.39

SANTA GLORIA PANATELAS CIGARS. Made by R. & W. Jenkinson Company of Pittsburg, who have the reputation of being manufacturers of the best brands of hand made stogies on the market. They are warranted by the makers to have an all-Havana filler; are made from choice selected stock and to compare favorably with cigars of equal quality sold at a much higher price. Undoubtedly the best value ever put out by any factory at that price; graded mild, medium, or strong as preferred; always indicate in order which is wanted; each cigar 4½ inches long.

MAKE MORE MONEY FROM THE SAME COWS

AND DO IT WITH VERY MUCH LESS WORK AND TIME

THE USE OF THE NEW MACY CREAM SEPARATOR will make dairying profitable to you just as it has for others. You will be surprised to find how much money you can make by keeping even just a few cows, and how little extra time and trouble it will really take to handle the milk from twice the number of cows you now keep. But if you do not increase your herd, if you milk no more cows than you have in the past, please remember that the same cows giving the same amount of milk with the same amount of time on your part and with much less time and labor on the part of those who skim ie milk and wash the pans will add to your yearly profits about $15.00 more for every cow you keep. That is surely worth saving.

'HOUSANDS OF CREAM SEPARATORS have been bought in the past at prices ranging from $40.00 to $75.00 by owners of only three or four cows. They have been willing to pay even these exorbitant rices to obtain the great advantages in cream saving, time saving and labor saving. Paying so much money for a cream separator is no nger necessary. The selection of your machine should be based entirely upon the number of cows you expect to keep, and the price you ay ought not to be greater than the saving your Macy Separator will make you within just a few months. If you keep only one cow, ie Macy No. 2 machine at $20.45 will meet your requirements even better than any of the cumbersome $75.00 to $100.00 machines. egardless of the number of cows you keep, you need not pay more than $45.45, the price of ur big dairy size No. 5½ Macy machine.

All U. S. Government and State Agricultural Experiment Station Bulletins recommend ie use of a modern hand separator. The advantages coming to users of these machines are:

1st—A large saving of cream.
2nd—Considerable saving of time and work.
3rd—Fresh warm skim milk for feeding growing calves and pigs.
4th—Protection to the herd in feeding milk separated on your own farm instead of half sour, tubercular infected skim milk coming from the creamery tank.

HOW MUCH BUTTER ARE YOU LOSING?

VE QUOTE FROM A NUMBER OF THESE EXPERIMENT STATION BULLETINS:

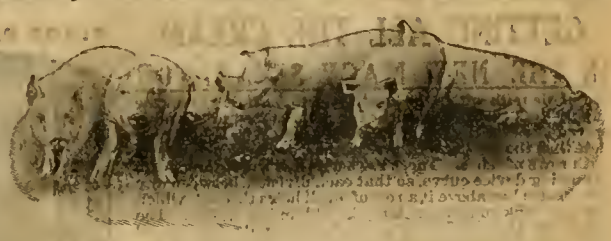
THIS KIND OF SEPARATOR DON'T GET ALL THE CREAM.

"Where the milk is run through the separator after each milking, the separator skim milk is of the highest possible feeding value for the calves. It is perfectly fresh and sweet and can be fed to the calves while still warm. It is generally conceded that separator skim milk is worth 25 cts. per hundred pounds." —Bulletin No. 116—Purdue Experiment Station.

"The percentage of protein in skim milk is greater than in the whole milk, and as protein is what produces bone and muscle, the feeding value of skim milk is apparent. The fat taken from the skim milk can be readily supplied in the fat and starch contained in grain."—Bulletin No. 126—Kansas State Agricultural College.

"In order to make a success of raising a calf on skim milk, the condition of the milk must be uniformly sweet. Warm, sweet milk, separated within a few minutes after being drawn from the cow, is in the best possible condition for the calf. The skim milk calf, raised according to modern methods, differs little if any, in size, quality and thrift and value from the same animal when raised by the cow. The calf fed on skim milk is not generally so fat during the first six months of its life as the one nursed by the cow. It often has, however, rather a better development of bone and muscle, and the difference between the two cannot be seen two weeks after weaning time."—Bulletin No. 57—Missouri Agricultural Experiment Station.

T WAS NEVER INTENDED that growing calves and pigs should be fed on milk that had been allowed to et in pans and crocks until the cream had been removed and the skim milk more r less soured and filled with bacteria. It is reasonable to believe that while the nilk is still fresh and warm you can easily add to the skim milk a splendid ubstitute for the butter fat you remove by mixing in a handful of ground grain. his gives to the animal all the bone and muscle producing elements found in varm milk just as it comes from the cow, and allows you to control absolutely he amount of fattening foods you wish to give the animal. The important hing for growing calves and pigs is not fat but bone and muscle, and the various eports given above at the State Agricultural Experimental Stations prove that resh warm skim milk is one of the most valuable foods for these growing animals.



YOUNG PIGS ALWAYS DO WELL ON FRESH SKIM MILK.

—FARM FOR LARGER PROFITS—

A NEW MACY CREAM SEPARATOR is one of those modern improvements and conveniences which you can't afford to do without ny longer. Looking at it just from the money side, if you buy a cream separator you will make from $10.00 to $15.00 more a year on each nd every cow you own. You will make that saving in butter which you are now feeding to calves and pigs, when you might be substituting little ground grain worth 2 cents a pound instead of rich, salable butter at 30 cents a pound.

THEN, TOO, EVERY AGRICULTURAL EXPERIMENT STATION IN THE U. S. and every owner of a good hand separator will tell ou that fresh warm skim milk which you get from the Macy Cream Separator, is worth for feeding, $10.00 a year more per cow han the cold, half sour, warmed over milk you now feed. This makes a total almost every year of between $20.00 and $25.00 on each cow.

¶ If you keep one cow, you lose $20.00 a year at least and a Macy Cream Separator No. 2 saves it all at a total cost of only $20.45.

¶ If you keep two cows, you lose $40.00 and a Macy Cream Separator No. 2½ will save it all at a cost of only $23.45.

¶ If you keep three cows, you lose $60.00 a year and a Macy Cream Separator No. 3 will save it all at a cost of only $28.45.

¶ If you keep from four to six cows, you lose $80.00 to $120.00 every year and a Macy Cream Separator No. 4½ will save it all at a cost of only $40.45.

¶ If you keep more than six cows, the Macy Cream Separator in the big dairy size, No. 5½ will save you about $20.00 each year on every cow you own, and will skim all the milk from any size herd up to fifty. The saving with this big machine will amount each year to from $120.00 to $1,000.00 according to the size of your herd, and the first cost to you is only $45.45.

WE DON'T BELIEVE, THEN, THAT YOU CAN BE IN DOUBT any longer as to whether or not it will pay you to buy a cream separator. You never see cream separators set aside and not used; the man who has one always uses it.

THE SIMPLEST OF ALL SEPARATORS

THE NEW MACY BOWL

THE MOST IMPORTANT PART

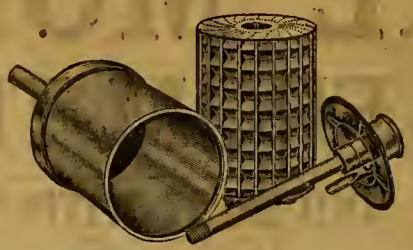
of any cream separator is the bowl with its contents, commonly spoken of as the skimming device. Upon the construction of these parts depends the ability of any machine to remove cream from the whole milk. The complete bowl and skimming device used in the New Macy Cream Separator weighs only from 5½ to 7 pounds, according to capacity, and consists of only three parts as illustrated. Many other widely advertised cream separators you will find have thirty or forty disconnected parts inside the bowl. These must all be removed from the bowl every time the machine is used, washed separately and handled carefully on a wire rack to be sure that they are put together right after cleaning. There are also a number of other machines which have only a few parts, some of which are called cores, but each core has so many deep crevices and is so difficult to wash thoroughly that they are really harder to clean than a skimming device of forty separate pieces.

THE NEW MACY SKIMMING DEVICE

is complete in just one piece, made of aluminum, a sanitary metal to which butter fat and slime will not stick, and so constructed that the twenty blades swing wide open like the leaves of a book, exposing every part of the surface for perfect and easy cleaning. If it were necessary to scrub the New Macy aluminum skimming device as it is the tin or tinned steel skimming devices of other machines you could get right at the center and clean it thoroughly without any difficulty, but aluminum is the only metal to which butter fat and slime will not stick. It will not rust or corrode, and has been called the "everlasting metal." After the skimming has been completed, it is only necessary for the user of a New Macy Separator to spread the blades of the skimming device apart as far as they will go and rinse in lukewarm water. This will loosen up and remove all particles of butter fat and milk slime. Then by dipping in scalding water the New Macy aluminum skimming device becomes as clean and sanitary as you can make the skimming device of any other machine by scrubbing, and it is all done in less than one-half of the time required to clean other skimming devices and with practically no work at all.

ANOTHER GREAT ADVANTAGE

of having the New Macy skimming device all in one piece is that it cannot be put into the bowl in any other way than the right position, and this can be done with the eyes shut or in the dark without any fear whatever of getting it together wrong, and thereby putting the machine out of balance. The top goes on in the same way, absolutely sure to be in its proper position, and all three are held together by a single bowl bolt running down through the center and fastening securely into the drop-forged bowl base. As you will notice by the illustrations of the complete machines on another page, New Macy Cream Separators have their skim milk outlets at the bottom of the bowls. The advantage in this is that the heavy skim milk is not forced to travel upward and out of the top, thereby remixing particles of butter fat with the skim milk. This bottom exit for skim milk also makes New Macy bowls perfectly self-draining, so that it is not necessary for the user to dump the contents of the bowl before cleaning. While the machine is coming to a stop, all the skim milk will be drained from the bowl. Many cream separators also retain in their skimming devices considerable valuable butter fat which is lost when the parts are washed. The New Macy empties out both cream and skim milk, and no butter fat is lost. These are advantages not found in most other cream separators, and easily overlooked unless the buyer is informed on these matters.



JUST THREE EASILY CLEANED BOWL PARTS

STILL ANOTHER GREA ADVANTAGE

of the N Macy skimmi device over any other is that t twenty curved aluminum bladea perfectly smooth on both sidea, ha no sharp crevicea and are not fil with small holes like a sieve as is t case with some machines. For t reason, cream globules do not clog the skimming device, even thou you are separating the milk while is at a low temperature. Some se rators have so many perforations their skimming devicea that a co siderable amount of valuable butt fat is retained in the machine a lost when the skimming device is washed. The New Macy Separator not only gets of the cream but delivers it perfectly from the machine by way of the cream spou The smooth surface of the New Macy skimming device makea it practically impossi for it to become clogged with even large cream particles, and the fact that it has perforations or sharp edges prevents butter fat globules from being cut or churned pieces. Such treatment destroys their shape and lowers the quality of butter ma from the cream. In using the New Macy Separator you may obtain cream of a thickness simply by a slight adjustment of a small cream screw which you will find the side of the bowl top. By turning this screw you can get cream of any densit whether for table use, butter making, whipping or for shipping to a distant mark

MANY SEPARATOR MANUFACTURERS

make extravagant claims for their machines when it comes to skimming cold milk. No cream separator made today will skim under all conditions so closely as the New Macy. This perfect separation of the cream is due to two things. First—The dividing of the whole milk into small streams as it enters the skimming device. Second—The repeated skimming the milk receives as it passes through the bowl. We might emphasize the importance of having a New Macy Separator because it skims cold milk so perfectly, but we know and every dairyman knows and the U. S. Government Bulletins state plainly that it is not advisable to allow milk to become cold before separating.

THE MILK AND CREAM SPOUTS

of the New Macy Separator are wide open and easily cleaned. In most other separators these outlets are narrow pipe shaped tubes, which are more difficult to clean than any other part of the machine. In addition to these advantages of easy cleaning, the New Macy Separator is the simplest and most convenient in construction. Only one tool is required in operating the machine. This is a small "T" wrench, and is used to turn the bowl bolt, by which the top is drawn down into th skimming device. Only one rubber ring is required, and this is placed on top of th skimming device. Turning the bolt draws the bowl top down evenly and tightly ont the rubber ring without cutting it away.

ALL TH BLADES OPE WIDE APAR FOR QUICK AND EASY CLEANIN

THE NEW MACY ALUMINUM SKIMMING DEVICE

GETTING ALL THE CREAM IN THE NEW MACY SEPARATOR

the whole milk enters the bowl at the top, coming from the supply tank through the float cup and the feed tube, and is spread out over the top of the skimming device. You will note that the top disc of the skimming device is perforated with rows of holes. These rows curve as the blades of the skimming device curve, so that each division between any two blades has above it a row of small holes through which the new milk runs down into the skimming device. The object of these holes is to divide the milk into small streams before starting the separation. It is plain to see that the centrifugal force within the bowl can work more thoroughly on small particles of milk than on large ones, so the more finely the milk can be divided the more thoroughly the separating device can do its work. Here in the New Macy you will find an important step in advance of other separators. The centrifugal force operating upon the milk as it passes down into the skimming device tends to throw the milk out from the center toward the bowl wall with a great deal of force. Skim milk particles are heavier than cream particles and this force operates a little more strongly upon them than on the cream, so that the skim milk particles tend to go farthest from the center and to the outside. In other words, the skim milk particles are trying all the time to get just as far from the center and toward the bowl wall as possible; being assisted a little more than the lighter cream particles by this centrifugal force, they drive them back toward the center.

With the New Macy Cream Separator you can get cream of any thickness you want by regulating the little cream screw on the bowl top. You can get cream so thick it will hardly run, or almost as thin as milk, or any thickness between these. Thick cream churns quickest and best. In thin cream, such as you must get by hand skimming, experts tell us you lose 10% of the butter in the churning, because the butter fat globules do not collect properly. So you will not only save one-fourth in getting all the cream from the milk but you also save one-tenth of the butter fat in churning the cream, if you have a cream separator.

THIS VIEW SHOWS THE COURSE TAKEN BY A DROP OF MILK PASSING THROUGH THE NEW MACY BOWL AND SHOWS HOW THE CREAM IS REMOVED.

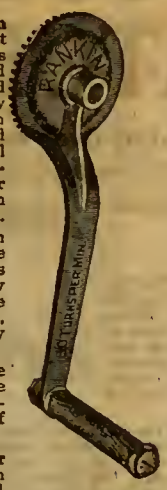
EIGHT SEPARATE SKIMMINGS BY LOOKING AT THE ACCOMPANYING ILLUSTRATION

of the skimming device you wi notice that the entire surface o each blade is covered with ridges running parallel wit each other. You will also see that all the blades are curved When the blades are closed the ridges on back of blad are farther from the center than the hollow places, if lin directly to center from outside is followed. As we hav said, the skim milk tends to get as far away from th center as possible, hence it will seek the ridge and driv the cream into the hollow. Now, the skim milk canno stay on this ridge but must pass on down through th bowl in order to get out at the bottom. In doing this it i turned from its course by the corrugations or ridges, an the cream or butter fat is squeezed out and forced in towar the center. If the New Macy Cream Separator stoppe right here in the separating process and emptied the skin milk out through the skim milk outlet and the cream ou through the cream outlet, it would skim as closely as an other machine on the market, because most of them giv the milk only one skimming, and only one or two of then give two skimmings; none more than that. The New Macy keeps right on skimming the cream and squeezing th milk as it passes down over each ridge until it has give from four to eight distinct separations. The skim mil flowing down over the last corrugation or ridge of each o the twenty aluminum blades reaches the bottom of th bowl. You will see by the illustration that the bottom o the New Macy skimming device is not a smooth, fla surface as in most other separators. Instead, it has rib 3/16-inch high and curved opposite to the way the bowl an skimming device turn. These ribs keep the flat bottom o the skimming device 3/16-inch above the bottom of the bowl and prevent the skim milk from passing out too rapidly

Separator cream is the best cream and separator butter is always prime butter. The cream separator takes from the milk all the slime, the filth and the stable dirt. If you will run just one milking through the New Macy Cream Separator and see for yourself what impurities it removes, even from milk that looks clean, you will not want to drink or give your children milk that has not been purified by the hand separator.

MADE TO OUTWEAR AS WELL AS OUTSKIM ALL OTHERS

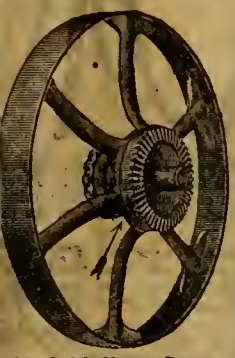
THE MACY CREAM SEPARATORS are made in five different sizes and in the two different styles shown below. These machines differ in mechanical construction, and while all separators sold by us are absolutely guaranteed against defects in material and workmanship, yet we always recommend that our customers buy the full iron frame style or Macy Standard Size Separator. In selecting the Junior line we have aimed to offer the lowest priced cream separator on the market, and yet supply a machine that will give absolute satisfaction. The type of gearing and general construction of this machine is such as is found in a majority of other separators on the market, and it contains the same perfect aluminum skimming device which has made all our other separators famous.



IN OUR NEW MACY STANDARD SIZE full iron frame machine, we offer the perfect cream separator. It embodies features that are not found in any of the high priced separators offered by agents. These mechanical improvements are of so much importance to the user and mean so much to you in the way of easy turning, convenience and durability, that we urge you to consider them very carefully before making your selection.

THE NEW MACY ONE-PIECE CRANK.—The crank of the new Macy Standard Size Separator is made in one piece; and the driving gear is a part of the crank by which the power is transmitted directly to the main vertical shaft without any possibility of loosening or slipping.

THE GRAVITY CLUTCH.—Another splendid feature of our gearing is the gravity clutch which we use at the top of the main shaft. This is not operated by a spring, such as is commonly used in even the highest priced separators. Springs vary in their tension; are sure to weaken and give way sooner or later, besides causing a disagreeable clicking sound when the handle is stopped and while the bowl continues to run. Our Macy clutch is operated by gravity, which will never vary and never give out.



Our Quick Change Power Pulley.

THE QUICK CHANGE POWER PULLEY.—For those who wish to connect the separator up to a gasoline engine or other power, we supply a special quick change power pulley, yet this pulley or beveled gear is a part of the friction disc, and every particle of power you apply to the pulley is transmitted to the main shaft and nothing is lost, and yet this pulley is so constructed that in starting, speed is developed gradually with practically no wear and tear on the separator.

THE SUPPLY TANK.—The New Macy milk supply tank is practically indestructible, as it is made of one piece of seamless pressed steel. The bottom of this tank slopes gradually to the faucet, so that it is not necessary to tip up the tank to empty out the milk at the end of the skimming. The faucet used on this tank is separable and can be instantly taken apart for perfect cleaning. This is quite important, as warm milk decomposes very rapidly, and nothing will contaminate cream and butter more than insanitary milk utensils.

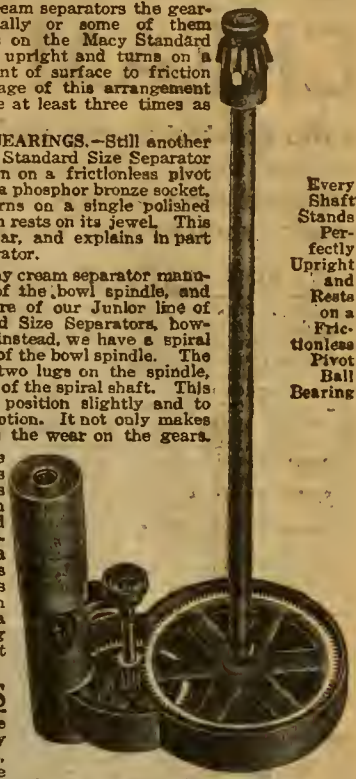
The Macy One-Piece Seamless Steel Supply Tank.

THE MACY FRAME.—The main frame of the New Macy Standard Size Cream Separator is cylindrical and tapering to give the most rigid construction and to occupy the smallest amount of space. It is only 38 inches from the floor to the top of the milk supply tank, while the base of the machine is only 15½ inches square. On account of its compact form the Macy Separator may be placed where larger and clumsier machines could not be used.

THE VERTICAL SHAFTS.—In other cream separators the gearing shafts are either arranged horizontally or some of them horizontally and some vertically, whereas on the Macy Standard Size Separator every shaft stands perfectly upright and turns on a small end, exposing the least possible amount of surface to friction and wear. You can quickly see the advantage of this arrangement over the horizontal shafts, which must have at least three times as much surface exposed to constant friction.

THE FRICTIONLESS PIVOT BALL BEARINGS.—Still another reason for the easy running of the Macy Standard Size Separator is that each of the three vertical shafts turn on a frictionless pivot ball bearing. The end of the shaft sets in a phosphor bronze socket, and the small polished end of the shaft turns on a single polished tooled steel ball, just as the pivot of a watch rests on its jewel. This arrangement reduces the friction and wear, and explains in part the light running quality of the Macy Separator.

THE SELF BALANCING BOWL.—Many cream separator manufacturers cut their gears on the lower end of the bowl spindle, and this method is employed in the manufacture of our Junior line of machines. In making the Macy Standard Size Separators, however, no gears are cut on the bowl spindle; instead, we have a spiral shaft on top of which rests the bottom end of the bowl spindle. The connection between these parts is made by two lugs on the spindle, which are driven by driving pins in the end of the spiral shaft. This arrangement allows the bowl to vary its position slightly and to adjust itself to any condition when set in motion. It not only makes the bowl self-balancing in use but lessens the wear on the gears.



Every Shaft Stands Perfectly Upright and Rests on a Frictionless Pivot Ball Bearing

THE OILING ARRANGEMENT.—Some separator manufacturers make great claims for their machines on account of the gears running in a bath of oil. The gear wheels in such cases take up the oil, lash it about and throw it all over the inside of the gear housing. In the Macy Separator only a small quantity of oil is used, and this is applied directly to the bearings where it is needed. As you will notice by the illustration of the Standard Size Separator, there is a shallow pool of oil which keeps the bearing submerged, and the oil is not thrown about by the gear wheels.

A WORD ABOUT REPAIRS

The Macy Cream Separator, owing to its style of construction and splendid quality of material used, requires but few repairs, but for the protection of our customers we wish to say that should anything go wrong and you want some piece or part quickly, a full supply of repairs is kept on hand at the factory and can be supplied promptly. If the repair is needed because of some defect in material or workmanship the part will cost you nothing, and if a charge is necessary it will be less than one-half the price asked by other factories and no more than enough to pay the bare cost of material and manufacture.

OUR UNLIMITED GUARANTEE

WE hereby warrant every Macy Cream Separator to be without defects in material, workmanship and construction, and to be perfect in operation when properly set up and managed. We offer and agree to replace or repair free of all charge, any piece or part giving out because of any defect in material or workmanship, without regard to date of purchase.

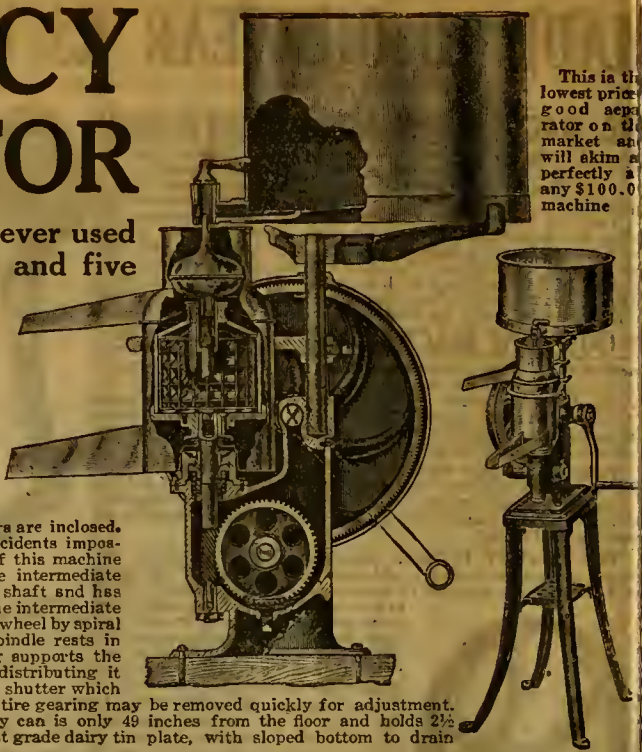
THE NEW MACY CREAM SEPARATOR

is the greatest money maker and saver of time and labor ever used on any farm. These machines are made in two styles and five different sizes, so that one of them will exactly meet your needs whether you keep one cow or fifty.



This is th lowest price good sepa rator on th market an will skim a perfectly a any $100.0 machine

THE NEW MACY JUNIOR CREAM SEPARATOR is a wonderful little piece of machinery. It has all the skimming efficiency of any $75.00 to $100.00 machine made. The skimming device is made of aluminum, and is the same close skimming, easily cleaned model used in our larger machines. The crank is only 7¾ inches long, so that the diameter of the circle you describe in operating the separator in only 15½ inches—only a little more than a foot from the point from where the handle is nearest to you to where it is farthest away from you. You do not have to bear down heavily and sway your whole body to operate this machine. The muscles of the arm do the work easily and without tiring you.

IN THE NEW MACY JUNIOR SIZE CREAM SEPARATOR all the gears are inclosed, making accidents impossible and preventing dirt and grime from collecting and cutting away the bearings. The gearing of this machine consists of three parts as shown in the illustration: The driving gear wheel and shaft, the intermediate gear and shaft, and the bowl spindle. The large driving gear wheel is attached to the crank shaft and has ratchet and clutch, so that the crank does not continue to turn after you release the power. The intermediate gear is made of high grade phosphor bronze, and transmits the power directly from the large drive wheel by spiral gearing to the spiral which is cut on the lower part of the bowl spindle. The end of the bowl spindle rests in a phosphor bronze socket, and turns on a frictionless pivot ball bearing. A flexible neck bearing supports the bowl spindle and keeps the bowl balanced. The intermediate gear wheel runs in a pool of oil, distributing it to the other gears, and to the frictionless pivot ball bearing. At the back of the machine is a shutter which may be opened and the entire gearing may be removed quickly for adjustment. The top of the milk supply can is only 49 inches from the floor and holds 2½ gallons. It is made of best grade dairy tin plate, with sloped bottom to drain perfectly.

We recommend this large size, full iron frame style if you intend to keep more than three cows

This is the big money saver. It will save you enough within just a few months to more than pay back the low price we ask you for the machine

IF YOU KEEP no more than three cows and do not expect to increase your herd we advise yo by all means to order one of the New Macy Junior Size Cream Separators. Plac it in use where you can put it to the severest tests. Try it on warm milk, on cold milk, on fresh mil on old milk; use it in your own way for thirty days and if you are not satisfied in every way, write u and we will have it returned to the factory and refund your money in full.

THE MACY STANDARD SIZE CREAM SEPARATOR

THESE LARGE MACHINES have a large number of improvements which are not found i the Macy Junior Size machine, nor in any other make o cream separator on the market. Although these points of superiority have nothing to do with the clos skimming and easy cleaning features they are important improvements, resulting in extremely ligh running and unusual durability. The main frame of the Macy Standard Size Separator is ver attractive in appearance and of most rigid construction. It is only 38 inches from floo to top. The base is only 15½ inches square, allowing the machine to be put in place where it would be impossible to use the larger and clumsier machines on the market The top of the supply can is lower than the waistline of an ordinary man. It is as eas to fill as to set a pan of milk on the table. This supply can is made of one piece presse steel with reinforced bottom, sloping to the faucet, so that every drop of milk drain quickly at the end of the skimming. The milk and cream spouts are wide open and eas to clean, instead of the pipe shaped uncleanable tubes found on many other separators The Macy Standard Size Cream Separator is the lightest running machine on th market. Any ten year old boy or girl can run it without getting tired.

WHY THE MACY CREAM SEPARATOR TURNS EASIEST

1st—The complete bowl and skimming device weighs only from 5 to 7 pounds, accord ing to capacity, whereas the bowls of most other separators weigh from 10 to 14 pounds

2nd—As shown by the illustration every shaft in this machine is vertical instead o horizontal. In other separators all are horizontal or some horizontal and some vertica In the Macy Standard Size Separator every shaft stands perfectly upright an turns on a small end, exposing the least possible amount of surface to friction and wea

3rd—Each vertical shaft turns on a frictionless pivot ball bearing. The small highl tempered end of each shaft sets in a phosphor bronze socket and rests on a single bal just as the pivot of a watch rests on the jewel.

The perfect mechanical construction of the Macy Separator as described n only explains the wonderful light running of the machine but also its durability. N separator made today will outwear the Macy.

GIVEN ENTIRELY IN YOUR OWN INTEREST

'BUY A LARGER CAPACITY CREAM SEPARATOR THAN YO NOW NEED. Just as soon as you own a Macy Cream Separator an find your dairy developing into a little gold mine, you will want to ke more cows, so we advise you by all means to order a larger size separat than your present requirements demand. The largest Macy Crea Separator is just as easy to operate as the smallest one, but will separa three times as much milk per hour. The larger the machine you buy, th less you will have to run it. That means a little time saved night an morning the year round, and time is worth money to you, especially some seasons of the year. Furthermore, the large machine which skim your milk in one-half the time that it would take a smaller capacity ma chine has only one-half the use, one-half the wear and consequent nearly twice the life. It will pay you best to buy a large capacity machin

No. 4½ New Macy Cream Separator. Price $40.45

$40.45 IS OUR PRICE with all freight charges paid by us for this large size New Macy Cream Separator with all our latest improvements. If you own ten or twelve or fifteen cows this machine will add more to your profits as a dairyman than any other cream separator you can buy, regardless of name, make or price. While the price we ask is a very low price, just about half the prices asked by many cream separator manufacturers for their widely advertised cream separators of equal capacity, please remember that the price is the least of the reasons why you should purchase the New Macy Cream Separator. You might buy a cream separator and save $50.00 on the purchase price, and this might appear to be economy, but if the cream separator you bought at a low price left a considerable portion of butter fat in the milk, if it did not skim as close as the New Macy, your loss in butter fat in the course of just a few months, if you have a herd of ten to fifteen cows, would more than offset the saving in price, and when you realize that a cream separator should last a lifetime you can very easily figure that a cream separator which does not skim as closely as the New Macy, would involve you in a tremendous financial loss in a few years' time.

THE SKIMMING QUALITY of the machine you contemplate buying is therefore the special feature which you should investigate with great care. We invite investigation; we are anxious to have every prospective buyer of a cream separator investigate the merits of the New Macy. We have a cream separator which is unlike any other cream separator; the skimming device is totally different from the skimming device employed in the construction of any other cream separator on the market today. It is so unlike any other skimming device and yet so remarkably efficient that letters patent have been granted by the Government of the United States and the Governments of Continental Europe, so that the Macy has exclusive rights to this vast improvement in cream separator construction. Where the milk receives but one separation in all other cream separators it receives eight distinct separations in the skimming device of the New Macy. There is no getting away from this; the milk must pass through the bowl from top to bottom. As it passes into the bowl at the top it is given its first separation and the process is then repeated seven times, so that when the milk reaches the bottom of the bowl there is no possible chance of a trace of cream remaining in it. We are willing to demonstrate the wonderful skimming qualities of the New Macy in competition with any cream separator manufactured, and we will take the so called skimmed milk which comes from any other cream separator manufactured and prove to you that the New Macy is a closer skimmer by removing the cream left in the skimmed milk after any other cream separator is supposed to have separated it.

WITH A SKIMMING EFFICIENCY eight times that of other cream separators, with a style of construction which is so simple that we have only three parts in the bowl and skimming device of the New Macy Cream Separator, with a skimming device so simple in form that it is the easiest cleaned of any cream separator, we could rest our claims for recognition on these special features, but there many other features possessed by the New Macy Cream Separator which distinguish it from all other cream separators.

IT IS THE EASIEST RUNNING cream separator of all hand separators, for the reason that its bowl and skimming device is lighter than others, and as it has an eightfold skimming efficiency, it is not necessary for us to depend on high speed for close skimming. Our bowl revolves at a speed of 8,000 revolutions per minute, which is in striking contrast to the speed required to operate other separators, most of them running at from 12,000 to 20,000 revolutions per minute. For this reason it is not necessary to turn the crank of the New Macy as rapidly as is necessary to successfully operate most other cream separators. Still another feature which contributes to ease of operation lies in the fact that the mechanical principles involved in the construction of the New Macy Cream Separator are entirely different from those employed in the construction of other cream separators. In the driving mechanism of our machines the bearings run on ball bearing pivots, so that friction is reduced to an absolute minimum. Our bearings are self oiling, too, and these things—lower bowl speed and the highest type of frictionless self oiling bearings—make the New Macy the easiest running of all cream separators. In fact, the weight of the handle starts the bowl.

YOU CAN TRY THE NEW MACY at our risk as explained elsewhere. We sell everyone of them with the understanding that the customer may use it thirty days and then decide whether he wishes to keep it or not. It is so simple, so free from complications of every nature, so carefully constructed that anyone can set it up and operate it and when it is run in competition with any other cream separator you can buy even at more than double our price, the results are so clearly in favor of the New Macy that in every instance the verdict is in our favor. We have been winning blue ribbons and medals wherever the New Macy is exhibited, and you cannot afford to buy the second best machine when you can buy the New Macy at the astonishingly low price we ask for it.

THE CREAM SEPARATOR AGENT will have a lot to say to you about the New Macy, perhaps, because it is sold at a low price. He may try to tell you that it is not so well built and will not last as long, or that it will not skim as closely as the separator he hopes to induce you to buy. Don't believe any statements he may make reflecting on the quality of the New Macy Cream Separator. The success of this highest grade cream separator has been so remarkable that some of the separator manufacturers whose machines have been selling at very high prices have printed little booklets and scattered them broadcast over the land, in which they attempt to justify the high prices they ask for their machines. Please remember that no cream separator manufactured is worth one penny more than the price we ask for the New Macy, and no cream separator is made of any better materials or by any more skill workmen than are employed in constructing the New Macy.

REMEMBER That we will prove these things to you, and when the cream separator agent tries to make you believe that the machine is not all that we claim for it, just ask him if he will place his machine in your home under the same conditions we offer to place the New Macy. Ask him if he will let you run his machine in your own way, just as you will be expected to run our machine in your own way. If his machine is simple and properly constructed he does not need to stay to show you how to run it.

THIS IS OUR No. 4½ MACHINE with a capacity of from 450 to 500 pounds. It is a splendid machine for those who have a medium size dairy, and we guarantee it to give absolute satisfaction. While it is of generous capacity, nevertheless, for the slight difference in price we believe it will pay any customer with a herd large enough to require the purchase of a machine of this size, to buy the largest New Macy, our No. 5½ machine, described on the next page, because then you always have reserve capacity to take care of any increase in your herd.

THE KING OF ALL CREAM SEPARATORS and the greatest producer ever used by t American farmer. This, the No. 5½, is the largest cream separator we make, and is sold by us at a price but slightly higher than that asked for our No. 4½ machine. This is a machine which will handle the work of a dairy in just a little time; even if you own but a few cows it is the most economical for you to buy, because it does the work so quickly and so thoroughly, and has such large reserve capacity that as your herd increases from year to year this big New Macy Cream Separator will separate the milk in just a little while without any more exertion and in less time than the machines of smaller size catalogued in these pages.

THIS BIG NEW MACY CREAM SEPARATOR represents the most advanced ideas in cream separator construction. It has the same skimming device that is used in all the New Macy Cream Separators we manufacture, the same three-part bowl and skimming device which makes our machine the simplest and easiest cleaned. It has the wonderful skimming device which gives it an eightfold skimming efficiency, practically eight cream separators in one, a machine so much better than any other cream separator manufactured that it stands in a class by itself.

REMEMBER that it is not necessary for you to take our word for it. We do not make these claims for high quality and superior skimming efficiency as a mere argument to induce you to order. We are perfectly willing and, in fact anxious to back our claims with absolute proof. We are perfectly willing to place a machine in your hands to let you prove the truth of our claims in your own way.

WE SHIP THIS MACHINE ON TRIAL We send it with the understanding and agreement that you may use it thirty days before deciding whether you wish to keep it or not. If you want to know more about this most successful of all cream separators, if you would like to take advantage of our thirty-day free trial offer if you would like to use it in your own dairy so that you may compare it with other cream separators in your community, or cream separators offered you by any cream separator agent or dealer just write us a letter, inclosing the price in full, and we will ship the machine to you to your railway station with the distinct understanding and agreement that you are to have the privilege of using this cream separator for full thirty days, and if at the end of that time your experience in operating the New Macy does not convince you that it is a better cream separator than you can buy from any other manufacturer, dealer or agent even at double or treble the price we ask, you are at liberty to return it to us at our expense and we will return your money in full and pay the freight charges both ways.

NO CREAM SEPARATOR AGENT or manufacturer, or dealer will make you such a broad liberal proposition as this. We challenge any cream separator agent, manufacturer or dealer to place his machine in your home side by side with our to let you test the machines side by side. Send fresh milk through them, send cold milk through them, send milk which has stood a day or two through the machines, and note the vast difference between the skimming efficiency of the New Macy and any other cream separator entered in this competitive test. We have entered many competitions of this character. Our New Macy Cream Separator has met all comers in an open contest to establish the superiority of several machines, and we have come off with colors flying again and again and again.

WE WIN IN COMPETITION for the reason that the skimming device in the New Macy Cream Separator gives us an eightfold efficiency. While the milk passes through the average cream separator but once, it passes through eight separate and distinct separations in the New Macy Cream Separator so that you will readily understand that it is practically impossible for the slightest trace of butter fat to escape into the skimmed milk receptacle. Remember, that you lose money every time you turn the crank of any cream separator which does not skim as close as the New Macy, and not one cream separator so far invented begins to approach the New Macy in skimming efficiency. Butter fat is one of the most valuable assets of the American farmer; do not waste it, but convert it into a substantial balance at your local bank. This can be done if you buy the New Macy Cream Separator, which gets every ounce of butter fat from the milk. Let us send the machine to you to be tested by you. Certainly you can well afford to take advantage of our remarkably liberal trial offer, since it cannot possibly cost you one cent to make the experiment, since if it is not entirely satisfactory at the end of thirty days, we will refund the money in full and pay the transportation charges both ways.

IF YOU NOW OWN a cream separator, you are not getting the full value of your money, because no matter what its name or make, no matter how much it cost you, the New Macy will outskim it. The New Macy would be a most economical investment for you even if you are compelled to throw away the cream separator you now own, because the additional butter fat the New Macy will get for you will pay the cost of the old separator and the New Macy combined several times over.

REMEMBER THAT WE GUARANTEE the New Macy Cream Separator against defective material and workmanship for a lifetime. Remember that it is built by the most skilled mechanical engineers in the country. Remember that it is built on principles entirely different from those employed in the construction of any other cream separator. Remember that our bearings are entirely different from those used in other separators, and are practically frictionless. Remember that the gearing apparatus, instead of being installed in a horizontal position, as in every other cream separator manufactured, is installed in an upright position, so that the weight rests upon but one end of each shaft, where it is supported by the finest ball bearing steel pivots. Remember, too, that our bowl is lighter than the bowls employed in other cream separators. Remember, furthermore, that since every drop of milk which goes into the New Macy Cream Separator passes through eight separate and distinct separations, it is not necessary that our bowl be operated at the tremendously high rate of speed necessary to successfully operate any other cream separator manufactured. Remember, too, that the bearings are all self oiling, and that all our gears are most accurately cut, the slightest variation shown when the micrometer gauge is used in determining their accuracy being sufficient to cause their rejection in our factory. For the reason that we have a lighter bowl which revolves at a lower speed and runs on frictionless, self oiling bearings, the New Macy is by far the easiest running cream separator now offered the American farmer. All these things we prove to you when you try the New Macy.

TWO EXCEPTIONAL BARGAINS IN PARLOR SUITES

These are two typical Macy values, and of a kind we are proud to offer. It is the kind that has made the name of MACY famous wherever merchandise is sold. If you want a Parlor Suite that will be admired by your friends and reflect your good taste; if you want attractiveness and good quality associated with extremely moderate price, order either of these suites. In every detail of their construction they show the mark of the skilled workman, and in no respect has either of the sets the appearance of cheapness. Read each description and remember that both sets are fully guaranteed.

$28.24 BUYS THIS MAGNIFICENT 5-PIECE PARLOR SUITE

It isn't what you pay for your furniture it's what you get for your money that really counts. We give you more furniture satisfaction in this suite for every dollar invested than you can get at other stores for a half more.

Such a remarkably low price means that it is only in the Macy store that a suite of such excellence can be purchased at such a figure. If you have ever bought any merchandise from R. H. Macy & Co., you know that there's always a saving offered on every price we quote. Here's new proof right in this offer. No other store in the country can duplicate this suite in quality, workmanship or appearance for the money. We wouldn't make this claim if the furniture were not just exactly as we represent it. It is not to be compared in any way with the grades usually offered at $28.24, for its equal is to be found elsewhere only in suites costing from $5.00 to $10.00 more. This suite consists of sofa, two large arm chairs, one side and one reception chair, made of all hard wood with highly rubbed mahogany finished frames; carved backs; spring seats and back carefully upholstered; suite covered to order with verona velour, tapestry or damask; a very fine suite and a most remarkable value. Don't forget to tell us what covering you want. Complete with castors; shipped from our factory in New York State.

RECORD PRICES IN BRASS BEDSTEAD

WE SHOW HEREWITH a page of brass beds manufactured for us by one of the largest and best bed manufacturing establishments in the country, and we offer them at prices which are bound to attract a great deal of attention because they are so much lower than the prices quoted on beds of equal quality by any other dealer. We guarantee these beds to be strictly high grade in every respect. They are made of the very best materials, given the finest finish, are perfectly fitted and will be found durable and satisfactory in every way, and much better than the brass beds made in the average factory and sold by the average retail dealer. Every modern appliance which will make for better quality and a higher standard of excellence in every respect is employed in this great bed manufactory, and you may rest assured that no retail store anywhere, nor any other house in America can give you such values as we offer you in the six numbers on this page.

THE FINISH OF A BRASS BED is a feature which must be given the very closest attention. Every piece and part of our brass beds is brought to a mirror-like finish by expert burnishing, and then this beautiful mirror-like surface is given several coats of the finest lacquer, which is a certain preventive of tarnishing. The lacquer is to polished brass what the varnish is to polished wood. We use none but the highest grade lacquer, giving our beds a finish which will keep them in perfect condition.

THE RAW MATERIAL which enters into the construction of our brass is specially selected and guaranteed absolutely class. Every post, rod, knob, rail and mounting is made from first class mat and is carefully inspected by experienced men, so that we feel sure these beds absolutely free from defective material of any sort.

THESE ARE NEW DESIGNS and they are exceedingly attractive. embody the newest ideas in brass bed signing, and while the designs are attractive, they are selected with a view combining strength and solidity with handsome appearance, and we offer them the product of years of experience in the production of brass beds of the hig grade.

OUR LOW PRICES are made possible by reason of our special cont and these brass beds go to you direct from the fac without any middlemen's expenses or profits added. We ask you to compare qualities we offer with the qualities offered by any other dealer at home or where, and you will discover that we save you from one-third to one-half on of similar quality. Remember that we guarantee to please you; we guarante save you money or you may return the beds to us at our expense of transport charges both ways and we will refund your money.

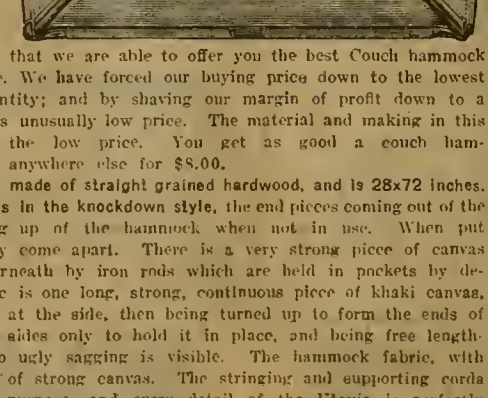
UTOPIA GRAND COUCH HAMMOCKS



The most comfortable and useful of all the outdoor leisure-hour contrivances is the couch hammock. The couch in the house is always a cosy spot, and the couch hammock outdoors offers the same comfort and ease and gives the additional reasure of the hammock and swing combined. When filled with sofa cushions it becomes a spot hard to resist on a summer day.

SLEEP OUTDOORS and be healthy. There is nothing better for the general health than sleeping in the open, and our Utopia Hammock Couch offers as comfortable a bed for this purpose as could be desired. It can be hung up under a tree, or on the piazza; or, if used with our patent Telescope Hammock support, it can be securely set up anywhere in a very short time, on the lawn or piazza, on even or uneven ground. The increasing popularity of hammock couches has induced us to make special arrangements with the manufacturer of the Utopia Grand Couch Hammock for this season's supply, and the result is that we are able to offer you the best Couch hammock value for $6.14 that you will be able to get anywhere. We have forced our buying price down to the lowest possible figure by ordering an unusually large quantity; and by shaving our margin of profit down to a few cents on each hammock, we are able to quote this unusually low price. The material and making in this Couch Hammock has not been sacrificed one bit by the low price. You get as good a couch hammock from us for $6.14 as you will be able to buy anywhere else for $8.00.

CONSTRUCTION The frame of this couch is made of straight grained hardwood, and is 28x72 inches. The entire construction is in the knockdown style, the end pieces coming out of the side frame, and thus permitting the complete rolling up of the hammock when not in use. When put together the frame is very rigid, and can not possibly come apart. There is a very strong piece of canvas stretched over the frame, which is fastened underneath by iron rods which are held in pockets by detachable clips and screws. The main hammock fabric is one long, strong, continuous piece of khaki canvas, extending over the frame, and under the spreaders at the side, then being turned up to form the ends of the hammock. It is attached to the frame at the sides only to hold it in place, and being free lengthwise, it automatically takes up any stretch, so that no ugly sagging is visible. The hammock fabric, with the frame canvas, makes two supporting thicknesses of strong canvas. The stringing and supporting cords are of the strongest and best procurable for this purpose, and every detail of the Utopia is perfectly worked out.

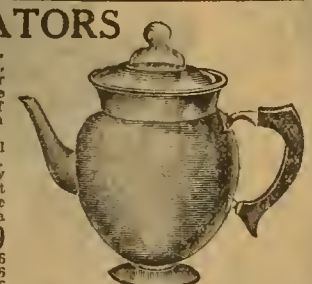
UNIVERSAL COFFEE PERCOLATORS



The Universal Coffee Percolator produces a coffee that is richer, stronger, more healthful, delicious in aroma, finer in flavor and free from grounds, without the bitter taste and unwholesome attributes possessed by coffee over boiled in the ordinary pot. A smaller quantity of coffee is required to make the same number of cups than by the old method, a great saving in the cost of coffee alone. The action of the hot water passing or "percolating" through the ground coffee, brews, and at the same time filters the beverage.

The "Universal" Coffee Percolator is made of pure aluminum, the ideal metal for cooking utensils, with top of clear glass, and dark ebonized handles, which are always cool. The pot fits on any stove lid just like an ordinary coffee pot; while for gas stoves a special lid, with an opening of the right size to fit the bottom of the percolator is supplied without extra charge. The outfit also includes a suitable brush to clean the valve and tube, and a descriptive pamphlet, containing full instructions.

BABY CARRIAGES GO-CARTS PERAMBULATORS

Stationary Folding Go-Cart

$2.14

This go-cart is designed for babies who are old enough to sit up. It can be folded into an upright position, to occupy about half the space of an ordinary chair, and when in use, is a very rigid, comfortable cart. The seat and back are covered with good quality leather cloth; the foot rest and arms are of wood, as is also the pusher. It has a good steel gear and steel reachers, the reachers being without a clamp. The wheels are strongly made and are 10 inches in diameter, with ⅝ inch rubber cushion tires, and are fastened with nuts. This is not a cheap cart by any means, but is well made, from good materials. The price is exceptionally low for a cart of this nature, and is much lower than you will be able to duplicate it for elsewhere. We guarantee your complete satisfaction and if you are not entirely pleased after receiving your purchase you can return it to us at our expense and we will immediately return your money and pay the transporation charges both ways. Shipping weight, crated, 40 pounds.

11B37001 Price each $2.14

Reed Folding Go-Cart

$3.71

This fine little go-cart is made with a reclining back and adjustable foot rest, and is a very comfortable, light-weight carriage. The back and foot dash are made of woven reed, and are finished with rounded edges. The seat is upholstered and covered with leather cloth. The back and foot rest can be adjusted to several positions, from a straight up and down chair to a reclining bed position. The gear and reachers are of steel, and the pusher and arm rests are of selected hardwood. The wheels are 10 inches in diameter, have wire spokes, and ⅝ inch cushion rubber tires. There is a parasol clamp on the reacher, which can be adjusted to almost any position desired. This makes a very convenient go-cart, as it can be folded up for carrying or transportation, and does not take up very much room. Every detail of its manufacture has been given careful attention and it offers you a good value, such as you will not be able to get elsewhere. Shipping weight, crated, 40 pounds.

11B37002 Price each $3.71

Single Motion Collapsible Go-Cart

$4.69

This is an exceedingly simple form of collapsible go-cart. Only one motion is required to completely fold or open it. When folded it occupies a very small space and can be carried around. When open it becomes a roomy, practical, comfortable go-cart. The body and hood are made of good quality leather cloth, and are finished in either blue or dark green. The seat is fitted with the "natural" spring, protected by an iron rod, which rides comfortably, without jolt or jar, the back springing simultaneously with the seat. The hood is unlined, has polished spreaders, and can be adjusted to any position. The gear is made of bicycle tubing, and the reachers are of solid steel, with enamelled wood pusher. The foot rest can be adjusted for either sitting or reclining positions, and the back is also adjustable. The wheels are 10 inches in diameter and have ⅝ inch rubber cushion tires. This is a very convenient cart for traveling, as it is easily carried, and takes up but little space in a car. The price is especially low, and offers unequalled value. Shipping weight, 60 pounds.

11B37003 Price each $4.69

Single Motion Collapsible Go-Car

$8.29

An extra finely made go-cart of the collapsible type, and one that we have add great numbers of this season. The gear made of steel bicycle tubing, and is arranged that it requires but one motion fold or open the cart completely. Thi cart is made with sides and dash of soli veneer, thus insuring comfort and safety fo the baby. The sides are nicely shaped, an are cut lower at the foot than at the head There is a foot well which can be converte into a flat top by means of an adjustabl apron. The back (which is adjustable t several positions) and the seat are covere with leather cloth. The hood is of leathe cloth, unlined, and has nickel plated spreade and supporting arms; it can also be tilte forward or back as desired. The reache are of steel and are fitted with an enamelle wood pusher. The wheels which are 1 inches in diameter, are of an extra stron pattern, have strong wire spokes, ½ inc rubber cushion tires, and are held by paten nickeled hub clips. We can furnish this go cart in either blue, green or tan. Shippin weight, crated, 50 pounds.

11B37004 Price each $8.2

De Luxe Pullman Carriage

$14.69

The body of this fine carriage is beautifully finished with a bright piano polish, and it is one of the most comfortable and attractive carriages we sell. The inside of the body is upholstered with American leather cloth; the foot well being deep and roomy, and easily converted into a flat top by an ingeniously arranged sliding cover, which cannot be mislaid or put out of order. The back of the body is adjustable to any position from upright to flat. The large hood is adjustable to any position, and has a back curtain, with a window, which serves as a wind shield when the hood is in its regular position. An attractive feature of this carriage, not found in any carriage of any other make, is the extra wind shield for use when the hood is tilted forward, or in stormy weather. This shield can be so arranged to entirely enclose the carriage, and make it wind or sun proof, but at the same time permitting sufficient air to keep the baby very comfortable. The hood has polished brass hood spreaders. The gear is of the flat steel type, and is very strong. The springs are the hinged coil style, and offer the maximum of resiliency and comfort. The gear is equipped with an effective brake which can be applied instantly. The wheels are 12 inches in diameter and are fitted with ⅝ inch rubber cushion tires, spring axle clips, and have polished brass hub caps. We can furnish this carriage in either green or blue. The price of this carriage fails to convey a proper idea of the excellence of its construction or its value. It is worth much more than we ask for it. Shipping weight, crated, 95 pounds.

11B37007 Price each $14.69

American-English Perambulator

$20.64

This baby coach offers the acme of comfort for the tiny tot. The extreme resiliency of the English strap gear makes it possible to go over rough ground without the slightest jar to the body of the carriage. The advantages of this kind of a baby carriage are many, and the demand for them is steadily increasing. The body of the vehicle is made of the finest selected hardwood, and is finished with a high piano polish and a delicate stripe that make it very attractive. The inside of the body is heavily upholstered in a fine grade domestic leather cloth which is very durable and looks as well as the imported goods. There is a roomy foot well in the middle of the body, which is covered with an upholstered cushion pad when not in use. When in use this pad can be placed on top of the seat pad. The car is reversible, being arranged so the baby can face either way, there being two seat pads and two holding straps. The Hood is made of the same material as the inside of the carriage, and is lined to match. It is reversible and can be folded up when not wanted; and when in use is held open by a pair of brass hood spreaders. The gear is the English strap type, the car hanging by straps from the long springs, and being prevented from jumping end too much play by an extra set of straps which hold it down to the gear. The reachers are of steel and the pusher of enamelled hardwood with brass knobs. The front wheels are 16 inches in diameter, and the rear wheels 22 inches, all fitted with ⅝ inch rubber cushion tires. Furnished in either blue, green or maroon. Shipping weight, crated, 125 pounds.

English-American Perambulator

$23.11

This car is designed to meet the demand for a carriage to combine the comfort and convenience of the English Perambulator with the stylish appearance of the reed goods. The body is woven of rounded reed, and is perfectly plain, without even the braided edge. The monotony of the plain curved shape is broken in a measure by the inward curve at the bottom. The inside of the car is upholstered with imported leather cloth, a very good material for this purpose, and a better grade than the American fabric. The foot-well has a removable cover, which adapts the carriage to a sleeping position. There are two seat pads furnished and two holding straps for the baby, so it can be faced in either direction. The hood is of imported leather cloth, is lined to match the upholstery, and has enamelled hood sprinklers. The hood can be placed in any position desired and faces either way; folds up completely when not in use. The gear is the easy-riding English strap type, and is fitted with steel handles and a pusher of enamelled wood, with brass knobs. The wheels are 16 inches in diameter in front and 22 inches in the rear, furnished with ⅝ inch rubber cushion tires, and brass hub caps. The axles have the patent spring axle clip, which makes it the work of a second to remove or put on a wheel. The demand for this type of baby carriage is steadily increasing, and this number at the price we quote is an excellent selection. The construction and finish are as near perfect as they can be, and the quality of the materials is of the best. Shipping weight, crated, 125 pounds.

11B37009 Price each $23.11

English-American Perambulator

$23.44

This is a full sized scroll model and is very popular pattern. It is very neat in appearance and is offered at a moderate price, giving an excellent value. In construction, design and workmanship of the gear, and general finish, this perambulator compares very favorably with the most expensive models in our line, and is a much better model and a better value than you will be able to obtain anywhere else at price like ours.

The body is handsomely fashioned with double scroll of raised beading and a delicate stripe which greatly enriches the otherwise plain sides. The deep foot well has a removable padded cover, and there are two padded seats furnished. All these pads as well as the upholstery of the carriage are of the best imported leather cloth. There are two holding straps furnished, so the baby can be faced in either direction. The hood is made of the same leather cloth that is used for the body, and is lined to match. It is made reversible, to suit the position of the occupant, and can be folded completely. The gear is the favorite English strap style and offers the most comfortable and easy riding of all baby carriage gears. The front wheels are 16 inches in diameter and the rear wheels 22 inches. The rubber cushion tires are ⅝ inch in diameter. The wheels are fitted with the patent axle clip and have brass hub caps. The carriage can be furnished in either green or dark blue. Shipping weight, crated, 125 pounds.

UTDOOR FIXED ROLLING CHAIR

$31.73

An improved outdoor rolling chair that fits the body perfectly from head to foot; comfortable, graceful and strong. The arms and back of the chair are made of a finely latticed light rattan; the seat, leg-rest frame and foot-board are made of oak, the leg-rest being caned. Excellently constructed throughout, with full height elliptical springs, affording ease in riding, and particularly adapted to country roads, curbs and street crossings. The wheels are steel hubbed with wire spokes and inch cushioned rubber tires. The chair is made for hard outdoor use, yet it can be made into a handsome house chair by the simple turning of two thumb screws; the wooden handle is removed, the chair occupies less space and can be readily guided through the rooms. The foot-board folds flat against the leg-rest to facilitate getting in and out of the chair. The chair is very well balanced, only the slightest effort being required to push or steer it. It is not only handsome in appearance, but solidly built, only the best and strongest materials being used in its struction. With ordinary care, the chair should last a life time. This chair is at a price far below the usual retail price and if you are in the market for thing of this kind by all means place your order with us and we will guarantee lease you. Shipping weight, crated, 150 lbs.

INDOOR INVALID ROLLING CHAIR

$15.24

For Adults or Children.—When purchasing a chair for an invalid the questions of comfort and strength are by far the most important. Our chairs are dependable; they are well built throughout of the best materials obtainable, and so shaped as to give the greatest possible comfort and ease. The worry and danger of uncertain construction is entirely eliminated if you use one of these chairs. They are so well made and so strong that your confidence is immediately gained. The most striking features that make for comfort are the perfect measurements of the chair, conforming closely to the shape of the body in curve, pitch and proportion. It is possible to obtain 11 different positions, from the straight sitting position to the full reclining, by means of the ratchet at the joint of the seat and back. The back, seat, and leg-rest are caned, and there is a pillow and foot-rest hinged to the leg-rest. The frame is made of polished oak, the wheels also being of oak, with half-round iron tires. The chair is light and strong, easily moved, and has a light running gear. The chair is made in three adult's sizes and one children's size, and is made in several widths to go through wide or narrow doors.

American English Mail Cart

$33.74

This is an English type of baby vehicle, and is one of this season's novelties that bids fair to become a permanent article, as it is a very handsome looking carriage, and a very comfortable one. We were the first to place this type of vehicle on sale, and are still the lowest priced of any, when first quality goods are in question, and we do not handle any but first quality baby carriages. This cart is made with an upholstered body and an adjustable foot box of a very ingenious construction, which can be placed in several very comfortable positions. The hood is not movable, but it can be folded back out of the way when not in use. The upholstery is of imported leather cloth and the hood is made of the same material and lined to match. The gear is a combination strap and spiral spriog affair, the back being on spiral aprings and the front on strap springs. There are two supporting feet at the back which prevent the car from being tipped too far down. The wheels are 12 and 24 inches in diameter, and have ⅝ inch rubber cushion tires. All the fittings, such as the hood spreader and hub caps are of polished brass. The reachers are of the best grade of bent wood, and are open, so as to be used as pushers or shafts for pulling. It is a remarkably easy going and easy riding carriage, and one that will not fail to please both parent and baby. The price is exceedingly low.

INDIANA REFRIGERATORS

Realizing that conditions and requirements of different homes and familie call for a range of qualities and prices we have devoted this page to a lin of Refrigerators which are the best in their class, but which are sold a prices to meet the demand of those who feel that for any reason they do not care to install a very high priced Refrigerator. Remember, just a much care in the construction and materials has been exercised in the construction of the Refrigerators offered below as has been exercised i the higher priced boxes; we would not sell the poorly constructed, poor material Refrigerators at any price. The intermediate grade which w are offering you here possesses all the good features of the best makes, but constructed with a view of economizing cost in the matter of trimming and other side ornamentations, not materially affecting the good qualities of the box in the slightest degree. The saving thus effected, and th vast demand has reduced the cost of manufacture in large quantities to a minimum, and the narrow margin of profit basis on which we sell a our merchandise permits us to pass these manufacturing advantages along to our customers in the form of very low prices. Just such a rep resentative type of dependable Refrigerators as we have pointed out above, honestly built, bound to give entire satisfaction regardless of th low price quoted will be found combined in the Indiana Refrigerators which we can confidently recommend.

CONSTRUCTION Seven distinct walls intervene between the outside case and inside provision chamber. The first is the Outside Case, which is made of seasoned hardwood lumber with handsome raised panels; finished in a rich golden oak with trimmings of polished brass and fitted with an automatic self tightening lock, that not only catches securely when slammed shut, but draws the door air tight. The second is a Dead Air Space, air tight, which prevents moisture from within from reaching the outside case and swelling it out of shape. Next follows a lining of non-conducting waterproof sheathing; cannot carry heat or moisture and makes the best inexpensive material for insulation purposes known; extends under the posts, making an absolutely air tight joint. Then comes another dead air space, air tight, as a double precaution against dampness from within striking outside the case. Next comes another lining of non-conducting waterproof sheathing, a double layer with dead air spaces between the inner and outer linings, this form having been found to give the most perfect insulation. The Interior Case is also of well seasoned lumber sheathed with galvanized iron, which is better than the ordinary zinc and easier to keep clean; practically exempt against leakage or damage by ice pick.

ICE CHAMBER Front bottom and back are of one solid piece of galvanized iron, with double seamed ends and soldered on the outside before being put in place making any leakage impossible. The ice rack is made of corrugated galvanized iron, firmly riveted; very durable and easily kept clean. The drip pipe is very simply constructed, can be readily removed, cleaned and replaced without any difficulty.

PROVISION CHAMBER Is sunk ⅜ of an inch below bottom of door. This prevents any spilled liquids from flowing out on the floor; all are fitted with removable shelves of galvanized iron.

THE TRAP Self adjustable, made of iron screwed in place, cannot drop off, can be turned down for cleaning and when released resets itself by its own weight; this is of the greatest importance, preventing the air from rushing in, melting the ice and causing the provisions to spoil, as frequently happens in other makes not equipped with this improved trap.

SINGLE DOOR INDIANA REFRIGERATOR

Single door Indiana Refrigerater, small size; made of hardwood golden oak finish; neatly paneled; interior has one galvanized iron shelf, ice chamber in the top covered with an air tight lid, attached by brass hinges; base stands on patent castors that cannot drop out; hinged baseboard which can be raised when required to remove drip pan. A most handy arrangement. This offer is positively without an equal. Our price $5.78 is actually less than you would have to pay for a medium quality refrigerator at your dealer's. These refrigerators are fully guaranteed, linings, trimmings, and finish, positively perfect. Order at our risk. You take no chances on the quality, we positively guarantee to furnish you the very highest quality refrigerator for the money that can be obtained in the market. Don't invest your money in a poor quality refrigerator, because it will not, and cannot give satisfaction, and, in any event, will prove a poor investment. Don't pay dealer's fancy prices elsewhere. Our vast purchasing power enables us to quote lower prices than dealers pay wholesale. We guarantee our refrigerators to be exactly as described. Our prices represent just the actual cost of material and manufacture with our one small profit added. Send us your order, if we do not satisfy you, return it at our expense and we will promptly refund your money, together with transportation charges.

ROUND CORNERED INDIANA REFRIGERATOR

Single door, Indiana Refrigerators of larger capacity; constructed of hardwood, golden oak finish; deep panels with rounded corners; equipped with two galvanized iron shelves; icechamber in the top covered with an air tight lid, attached by brass hinge and fitted with a brass pull handle to raise or lower; patent castors which cannot drop out; also fitted with a hinged base board to be raised when it is necessary to remove the drip pan, which is rust proof. No better value, quality considered, can be obtained elsewhere for the money. Our Refrigerator B37409 at $11.39 must be seen to be appreciated. It has no rival for the money. The sterling qualities of our refrigerators are unsurpassed and the descriptions truthfully stated. The value in our refrigerators does not lie in a fancy pattern; the value lies in the amount of the material used; the quality of the material; the construction and finished workmanship. Do not delay your order, we are willing you should order direct from this catalogue and we will send the goods direct to you, with the distinct understanding that they must reach you in perfect condition, and prove entirely satisfactory.

NORTH STAR REFRIGERATORS

In this line of high class Refrigerators will only be found those which have been subjected to many varying tests, and have been ound universally satisfactory and pronounced foremost in comparison with many others as ice saver and food preserver. Although erhaps a little higher in price than the ordinary make of Refrigerators, experience has taught our customers that in the constant waste f ice and spoiled provisions nothing would be gained in the purchase of an inferior grade of Refrigerator. In view of this, there- ore, it would be extreme folly to waste money in the purchase of a refrigerator that was not backed up not only by the guarantee of ie maker, but also by the testimonials of thousands of families who are using the North Star Refrigerators in their own homes.

ONSTRUCTION In the choice of materials which enter into their construction great care has been exercised to select only ose which, after careful testing, have been found most adapted to the require- nts. Seven different sections are combined to construct the Refrigerator; the tside case is of hard ash or solid oak, specially selected and thoroughly air asoned so as not to warp, crack or shrink; the dead air space is airtight and oof against dampness; thick sheets of insulating waterproof sheathing are placed ainst a wall of granulated cork which is additionally protected on the other side th other sheets of waterproof sheathing; then another layer of hard wood, and en the inside metal linings of galvanized iron and zinc fastened so securely to e inner wood casing and floor as to be absolutely water tight. Each section of e wall thus constructed becomes a perfect non-conductor that no heat can pene- ite or cold escape. Note particularly that no substance has ever been discovered ite so effective for refrigerator insulation as granulated cork, the best quality of hich is used in the construction of the North Star Refrigerators. Additional points merit in this desirable make of Refrigerator are:

OCKS AND HINGES made of brass, heavily nickel plated and highly polished. The locks are fitted with a strong spring hich draws the door into an airtight joint, in the outside wall when slammed shut.

HE FOOD CLOSET is built so that the floor is slightly below the level of the door, consequently any liquids accidentally illed can easily be dried up without danger of flowing over on the pantry floor; e walls are lined with heavy zinc, first quality, while the floor is covered with me quality zinc.

HE ICE RACK is made of heavy corrugated galvanized steel, supported by broad bands of the same strong metal, firmly riveted to the der corrugated surface of the galvanized steel rack. Its shape facilitates the flow pure cold dry air, downward to the food closet below.

CE CHAMBER This is flawlessly construcled, every part of floor, walls and door being lined with heavy galvanized iron.

THE DRAIN PIPE is large enough in diameter to allow all impurities to flow down and out with the melted water into the trough underneath the bottom of the box, in the center, convenient for cleaning.

THE TRAP The importance of the trap is often overlooked. If dropped off and not noticed the cold air escapes and the warm air rushes in, allowing the ice to melt and the food to spoil; the trap in the North Star Refrigerator is firmly screwed in place, and when turned over for cleaning purposes reseta itself in proper position again when released, by its own weight, being self-adjusting and requiring no special attention.

The Trap

CASTERS are the standard ball bearing variety, are held in place by a spring socket and therefore cannot easily fall out; all bases are fitted with a swing front baseboard which, when raised, permits easy access to and withdrawal of the drain pan.

TESTS MADE using several Refrigerators bought at random from local dealers, representing the makes of different factories, all fairly conducted in the Mechanical Engineering Laboratory of a large Western University, the North Star Refrigerator produced a lower temperature with an equal amount of ice under the same conditions. This proves in a practical way our claims that the North Star is the best and most scientific in its insulation, ice saving and food preserving properties, general construction and superior finish.

FOR THOSE WHO PREFER to have the food closet lined with white enamel instead of zinc, we are quoting prices on this style as well as on the zinc lined food closets.

TOP DOOR REFRIGERATOR

This illustration shows a North Star Refrigerator with case of solid ash or oak, finished golden; handsome raised panels front and sides; easily polished; top fitted with the ice chamber of generous capacity, fitted with a zinc lined air tight cover and nickel pull handles in front; in this style we offer three different sizes to select from, for small, medium and large family use; priced either with zinc and iron or white enameled lined food closet; fitted with two shelves, galvanized or of heavy silver wire. This is one of the most sanitary, up-to-date, easily kept clean refrigerators on the market. One of the greatest features in this refrigerator is that each section of the wall is so constructed that it becomes a perfect non-conductor—no heat can penetrate—or cold escape. It is flawlessly constructed, of good material and workmanship. You save money ordering from us. You are safe when you buy a North Star Refrigerator. You've got to take somebody's word when you buy a refrigerator, or else find out at your own cost. Join the army of people who find perfect satisfaction in quality and price, in buying their goods from us.

FRONT DOOR REFRIGERATOR

This style of Refrigerator is designed for apartment houses or where floor space is limited; also for those who prefer a front door instead of raised cover opening into the ice tank; are built quite high but narrow so as to fit in odd space; both in storage and ice capacity will hold as much and sometimes more than the low square boxes previously described; of solid oak or ash with a golden brown finish; deeply cut raised front and side panels; fitted with three shelves, ice rack, etc. This style supplied either with the zinc and iron or white enamel lining. The illustration cannot give this refrigerator justice; the unexcelled fittings and workmanship are but a few of the many attractive features now being offered in this refrigerator. Remember, we sell only first quality—anything you buy here is guaranteed, and if it disappoints you in any way you are privileged to return it. A lower price than ours means a poorer quality. Before you buy elsewhere, look over the descriptions and values we offer—the guaranteed quality—unmatchable prices, and we know after investigation you will send us your order.

NORTH STAR HIGH GRADE ICE CHESTS

A word regarding Ice Chests: Combining as they do the food and ice chamber, all in the one space, without any separation or air circulation, ice chests are not so readily adaptable for regular household purposes as the upright refrigerators; the ice chests however adequately meet the demands of grocers, and restauranta where they are excellent for the storing of bottled or canned goods. For such purposes nothing better than the ice chests we offer can be had in the market.

This hardwood high grade ice chest, round cornered, beautifully paneled, made of solid oak or ash, finished golden, walls thoroughly insulated and protected by heavy zinc and iron linings; contains metal aliding shelves and hardwood ice rack; nickel trimming outside; in five sizes, measurements and prices as follows:

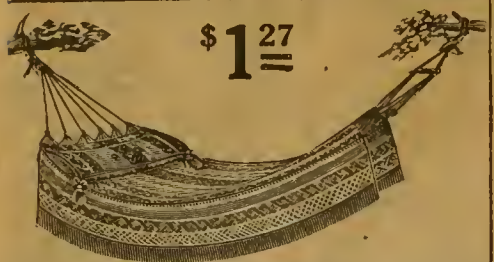
SPECIAL VALUES IN GOOD HAMMOCKS

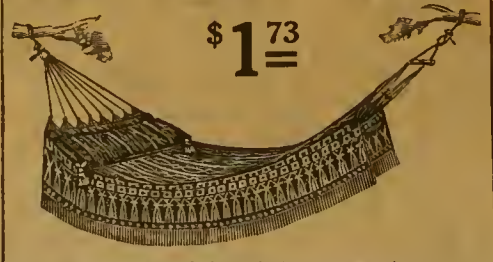


$1.27

This hammock is one of the most popular in our entire extensive line. Its low price and excellent quality, besides the handsome appearance, make it an unusual hammock bargain, and the value you get for your money cannot be equalled anywhere. A very strong material of a combination weave makes the bed of the hammock. The weave is a zig-zag twill in combination with a plain weave and dismood figures, arranged in stripe effects, and in very attractive color combinations. It has a concealed spreader at the head and a dividing wood bar at the foot, with patented tips, which prevent the tearing or tangling of the stringing if it should get caught. The stringing is continuous throughout, and the end cords are passed into and through the spreader and bed. The fringed valance is woven onto the bed, with a three-ply cord between the two. The bed is 36x80 inches; weight about 10 pounds.

11B37601 With regular pillow and wide valance. Price each $1.21

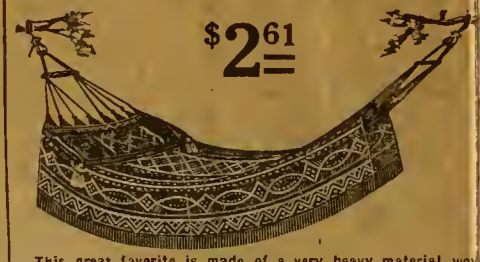
11B37602 With regular pillow having buttons and tassels, and wide valance. Price each $1.27



$1.73

This striped hammock is made from a very strong canvas and twill woven material, having a Jacquard design in the body and valances, the general design being bold and contrasting stripe effects, in the simpler renaissance forms. It is an exceptionally well-made hammock and one that will outlast many lower-priced ones. For durability, quality of materials and fine construction, you cannot equal this hammock anywhere under $2.25. Our low prices are made possible by our large buying and narrow margin of profit. This hammock has a concealed spreader, and a very comfortable lay-back pillow with buttons and tassels. The valances are wide and full, and are interwoven with the bed, the dividing line being triply strengthened by a heavy interwoven cord. The stringing is continuous, and the end cords at each side are fastened right through the spreader bar, thus giving great supporting strength where all inferior hammocks show the first wear. The wood dividing bar at the foot has patented tip ends, designed to prevent tearing of cords that get displaced, by simply permitting them to slide off instead of getting caught. Torn supporting cords mark the beginning of the end of most hammocks; but are prevented in our hammocks by this patented device. The adjustable hitch end rings make it very simple to hang up this hammock without fussing or tying knots in ropes. Size of bed, 39x82 inches. Shipping weight, about 15 pounds.

11B37603 Price each $1.73



$2.61

This great favorite is made of a very heavy material wo[ven] in a close figured twill effect with a Jacquard design in t[he] body and valances. The striped design shows that ri[ch] simplicity so much in vogue now in all textiles. We have t[he] fine pattern in several desirable color combinations. Hit[ch] end rings requiring no adjustable ropes or knots; simp[ly] pass a rope end through the ring and pass the end under t[he] loop, and the fastening is complete. The stringing is c[on]tinuous throughout and the suspension is divided at head a[nd] foot. The dividing bars have that patented tip end feat[ure] which means longer life to a hammock. If the string[s] should get caught over the bar, this patented tip perm[its] it to slip off again, instead of tearing, as is the case in i[n]ferior hammocks. The end cords at each side are faste[ned] through the spreader, and give extra strength in an otherw[ise] weak place. The valances are wide and full, and are wo[ven] as one piece with the bed, having a three-ply cord interwo[ven] at the dividing line to give additional strength. A soft co[t]fortable pillow is provided, and can be turned back o[ver] the stringing if a higher head position is desired. The pill[ow] has fancy tassels and buttons. The size of the bed is 41 [by] inches. Shipping weight, about 15 pounds. $2.[61]

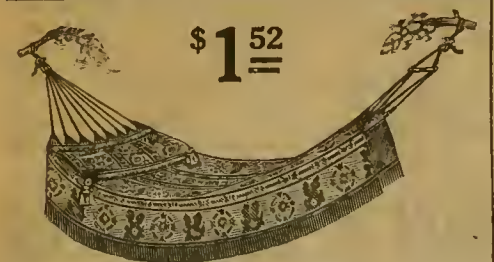
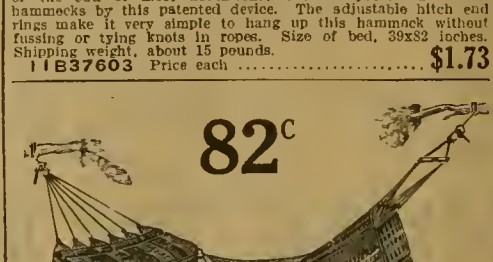
11B37605 Same as above, but all white, instead colored. Price each ..... $2[.61]



$1.52

This hammock is made from a very strong material of the close figured warp twill weave, ornamented with a floral renaissance effect and with a Jacquard design in the body and valances. It has a concealed hardwood spreader at the head, and a patented tip end wood bar at the foot. This bar prevents the tearing or tangling of cords, if the stringing should become displaced, as the strings simply slide off, instead of catching and tearing, as is the case with many other hammocks. The stringing is continuous and is made much closer and stronger than you will find in many higher priced hammocks sold elsewhere. The end cords at both sides are fastened through the spreader and give the greatest strength where it is needed most. This hammock has a lay-back pillow, which can be turned up onto the stringing for a higher position, and which has buttons and tassels. The wide valance is part of the bed of the hammock, being woven into it, and has an additional three-ply cord interwoven for greater strength at the dividing line; weight about 15 pounds. $1.52

11B37614 Price each $1.52



82c

This is the best low-priced hammock on the market today. In quality of materials, workmanship, fine appearance, and durability, you will find it much better than any hammock now being sold at from $1.00 to $1.25. The bed of the hammock is made from a strong, open gauze weave cloth, and is in an attractive stripe design, and comes in several attractive color combinations. It is furnished with a comfortable pillow, and has a narrow valance woven onto the body of the hammock, with a three-ply cord interwoven between the valance and the bed to give greater strength. The head of the hammock has a strong spreader, concealed in the weave of the fabric. The wood bar at the foot has patented tip ends, so arranged that if a string gets caught on the bar, it simply slides off again. Another good feature is that the end cords, at both head and foot of the hammock are carried down and through the spreader and the fabric, thus putting the greatest strength where the heaviest strain is. The adjustable hitch end rings require no adjusting of ropes or knots, you simply slip the end of the rope through, and with a simple turn, the fastening is complete. The bed is 36x78 inches. Shipping weight, about 15 pounds. 82c

This number gives an extra good value for those desir[ing] a good, low-priced hammock. The bed is strongly made in a close figured twill and canvas weave fabric, having attract[ive] stripe effects interwoven, and is further trimmed with a n[ew] cross-bar design on each side. The full valance is woven i[n] the fabric of the bed, with an interwoven three-ply cord [be]tween to strengthen the edge. The head and foot stringing [is] continuous, the end cords being carried into and through [the] spreader and body. The spreader is concealed and is of v[ery] strong material. The stringing through the spreader grea[tly] strengthens the hammock, and is a feature not found in o[th]er hammocks. The hard wood dividing bar at the foot h[as] patented tip ends, which cause displaced strings to slide [off] instead of getting caught and tearing, as so often happens [in] other hammocks. The adjustable hitch end rings make [the] hammock very easy to put up, as the rope needs only to [be] passed through the loop, and the end tucked under, mak[ing] a strong fastening which cannot slip or get loose. Size [of] bed is 36x77 inches. Shipping weight, about 15 pounds.

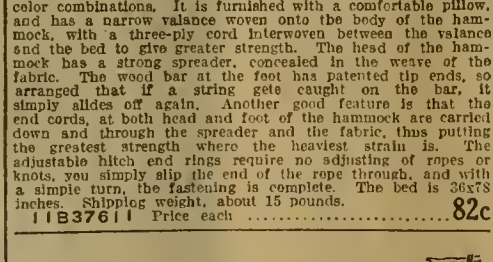
UTOPIA CHAIR HAMMOCK

This is an exceedingly comfortable "sleepy-hollow" sort of a hammock, and can be used as a regular hammock or a chair hammock as in the illustration. The hammock itself is made from a closely woven twilled fabric. There is a concealed spreader at the head and the foot. The pillow is adjustable and can be placed in any position up or down; and is upholstered with buttons and fancy tassels. The stringing is strong and continuous throughout. The Utopia seat, which is the feature of this hammock, is composed of two sides and five slats, three fixed and two removable. The back and front slats are removable for the purpose of taking the seat out of the hammock. When taken out the seat can be folded up to make a symmetrical package. The ropes which connect with the seat support permit the adjustment of the seat and the foot portion. Size of bed 34x84 inches. Shipping weight of hammock hammock support and awning as illustrated about 50 pounds.

11B37606 Hammock only, with Utopia Seat. Price, each $3.79

11B37607 Telescope Hammock support, as shown in illustration; complete with all necessary fastenings $5.06

11B37608 Hammock Awnings, as illustrated, made in khaki, green, gold or red; can be folded like an umbrella when not in use; complete with attachments for securing to telescope support. Price $4.69



$1.98

This medium-priced hammock was selected from our large assortment as one that will give an extraordinary value. It is one of the strongest of the low-priced hammocks, and one that is in great demand by our discriminating patrons who know what to select to make their money go farthest. All our hammocks are priced as low as it is possible to sell honest merchandise, and our prices to you are lower than your local dealer can get the same goods for from the same manufacturer that we buy from, because we buy more in a week than he can handle in two or three years. This hammock is made from an extra strong canvas and basket weave material, and has all the patented and other desirable features of our high grade line of goods. The body is made in an attractive stripe design in several pleasing color combinations and has full wide valances, woven onto the bed. The spreader is concealed in the fabric, and the wood bar at the foot has the patented tips which prevent displaced cords and strings from tearing. The stringing is close and continuous, and the end cords at both sides are fastened through the spreader. The pillow is very comfortable and is finished with buttons and pretty tassels, and can be turned up and back to give a higher position. Adjustable hitch end rings make it very simple and easy to hang this hammock. Size of bed, 42x82 inches; weight, about 15 pounds.

"Extra Quality" Hammock of close figured twill and sa[tin] wove material, possessing unusual strength and wonder[ful] wearing qualities. This hammock is made better and stron[ger] than any of our lower priced goods and is a better and m[ore] satisfactory hammock than you will be able to buy anywh[ere] else for $2.75. It is intended for those who are willing [to] pay a little more and get an article that is much be[tter] in every way than any lower-priced hammock. The gen[eral] design, in addition to the Jacquard design in the weave, i[s a] simple floral striped effect, and comes in several harmoni[ous] color combinations. The valances are wide and full, [and] are interwoven with the bed, making one strong fa[bric] throughout. There is an additional three-ply cord w[oven] between the valance and the bed for additional streng[th]. The hammock is supplied with a concealed spreader, [a] continuous stringing, with a divided suspension at the h[ead] and foot; the dividing bars having the patented tip e[nds] which prevent tearing of cords which might get displa[ced]. The end cords at each side are continued down into [and] through the body fabric and the wooden spreader, thus giv[ing] great additional strength in the place where most hammo[cks] give way first. The pillow, which is well made and one [of] the most comfortable pillows supplied with hammocks, [can] be laid back to give a higher position, and has ornamen[tal] tassels and buttons. The hanging device is very simple, [and] requires but a moment to adjust. Simply pass the rope [end] through the ring, and pass the end of the rope under [the] loop. Size of bed, 40x82 inches. Shipping weight, about [15] pounds.

$2.94

This handsome looking hammock is made of heavy material woven in close figured twill weave, with Jacquard design in valance and body. Valances are full and wide, and are part of bed fabric, being woven into it with a dividing line of three-ply cord for extra strength. Has concealed spreader at head, with comfortable pillow, made to turn back if higher head position is desired. Suspension divided at head and foot, dividing bars having patented tip to prevent tearing cords that get caught. Adjustable hitch-end rings. Hammock is 43x83 inches. Shipping weight about 10 lbs.

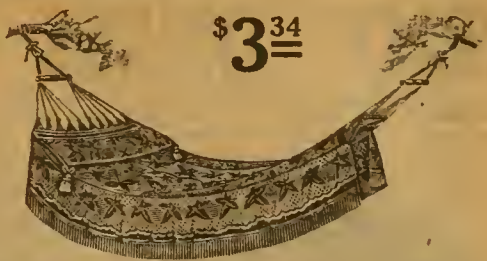
$3.09

In this number you get the maximum of quality. Material is plain, heavy, close canvas weave fabric, without figure or design of any kind—just plain, strong material, designed to wear, without regard to looks. Can be had in yellow, red, or green. Hammock has concealed spreader at head, and comfortable pillow, designed for either normal or high head positions. Patented clip-over tips to prevent catching and tearing. A three-ply cord interwoven between bed and valance, gives strength, and prevents sagging. Size of the woven part 45x84 inches

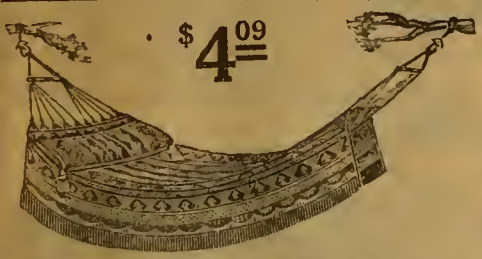
11B37702	Shipping weight about 10 lbs.	$3.09



$3.34

The material in this excellent hammock is a fancy woven fabric, though a strong and closely woven one. The Jaquard design appears in the valance and body, while the main ornamental feature is the ivy leaf, used as a dividing figure for the different weaves that comprise the fabric. The many weaves include satin, twill, basket, diamond, diagonal and plain weaves, continuous stringing, patent tip, to prevent strings from catching and tearing. Valances are full and wide. The end cords on both sides are fastened through spreader, dividing the strain. Patent hitch-end hanging ring. Woven part 45x84 inches.

11B37703	Shipping weight about 10 lbs.	$3.34



$4.09

The advantage of this hammock over some of the others listed is in the excellent material which goes into the body. Fabric is a combination of tapestry weaves, with jacquard design in body and valances. General design fancy striped figures of various motifs, all suggested by the weaves and patterns. Valances are wide and full, and interwoven with bed, making one solid body; a three-ply cord interwoven at dividing line makes an extremely strong edge. Suspension is divided, bars having patented clip-over tips to prevent the tearing cords. Hammock is 40x84 inches.

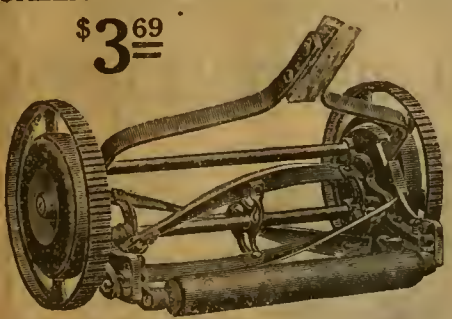
GREEN MOUNTAIN PLAIN BEARING LAWN MOWER

$3.69



This is one of the best lawn mowers for suburban and country use, as it will trim a lawn nice and smooth, on even or uneven ground. The driving wheels are made larger than in the lower priced machines, and the machine does not sink into gullies as quickly as it would if it had smaller wheels, thus leaving the grass smoother and more even. The 10 inch driving wheels run on a tempered steel shaft ½ inch in diameter, in an adjustable plain bearing box. This box can be adjusted to regulate the friction and to take up any loose play that might develop, as well as to compensate for any wear. Once adjusted, it is scarcely ever necessary to ourb this bearing except for lubrication, as it will maintain its adjustment indefinitely. The cutting reel has three blades of finely tempered tool steel, which will keep their keen cutting edges for a long time. The under knife is of a very hard, and finely tempered tool steel and is made adjustable for wear.

GREEN MOUNTAIN BALL BEARING LAWN MOWER

$4.49

This is an exceptionally fine, large wheel, lawn mower, and while it is built of the same fine materials and in the same substantial manner as our Green Mountain Plain Bearing machine, it has the added advantage of being made ball-bearing. The driving wheels are 10 inches in diameter, and will run smoothly over an even ground, thus leaving the grass even, although the ground may be rough. The machine runs on an improved ball-bearing, the balls being of the best tool steel, ¼ inch in diameter, and nicely tempered and polished. The balls run in a 1¼ inch ball race, and are held in place by an adjustable cone bearing, which permits but the slightest friction. These cones are of the finest tool steel, hardened and ground, and cannot possibly work loose after being adjusted. There are three tool steel knives on the cutting reel and the under knife is also of the best tool steel, hardened and ground. The under knife can be adjusted to compensate for wear.

Our Big Value Tip Top Lawn Mower

$2.57

In this Tip Top Lawn Mower at $2.57, we are offering you absolutely the biggest value for the money that you can obtain anywhere. You may be able to buy a lawn mower for less money, but it will be a cheaper machine in construction and quality of materials as well as in price. The same factory that makes our higher priced machines also makes this one, and it is a factory that has been built up on the honesty and merits of its products. This machine is made with three finely tempered tool steel knives on the reel, and an under knife of tempered tool steel, which is finely ground and is adjustable to compensate for wear. The driving wheels are 8 inches in diameter, and run on a ½ inch tempered steel shaft, in an adjustable, plain bearing box, that is adjusted and fitted to eliminate most of the friction.

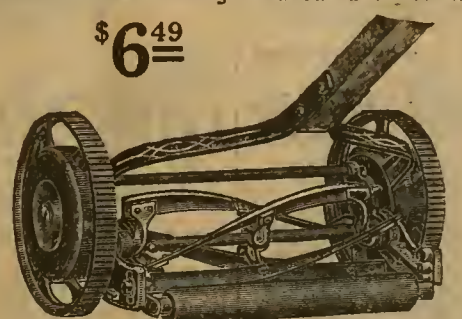
Worcester Ball Bearing 4-Bladed Lawn Mower

$6.49



Easiest running lawn mowers on the market today. It is especially adapted for uneven ground and for long grass, cutting clean the first time. There are four tempered tool steel blades on the cutting reel, all hardened and carefully ground. A special feature of this machine is the under knife. This knife is to be made specially for this machine by electrically welding a piece of tool steel, ½ inch wide, to a piece of selected Bessemer steel. The whole is then hardened and ground, making the best and most lasting under knife ever put on a lawn mower. The driving wheels are 10 inches in diameter, fitted with the best bicycle ball bearings, running in ground ball races, and are held by a patent cone adjustment.

New England Ball Bearing Lawn Mower

$3.09

This is the most satisfactory and well-built medium priced lawn mower on the market. All the parts are well made from selected materials and carefully assembled, making as thorough and reliable a machine as you can buy for 20% to 30% more than we ask for this one. This machine is fitted with ball bearings, which makes it as easy to operate and as light-running as the highest priced machines. The balls are of the best tool steel, ¼ inch in diameter, and run in 1⅛ inch ball races, and are held in place by a patent cone adjustment, by means of which the bearings are easy to adjust, and can be made to compensate for wear. These cones are hardened and ground, and once adjusted will never work loose. The reel has three tempered tool steel knives; and the under knife is also of tempered tool steel. The driving wheels are 8 inches in diameter.

MACY TRUNKS MAKE TRAVELING A LUXURY

To the traveling public as well as others the trunk is an indispensable necessity. Considering the amount of rough handling it is bound to receive, when making any such purchase, the item of price should be disregarded and quality only considered—being an instance "Where the best is the cheapest in the end"—of course, something depends on the use to which a trunk will be subjected to. If for an occasional trip or storage purposes, the medium price grades will answer, but for continuous or long distance journey, our advice is "Buy the Best" as a good paying investment.

FIRST QUALITY ENAMELLED COOKING UTENSILS

AGATE is the most universally used of all kitchen ware. It is remarkably easy to keep clean, while the hard enamelled surface is absolutely non-absorbent, and will last many years. We sell more agate ware cooking utensils than any other kind, and we have never failed to satisfy our patrons.

MOST OF THE ARTICLES mentioned on these pages are offered in two grades, single and double enamelled. We get our supply from the largest manufacturers of agate and enamelled ware in the United States, and never buy or sell any but the best grades. Our single enamelled ware, known as the "EL-AN-GE" brand, is superior to that usually offered by other dealers, as the very best quality, and our prices for the same goods are lower than the lowest. We do not claim single coated ware to be the very best, but we do claim that every piece of "El-An-Ge" single enamelled ware we sell is perfect, and as good, if not better than any other single enamelled ware on the market. We do not handle seconds, or damaged goods under any consideration, and you are perfectly safe in selecting our El-An-Ge brand, as it is better than what is usually sold as the best.

OUR SINGLE ENAMELLED WARE is made in the same great factory that makes the single enamelled, but is finer finished, and has three heavy coats of enamel instead of two. We claim it to be the very best enamelled ware on the market, and it will outlast any other kind of enamelled ware you can buy. It pays to pay a little more for this grade, as you will only have to buy once. You cannot buy "best quality" agate ware at prices as low or lower than ours. If you do get so-called "best" goods for less, you may be getting seconds, or chipped goods, often as first quality.

ALUMINUM COOKING UTENSILS LOOK LIKE POLISHED SILVER WEAR LIKE SOLID IRON

One of these aluminum frying pans should last a life time with ordinary care. They are easy to clean, and as they require less heat than steel or iron frying pans, there is less liability of the food burning if neglected. The metal handles are firmly riveted to the body and will never break off. They look like silver and wear like steel.

Perfection Ash Sifter

11B38762 When considering the purchase of an ash sifter several important points stand out prominently above all others.

1st The efficiency—Our sifter will thoroughly separate coal and cinders from the fine ashes in less time than any other on the market.

2d Ease of operation—A perfection ash sifter is so easy to handle that a boy can operate it and secure good results.

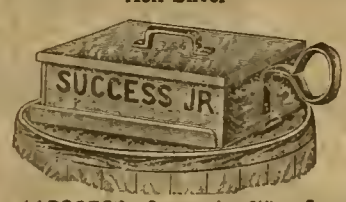
3d Construction—It is very simple in construction, having a conical shaped revolving screen automatically fed through a stationary screen in the hopper. The revolving or stationary screen cannot possibly become clogged. There is a top on the hopper and a dust screen on the cinder chute. The top casing is removable, and the revolving screen can be taken out and replaced in five minuutes.

4th Cleanliness—The hopper top and dust screen make the sifter dust tight, thus doing away with all dust and dirt while operating.

5th Durability—The sifter cannot become clogged or get out of order if properly used and will last a life time.

6th Price—While there are some sifters on the market lower in price, the "Perfection" is the most perfect device ever invented, and it doesn't pay to buy inferior sifters that do inferior work to longer time, laboriously handled and always out of order.
Macy's special price, complete, each $4.33

Ash Sifter



11B38763 Success Jr. Sifter—For a practical sifter adapted for home use, there is no sifter on the market that quite compares with our Success, Jr. It performs its sifting quickly and effectively, simply and cleanly. It is tight, all metal, galvanized throughout, very strong and durable. Nothing to break and nothing to get out of order. It rests on the top of the ash can, the fine ashes sifting through into the can, the coals and cinders easily removed. Many high priced sifters do not accomplish their work as quickly or as thoroughly.

FOR FULL DETAILED DESCRIPTION AND PRICES OF THIS STEEL RANGE SEE OPPOSITE PAGE

DESCRIPTION OF OUR SUPERB STEEL RANGE

I BUILDING THE SUPERB Steel Range every piece of material which enters into its construction, every process through which the various parts pass in the great stove foundry which produces it is so closely inspected, so carefully designed that we have a steel range far in advance of other steel ranges offered by her manufacturers and dealers, and there is no possible comparison to be made between this, our Superb, and the steel ranges offered by retail dealers at from $40.00 to $55.00. When you buy the Superb Steel Range at our wonderfully low price you not only get l that any other range manufacturer can possibly give you, but you get more improvements, better materials, more scientific construction than you can possibly get from any other range manufacturer or dealer, even at a price from one-third to one-half more.

HE BODY Every Superb Steel Range is made from especially prepared range steel, made by the Wellsville Rolling Mills Company and known to ve builders and steel buyers everywhere as Wellsville blue polished steel. It is very best material which can be used in the construction of a steel range, as it uires neither blackening, polishing or japanning. In its natural state Wellsville ished blue steel presents a very attractive appearance, is easily cleaned and always ks neat. The steel sheets are handled at the rolling mill between heavy rollers ning in a bath of oil. They are also handled in oil at the stove foundry, which serves its beautiful luster and prevents spots and marks appearing as it passes ough the hands of the workmen. All the cleaning necessary is an occasional ding of the surface with a soft cloth, which brings out the beautiful luster of the el and makes it a delight to the eye and a source of pleasure to the housewife, l requires no further attention. No matter how you force the fire or how hot your ge becomes the beautiful surface will not burn off. Wellsville blue polished steel become standard the world over and the best priced ranges sold are made of this terial, because of the superior wearing quality and its attractive appearance.

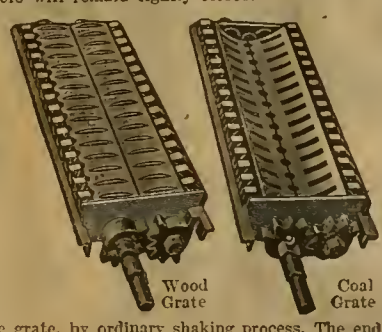
OT WATER FRONTS can be furnished at any time in years to come for any of the steel and cast iron ranges sold by us. t water fronts are designed to connect with a pressure boiler, and can be easily ed in the fire box at any time by simply removing the front fire box lining. Water nts and pressure boilers are used only where there is a supply furnished with con- nt pressure through pipes, which can only be obtained in towns or cities having ter works, or where you have an elevated water tank. A hot water front gives h an ample supply of water that you would only require a square range instead one with an extension reservoir. However, water fronts may be fitted in either le range. Where range is ordered from us with hot water front, it will in all es be fitted in the range before leaving our foundry unless otherwise ordered. make no charge for fitting water front in range if ordered with the range.

THE ASBESTOS LINING saves both fuel and repairs. Every part of our Superb Steel Range coming in contact with the fire or along the fire travel, is well protected by steel plates and asbestos millboard of extra thickness to prevent the fire from injuring the stove in any way. Every sheet of range steel in the body of the stove and around the back and sides of the oven is thus protected so that the entire heat from the fire is kept within the stove, which adds to its effectiveness and economy in the use of fuel. This asbestos protection extends also under the oven flue so that the heat units are kept within the stove and your floor is never endangered. The illustration shows the manner in which the asbestos is used in the range, the light colored section being the asbestos millboard, while the other parts are range sheet steel.

XTRA LARGE OVEN The average housewife frequently has need for the extreme capacity of her oven, and finds it a great nvenience and a big saving in time if her entire baking can be done at one time. r Superb oven is full size and is the largest which can be installed in the size ve ordered. The measurements we give are actual inside size and can be easily rified with the rule. The oven is made of one piece of heavy gauge sheet steel, sely riveted to prevent buckling. The bottom of the oven is securely braced by a vy cast iron backbone and cast iron oven protectors.

MPROVED FLUES We use in our Superb Range the improved sheet flue construction, which heats the oven at the back as well at the sides, and provides the most natural course for the draft. There are no lden reverses, and the heat is drawn rapidly around the oven. The base of the ck flue is cast iron, which makes it practically indestructible. The flues are all oroughly insulated with heavy asbestos millboard covered by heavy plates of range el, making all parts triple walled, and retaining in the oven every unit of heat oduced by the fire. Because of the superiority of the flue construction, the oven every Superb Steel Range gives the most perfect and most economical baking sults. It is square, the oven doors are perfectly balanced and the door handles fficiently heavy to insure that the doors will remain tightly closed.

UPLEX GRATES Every Superb nge is equipped with a heavy duplex ate, which makes your stove equally serviceable for burning either hard soft coal or wood and can be easily quickly removed. One movement of crank cuts out all the dead ashes d cinders and drops them into the pan. When reversed, the duplex ate forms a perfect wood fire bottom, making the fire box shallower, ich is desirable when burning wood. removing the end linings and reing the grate, a perfect wood fire x is formed.



Wood Grate — Coal Grate

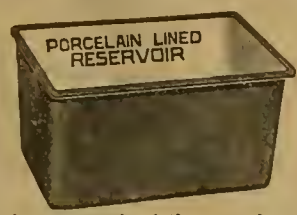
ND DOOR allows ready access to the fire and is ge enough to remove the clinkers, ich may not have passed through the grate, by ordinary shaking process. The end or saves taking off the top lid and prevents the escape of gases into the room.

DAL FEED POUCH AND POKER DOOR Our Superb Steel Range has a commodious coal d pouch, which permits feeding the fire without removing the lid and is a great nvenience where soft coal is used, because no smoke or coal fumes will escape into kitchen. Below the coal pouch is the poker door, which when open exposes the ire surface of the fire and permits the use of the poker without disturbing the lids.

A TOWEL ROD extends from front of stove to extreme back edge of reservoir, is full polished and nickel plated; is made of heavy steel tubing and has ball ends. Brackets extend out from the stove far enough to give sufficient clearance to keep the linen from coming in direct contact with any part of the store. May be removed instantly. A great convenience.

THE FIRE BOX is made of heavy cast iron with curved ends and is carefully proportioned with a view to producing the quickest heat from the smallest possible quantity of fuel. It is so arranged that hard or soft coal or wood may be used as desired and equally good results obtained. By turning the duplex grate you will have a solid level bottom for wood burning, and by removing the other linings you have a wood burning fire box. The duplex grate and loose lining provides the most simple and efficient method ever designed for instantly changing a perfect coal burning fire box into a perfect wood burning fire box with extension ends for the reception of long sticks of wood.

MAIN TOP, COVERS AND CENTERS are made of the best cast stove plates. These plates are interchangeable with allowance for contraction and expansion, which prevents warping and cracking. The surfaces exposed to the fire box are ribbed, making them strong and more durable.



RESERVOIR Our Superb Range is equipped with a cast iron reservoir tank, white enameled on the inside over cast casing and is heated by means of flues, conducting the heat directly to the bottom and around the sides of the tank. The front end is handsomely embellished with an attractive nickel frame and cover is black japanned and beautifully striped. Many of the steel ranges of today are equipped with reservoir casing of the same steel as is used in the bottom of the range and lined with asbestos. When the water in the inner reservoir of the range becomes heated a sweating process results and dampness between the asbestos and reservoir plates quickly rusts out these steel plates. It is for this reason that we equip our Superb Steel Range with cast reservoir casing which will endure as long as the range is in use.

GRADUATED NEST COVER Our Superb Steel Range is fitted with five solid covers and one nest cover, or graduated lid, as shown in the illustration. This is a very convenient little device, as the varying sizes of the openings in the cover will be found extremely useful. It consists of a series of reducing rings so interlocked that either the entire cover or a single section or more may be removed and a hole provided to fit any vessel from an ordinary tin cup to a vessel the size of cover.

OVEN THERMOMETER The oven thermometer is one of the greatest conveniences ever brought to the aid of the housewife. It measures heat as accurately as the clock measures time or a steam gauge measures pressure. It indicates when the oven has reached the degree of heat desired, makes it practicable to maintain a uniform temperature and makes good baking easy for the most inexperienced; it does away with bad luck in baking, which is due to bad heating of the oven oftener than any other cause; it tells when to check the fire by showing when the oven has nearly reached the right heat. When the hand of the dial points to the degree of heat required for the work in hand, it is then in order to close the front damper of the range, thus shutting off the draft through the fire box so as to retain the strength of the heat in the oven, while at the same time preventing waste of fuel. All ranges and cook stoves vary somewhat in the time required for perfect roasting or baking, owing to the difference in size, but after a little time the thermometer will be found to be a reliable guide.

THE HIGH WARMING CLOSET of the Superb Range is of generous proportion with a balanced steel door, which lifts up and back into the closet without reducing the size of the warming space. The front of this warming closet is ornamented with beautiful silver nickeled top and bottom bands. Directly beneath the warming closet, and at exactly the right height from the main top, are two silver nickeled teapot holders, which may be instantly brought into position for holding a teapot or other cooking utensils. In the smoke flue which passes from the main top up through the warming closet, is a large tastefully designed silver nickeled check draft.

OUR METHOD OF SELLING direct to the consumer from the manufacturer adding to the factory cost but one small margin of profit, enables us to sell you this handsome blue steel range at the astonishingly low price we quote and yet give you a stove the equal in every respect of the widely advertised brands and makes for which you have been in the habit of paying from $50.00 to $75.00. By comparing this stove with the best grade ranges being sold by dealers, you will find that our statements are borne out by the stove itself and we are willing to set it side by side with any range that you can buy at home or elsewhere for from $25.00 to $35.00 more than we ask and abide by your judgment as to the merits of the two stoves.

THIS IS ONE OF THE FINEST steel ranges catalogued by us in these pages and it is by far the best steel range on legs offered by any manufacturer or dealer.

WE WISH YOU COULD SEE this fine six-ho steel range on legs. We wish that we could show y every detail of its construction, and if we could do th if we could explain to you, with the range itself bef you, the many points of superiority which place th steel range in a class by itself, we are very sure th you would be perfectly willing to pay the price we a for it, even though it be slightly higher than the pri asked by us for other steel and cast ranges shown this catalog.

IF YOU ARE THINKING OF BUYIN a steel range we know that we may be placed at a ve great disadvantage, we know that it is not possible f you to see and examine our ranges and stoves, and that picture and our printed description is the only method have of conveying to you any understanding of what have to offer you. We know also that your local dealer ma be perfectly willing to sell you a steel range on time, he may ev offer to set the range up in your home, and we know that against our picture you may see the article itself in the loc dealer's store. He may tell you that you may take your own tim to pay for it, whereas our business is transacted strictly for cas He will be able to tell you all about the good qualities of his st range as you talk to him in his place of business, but we have th satisfaction, he must also tell you the price of his steel range a in every case, quality for quality, his price must be from one-thi to one-half more than our price and in some cases double t price we ask.

CAN YOU AFFORD TO PAY any dealer at home elsewhere the great increased price simply for the privilege of taking a few month time in which to pay it? Can you afford to pay the sum of $15.0 or more for the privilege of looking at the local dealer's range Can you afford to pay $15.00 or more for the privilege of payi for the steel range in partial pa ments? If you can, of course y will not send us your order; and you are unwilli to pay cash cannot supply yo wants. you are willing send you order to with the unde standing th the range we w ship you on yo order will be exactly as rep sented and entirely satisfa tory or we w refund you money, of cour we do not expe your order. B if you want t highest grad steel range ma in this style, you want a bi strong, massive, up to da steel range, one that will last a lif time and yet is sold at a saving you of $15.00 or more, then by all mea read the detailed description of this st range as given on the opposite page. It how this steel range is made in one of t largest steel range foundries in the wor —let us tell you the story of its manufacture that you will understand why it is the best st range of this pattern and why you can well affo to send us your order for it if you want t greatest value for your money.

THE ILLUSTRATION can give you on a faint idea of t splendid qualities of every piece of material whi enters into its construction. The picture fail give you any idea of the large oven, superior grate construction, the ex large capacity enameled reservoir, t absolute fire control, the scientifically c structed flues. We want you to read next page for full details. Neither c the picture tell you how economical it is the consumption of fuel. Pictures lo very much alike. On paper one st range may look as well as another, judgi solely from the illustrations, and, inde some manufacturers and dealers find easier to make fine steel ranges on pap than in the foundry itself. In selecting the ranges and stoves catalogued in these pages we made our selections from number of offerings from high grade, dependable manufacturers, and we can say to you that there is not a range shown in this book that w do not guarantee. Some of them are sold at extremely low prices and in some cases we tell you that we would advise you to spend a fe dollars additional and purchase a higher grade range or sto recommended by us, or whether you purchase the low priced stove, in any case you will get greater value for your money than you can p sibly get by spending an equal sum with any other firm or individual at home or elsewhere.

WHY YOU SHOULD PURCHASE THE PEARL STEEL RANGE

DON'T LET OUR LOW PRICES lead you to believe that the ranges we offer are not of the highest grade. Remember when we quote you a price from one-third to one-half lower than is quoted by a retail dealer is simply means that because of more economical methods of merchandising we are underselling all competition. From the factory to the merican home direct is our short cut method of merchandising, and while our policy of selling at a mere cost of material and labor in high ass, economically administered manufacturing establishments, with just one small margin of profit added, means that no wholesaler, no bber, no general agent, no traveling salesman, has made a penny of profit in the transaction, these new selling methods are representative of ie highest commercial development of the age and bring to you more of the necessities and many of the luxuries of life which would otherwise e denied you. Our low prices on steel ranges, as well as on other high class merchandise, as catalogued in these pages, are but the tangible idence of our price saving ability. To prove to you that quality for quality, we undersell all competition at home and elsewhere, we solicit our order for this Pearl Steel Range with the understanding and agreement that you may use it thirty days in your own home, that you ay try it in your own home, that you may try it in your own way, that you may compare it with ranges owned by neighbors and friends or ffered you by other dealers, and, if at the end of thirty days you find that the comparison is not wholly in our favor, and that you can uplicate this steel range even at from $10.00 to $15.00 more money, then return the range to us at our expense and we will refund the purchase rice in full together with the transportation charges paid by you.

O EFFORT OR EXPENSE has been spared in the development of this, our six-hole Pearl Steel Range, set up from e floor. The best experts in one of the largest foundries in the world developed and rfected this steel range, and while we are well aware of the fact that it is possible purchase a certain kind of steel range on legs for less money, and while at e price we ask many may feel that they cannot afford to purchase it, nevertheless very large percentage of our customers, realizing that the purchase of a range eans an investment in a necessary household article which should last a lifetime, e willing to pay a little bit more than the prices asked for lower priced nges and get the benefit of the very latest ideas in range construction, the very st 1911 designing, special features not to be found on the ranges and stoves fered by any other firm or dealer at home or elsewhere. Though we have spared ither effort nor expense in the perfecting of this high grade range, it is sold at price which represents but the mere cost of materials and labor in one of the rgest and most economically managed foundries in the world.

THE BIG RESERVOIR TANK is made of the very best stove plate castings, fully enameled with best porcelain lining. The reservoir casing is made of the highest grade gray iron and will not rust or burn out. A slight turn of the damper throws the heat under the reservoir tank, heating the water boiling hot. The top of the reservoir is flush with main top of range and hinged covers are beautifully japanned and striped. The roomy high warming closet has roll front door. It is just the right height from the main top, so that it is easily reached by a person of average height.

HE ORNAMENTATION of this range is very attractive. Like all high grade articles it is rather plain in sign. Whether you wish to buy a range, a piece of furniture or some her article for your home, you will observe that the articles of the highest ality, the best materials and the most careful workmanship are generally e from "gingerbread" and elaborate details. Intricate carvings may ver defects in material and workmanship, while the plain finish exposes y imperfections either in material or workmanship. The plain surfaces of is steel range are beautifully finished, however, the silver nickeling being pecially brilliant. The nickeled parts are the edge of main top, the oven or frame, oven door panel and handle, fire door, ash door, clean out door, gh closet brackets, closet bands and corners, pipe check draft panel, lea- t stands, door handle, ornament and back guard corners.

Don't ink of ordering a steel range at home or elsewhere until you have first taken vantage of this liberal offer.

' YOU BUY this everlasting steel range, one that will give you good service for a lifetime, it will save its cost in the amount of fuel consumed by as compared with any other steel range of this pattern that we know of, and we ve examined very carefully the best ranges offered by the best founders in this untry; and, though the price we ask for it is higher than the prices of many other eel ranges shown in this catalog, our margin of profit is exactly the same in every se, the additional price asked being the additional cost of the higher grade ma- rials used in its construction, the labor employed and the great care and skill used every detail. You will make no mistake if you order this, our Pearl Steel Range, der the liberal trial terms as described above, remembering that we guarantee this oge to be absolutely the highest grade steel range on legs produced and one that ll prove entirely satisfactory to you under all conditions.

THE RICHNESS OF ITS APPEARANCE the beautiful base, the perfect fitting and careful mounting, its symmetry and grace make it impressive and one of the most appealing of all steel ranges. The fire box, oven and flues are correctly proportioned with all the features of convenience, dudability and economy.

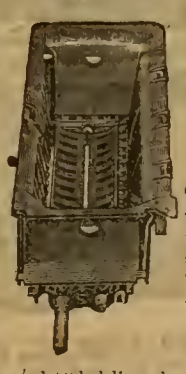
THE BODY is made of handsome blued hard rolled steel of an extra heavy gauge. It is tightly and strongly riveted with wrought rivets and protected at all exposed parts by asbestos and the best grade of steel plate lining.

MAIN TOP, COVERS, CENTERS AND ANCHOR PLATES These are the vital parts of a range that really do most of the work and are exposed to the direct action of the fire. These parts of the Pearl Steel Range are the very best grade of stove plate castings in special pattern designed by our foundry and are guaranteed not to warp, crack or otherwise get out of true. Only the highest grade selected gray iron is used in making these stove plate castings, and they will be found to be far more serviceable than the malleable iron tops and centers used by many steel range builders. Each Pearl Steel Range is furnished with one graduated or nest cover as shown.

THE LARGE OVEN of this big six-hole steel range on legs will delight any housekeeper. There are no better built ovens than we use in this high grade steel range. It is fully aluminized, quickly heated, and top and bottom are so well protected and braced that warping and buckling are impossible. We use in the construction of this oven an improved sheet flue which insures quick and even baking. This oven is absolutely square and airtight. The drop oven door is counterbalanced, is beautifully silver nickel trimmed.

A DUPLEX ANTI-CLINKER GRATE is fitted in every Pearl Steel Range, the same high grade dependable grate used in all our highest grade steel ranges. This grate will burn any kind of fuel, either hard or soft coal, coke, wood, chips, corn cobs or any other material commonly used for fuel. It is made in two sections and a slight turn of the shaker cuts out all the dead coals and clinkers, dropping them into the ash pan below without disturbing the live fire. For wood burning this grate is inverted, giving a flat fire box bottom, wood requiring less air for perfect combustion than coal. The ash pit is directly beneath the fire box and it is equipped with extra large bailed ash pan. The ash pit door is perfectly fitted, securely mounted and beautifully silver nickeled.

THIS RANGE is equipped with combination coal feed pouch and broiler door at left end in all its various sizes and styles. This is the same dependable and satisfactory combination door used on our high grade steel ranges and through it the fire may be replenished without disturbing cooking utensils in use on the main top, or steaks and chops may be broiled over the hot coals within, the fumes passing up the smoke flue instead of filling the kitchen with their odors. The draft or poker door below the broiler door is unusually large, and because of the disposition of draft openings, gives a uniform supply of air to all parts of the fire box and insures perfect combustion of the fuel.



THE FIRE BOX is of special construction. It is of unusual proportions and is guaranteed to be most economical and durable. In designing, great care has been given to the construction of this portion of this high grade steel range, because upon this section of the range depends its economy in operation, the baking qualities of the oven and, in fact, the very life of the range itself. The linings are extra heavy and thoroughly ventilated. It has fire bix extension for wood, so that when end linings are removed an extra long stick of wood may be used. The fire back is made in three pieces and may be instantly removed.

We sell the Pearl Steel Range on legs in six sizes. Price is for range securely crated and delivered on board the cars in Southern Wisconsin.

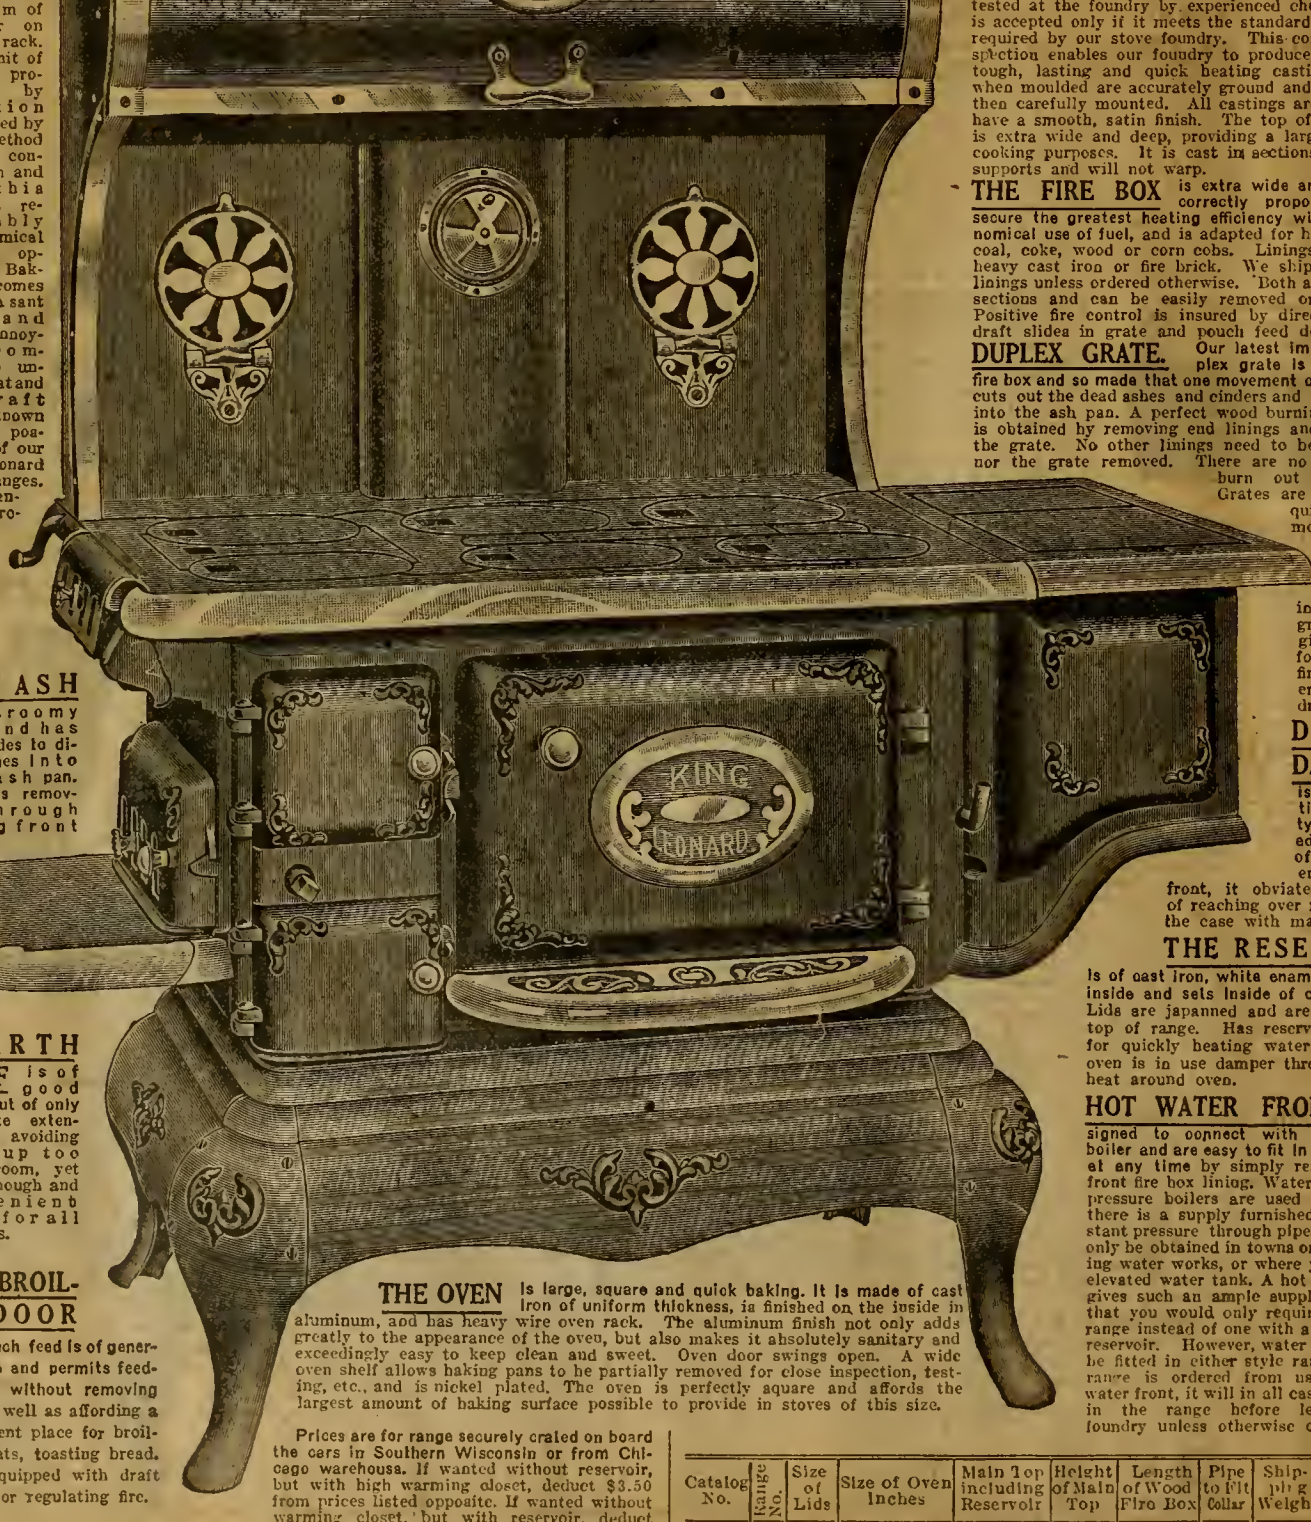
KING LEONARD CAST RANGE $26.35 AND UP

THIS BEAUTIFUL NEW COLONIAL CAST RANGE is a strikingly attractive stove, gives the impression of elegance, and while very plain in design, has enough ornamentation to skillfully evade the "too plain" class. This is a new addition to our stove department and will satisfactorily meet the present day demand for a plain Colonial stove, one which is free from the elaborate ornamentation, which permits dirt and dust to collect and which makes so much additional labor for the housewife to keep it clean and presentable.



FLUES throw uniform heat around the oven, preserving an equal temperature at top and bottom and makes even baking possible whether pans are on bottom of oven or on oven rack. Every unit of heat produced by combustion is utilized by this method of flue construction and makes this a remarkably economical one to operate. Baking becomes a pleasant task and those annoyances common to uneven heat and poor draft are unknown to the possessor of our King Leonard Cast Ranges. Flue clean-out is provided.

THE ASH PIT is roomy and has ash guides to direct ashes into boiled ash pan, which is removable through swinging front door.

HEARTH SHELF is of good width but of only moderate extension, avoiding taking up too much room, yet large enough and convenient enough for all purposes.

THE BROILER DOOR and pouch feed is of generous size and permits feeding fire without removing lids, as well as affording a convenient place for broiling meats, toasting bread. It is equipped with draft slides for regulating fire.

CONSTRUCTION. This stove is as careful built and as closely i spected as a delicate piece of machinery, and eve one going out to our customers is perfect in eve respect and ready to set up in your kitchen. N old material or scrap iron is used in making th castings for this stove — only new iron goes int its construction and that the very best which ca be bought. Every carload of raw material tested at the foundry by experienced chemists an is accepted only if it meets the standard of qualit required by our stove foundry. This continual in spection enables our foundry to produce uniform tough, lasting and quick heating castings whic when moulded are accurately ground and fitted an then carefully mounted. All castings are gray an have a smooth, satin finish. The top of the rang is extra wide and deep, providing a large area fo cooking purposes. It is cast in sections, has ca supports and will not warp.

THE FIRE BOX is extra wide and deep, correctly proportioned secure the greatest heating efficiency with an ec nomical use of fuel, and is adapted for hard or so coal, coke, wood or corn cobs. Linings are extr heavy cast iron or fire brick. We ship fire bric linings unless ordered otherwise. Both are made i sections and can be easily removed or replaced Positive fire control is insured by direct dampe draft slides in grate and pouch feed doors.

DUPLEX GRATE. Our latest improved Du plex grate is fitted int fire box and so made that one movement of the oran cuts out the dead ashes and cinders and drops the into the ash pan. A perfect wood burning fire bo is obtained by removing end linings and reversin the grate. No other linings need to be disturbe nor the grate removed. There are no frames t burn out or war Grates are easily an quickly r moved. En doo swin ope expos ing entir grate fro giving acce for slicing th fire with po er and ha draft slide

DIREC DAMPE is of the ve tical plung type, is remo ed from rea of flames. O erated fro front, it obviates necessi of reaching over range, as the case with many stove

THE RESERVOI is of cast iron, white enameled on th inside and sets inside of cast cesin Lids are japanned and are flush wit top of range. Has reservoir damp for quickly heating water and whe oven is in use damper throws all th heat around oven.

HOT WATER FRONTS ar de signed to connect with a pressu boiler and are easy to fit in the fire bo at any time by simply removing th front fire box lining. Water fronts ar pressure boilers are used only whe there is a supply furnished with co stant pressure through pipes, which c only be obtained in towns or cities ha ing water works, or where you have elevated water tank. A hot water fro gives such an ample supply of wat that you would only require a squa range instead of one with an extensi reservoir. However, water fronts ma be fitted in either style range. Whe range is ordered from us with b water front, it will in all cases be fitt in the range before leaving ou foundry unless otherwise ordered.

THE OVEN is large, square and quick baking. It is made of cast iron of uniform thickness, is finished on the inside in aluminum, and has heavy wire oven rack. The aluminum finish not only adds greatly to the appearance of the oven, but also makes it absolutely sanitary and exceedingly easy to keep clean and sweet. Oven door swings open. A wide oven shelf allows baking pans to be partially removed for close inspection, testing, etc., and is nickel plated. The oven is perfectly square and affords the largest amount of baking surface possible to provide in stoves of this size.

RELIANCE CAST COOK STOVE $8.45 And Up

We Furnish This Stove With or Without Galvanized Iron Reservoir.

THIS CAST COOK STOVE is a very desirable, neat and attractive pattern. Made of the best material and designed to meet the demand for a moderate priced stove having all the essential features of the higher priced ranges, but without the ornamentation and nickeling which adds so much to its cost. This stove is made to burn either hard or soft coal, coke, wood, corn cobs or trash, has dumping grate, deep hearth and bailed ash pan and is equipped with ponch feed.

THE BODY is made of heavy cast iron stove plate, is carefully fitted and will give exceptionally good cooking and baking service. The castings are all smooth without flaws of any kind and can be easily kept clean. The top of the stove is made of heavy cast iron, the centers and anchor plates are well braced. Stove has swinging front door with slide draft.

THE OVEN is of generous size. Made of heavy cast iron and is equipped with steel oven rack and outside oven shelf.

THE FIRE BOX is well proportioned and is lined with durable castings. The grate is of the shaking and dumping style, is extra heavy and will not warp. The stove is equipped with flue cleaning door, flues are of ample size and fire travel has sufficient clearance between the oven and the stove top to insure good draft, making the oven a rapid, even baker.

WE SHOW THIS STOVE without reservoir, but reservoir of galvanized iron can be furnished when so ordered. Reservoir is heated by contact with the body of the stove and will respond quickly to the action of the fire and is of generous size.

IF YOU WANT a good cooking and baking stove and do not care to invest $18.00 or $20.00, you will find our Reliance Four-Hole Cast Cook Stove just the kind of a stove you want; one which will look well in your kitchen, is compactly built, of neat pattern and has all the essential qualities of the higher priced stoves incorporated in its construction.

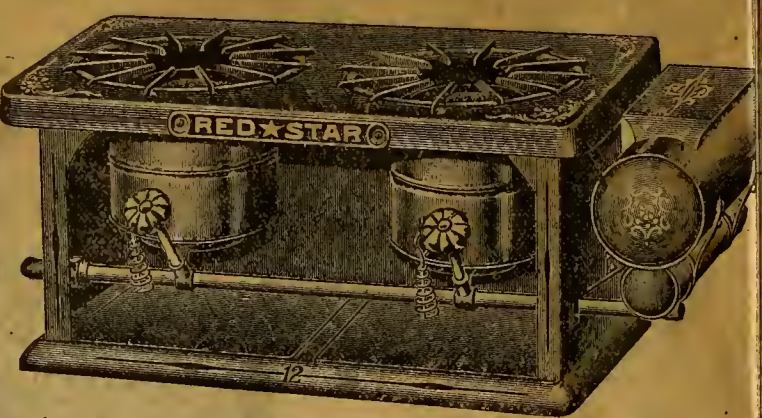
$2.94 THE RED STAR OIL-GAS STOVE

Just think of it. We are offering this Marvelous Money-Saver, Time-Saver, Temper-Saver, Dirt-Eliminator, with our guarantee of quality at the sensationally low price of only....$2.94



IF YOU'VE EXPERIENCED dissatisfaction with other Oil Stoves, we ask you not to judge the Red Star by your experience with those defective makes you've tried. The Red Star is as far superior to any other wickless oil stove now on the market as is the present day locomotive an improvement over the original Erickson model.

YOU CAN ORDER the Red Star with the certainty that you are going to get a stove that will not only burn perfectly, give the greatest possible amount of heat at the least possible fuel cost, but one that is guaranteed to give lasting service, guaranteed not to get out of order and guaranteed to burn satisfactorily always. When you realize what a great improvement this stove is over wood and coal stoves in summer, its advantage is almost too apparent to require mentioning. Consider what one of these stoves means to you—the advantage it offers—the money it will save. You really cannot afford to be without one. It does away with one of the most objectionable features of household work. Without bother or trouble it gives you heat without loss of a moment's time. No kindling, no wood, no coal to buy, no ashes, no coal dust, or soot to remove, no annoyance whatever.

The Red Star is an Ever-Ready Convenience That Saves Time and Money

IT IS FAR MORE NECESSARY to the household than anything else ever invented for household use. Three or four times a day this stove is put into service. Think of the effort, labor, health and temper used up on the ordinary stove. You know how unpleasant it is to start your fire in the old way. You know how annoying it is to have to arrange your kindling, paper or what-not in your stove, light it, bring in the fuel and then have to wait and fuss around while the stove is heating. Why should you burden yourself with these trying things when for only $2.94 you can get a RED STAR Oil-Gas Stove and have your fire almost waiting to be used; ready in a minute's time. All that is necessary is to light a match, turn on the gas—and presto!—you instantly have enough heat to cook an entire meal. And yet with all its special features, the RED STAR is economical.

12c Will Buy Enough Fuel for An Entire Week

IT'S ALMOST UNBELIEVABLE that for about $6.00 a year you can have almost an unlimited supply of heat to use for all purposes. But it is a fact. The Red Star Oil-Gas Stove is so constructed that it will practically burn air—and is there any cheaper fuel than air? It's improved burner mixes a supply of kerosene oil with a large amount of air and thus produces fuel out of almost nothing. And the cost—for only a few mills—not even as much as a penny—you can cook for hours. Less than a gallon of kerosene oil is sufficient to do all the cooking for an average family for a week. In addition to that, it will produce enough heat to do your ironing, baking and any other work for which the ordinary stove is used. The Red Star is so simple it requires not a second to operate it. You light it in the same way as you do a lamp or gas jet. Fill the reservoir with common kerosene oil. Turn the knob and the oil will flow into the burner bowl. By touching a lighted match to the oil the gas begins to generate and pass through the mixing chamber where it is mixed with air. In this way a very small amount of oil mixed with about a barrel of air produces an intense heat in the burner. You can regulate the supply of heat to suit your requirements by turning knob one way or another. And when your cooking is completed, you turn off the oil and the stove cools immediately. This is great on a summer day. With the coal or wood stove you do your cooking, and then have to wait until the stove cools before the house cools. This is avoided with the Red Star.

The Red Star is Guaranteed and Will Be Sent to You for Trial

WE KNOW THE RED STAR is the best, the most practical, the most satisfactory, and the most reliable Oil-Gas Stove yet invented. Therefore, we are willing to send it to any address to be used for 30 days and given a thorough testing. This offer means that all you have to do is send us $2.94, price of the two-burner Red Star. We will ship the stove to you securely crated. Y use it for thirty days for cooking, washing, baking, or for any other purpose: note h little oil it consumes; how easily it is operated; how safe it is; how convenient it is. Th if you are not pleased with it, return it to us and we will refund your money, toget with the transportation charges. This trial will not cost you one penny, if the Red S is not just as we recommend it and if you are not perfectly satisfied with its service.

This is the Way It Is Made

IT'S DESIGN is shown in the picture. While it looks large, it is neither bulky heavy. It's height is 14 inches and it's weight is medium; can placed upon a table, bench, shelf, or cabinet. Very convenient to handle and can placed in a corner or under a table out of sight. Size of top is 14x22 inches; has t grates, each 8 inches in diameter; burners are fitted into black japanned outer drums are 4 inches in diameter. This affords protection against sudden gusts of wind or su tions caused by opening or shutting of doors or windows. The drums also give aid in t work of producing gas and help to reduce the consumption of fuel to the lowest amount which means economy for you. The Cabinet frame of the Red Star is made in the m durable manner; is finished in black japan, with closed back and sides. It is neatly d signed with nickel plated name plate and nickel plated valve handles. Although the R Star is intended for practical use, at the same time it has an attractive appearance. Ev detail of it's construction is clean cut and perfect. You can see from illustration that is easy to clean and that every part is easy to get at. The Red Star has double reservoi brass finished. These connect with burners with aluminized pipe line and oil bowls fu aluminized. The upper kerosene reservoir may be removed and filled without interfering wi the stove. There is an asbestos kindler which will almost never wear out, being thoroug protected. We supply all the necessary attachments, such as are illustrated. One ca lifter goes with each Red Star Oil-Gas Stove. Weight of the two burner Red Star O Gas Stove is 30 pounds.

THIS IS OUR 3-BURNER RED STAR OIL-GAS STOVE

$4.10 IS THE PRICE

and considering the advantages it offers, its real worth cannot be estimated; has three burners, produces a strong blue flame, is wickless, gives no odor and is easily cleaned.

THIS IS THE THREE-BURNER

model of the Red Star described above. With the exception of being a trifle longer, it is of the same size, has the same construction and will give the same service. Of all the oil stoves on the market there is none that has the good features of the Red Star. The majority of the other makes burn a wick and consume oil almost as rapidly as the coal-stove or wood-stove consumes fuel. But the Red Star is different. It is the one perfect Oil-Gas Stove that we recommend. It has no wick to be trimmed, there's no danger of explosion, and it produces a strong, blue flame that gives intense heat. You can get an idea of the design and shape of the Red Star from the pictures shown on this page. This model is intended to meet the requirements of those who have a great deal of cooking to do at one time. But it is the same in every way as the one above, only larger by one burner but takes up practically no more room. The top size is 32x14 inches and it is 14 inches high. The Red Star is not to be compared with the defective and unsatisfactory oil stoves sold by many manufacturers and dealers. This stove is guaranteed to operate perfectly.

NOT A SKELETON STOVE but one with a full cabinet frame, open in front, with back and ends enclosed. We could have a skeleton frame made at a lower price, but experience has taught us that the most satisfactory and practical frame is the one we illustrate here. And the extra cost you have to pay is more than made up by the advantages the closed back and sides afford. They protect the burners from gusts of wind that might come through an open door or window and they give the stove a neater appearance.

COMPARE THE RED STAR with any other. We are willing to have you make a thorough comparison of the Red Star with any other make. We will send it to you for a 30-day trial. If your friend has a stove of another make or style, you may put the two together and see which consumes less oil, gives the stronger flame, looks better, which is the easiest to operate, and which is the safest and cheapest and best in every way. Nothing would please us more than to have this done. The result will be in favor of the Red Star every time. We know—for we are familiar with every make on the market. We know the so-called good ones and we know their weak points. And we say that the Red Star is superior to them Most of the other makes have skeleton frames, and that style has been discarded re because of its disadvantages.

A PERFECTLY SAFE STOVE The Red Star can be used by a child with much safety as a grown person. There's chance of an accident, no odor, nothing to affect your health, and nothing to soil th hands or clothing. In fact, none of the objections found with the skeleton type wick stove with their dirty, oily wick constantly to be cut and fitted and their ma other unpleasant features. The Red Star is a well tried stove, built to do what other kind has ever done or ever will do, so far as we can see. It is built not only make cooking a delight instead of a dreaded task, but also to reduce the cost of cook to the lowest possible figure. And it has proved its superiority over other stoves—prov it by rigid tests made by us, and by the test of actual service in the homes of thousan of farmers and city residents.

OWNERS LIKE THE RED STAR because it does everything a good Oil-G Stove should do and meets all the requi ments of any family; it does what you expect any stove to do—and what no other oil st has ever done. It cooks and supplies heat at the lowest cost for fuel, and without the le inconvenience or disappointment. With the Red Star, you are always sure of ha your meals on time; always sure of perfect running order; always sure of eco omy, clea liness and no odor. Shipping weight of the Red Star Oil-Gas Stove is 40 pounds.

HOW WE BUILD THE LAKEWOOD

This is a new model Bicycle which we are offering this year, built for us by the same firm which has been making our high-grade icycles for many years and it has been built according to our own specifications, to be offered as the very best wheel to be found nywhere at a reasonable price. As a matter of fact, we have been surprised ourselves at the wonderful value we are able to put in his bicycle to be sold at only $17.74, and we think that when you read the detailed description as given below, that you will agree ith us that it is in every way a high-grade, dependable wheel which is sure to give the rider absolute satisfaction. While we andle higher priced wheels and machines worth every penny we ask for them, remember that our higher priced wheels are given iore elegant finish and more expensive equipment. This does not necessarily mean that the higher priced wheels are better wheels, ome riders prefer certain styles of equipment as given on our higher priced wheels, and this equipment, in many instances, is applied by manufacturers who own exclusive patents, and therefore ask a price which makes it necessary for us to get a higher price or bicycles so equipped. From the standpoint of service and real intrinsic value, however, we think you will find the Lakewood the ery best wheel that you can buy, regardless of name, make, or price.

N CONSTRUCTING a machine of this type we have considered carefully every line of strain that comes on a bicycle built for rd use over rough roads, and have placed the extra bar at the top in the exact sition where it means most to the strength of the machine, and at the same me adds beauty to its appearance in every way.

UR BICYCLES have always been known as leaders in the bicycle world, both for heavy service on long distance cross country runs and r high grade track work. The best bicycle riders, either in the long distance ass or the high speed men, have ridden our wheels, and all are unanimous in eir praise of the high quality of the workmanship embodied in these models, eir easy running qualities, the correct design of the frame, and the adjustment of e parts which gives such easy control at all times.

O EFFORT OR EXPENSE has been spared in the making of our 1911 line of Bicycles better than any of r preceding models, and because of the extreme care that is exercised in every partment of the factory in which these wheels are constructed, because of the reful selection and rigid examination of every piece of raw material that enters to the makeup of Lakewood Bicycles, because of the high type of workmanship rned out by each of the thoroughly trained mechanics who have spent years of ne and no end of hard work in the perfecting of their methods in bicycle nstruction, and in securing the knowledge required to build a bicycle exactly ght in every detail, and because of the enormous amount of money that has en spent in the securing of the very latest and most accurate scientific mach- ery which, in the last analysis, is the climax of all effort toward the producing a perfect bicycle, with which the Lakewood factory is equipped complete and detail from one end to the other.

/E DO NOT HESITATE to make the broad and sweeping statement that our Lakewood, at the extremely low ice of only $17.74 each, which is all we ask for the completely equipped machine as illustrated on the preceding page, and described below, is the height of elegance, beauty and utility, and that it represents the very best of twentieth century thought and skill in bicycle construction at anywhere near this price.

ORDER THE LAKEWOOD Bicycle, as illustrated and described, use it in your own way, testing it thoroughly on all kinds of roads and under all conditions of weather; ride it in the country, on the pavement, or track; take it apart and note its simple and direct method of construction, examine the bearings and the parts thoroughly and carefully, and if from such a careful investigation you can offer one single criticism, or if you can discover one latent or mechanical defect in any feature of its construction, advise us at once and we will correct the difficulty without question and without cost to you. Or, if we are unable to correct any fault you may discover either in the material or workmanship, we especially urge that you ask us for shipping instructions on the machine and return same complete, upon receipt of which we will send a complete new bicycle if you desire, or refund every cent you have paid on the order.

WE WOULD LIKE YOU to be the judge in the matter of deciding whether our Lakewood at the very reasonable price of only $17.74 complete, is not better actual value than any other bicycle of similar type or design that you have seen or investigated, offered at prices even much higher than we ask. We are so confident that you will agree with us in saying that this high grade model is the best bicycle value on the market, after you have had an opportunity to examine it carefully and test it thoroughly in every way, that we do not hesitate to guarantee satisfaction in every detail of its construction and to leave the decision in the matter to your own good judgment.

HE HUB Our new spindle shape drop forged Hubs, are distinctly fferent from hubs used on any other cycle. The body is made from steel drop rgings turned to shape, while the cups e turned from solid tool steel bar ock, carefully tempered and then se- rely placed in the hub body, thus mak- g the body and cups in two distinct rts. It is impossible to construct a ib of one piece and get the body with e right degree of toughness and resil- ncy, and at the same time have it fficiently hard in the cups for the balls. hile most manufacturers furnish a one- ece hub, yet it is impossible to tem- r the cup portion without overtemp- ing the flanges, so that the spokes w l eak out under sudden strain. Our hub nstruction is far superior to the old ethod. To construct a hub such as e use in our Lakewood is far more ex- nsive than any other hub, but we ve determined that our Lakewood shall the best equipped bicycle ever placed the market.

THE TIRES The tire equipment of our new Lakewood is far superior to any other tire which we have before furnished with our bicycles. In our Lakewood Tire we especially feel that we are giving you greater value than ever before. This tire with its greatly improved practically puncture proof, self healing qualities is considerably more expensive, and a more popular tire than furnished heretofore. You will note by the illustration that we show an extra long genuine Schrader valve. This is the only perfect valve made. This valve goes entirely through the valve stem and into the tire proper. This special construction will save you many torn valve stems, as it really means an all metal reinforced stem. This Schrader valve is made entirely of brass and can be very easily adjusted by means of the cap.

THE PEDALS Our Lakewood Reduced Center Pedals, are especially designed and constructed to match our new spindle shape drop forged hub construction. We have never cheapened the quality of our equipment, although we have from time to time, steadily reduced our prices, until to-day in all features of construction and equipment quality has been our first consideration, price second. This policy has been carried out even to the pedal equipment, an article so many times cheapened in desire for additional profit. Note the beautiful lines and strength of the new Lakewood pedal. Observe the large balls fitted with retainers, so that in the event of taking the pedal apart to clean it the balls do not fall out and become lost as in other pedals. For your own satisfaction examine other pedals and see how many contain ball retainers, pedals which are as strong and durable as our new reduced center Lakewood pedal.

TOOL BAG Of fine selected oil tanned grain leather, reinforced embossed tool bag and equipment, is furnished with our Lakewood. The equipment consists of a quick action brass hand pump with reinforced leather connections, fine drop forged steel adjustable hand bicycle wrench, an extra fine quality all brass bicycle oiler, a stick of bicycle chain graphite. This bag is especially constructed, with both ends doubly reinforced with fiber, so that it will always maintain its shape. It is constructed of extra fine grain leather beautifully embossed, so that it presents an unusually fine appearance, and is not one of those cheap, trashy split leather bags furnished by many dealers. Every article of equipment in this tool bag has been specially purchased by us with a view to furnishing it only with our Lakewood Bicycle.

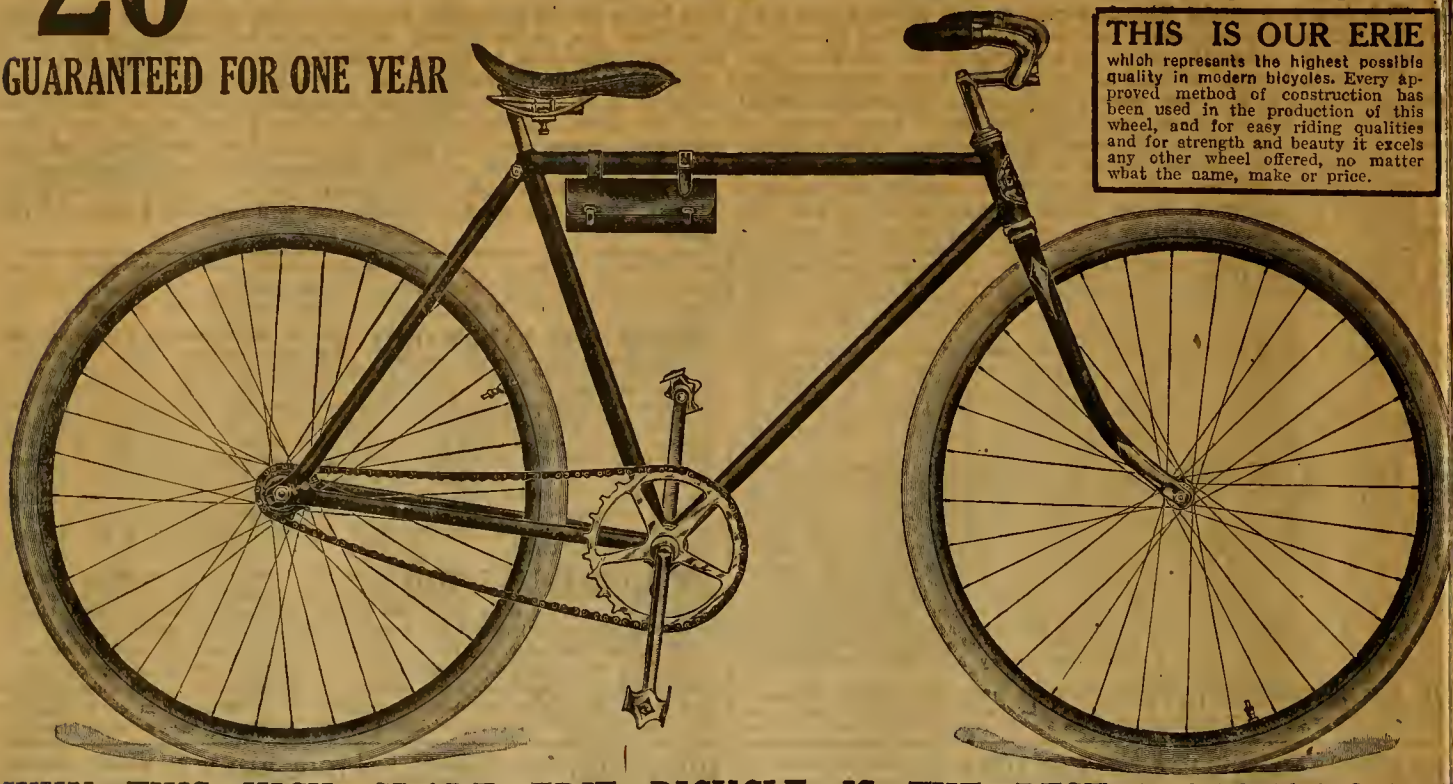
which represents the highest possible quality in modern bicycles. Every approved method of construction has been used in the production of this wheel, and for easy riding qualities and for strength and beauty it excels any other wheel offered, no matter what the name, make or price.



WHY THIS HIGH GRADE ERIE BICYCLE IS THE BEST BICYCLE TO BU

WHILE WE REALIZE that there are many bicycles now on the market offered at a lower price than we ask for the Erie, sold at $20.74, and while we realize that the manufacturers of these bicycles claim them to be the very highest grade made, we are perfectly willing to leave the decision to you as to whether or not the wheels offered at a lower price than we ask for the Erie are not in almost every detail inferior to this our highest grade bicycle.

TO ENABLE YOU to determine our claims for this highest grade bicycle, and the claims advanced by others for wheels which they offer at a lower price, with the claim that they are the very highest grade made, and that no other manufacturer can equal them or surpass them, we ask you to compare the detailed specifications of the Erie as given below, with the detailed specifications of the bicycles offered by others, and which they claim to be the best it is possible to produce. If you will compare this Erie Bicycle with the bicycles offered by others, you will discover that in almost every respect our wheel excels all others.

IN THE FIRST PLACE the Erie has always been known as one of the very best bicycles it is possible to buy. It has achieved this reputation by years of performance on the track and on the road. The Erie is known wherever the bicycle is known, and throughout all the years of its manufacture it has been steadily and materially improved until to-day it represents all that is best in bicycle construction and all that is new for the season of 1911.

WE SELL IT TO YOU under our guarantee of satisfaction or your money back. When it reaches you, note its graceful outline, its racy appearance; its great strength; its perfect workmanship and splendid style. Note all the special features embodied in this our new 1911 Erie, and if you are not then satisfied with the wheel we have sent you, if you are not convinced that we have sent you a better wheel than you can obtain anywhere else at any price, send it back to us and we will refund the purchase price in full and pay the transportation charges both ways.

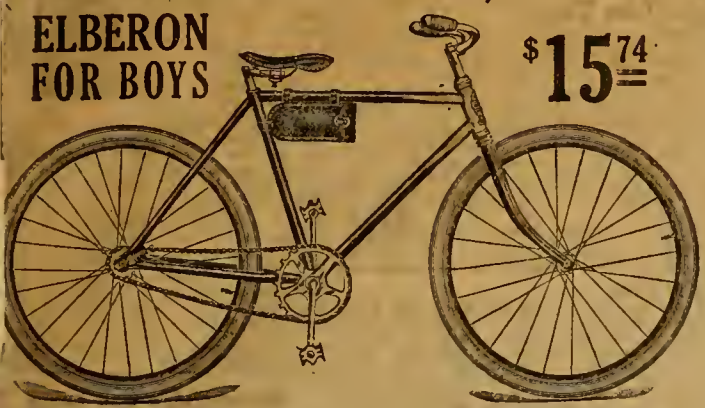
ELBERON FOR BOYS

$15.74



The material used in the Elberon Bicycle is selected with great care and nothing but the highest quality cold drawn seamless tubing steel is used. All cups and cones on which the ball bearings revolve are turned out of best grade solid tool steel, oil-hardened and will be used for years without showing wear. All the drop forgings, the points of the frame, the lugs upon which the front and rear axle rests, are made of the best steel by the best known process and are very durable. You can buy wheels for less money—some wheels one even—but no bicycle so full of merit and superior in every way, has ever been offered for so small a price.

DETAILS OF CONSTRUCTION

THE FRAME. Seamless tubing of one inch diameter, 20 gauge is used in the main frame which is reinforced, pinned, wired, filed and brazed at the connections, assuring an absolutely unbreakable smooth flush joint. Every frame is trued in a jig, perfectly aligned and thoroughly inspected.

THE FORKS. Elberon forks are of graceful proportions and warranted to stand the extensive jolts to which this part of a bicycle is subject. The crown is an improved deep forged construction and firmly affixed to the fork sides. The rear forks are oval shaped and reinforced, and braced with cross bridge.

THE WHEELS. The hubs of the Elberon are the drop center or concave style, which, together with the concave Atherton Coaster Brake, adds greatly to the appearance of the cycle. The bearings are machined from solid stock, and the cones and cups are carefully hardened. The rims are made from selected wood, and will hold their shape under most trying conditions. The spokes are made from piano wire of great tensile strength. Double swaged, nickeled over copper, and machine polished.

THE HANGER. The Elberon hanger, being of the one piece type, is very strong and practical. It is only necessary to unscrew the lock nut and cone, remove the cup from the left side and the crank and axle can be easily drawn out from the right. The adjustment is positive and the cranks cannot work loose.

THE SPROCKETS are of a special design, accurately milled, and are secured by a lug on the crank forging.

THE FINISH. The Elberon finish has always been of high order and both the nickel plating and enameling are put on to stand the varying conditions of climate. The frames and forks are enameled a deep black color, not conspicuous but refined in appearance, and the head is a bright red with "fish tail" of V-shaped design extending five inches along the main tubes of the bicycle. The dark black combined with red head makes a most attractive appearance.

SADDLE. Made of best quality leather and well padded.

PEDALS. Bennet rat trap.

HANDLE BARS. Regular, adjustable.

TIRES. Oxford single tube guaranteed tires, of exceptionally good quality.

TOOL BAG. With wrench and oil can.

Our line of Juvenile Bicycles for this year is the best and most complete in every way that we have ever offered our customers. The frames are substantially built to withstand hard usage, and the crank construction makes them easy running, so that the little folks can obtain plenty of good, healthful exercise without wearing themselves completely out. To ascertain the most desirable model for a child, secure the inside leg measurement to the extended ball of the foot. Then add to the height of the frame the length of the crank, and allow two inches for saddle. This will give the proper height frame to order.

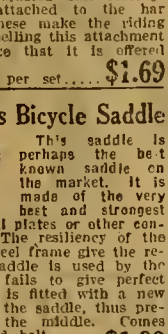
Acme Spring Fork

For more comfort and safety in bicycle riding, and as an efficient means of overcoming the jolts and jars of city pavements and rough country roads, this spring fork easily stands ahead of all similar contrivances on the market; is simple in construction, strong and thoroughly practical. All parts finished in extra heavy triple nickel plate, giving a neat appearance, and making it suitable for a bicycle of any finish. It is made to fit any style of bicycle, and can be attached easily and quickly, without disturbing any of the front bearings. The device consists of two short arms, to one end of which the wheel is attached and to the center of which the fork is fastened. The other ends are connected by the long rods to the stiff spring at the head of the bicycle. All unevenness of the road is taken up by the powerful spring, and there is very little, if any jar felt in the frame of the bicycle. Five lengths of rods are furnished: 19½, 21½, 22½, 23½ and 24½. Any other length can be made to order. Springs are light, medium or heavy, adapted to the weight of the rider. State length of rod and kind of spring wanted when ordering. **$3.12**

38B43401 Price each $3.12

Majestic Ball Bearing Spring Fork



This device entirely overcomes the annoying jounce and jar experienced in riding on rough ground or pavement. It is easily attached to any make of wheel, and weighs but 16 ounces. The springs are of fine steel and all parts are polished, plated and buffed. You will be astonished at the difference this little device will make in the comfort of bicycling, the roughest pavement feels like asphalt. There are two finely adjusted ball bearings where the forks are attached to the bar of the Majestic, and these make the riding still smoother. We are selling this attachment at the very lowest price that it is offered for anywhere.

New Oxford Single Tube Tires

The serviceability of a bicycle is the serviceability of its tires; no more and no less. If the tires are poor, and you have no confidence in them, then you have no confidence in the bicycle. Our new Oxford tires enjoy a great measure of confidence and popularity. This popularity and great demand for them is due no doubt to the realization of their splendid value and wearing qualities. The same care is exercised in the construction, the choosing of material and finish of these tires, as in the making of many higher priced tires. The heavy pure rubber inner tube is strengthened by two layers of the finest woven Sea Island cotton, carefully built up by hand, and covered with a very heavy outer coat of fine wearing rubber. The tread is extra heavy and ribbed to give the maximum traction qualities, and making it positively non-skidding. The hand-building method of tire construction, combined with a careful selection of good materials makes a tire that has great strength, resiliency, wearing qualities and air holding properities. The new Oxford is the best tire on the market that can be obtained for this price. It is no doubt as good as many tires sold elsewhere at even a third more.

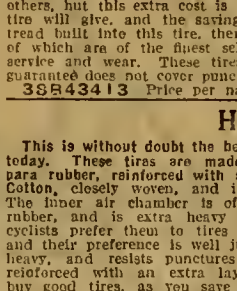
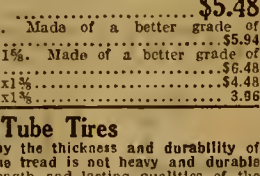
Dreadnought Tires



The Dreadnought is known as the one best single tube tire. It is reliable, long wearing and will give the best satisfaction. One of the strongest points in a tire is its "traction" qualities. Special attention has been given this feature in the construction of the Dreadnought. The tread is of a peculiar construction, having raised ribs running both the long way and diagonally across the tire. The ribs that run the long way prevent the skidding of the tire, and the diagonal ribs are so arranged to give a positive hold on the ground. This extra tread has also been intended to strengthen the wearing face of the tire, and being made of heavy materials and the best rubber, has given the tire additional puncture-resisting qualities. Owing to the superior grades of materials used in the construction of this tire, and the great care which is exercised in its manufacture, this tire costs a little more than many others, but this extra cost is insignificant when compared to the extra wear and service this tire will give, and the saving it will effect you in repair bills. In addition to the extra tread built into this tire, there are six layers of heavy material used in its construction, all of which are of the finest selected materials, and put together to give the greatest possible service and wear. These tires are guaranteed for three months from date of sale, but the guarantee does not cover punctures, or injuries caused by misuse or neglect. **$4.96**

38B43413 Price per pair $4.96

Hartford Single Tube Tires



This is without doubt the best known tire on the market today. These tires are made of several layers of pure para rubber, reinforced with several layers of Sea Island Cotton, closely woven, and interwoven with the rubber. The inner air chamber is of the very finest pure para rubber, and is extra heavy and well protected. Many cyclists prefer them to tires costing a great deal more, and their preference is well justified. The tread is extra heavy, and resists punctures to a great extent, being reinforced with an extra layer of rubber. It pays to buy good tires, as you save the difference in cost very quickly in repair bills. These tires are sold with our guarantee for three months from date of sale, but this guarantee does not cover punctures, or injuries caused by misuse or neglect.

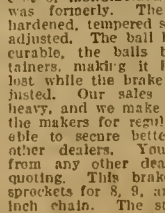
Gibraltar Thick Tread Single Tube Tires



The life of a tire is determined by the thickness and durability of the tread, or face of the tire. If the tread is not heavy and durable the tire is valueless. The great strength and lasting qualities of the Gibraltar tires are due to the raised tread and extra layers of fabric which are added, in addition to the perfectly pure Para Rubber air chamber. These tires are built to stand the severest strain to which a good tire can be put, and they stand it because the extra weight and thickness are put just where it is needed, in the tread, or face of the tire. The puncture resisting qualities, the fine appearance, the all round capacity for taking hard usage, are all features that go toward making this tire one of the most popular on the market. We can recommend this tire to anyone desiring a good all round tire that will give good wear and service, and at a very moderate price. Gibraltar Thick Tread, Single Tube Tires, 28x1⅜, 1½ or 1⅝ inches. **$4.24**

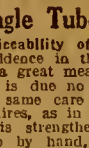
COASTER BRAKES

The Atherton Coaster Brake

The Atherton is one of the most satisfactory and successful coaster brakes on the market. The materials selected are of the very best, the workmanship and finish perfect. This brake is not complicated, and can be taken apart and assembled by any intelligent person. The use of all small delicate parts has been eliminated, leaving nothing to get broken or out of order. This has in a great measure increased the strength and durability of the brake, at the same time making the cost of manufacture considerably less than it was formerly. The cones are of the best hardened, tempered steel, carefully ground and adjusted. The ball bearings are the best procurable, the balls being held in patent retainers, making it impossible for any to get lost while the brake is being cleaned or adjusted. Our sales on this model are very heavy, and we make special arrangements with the makers for regular supplies, and are thus able to secure better prices than nearly all other dealers. You cannot buy this brake from any other dealer at the price we are quoting. This brake can be furnished with sprockets for 8, 9, and 10 teeth, and for 3/16 inch chain. The standard hubs are drilled for 28, 32 or 36 spokes. When ordering always state number of teeth wanted for rear sprocket and number of spokes.

38B43422 Special price for brake, complete with rear sprocket.... $4.24

"New Departure" Coaster Brake



This is the brake that was built right in the first place. The original New Departure was so well designed, the needs of a coaster brake so well understood, that no change has been necessary in the design or construction of this brake for the past eight or nine years. This is a point of merit possessed by no other Coaster brake. The New Departure is now being used by millions and almost every cyclist you meet is familiar with its merits. In design, mechanism, construction and materials the New Departure is absolutely correct. It cannot fail to work properly and successfully. Added to the mechanical correctness of the New Departure is the extreme care of the manufacturer to make every part as strong and durable as possible. Every part is turned out of selected bar steel, and is specially treated in the hardening process so as to particularly adapt that part for long and efficient service. It goes through 40 skilled hands and 100 operations before it reaches final inspection and testing. It has earned its reputation of being the best made, best finished, and most reliable coaster brake in the world. When ordering state size of sprocket and number of teeth; whether ⅛, 3-16, or ¼ inch wide, and whether 8, 9 or 10 teeth. Also state how many spokes the hub is to be drilled for, whether 28, 32, 36 or 40 spokes.

Searchlight Acetylene Lamp

The most widely used and the most satisfactory acetylene lamp ever made for this price. It is as good as many lamps that are sold for a great deal more. The duplex reflector and polished, high-power lens combine to throw a clear, white light for a great distance. This model has been greatly improved and is one of the most economical on the market, not only first cost, but in the cost of operating, as generates the gas only as fast as the burn can consume it. The water control is convenient and the valve is of the needle pattern. This lamp can be instantly taken apart for cleaning, has removable lens, colored jewelled side lights, fine burner with imported tips, protected reflector, and the Universal bracket, by which the lamp can be attached to either the head or fork of the bicycle, and in any position desired. The lamp stands 8 inches high, and weighs packed for shipment, about 40 ounces. This fine lamp has never before been sold at the extremely low price we are quoting. **$2.**

38B43429 Price complete .... $2.

Breckenridge Gas Lamp

One of the most powerful acetylene gas lamps on the market for bicycles. It gives a one hundred-and-twenty-five candle power white light and will burn steadily for 6 hours at one filling. This is a strongly built lamp, and intended for hard service, at the same time being very attractive in appearance. It is full nickel plated throughout and made of good durable materials. When filled the lamp weighs only 32 ounces. It is 7½ inches high, has a 2½ inch Fresnel removable front lens which is highly polished. The reflector at top are of aluminum, highly polished and easily removed. There are red and green side lights, jewelled and polished. The burner generates ¼ foot gas per hour and has a removable lava tip. The water regulator is under immediate control, and the water valve is a finely ground needle point. The entire lamp is easy to clean and has no complicated parts. The price is exceedingly low for a lamp of such fine construction.

KNICKERBOCKER HAMMERLESS GUNS

This line of hammerless guns is without question the best value on the American Market, and while the prices are more moderate than any other well known line, the high standard of quality in material and finish has been maintained. The symmetrical lines, balance and beautiful finish of these guns are so much superior to other guns of the same price, that it is necessary to see them to appreciate these points. Every part is dropped forged—highly polished and case hardened. The working mechanism is simple and strong. The barrels are made of Armory Steel, especially bored for smoked or black powder, matted extension rib. Furnished regular with right barrel modified and left barrel choke bored; all parts of frame made of dropped forgings, (no casting used). The side plate locks are fitted with spiral mainsprings; the locking mechanism consists of heavy cylinder bolt connected with the barrel lug, and a cross bite on the extension rib. The safety slide locks the trigger automatically, and prevents accidental discharge. Made in 12 or 16 gauge, 28 or 30 inch barrel. Weighs 7¼ to 8 lbs.

VICTOR SINGLE BARREL SHOT GUN

Never before has a 12 gauge, 30 inch, single barrel shot gun been sold at so low a price. These guns have always been sold at prices ranging from $8.00 to $12.00. With the scarcity of the game in many sections and the necessity of having a gun of extremely long range killing power, there has been an increased demand for a gun of this kind. We accordingly arranged to have this gun made especially for us and are therefore able to sell them at the extremely low prices quoted. We guarantee these Victor single barrel guns to be the equal of or better than any finer gun in the market regardless of name or price. This gun is better balanced, better finished; is choked bored, has drop lever action and case hardened frame-patented fore-end, center rebounding hammer; is made of walnut stock with fancy rubber butt plate. Can also be had in 16 gauge for black or smoked powder.

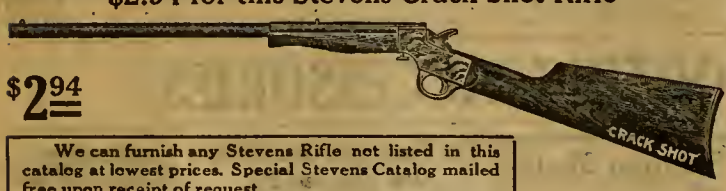
STEVENS CELEBRATED HIGH GRADE RIFLES

$2.94 for this Stevens Crack Shot Rifle



$2.94

We can furnish any Stevens Rifle not listed in this catalog at lowest prices. Special Stevens Catalog mailed free upon receipt of request.

ONE OF THE GREATEST VALUES EVER OFFERED. This is unquestionably one of the greatest values ever offered in a 22-caliber, single shot rifle. The construction of this rifle is unexcelled. It is fitted with solid steel breech block which fits snugly against the frame, permitting of no back fire or spit fire, a fault common in many rifles. The shell is automatically extracted when pulling back the breech block. The extractor is unusually heavy and strong, made extra wide, giving the full purchase on the unexploded shell and overcoming the possibility of the extractor slipping past the shell, making it necessary to punch out the shell with a cleaning rod or with a knife, a fault often experienced with other makes of 22-caliber rifles. This is one of the most popular take down rifles made by the Stevens Arms and Tool Co. The barrel is made of finest high carbon steel, 20 inches long, round, handsomely blued, heavy at breech, and fitted with standard size open front and rear sights. Chambered for 22 short, 22 long or 22 long rifle, black or smokeless cartridges. The frame is nicely proportioned. The outline is pleasing, handsomely case hardened in a beautiful mottled finish. Has oiled walnut stock, rubber butt plate and the shooting qualities of this rifle are unexcelled. We guarantee it to be equal in accuracy and penetration to any 22-caliber rifle made. Weight, 3¾ pounds.

Weight, packed for shipment, about 5 pounds.

38B43907 Price **$2.94**

$8.74 for this Stevens Repeating Gallery Rifle No. 80

$8.74

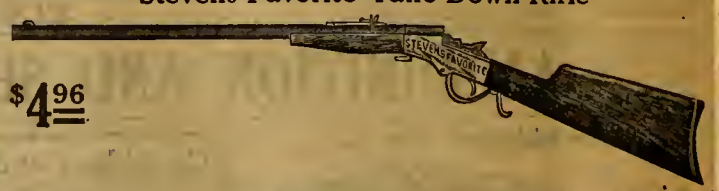
This model is an up-to-date Repeating Rifle, containing many new features, never before embodied in a rifle of this class.

The action, in principle, is of the bolt type, operated by the sliding fore-end, which travels only 1¼ inches. Breech bolt in action works the block lever, first upward, then back, ejecting the empty shell, its forward motion forcing a fresh cartridge into barrel. Action when closed, presents a solid top, preventing dirt or any obstruction entering to clog it.

For 22 short, 22 long and 22 long rifle R. F. cartridges. Magazine holds fifteen cartridges, besides one in the chamber; 24-inch round barrel; extreme length 41½ inches. Bead front and sporting rear sights; varnished black walnut stock; blued trigger guard; rubbed butt plate.

38B43912 Price **$8.74**

Stevens Favorite Take Down Rifle



$4.96

The manufacturer fixes the price at which we shall sell these rifles, and will positively not allow any house to sell them cheaper. The prices are guaranteed to be as low as offered by any reliable house in the United States, and should you be offered these rifles lower by any dealer, you will confer a great favor by advising us, to give us an opportunity of adjusting the prices.

THE FAVORITE is guaranteed to have as well finished and rifled a barrel as found in the most costly rifles. Entirely new model. The barrel is held to stock by a setscrew, and is easily separated or put together. All have case hardened frames, walnut stock, finely finished, warranted accurate; all shoot rim fire cartridges and are fitted with sporting rear sight. The Favorite has 22-inch barrel and weighs about 4½ pounds.

Stevens-Maynard Junior Rifle No. 15

$2.34

SHOOTS 22 LONG RIFLE, C. B. CAPS, 22 SHORT R. F. AND 22 LONG R. F. CAARTRIDGES. An excellent 22-caliber rifle for target practice and shooting small game at a ridiculously low price. This rifle in shooting qualities, material, finish and construction, compares favorably with rifles sold by dealers at double our price. The barrel of this rifle is 18 inches long, made of the finest steel, bored from the solid bar, accurately rifled, handsomely blued and fitted with open sights, which are accurately adjusted. Barrel is octagon to forward end and fore arm, remainder of barrel is round. Is finely modeled and has walnut stock and fore arm. Blue steel frame and butt plate. Lever action finely finished. Measures over all 33 inches and weighs 2¾ lbs. The "take down" feature is extremely simple. Unscrew the knurled nut which goes through the lever and link, and the rifle comes apart in two pieces. There are no small parts to be lost, no breech block to be misplaced. Chambered for 22 long rifle, but will also shoot C. B. Caps, 22 short R. F. and 22 long R. F.

EXCEPTIONAL INDUCEMENTS ON WALL TENTS AND CAMP SUPPLIES

The Macy's special wall tent, absolutely guaranteed, full size and full weight. Great care has been exercised in the selection of the duck used in the manufacture of these well known wall tents. It is known as standard 10 ounce full weight, single fold, 29 inches wide. The workmanship is the best that skilled labor can produce. Has double sewed seams, reinforced and strengthened on canvas and on all places where most needed. We give weight of tents with poles below on 10 ounce tents. The weights vary slightly as poles do not always run alike. A 8½x12 foot tent makes a good out house or summer kitchen.

Allow 3 to 5 days' time for making tents, and in June and July, we require 4 to 8 days, according to the number of orders we have on hand at the time we receive your order. Send for samples of canvas, which goes into our tents, and instructions on "How to judge a tent." We carry all sizes of tents from 7x7 feet to 12x12 feet in stock, and can make prompt shipment, but on all other sizes allow 3 to 5 days' time to make the tent. In June and July allow from 4 to 8 days.

Special Notice

We do not carry tents in 8 ounce duck larger than 9x9 feet. From the actual experience we have had in the handling of this line for many years, we find that an eight ounce tent, larger than 9x9 feet, is not desirable. A 10 ounce duck costs very little more and the difference in price will more than compensate you in the way of wearing quality.

CANOES, ROW BOATS AND BOAT SUPPLIES

We are the only exclusive dealers in the product of the Old Town Canoe Company and any other firm or firms selling these products are doing so under misrepresentation. These canoes have selected straight grain cedar ribs 5/16 of an inch thick and 2 inches wide, placed near enough together so a bottom rack or flooring is unnecessary. The sheathing or planking, is 5/32 of an inch thick. A smooth reed with square joint is copper fastened to ribs; the stem and stern part are of white ash, or oak-steam painted. Seat, frames, thwart and deck are of ash. Canoe has two seats and two thwarts; all seats, frames and thwarts being bolted to gunwales and are removable. Gunwales are of selected straight grain spruce; out-wales are of white spruce; the outer covering is of heavy cotton canvas drawn tight and smooth; its pores are filled with a water-proof composition to bring it to a smooth surface, then painted in fancy colors and varnished. Hulls are thoroughly oiled before canvas is put on.

Our "Fairy" Ball Bearing Tricycle

$10.49

No prettier, more durable, or sensible tricycle has ever been built than our light running little "Fairy" machine. The "Fairy" ball bearing tricycles are wonderfully easy riders, at the same time develop a graceful exercise for the whole body. The motion for the treadle is forward and back with only a slight depression, thus avoiding the usual up and down, awkward, and ungraceful action of the usual girl's machine. Are built for service. The frame is made of strong steel tubing, joints reinforced and firmly braced. Highly finished in a beautiful shade of maroon with brown stripes, and brightly polished nickel trimmings. The seat is upholstered in handsome black oeal leather, adjustable to suit the rider. Built in three sizes as follows:

WE ARE HEADQUARTERS FOR FINE FISHING TACKLE

New styles, new patterns at greater values. The values in a fishing rod or tackle do not lie in the fancy pattern or odd get-up of the outfit. The value lies in the amount of material used, the quality of the material, and the method of construction.

We particularly call attention to the variety of sizes and weights as compared with those offered by others at similar prices. You will notice that our variety of Fishing Tackle is as large or larger than that of any other. We call attention to the high grade brands we carry in these sporting goods, and all of our material has been carefully selected with the view of giving our customers the advantage of the very best at the least price.

Bucket

All fishermen who use live minnows, frogs or crawfish, should have one of the never-sink floating buckets, as it will pay for itself in one trip. When you arrive at the lake or river where you intend to fish, pull out the inside bucket, tie a short string to the handle so it will not float away. The air chamber at the top of this bucket is air tight, with an opening at the top with a self locking, hinged, perforated cover to allow you to get at your minnows very easily. The top of the inside bucket floats 2 inches above the water, made of galvanized wire, permitting plenty of fresh air. The cover of the outside bucket has a strong hinge and locking latch, perforated sunk-in cover for putting ice on when in transit on hot days. Made of IX heavy tin plate with wire bail handle, nicely finished in rich dark green enameled in gold and fancy decorations. Weight 3 and 3½ pounds. Be sure to state size wanted.

AT THESE PRICE SAVINGS YOU SHOULD BUY LIBERALLY

THESE WONDERFULLY LOW PRICES are the result of weeks and months of careful planning, and come as the result of the Macy policy of either manufacturing what we sell ourselves or securing the goods from manufacturers and producers at first hand under the most favorable conditions. We have a buying organization unsurpassed by that of any other merchandising establishment in America. Keen, trained, experienced men and women who are specialists in every line of merchandise—some of them in Europe, some of them in the Orient, while others are in the manufacturing and producing centers—are always ready to take advantage of any condition which will bring us high-class, dependable merchandise at a saving in price. For months this world-wide buying organization has been searching for exceptional values. When a manufacturer finds a dull season coming on, our buyer in his line is ready to suggest making up certain lines of goods for us at a special contract price. In other cases manufacturers, producers, importers with overstocks find us ready to take their surplus goods at an attractive price for cash. All these things taken together have made it possible for us to give you the wonderful bargains shown on every page in this big catalogue.

HOW TO MEASURE AND ORDER MEN'S CLOTHING FROM US

You can order a suit, pair of pants or any other clothing you need from us quickly, economically and satisfactorily by making your selection from this book and by taking your measurements right in your own home. Our simple measuring and ordering plan enables you to do this without any previous experience and without the services of a tailor. Select the clothing you want and write out your order, using our order blank, if you have one. If you haven't one take any plain piece of paper and write your order on it. Let some friend or member of your family measure you. All the information we need is, first, state what size coat you wear (breast measure); second, tell us what size pants you wear (your waist and inseam measures); third, give your height, weight and age. Mail your order to us with remittance. Don't be afraid about making a mistake. It is so simple that there isn't one chance in a thousand that you will make one. Even if you did make one we would be bound to notice it, and correct it for you. Every order is carefully examined before goods are shipped. Your first experience will prove to you that it is just as easy and satisfactory to order men's and youths' clothing from us by mail as it is to order hardware, paints, furniture, and other goods. Thousands are doing it every day. Try it.

If you don't find what you want listed in the pages of this catalogue, please write us, telling us what you want, about the price you expect to pay and we will undoubtedly be able to supply you. This catalogue, while showing a big line of merchandise, does not show our complete stocks, which are constantly changing, and we are almost sure to have what you want at a low price.

R. H. MACY & CO., NEW YORK

FIFTY-THREE YEARS OF PROGRESS

That firm which would achieve a large measure of success must observe a number of fundamental principles, and assume such an attitude towards its customers, as will win their confidence and increasing support. When the business of R. H. MACY & COMPANY was founded 53 years ago, the members of the firm laid a foundation of a character which has sustained the great business structure which has since been erected upon it, in its more than half a century of merchandising in the great Metropolis of America—New York City. You who receive this catalog may never have had a business transaction with us; you may never have entered our great store at 34th street and Broadway; you may never have favored us with an order by mail; you may never have heard of us, as a matter of fact, and as we realize that our prospect of having business relations with you in the future depends almost entirely on the degree of confidence you have in us, we are very glad to take this opportunity to tell you something of the history of R. H. MACY & COMPANY and to acquaint you with some of the things this house stands for.

The Mail Order business is founded upon confidence. Ordering by mail and accompanying the order with the full purchase price is a method of supplying your needs which is comparatively new. The last twenty years, as a matter of fact, have witnessed the general introduction and development of this system of buying merchandise and it is satisfactorily employed by millions of people today. It has revolutionized the merchandising practice of the world; it has proven an evolution in business, and has compelled the readjustment of the business methods of the day, to the very great advantage of the consumer.

Preceding the introduction of Mail Order methods of selling merchandise, the Department Store had proven itself an institution of great value to the people. The gathering together of great stocks of miscellaneous merchandise under one roof enabled merchants to so reduce the cost of doing business as to quote most attractive prices, which in turn developed a volume of business which enabled those merchants to purchase in enormous quantities at a considerable reduction in manufacturing and producing cost. This advantage was passed along to the customer in the form of still lower prices. The great forward step taken by the Department Store lead logically to the further application of Department Store theory and practice in the development of the Mail Order business.

We were pioneers in Department Store merchandising. The Macy Store was the original Department Store that blazed a new way through the wilderness and since we instituted the Department Store method of buying and selling goods, Department Stores have sprung up in every city in America, and many of them have grown to be the commercial wonders of the age. We brought the Department Store to its highest possible development, and in our great establishment at 34th and Broadway, New York, as many as 250,000 shoppers have passed through the aisles in a single day. Millions of dollars' worth of the choicest merchandise to be found in the markets of the World are carried on our shelves and counters. Our buyers visit the remotest corners of the World in search of merchandise. We have offices in seven of the great cities of the World and we secure from first hands the finest product of farm, field and factory. The merchandise so secured is sent direct to our great store in Greater New York and passed on to the customer with just one small profit added to producing or manufacturing cost.

It was but logical, therefore, that as pioneers in modern merchandising methods, we should go a step further and apply our methods to the selling of merchandise by mail, to the end that the great advantages of our wonderful store in New York might be offered to men and women everywhere. Eight years ago we issued our first catalog and each season thereafter we enlarged it and improved it until this season we offer you in this book the largest and best catalog ever issued by the house of Macy.

As you hold this big catalog of about 460 pages in your hands, you cannot realize what it represents. The great stocks of merchandise shown in its pages have been gathered together as the result of weeks and months, yes, of years of careful planning and intelligent business building. The qualities we send our customers, guaranteed to be the best possible—the prices, guaranteed to be lowest, quality considered—all have come as the result of definite plans, of definite principles applied to merchandising and the net result to you is the opportunity this catalog brings you to live better today than you have ever lived before and at lower cost.

We manufacture or produce more of the merchandise sold by us than any other store in the World. You will readily understand what this means, because manufacturing or producing enormous quantities of merchandise ourselves and sending it direct to you, the consumer, with just one small profit added to manufacturing or producing cost, enables you to buy merchandise at a big saving compared with the prices you would have to pay any other firm or individual at home or elsewhere who secures this same merchandise through the usual channels. The average retail dealer purchases the merchandise he sells from wholesalers, or jobbers, or manufacturer's agents. Back of the price your merchant pays is found a long row of profits to middlemen, great selling expenses, cost of warehousing, traveling salesmen with their railroad fares and hotel bills and miscellaneous expenses, all of which is entirely eliminated by us when we manufacture or produce our goods. As a matter of fact, under the old system of merchandising the price you pay is often double or treble the first cost of the merchandise. It can't help but be so when the producer of the raw material must get his profit, the manufacturer must have his profit, the salesman must have his salary, the jobber must have his profit, and the retailer with his small sales and large proportionate expenses must have his profit, all of which becomes a part of the price you pay in the average retail store. When you compare this method with our method the comparison is so much in our favor that it must carry conviction to you that there is real economy in the Macy merchandising policy. Our foreign buyers, with their headquarters in the great textile centers of the World, often give us things secured from first hands at a price so low that we are able to sell in our Broadway Store at a price which is about the price retail dealers pay the importer for the same merchandise. Wherever it is possible for us to do so, we cut out every unnecessary expense. We go to first hands for our goods wherever it is possible for us to do so and because of our large volume of business we find that it is possible for us to buy almost everything we sell from first hands. When we have failed to secure merchandise at a price we think it is really worth, we have often gone into the manufacture of this merchandise on our own account.

This is the Policy of R. H. MACY & COMPANY and its practical application has resulted in the development of this great business, now in its fifty-third year. The same principles which governed the partners in this business in the early days of our history, govern the sons of the founders of this business to-day, and when you send us your order you may send it in the fullest confidence that you will receive the same considerate treatment from us that we would expect to receive from you were we buying goods from you. We apply the "Golden Rule" in this business and if you believe in high standards in the business world, if you believe in commercial integrity, if you believe in a business enterprise which makes square dealing its cornerstone and which makes every effort possible to give its customers the most considerate treatment at all times and under all conditions, you will certainly be justified in using this catalog to the fullest possible extent in ordering such goods as you need from day to day in your home or workshop.
